The State Department country reports on human rights practices includes a comment that the Department does not know to what extent torture is utilized in the Empire, but that prison detainees are mistreated and beatings are a common form of discipline. This official report states that "preventive" detention of many persons is prolonged without judicial recourse.

There are published reports of two foreign journalists being arrested last year with the American being expelled and the Britisher being severely beaten and incarcerated for a month.

I agree with the Peace Corps Act amendments overall, but I must strongly object to the inclusion of $1,504,000 in the Peace Corps program for the Central African Empire. This is an increased request of $530,000 over last year's level. I must object because of the attitude toward human rights by the leader of the country, Emperor Bokassa, and because of his attitude toward the economic welfare of his "subjects."

The December 19, 1977, issue of Newsweek magazine contained an article about the coronation of Emperor Bokassa—a lavish ceremony which cost about $25 million, nearly a third of the country's annual budget, with the ceremony being a conscious imitation of Napoleon's own coronation. The crown the Emperor wears reportedly cost $2.5 million and he has recently purchased a $1 million Swiss villa to stay in when he goes to Europe on "royal visits."

The Emperor's control of his country has been solidified by the jailing, killing, or disappearance of his opponents. An example of his cruelty is his forcing his Cabinet to witness the fatal beating of convicted thieves 5 years ago.

The Congress of the United States cannot justify any aid programs to this country because the net effect of this assistance would be to help sustain Emperor Bokassa's rule and allow him to use his country's resources for totally inappropriate purposes.

Because of these concerns, the Agency for International Development is unilaterally pulling out of this country and I believe the Peace Corps should reconsider its program in the Empire before any American volunteers there are brought before the Emperor and beaten or thrown in jail. All forms of American assistance should be discontinued as long as Bokassa continues his repressive regime and wasteful spending practices.

I submit for the RECORD, an article appearing in the December 19, 1977, edition of Newsweek magazine.

BOKASSA'S NEW CLOTHES

(Africa had a brand-new Emperor last week—Bokassa I of the Central African Empire. From Bangui, the sweltering capital of Bokassa's empire, NEWSWEEK's Loren Jenkins filed this report:)

The setting was the Jean-Bédel Bokassa sports palace, located next to Jean-Bédel Bokassa University on Jean-Bédel Bokassa Boulevard, Bokassa, 56, a former sergeant in the French army, sat impassively on a gilded, 15-foot-high throne in the winged shape of an imperial Eagle. To his right sat Empress Catherine, 28, sheathed in gold lamé, and his 2-year-old son and heir apparent, Jean-Bédel Georges, wearing a crisp military uniform. Officers of the imperial guard draped Bokassa's shoulders with a 30-foot train of red velvet embroidered in gold and trimmed with ermine. A beplumed general presented him with a diamond-studded scepter and then held up a $2.5 million gem-encrusted gold crown on a velvet cushion. Bokassa stood and slowly raised the crown to his head. Then, like his idol, Napoleon Bonaparte, he crowned himself Emperor.

The Central African Empire—known in French colonial days as Ubangi-Shari—is a landlocked nation of 2.2 million hapless souls teetering on the edge of bankruptcy. But that did not stop its bandy-legged new Emperor from splurging on grandeur. The coronation cost about $25 million, nearly a third of the country's annual budget, and the ceremony was a conscious imitation of Napoleon's own coronation in 1804. For the ensuing festivities, Bokassa imported 40,000 bottles of French table wine, 24,000 bottles of Moet et Chandon champagne, a similar amount of Chivas Regal Scotch, 450 pounds of rose petals, 25,000 fresh-cut flowers and 60 Mercedes limousines—which had to be air-freighted into Bangui.

FIREWORKS AND BARE-BREASTED MAIDENS

The result was a rousing good show. When he wasn't escaping the heat in an air-conditioned Mercedes, the Emperor rode in a green-and-gold carriage drawn by matched grays imported from Normandy (and doomed to die in the fetid climate). The 3,500 invited guests were treated to lavish banquets—and to a ton and a half of fireworks that rained sparks on them as they ate. Lancers in green tunics paraded, bands played, bare-breasted maidens danced and tribesmen coaxed strange sounds out of giant horns. Sparse knots of Bokassa's subjects watched the pageant morosely, but the Emperor himself defended the extravagance. "One cannot create a great history without sacrifices," he declared.

As for the guest-list, anyone who was anyone wasn't there. Bokassa had invited his fellow emperors, Hirohito of Japan and the Shah of Iran, along with Queen Elizabeth II and 150 heads of state. Pope Paul VI was invited to hand Bokassa his crown, as Pius VII had done for Napoleon. But Bokassa was royally snubbed by nearly one and all. Pope Paul informed him that the Vatican was no longer in the business of crowning emperors and instead sent an archbishop to watch. Despite his admiration for the French (Bokassa had wept at Charles de Gaulle's funeral), Paris sent only its Minister of Cooperation. The U.S. was represented by its ambassador. The only Head of State in attendance was the Prime Minister of Mauritius, Sir Seewoosugur Ramgoolam.

The fact is that Bokassa has become an embarrassment, even to his tolerant African peers. He is no Idi Amin, but his rule has been mercurial and arbitrary since he took power in a coup on New Year's Day, 1966. Opponents have been jailed or killed—and some have disappeared. The Emperor is still trying to live down an incident that occurred five years ago, when he led his Cabinet into a prison and made them watch as a group of convicted thieves were beaten to death with clubs and rifle butts. Last summer, he had two Western reporters thrown into jail. Before they were freed, one of them, Michael Goldsmith of the Associated Press, was brought before Bokassa, who accused him of being a South African spy, beat him to the ground and stepped on his glasses.

Bokassa's big day began slowly: the Emperor was an hour and a half late to his coronation. As the guests sweated in despair, a French Navy band ran through its entire repertoire and was replaced by canned music. The Women's Army Corps handed out bags of caramels "pour passer le temps." Finally Bokassa arrived and crowned himself. A 21-gun salute rattled the windows of the sports palace, prompting one startled journalist to ask: "Is that outgoing or incoming?" As he prepared to crown his wife, the Emperor announced that "We, Bokassa I" would scrupulously uphold the constitution.

FROM CATHOLICISM TO ISLAM AND BACK

Next, the ceremonies moved to the Cathedral of Notre Dame de Bangui, where the Emperor's ascension was sanctified by a Solemn High Mass. Conveniently forgotten was the fact that, only a year before, Bokassa had announced his conversion to Islam, in anticipation of aid from the rich and devoutly Muslim regime of Libya. The aid never materialized and Bokassa reverted to his Roman Catholic faith. As the papal delegate, Archbishop Domenico Enricci, looked on, the Archbishop of Bangui officiated at the Mass and an imperial chamberlain with a handkerchief in either hand mopped up the sweath that ran in rivulets from the imperial brow.

That night, Bokassa treated 4,000 people to banquet. There was a giant tureen of caviar and bottles of wine and liquor graced every table. To honor the Emperor's service in Vietnam (where he fought with the French Army and sired one of his 30 children), some of the entertainment was provided by a song-and-dance troupe composed partly of former bar girls from Saigon. But the food ran out before the guests did, and the liquor was pilfered by waiters and soldiers.

MAJORETTES AND PYGMIES

The final act was a parade down the former airport runway now known as Bokassa Boulevard. Wearing a Napoleonic uniform and a cockaded hat, Bokassa reviewed his entire 1,000-man army. Drum majorettes pranced past, led by a leggy baton twirler from Nice. Students and the business community were represented, along with a loyal delegation from the country's Pygmy Women's Association.

No amount of spectacle could conceal the fact that the Central African Empire is one of the 25 poorest nations on earth (per capita income is less than $200 a year). On the last day of the festivities, the U.S. announced that it was phasing out its $1 million annual aid program because of Bokassa's human-rights violations. But nothing could dampen the Emperor's spirits. With more bravado than need, he placed an order for still more Mercedes limousines. Few of his guests were impressed by the long-term prospects for Bokassa's reign. "It's all well and good to carry on about Napoleonic grandeur," said a French businessman. "What Bokassa seems to be forgetting is that after the grandeur came Waterloo."

Mr. OBEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I just want to ask one question on this amendment. What benefit could this amendment positively have for our interests in the Central African area?

I think the gentleman from New York has already summed up, as have others, what the purposes of the Peace Corps activity are, not only in Central Africa but elsewhere around the globe. I will not take the full 5 minutes but I simply want to read in part from a letter which was sent to Congress by four former Peace Corps Directors, Republican and Democrat: Mr. Joseph Blatchford, who directed the Peace Corps under Presi-Democrat: Mr. Joseph Blatchford, who directed the Peace Corps under Kennedy; Mr. Jack H. Vaughn, who directed the Peace Corps under President Johnson; and our former colleague Mr. John R. Dellenback, who directed the Peace Corps under President Ford.

They said simply this:

Farsighted Congressional leaders, Secretaries of State of both political parties, and President Kennedy who started the Corps, have always insisted that the Peace Corps should not be used as a political reward or weapon. . . . Decisions as to where Peace Corps Volunteers should serve have been and should be based solely on need, receptivity, and local conditions conducive to the Corps purposes. Any other standard would do the gravest injury to the uniqueness, effectiveness and history of the Peace Corps.

Regardless of whether we agree with that or not—and I happen to agree with it—I think we can take at face value the law quoted by the gentleman from Florida, which states simply that the Peace Corps should be run in accordance with what the the best foreign policy interests of the United States. I think the best foreign policy interests of the United States lie in keeping the lines of communication and assistance open to people. I would agree with the gentleman from Florida that the self-styled emperor of that country is a fool.

But I do not think that you have to endorse the leadership of a country in order to be concerned about the health and the educational problems facing some of the most wretched creatures on the face of this globe.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I too am opposed to this amendment. We have let pass the whole earlier part of this bill. I oppose the process that we have developed in this Congress of a country by country elimination from these various programs. We have let pass bountiful requests to one of the worst countries, Nicaragua, where we certainly have seen the most outrageous violations of human rights in the past few months. We let that pass, but we must stop the country by country attack in this bill.

I support the bill as presented by the committee.

Mr. OBEY. Mr. Chairman, I fully concur in what the gentlewoman from New Jersey (Mrs. FENWICK) has just said. Certainly Congress should not go on the idea of you gore my ox and I will gore your ox. I think we should support the decision that we made last week. It was a sound decision.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

Mr. Chairman, I am opposed to the amendment of the gentleman from Ohio (Mr. ASHBROOK) which would cut funding for the Peace Corps programs in the Central African Empire.

This discussion brings to mind a similar debate which occurred on this same floor only 7 years ago—then the target was Chile, President Allende, but the major issue was the same: Why send the Peace Corps to a nation whose substance and style of politics is so antagonistic to the United States?

As was the case for Chile in 1971, there are good humanitarian and political reasons to continue the Corps program in the Central African Empire. And these reasons are no less convincing now than in 1971 when they were successfully invoked to enable the Peace Corps to continue in Chile.

First, humanitarian reasons. The Central African Empire is one of the poorest nations in the world. With a per capita income of $230 it is considered by the World Bank to be one of the six poorest nations. It also ranks among the 10 poorest in terms of quality of life. If we are serious about our commitment to aiding the "poorest of the poor," then support for the Peace Corps program in this nation is essential.

Let us take a closer look at the programs this amendment would cut. They include: small-scale food production programs geared toward individuals; health and village improvement projects that decrease the incidence of disease and provide villagers with the ability to improve the quality of life by their own actions; water resource projects that provide clean water supplies for villages and lead to other community-level projects. And since very few international agencies function in the Central African Empire, passage of this amendment would seriously curtail grassroots development assistance.

As has been noted in past debates, the Peace Corps is a people-to-people program. Its volunteers do not sit comfortably in air-conditioned office buildings formulating grand strategies for development. They are literally down to earth—living in the villages, working on farms, in health clinics and in schools. They struggle to improve the daily conditions of life for the poorest of the developing world. And they do so not for immense sums of money, but because of their desire to help their fellow man.

Both through its legislative mandate and in practice, the Peace Corps does not advance partisan U.S. political interests. By putting people not politics first, the Peace Corps can avoid pressures that occasionally impair the effectiveness of bilateral assistance programs.

Peace Corps projects do not create brick and mortar monuments to the folly of host country leaders.

These funds cannot be channeled into the pockets of the nations' elites.

With respect to the Central African Empire, no project funds are given to support the crazy schemes of Emperor Bokassa.

The Peace Corps is a fine means by which we can provide an example of our leadership and commitment toward the development of the Third and Fourth Worlds. As was stated in the debate 7 years ago, the Peace Corps volunteers are a "breath of fresh air" in nations often smothered by political unrest and hostility. Do we really wish to cut funding for this program in a nation such as the Central African Empire? Do we really wish to make a sham of all our talk about aid to the poorest of the poor only to slap the wrist of some emperor-clown? I certainly hope not.

I hope that you will show respect for the Peace Corp's nonpolitical mission as you have in the past and defeat this amendment.

Mr. YOUNG of Florida. Mr. Chairman, If the gentleman will yield, the gentleman has suggested that this amendment was doing away with the Peace Corps whereas it deals with only one small part of the operations of the Peace Corps.

Mr. CONTE. I am speaking about the country, the Central African Empire, and I am saying that if there were only 10 people who were homeless and who were hungry, with no opportunity for education, or who were sick, I would still want the Peace Corps to help them.

Mr. YOUNG of Florida. I just wanted to make sure that the gentleman was not directing his remarks at knocking out the whole Peace Corps.

Mr. CONTE. I think everybody knows where we stand on this and let us hope the amendment is defeated.

Mr. DODD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise with some reluctance. I am not a member of this committee, but the substance of this amendment is such that it is very near and dear to my heart.

I am one of two ex-Peace Corps volunteers who serve in this Congress. As a former Peace Corps volunteer, particularly one who served in a nation where the political atmosphere in 1965 and 1966 was one of the most dramatic kind, I find this amendment to be totally lacking in merit. I served in the Dominican Republic.

Shortly before the revolution there in May 1965, when political tensions were extremely high, I point out to my colleagues in this Chamber today that there was a period of time when the U.S. mission was asked to leave the Dominican Republic. We packed up and moved out. Only one single entity was asked to remain and continue its functions as a part of the U.S. mission. That was the Peace Corps.

Mr. Chairman, one of the unique characteristics of the Peace Corps is that it has not been a part of our foreign policy effort, either on the long term or the short term. It has always been construed by other nations as an organization designed to work with the very poorest of the poor in those nations.

Mr. Chairman, if we take this action today and make, in a sense, the Peace Corps a part of our political long-term or short-term foreign policy, we are adding a dimension to the Peace Corps that it has never had in its short history over the past 17 years.

Therefore, Mr. Chairman, as one former member of that organization, one who has seen that organization work and who has seen it work under the most stressful and trying circumstances in the presence of our own military troops, who were then in the Dominican Republic, where the Peace Corps had received the kind of warmth even in the most heated barrios of Santo Domingo in 1966, I would strongly urge my colleagues to defeat this amendment and allow this organization to continue to remain what it has been for the past 17 years, an entity separate and apart from our long-term or short-term foreign policy goals in this country.

Mr. Chairman, again, I urge my colleagues to defeat the amendment.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, in April this body passed H.R. 11877, the Peace Corps Amendments of 1978. During the debate on that bill an amendment was offered similar to this one. At that time that amendment was defeated by a vote of 169 yeas to 228 nays.

Mr. Chairman, let me point out that one of the chief discontents with the Central African Empire is that the emperor, spent a vast sum of money on his coronation, something of which I thoroughly disapprove. However, Mr. Chairman, let me point out that unlike a lot of foreign aid programs, the Peace Corps does not put any money into the hands of the government itself. The money goes directly to support the Peace Corps volunteers.

I urge this body to respond in the same way as we did before and vote to defeat this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Ohio (Mr. ASHBROOK) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONTRIBUTION TO THE INTER-AMERICAN DEVELOPMENT BANK

For payment to the Inter-American Development Bank by the Secretary of the Treasury, $814,005,483, for the United States share of (1) the increase in subscriptions to (a) paid-capital stock, and (2) callable capital stock, and (2) the fifth replenishment of the resources of the Fund for Special Operations as authorized by the Act of May 31, 1976 (Public Law 94-302), to remain available until expended: *Provided*, That no such payment may be made while the United States Executive Director of the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code.

AMENDMENTS OFFERED BY MR. LONG OF MARYLAND

Mr. LONG of Maryland. Mr. Chairman, I offer two amendments relating to international financial institutions, and I ask unanimous consent that they be considered en bloc.

The Clerk read as follows:

Amendments offered by Mr. LONG of Maryland: On page 16 of the bill, line 10, strike out "$814,005,483" and insert "$560,000,000".

On page 18 of the bill, line 4, strike out "$430,000,000" and insert "$100,000,000".

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. LONG of Maryland. Mr. Chairman, the Long-Miller amendments reduce the recommended appropriation for two multilateral banks by $584 million. The amount for the Inter-American Development Bank, IDB, is reduced to $560 million, and the amount for the International Development Association, affectionately known as IDA, is reduced to $100 million.

If the Members remember nothing else about the Long-Miller amendments, I want them to remember just three points.

Even with the proposed reductions, these two international banks would be receiving the largest combined appropriation they have ever received in the history of foreign aid.

The second point is this: Even with the proposed reductions, the Inter-American Development Bank and the International Development Association will be receiving a 14-percent increase over fiscal year 1978, a bigger increase than President Carter requested in the budget for major domestic programs. Compared to this combined 14-percent increase, these are the increases for major domestic programs: Social security, 13 percent; energy, 12 percent; national defense, 9 percent; veterans, no increase at all; public works, minus 11 percent; and community and regional development, minus 11 percent.

Mr. Chairman, the alternative to cutting the amount for these two banks is a meat-axe cut which will be offered if the Long-Miller amendments fail. That is a meat-axe cut which the gentleman from Ohio (Mr. MILLER) has in reserve, and it is my understanding that if the Long-Miller amendments are agreed to, the gentleman from Ohio (Mr. MILLER) will not offer his across-the-board cut.

Let me point out that the across-the-board cut would hurt aid programs such as agriculture, rural development, health, population control, schools and hospitals abroad, disaster assistance, refugee relief, Peace Corps, and support for Israel, Africa, and Greece.

If the Long-Miller amendments to reduce these two multilateral institutions are accepted, as I indicated before, the

gentleman from Ohio (Mr. MILLER) will not offer the 8-percent across-the-board cut. My point is that we want Congress to control the purse and not turn the job over to the executive branch. The House should vote for the Long-Miller amendment and reject any attempts to apply across-the-board reductions.

Mr. Chairman, I would like to ask the gentleman from Ohio (Mr. MILLER) if he would like to speak to that for just a moment.

Mr. MILLER of Ohio. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Ohio.

Mr. MILLER of Ohio. Mr. Chairman, I do have an amendment prepared that would reduce the Foreign Assistance Act approximately 8 percent.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. LONG) has expired.

(By unanimous consent, Mr. LONG of Maryland was allowed to proceed for 5 additional minutes.)

Mr. MILLER of Ohio. If the gentleman will yield further, as I have stated in two "Dear Colleague" letters to the Members, I would not be offering the amendment that I have prepared if the Long-Miller amendment, that is before the House at the present time, reducing the two international financial institutions by $584 million was approved. I intend to hold to that commitment. I think it is very important that we do reduce the overall bill. We have had 2 percent and 5 percent reductions on the appropriation bills. Some will say, as I have heard in the case of Labor-HEW, that some of the domestic programs will be hurt, and I think it is very important that if we are going to reduce here at home we certainly can reduce foreign assistance to other nations. Every opportunity that I have, I want to convev the message that many of the nations that we have aided around the world now are loaning us money in order to support our national debt.

Mr. Chairman, I would like to convey the message that we now owe the various nations around the world $108 billion that the foreign nations have loaned us in order to support our national debt, which is really money which we borrowed to give to them, in the first place.

Mr. LONG of Maryland. I have quite a bit yet to say here and if I could reclaim my time I would appreciate it.

Mr. MILLER of Ohio. I would be happy to do that.

I believe the message is clear that we should support and approve the Long-Miller amendment.

Mr. MOTTL. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Ohio.

Mr. MOTTL. I thank the gentleman for yielding, and I rise in support of the gentleman's amendments.

Mr. Chairman, any reasonably intelligent person could take a long, hard look at the budget of the U.S. Government and realize the great amount of excessive spending it calls for.

For example, he could point to our national defense projected expenditures of $120 billion and cite numerous instances of waste and inefficiency.

He could note the mind-boggling annual budget of some $180 billion by the Department of Health, Education, and Welfare and observe that many of the programs are wasteful and poorly administered.

Or he could cite the $940 mililon in annual expense of the National Science Foundation and point out that many of its undertakings are ludicrous.

But I submit that the one expenditure that would jump right out at him and cause our reasonably intelligent individual to shake his head in disgust and dismay in our foreign aid program. Some of the projected expenses in this proposed $7.3 billion program for fiscal year 1979 would cause him to ask questions like this:

First. Why have appropriations increased fourfold, from $1.8 billion in 1970 to the proposed $7.3 billion for this year, in just 9 years?

Second. Why are we giving Vietnam—that Southeast Asia nation where so much American blood was spilled in the past 15 years—$1.5 million indirectly this year?

Third. Why are we indirectly spending even one American dollar on the nations of Cuba, Angola, and Uganda?

Our foreign aid program, or more accurately our foreign giveaway program, is a ridiculous waste of taxpayers' money. At times of staggering Federal budget deficits and runaway inflation, we foolishly throw money around in other nations of the world as if there were no tomorrow.

I have consistently voted against foreign aid appropriations, will do so again today, and intend to do so in the future until—at the very least—our economic problems here at home are taken care of.

Just pause for a moment and think of the good more than $7 billion could do for our country. As one possibility, it could be used to reduce the enormous Federal debt. Or it could be added to the proposed income tax reduction to provide even greater relief for middle-income Americans. Or it could conceivably be used to provide additional jobs and institute and/or complete needed public works projects.

We should have learned during the turbulent 1960's that we cannot buy freindship or respect overseas. In fact, the more money that we give some foreign rulers, the more those nations seem to distrust and abhor us.

It is time that we in Congress voted to close our pocketbooks to foreign nations and show the American people that we can be frugal with their hard-earned-tax dollars. I urge you to join with me in voting down H.R. 12931.

Mr. LONG of Maryland. Mr. Chairman, let me point out that mention has been made of the idea that this would hurt the poor people of the world if we cut this bill. Let me point out that only approximately 1 in 8 loans provided by the Inter-American Development Bank in 1977 was even designed to predominantly reach the poor sectors of the developing countries, according to the congressional research report. I know the document was sent around by the gentleman from Wisconsin, and others, and I want to tell the Members that I have seen a lot of statistics in my life and I have written a lot of books on them but keep in mind statistics can be manipulated to prove any point.

IDA and IDB are helping nations which are guilty of violence, such as Argentina, Chile, Haiti, Paraguay, and Uruquay. IDA just announced a $60 million loan to Vietnam for 50 years repayment at no interest—no interest. There is a three-quarters of 1 percent service charge. And they were so arrogant that they did it right in the middle of this congressional debate.

Mr. ASHBROOK. Mr. Chairman, if the gentleman would yield, would he repeat that? That is astounding.

Mr. LONG of Maryland. It is a $60 million loan, 50 years repayment, zero interest, and we pay approximately 30 percent of that. It will come out of U.S. taxpayers' money.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding to me. I report to the gentleman that that same bank has four more of the same type of loans pending for Vietnam.

Mr. LONG of Maryand. Let me point this out: The International Development Association and Inter-American Development Bank, have employees who receive very large salaries. This ought to appeal to all the Members.

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

(By unanimous consent Mr. LONG of Maryland was allowed to proceed for 2 additional minutes.)

Mr. LONG of Maryland. Here is the humble salary of the average Congressman and Senator, $57,500. $66,000 is paid to the U.S. Cabinet officers and $75,000 is paid to Vice President MONDALE.

The top professional staffs of the Inter-American Development Bank receive $73,230, counting their tax credit. The top professional staff members of the World Bank, who are, just like our congressional staff, receive $89,500 including tax credits. This is what the banks are paying. These are institutions, that are supposed to be directing aid to the poor. These are institutions about which we are told that we will be taking money away from the poor people all over the world, and they are going to suffer. I can tell the Members one group whose poverty they managed to solve, and that is the poverty of their top professional staff.

Mr. WOLFF. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the

Long-Miller amendment to cut $584 million from the Inter-American Development Bank (IDB) and the International Development Association (IDA).

I am not one to indiscrimantely cut foreign aid programs. Just recently, I LONG, in opposing a reduction in aid to India. I am well aware of the beneficial effects that foreign aid programs can have on both the recipient nations and this Nation. Helping to develop the economies of the lesser developed or third-world nations, eventually augments our own foreign trade. International trade and U.S. exports create jobs for Americans. In this interdependent world, the United States cannot afford to ignore the needs of the developing countries. The United States has long been in favor of the type of aid which helps other nations help themselves.

Why, then, am I supporting the Long-Miller amendment? Because the IDB and the IDA are not helping the poorest people in the nations they aid by any means. Many pork barrel type projects are benefiting the weathy few, or the political elites. A report by the Congressional Research Service shows convincingly that the poor have not been helped, nor have the Bank's programs been targeted to the American ideal of helping people to help themselves. To quote the CRS study:

> It appears that the Bank's efforts in directly meeting basic needs have been modest to date, and it has done little to organize the poor for self-reliant development.

These two goals, to help the poorest, and to give "boot straps" type of aid are the two most important goals of U.S. foreign aid programs. This Nation must send a message to the Inter-American Development Bank and the International Development Association that we will not send our taxpayers' money to the political fat cats in other nations or the wealthy elites.

The Congress has the very important duty of deciding where our priorities lie in distributing more taxpayers' money among the many Federal programs and commitments. Even if $584 million is cut from these two Banks, the Banks will receive a higher percentage increase from last year's funding levels than many important domestic programs, including veterans programs, defense expenditures, social security, and energy programs. The United States cannot afford to contribute to ineffective foreign aid programs that do not even benefit the neediest people.

I do not support cutting foreign aid for the sake of chopping for no good reason. Such an across-the-board approach would needlessly penalize those institutions which are working to help the needy and to promote effective development programs. A selective, well-thought-out cut like this one sends a message to the institutions in question, and saves U.S taxpayers $584 million in funds that would be better spent elsewhere. I urge my colleagues to support Mr. LONG and Mr. MILLER's amendment.

Mr. MOORE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to rise in support of the Long-Miller amendment. I have taken a different approach to this problem these last two Congresses, of trying to put a limitation on how the funds are used by the Bank. I have introduced four amendments to this effect, three successfully, and I have seen that those amendments have not really been that successful.

All we can really do is tell our representative on the Boards of those Banks not to vote for certain kinds of loans but our representatives are usually outvoted. Those loans still go through. As a matter of fact, in two out of nine such loans, which were basically not in the American interest, only in two of those instances did the U.S. representative vote against them.

So I have come to the conclusion that the chairman of the subcommittee and the gentleman from Ohio are right. The only way to get at these loans is to cut back the funding. Certainly we need to save money for our taxpayers, but I submit also it is awfully hard to explain to our hard-pressed American farmers or producers that we are using their hard-earned tax dollars to give to countries to put people into competition against them, which our people cannot really compete with because their producers overseas do not have to comply with the requirements of OSHA, social security, minimum wage, and other laws that cause our costs of production to be higher.

So I support the amendment as being probably the only way we can successfully get at the problem.

Mrs. SMITH of Nebraska. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, one of the most discussed items of this foreign aid appropriations bill is the lack of effectiveness of the international lending institutions. These are the organizations which gladly take American money, but give the Congress and the President no say in how it is spent. Defenders of our contributions to these Banks say they are effective ways to insure that American aid money reaches the poor of the world.

The money may be targeted to the poor countries of the world, but we have no guarantee that the aid is benefiting the poor people of the world. There are those in every country who would siphon off the funds aimed at the poor and use it for their own personal gain. This has been documented time and time again and it just reemphasizes the point that our form of foreign aid is not accomplishing its objectives.

As Foreign Service officer, Roger Darling, who works at the Agency for International Development recently wrote in the Washington Post:

> Foreign Aid welfare can never meet the escalating needs of poor nations, and as long as it unwisely tries to do so poor nations will defer confronting and resolving the true causes of their poverty and human suffering.

According to a recent Congressional Research Service study of the World Bank and its effectiveness in channeling money to the poor, the study says:

> The World Bank in clearly not reaching the poorest of the poor and has done little to organize the poor for self-reliant development.

Only one out of eight projects funded by the Inter-American Development Bank (IDB) is even designed to reach the poor.

From another study of the World Bank:

> Although 200 million live in desperate slum conditions, resources devoted to human settlement programs are pitifully short (1.4 percent of total World Bank lending for the years 1971–76). The indifference of both governments and international development agencies is quite obvious.

We also hear that without assistance from the international lending institutions, the plight of the world's poor would be getting worse instead of better. Well, according to the statistics we have available, the world's poor and hungry are not being helped by these organizations in spite of the billions of dollars loaned and given to the Third World countries.

For instance, the growth rate of food production per capita in the developing countries has fallen from 0.7 percent in the years 1961–70 to 0.2 percent in the years 1970–76. Despite large imports, the nutritional status of large portions of the Asian population has declined. By 1985, it is estimated that South and Southeast Asia face a shortfall in essential food of 30 million tons.

Unfortunately, money the Banks give to these countries encourages for the most part export agriculture which does not help the poor but only helps the elite landowners in underdeveloped countries.

We also hear the argument that projects financed in underdeveloped countries provide jobs for the poor of those countries. But the facts are these: More than 40 percent of the labor force in poor countries—283 million people—are unemployed or underemployed. Opportunities for jobs in these countries go to a very small part of the population.

These examples can be repeated over and over again in the various countries to which our tax money goes. Let me repeat that Americans are not hard and callous. We want to help people who are in a bad way. We have been the most generous nation on this Earth. But, we—as representatives of the thousands and thousands of taxpayers and voters who sent us here—owe it to those people to insure that the programs which they are financing are going to be effective.

We have not seen evidence that our tax money is being used effectively to reduce hunger. We would not be doing our jobs if we did not inquire and question and probe. If we do not do these things, more and more tax money will be poured away without any tangible results. I support the Long-Miller amendment.

Mr. LONG of Maryland. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. Mr. Chairman, the gentlewoman pointed out that this may be aiding the poor nations but not the poor people. I wish to state that some of the richest people in the world live in some of the poorest countries. I might add that I have some five pages

of material pointing out the difference between the poor countries and the poor people. Let us take Bangladesh. That is one of the poorest countries in the world. Let me read a statement from two people who spent several years in Bangladesh:

Here's how IDA tubewells benefit the rich and not the poor: The tubewells are distributed first to those with political clout, then to those with the highest bribes, typically the largest landlords. The landlords use the tubewells for their own acreage, selling water at high rates to the peasants, then taking advantage of their monopoly on water to buy the land around them, causing an increase in the number of landless peasants.

Where do these poor people go when they are forced off their land? They crowd into the cities. This tubewell in Bangladesh helped create a few more of these homeless peasants. A project which was funded by IDA.

My predecessor used to say: "You know, this is a device for taking money from the poor people in rich countries and giving it to the rich people in poor countries." And nobody ever said a truer word.

AMENDMENTS OFFERED BY MR. OBEY TO THE AMENDMENTS OFFERED BY MR. LONG OF MARYLAND

Mr. OBEY. Mr. Chairman, I offer amendments to the amendments.

The Clerk read as follows:

Amendments offered by Mr. OBEY to the amendments offered by Mr. LONG of Maryland: Strike out "$560,000,000" and insert in lieu thereof "$797,725,373".

Strike out "$100,000,000" and insert in lieu thereof "$421,400,000".

Mr. OBEY. Mr. Chairman, I rise in support of the amendment I have offered and in opposition to the amendment by the gentleman from Maryland (Mr. LONG).

Mr. Chairman, I think it is important for the House to keep a number of facts, as opposed to slogans, in mind.

No. 1, this committee has already reduced the request of the administration for IFI's by over 25 percent.

No. 2, a substantial portion of the money in this bill for the International Financial Institutions will never be expended. It will never contribute to the national debt because it is in the form of callable capital which is there simply as backup guarantee money for the Banks.

It is in the bill—and I should point out that we are the only country in the world which uses this procedure—it is in the bill because of the specific request of the Senate chairman of the subcommittee and the House chairman of the subcommittee, the gentleman from Maryland (Mr. LONG).

That is one of the reasons that this item appears to be so high. However, let me point out that the bottom line on this whole question is simply whether or not we believe America ought to keep its word. That is what we are dealing with here today. Whether we like it or not—and I do not happen to particularly like it, so I have raised all kinds of Cain with the administration until we obtained a guarantee from them to attempt to negotiate a different kind of replenishment next time around to the bank so that Congress is not locked into any specific figure—the fact is that we are committed under international law to at least the amount listed in this bill for IDA and for the IADB.

We went to the administration and we said, "We understand what the problems are. We are practical people. Can you tell us what the bottom line is? What is the amount that we must appropriate in order to meet America's share of the scheduled outlays for this year, the scheduled disbursement for this year, in the bank?"

They gave us that number. That is the number in the bill. The reason that number is so important is that if we fall one penny below it, it means that we are in violation of an agreement entered into by President Nixon, submitted to the House by President Ford, and approved by the House under President Ford.

Mr. Chairman, I want to point out that the study of the Congressional Research Service, which is referred to very often by the gentleman from Maryland (Mr. LONG), reads as follows on this point:

Given the nature of the instruments in which the aforementioned undertaking is embodied, it seems that an obligation exists under international law.

They go on to cite the report which accompanied the bill which passed IDA IV on the authorizing bill. When Congress considered it. The report said as follows:

The Committee emphasizes this point because it wishes the House to be aware that this authorization bill will result in a binding international commitment by the United States. Congress should be aware now that a valid international commitment will exist when appropriations to cover this agreement are requested.

That is why, in my judgment, the Long amendment would be so disastrous.

Mr. Chairman, let me point out what we are talking about here. Despite what the chairman suggests, this money does reach the poor. The Congressional Research Service study to which he is fond of referring reads as follows:

In 1972, some 28 percent of agriculture lending could be classified as going, some project-oriented, to the poor. By 1977, this had risen to 63 percent, a dramatic shift in the 5-year period. There is also an obvious poverty focus in the bank's urban development programs. Some 70 percent of fiscal year 1977 projects directed some benefits to the poor.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. OBEY) has expired.

(By unanimous consent, Mr. OBEY was allowed to proceed for 3 additional minutes.)

Mr. OBEY. Mr. Chairman, they went on to say the following:

The harshest analysis we have read of the bank's operations comes from its own operations evaluation unit. The criticism was more well-informed than that found in the popular press and academic journals.

Mr. Chairman, I just want to talk about what we are really talking about here. We are talking about three things. We are talking about whether we want to meet our commitments or whether we do not; and I want the Members to know what it really costs to support the amount we have in the bill.

A pack of cigarettes. About half the people in this House smoke them. The average cost per capita to American citizens to support the entire international bank structure for an entire year is the cost of a pack of cigarettes every week. Big deal. That is what we are talking about to help some of the poorest people in the world and to keep our influence in the most efficient and effective international aid operation in the world.

The amendment offered by the chairman would save the grandiose sum of about 14 cents a week per capita. That means we would be saving the taxpayers the cost of about a pack of gum every week. I also say, big deal.

So I would urge you to oppose the gentleman's amendment, and to adopt the amendment which I have sent to the desk which provides the equivalent of a 2-percent cut for the two items under question in the chairman's amendment.

It is very difficult to tell what the exact dollar amount is which is needed to sustain our commitment. This amendment is offered in the hope that the disbursements will be a little slow out of the banks and that we will, therefore, still be able to keep our international commitments even though we have reduced slightly the amount of money in this bill for these items that I would urge you to suport.

I am a practical man. I would recognize the need to support some kind of cut, but I urge you to make it responsible. I urge you to support a cut which does not run the absolute risk, as the chairman's cut does, of destroying our credibility and reneging on our commitment that past Presidents have made.

Mr. FLYNT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, I support the amendment offered by the subcommittee chairman, the gentleman from Maryland (Mr. LONG) and cosponsored by the gentleman from Ohio (Mr. MILLER). I oppose the amendment to the amendment offered by the gentleman from Wisconsin (Mr. OBEY). This amendment would reduce the appropriations for the International Development Association and the Inter-American Development Bank by $585 million. Without the Long amendment, the fiscal year 1979 appropriations for these two banks would be 54 and 70 percent, respectively. It is important to remember that even with the amendment offered by the gentleman from Maryland (Mr. LONG), the increase in the appropriations for these two multilateral banks would be 17 and 13 percent more than was appropriated in the 1978 appropriations bill. Even if this amendment carries, that percentage increase in 1979 appropriations for IDA and IDB exceeds the President's budget requests for practically all of the domestic spending programs that are administered in behalf of the American people. During a period when our citizens are suffering from inflationary pressures resulting from Federal deficit spending, I feel that it is imperative that the Congress take the initiative in this instance to cut excessive

and unnecessary foreign aid spending to demonstrate to the American people that we are very serious about restoring some sound fiscal management of our budget.

I do not believe that we can ask the American taxpayer to continue to finance increased expenditures of American dollars for foreign aid when Federal resources to help our own citizens are becoming scarcer.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

The gentleman has made a very important point. He has pointed out that even with the cuts, the two banks are still getting a large increase over last year. Forget about the budget request. They ask for whatever they want to make the committee look good, but we are talking about last year. On our extreme right is what the present committee bill is. Next is the Long-Miller amendment with the proposed cuts. That position is still higher than what the President requested for social security, energy, national defense, and so forth.

Mr. FLYNT. Mr. Chairman, I thank the gentleman. I was going to come up with some of those, but I thank the chairman of the committee for making that statement.

Mr. Chairman, I think it is unconscionable at a time of rampant inflation and at a time when the deficit is growing every day that we seek to increase the appropriations for these two multilateral banks by 54 and 70 percent, respectively. It is an unconscionable increase and to do so at this time is, in effect, adding to the deficit, adding to inflation and reducing on a pro rata basis and on a comparative basis funds for domestic programs, many of which are being cut and cut seriously by the budget and by some of the appropriations bills.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

(By unanimous consent, Mr. FLYNT was allowed to proceed for 3 additional minutes.)

Mr. FLYNT. Mr. Chairman, we who support this reduction are not seeking to reduce our assistance in meeting basic humanitarian commitments to help developing countries reach the human subsistence level. The committee has, in my view, properly addressed this commitment in providing increased appropriations for fiscal year 1979 to alleviate hunger and malnutrition, reduce illiteracy, provide medical services, and control population growth. We are not seeking to eliminate assistance designed to directly benefit the poor in these developing nations, but rather to reduce foreign aid assistance for public works and industrial projects in other countries which seldom, if ever, benefit the poorest people in those countries.

Studies and reports recently completed on foreign aid expenditures by the Congressional Research Service, the International Institute for Environment and Development, and the Center for International Policy show that a substantial portion of IDA and IDB funds made available to developing countries never benefit the poorest sectors of these economies. These reports illustrate that the United States has not yet achieved its objective of trying to assist the world's poor in their attempt to help themselves. The Long-Miller amendment affords us the opportunity to redirect foreign aid expenditures so that our objective of helping the poor is more adequately addressed.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Chairman, I want to thank the distinguished gentleman from Georgia for the wonderful statement the gentleman has made here today.

I want to ask the gentleman a question, if the gentleman thinks we are bound by the actions of a previous Congress or a previous President on appropriations which we consider today?

Mr. FLYNT. It has always been generally accepted that one Congress cannot bind a succeeding Congress, certainly in the area of an appropriation bill. I think that it has been demonstrated time and time again that the executive branch, under whichever political party, cannot bind either the House or the Congress as a whole.

Mr. CARTER. Mr. Chairman, if the gentleman will yield further, I think the gentleman for his statement and certainly agree that this is an independent body and can make up its own mind what it is going to do, regardless of what someone has done in a previous Congress. Our duty is to our constituents; and we owe fealty to no others.

Mr. FLYNT. Mr. Chairman, I thank the gentleman from Kentucky.

Mr. Chairman, unless we adopt this amendment, we will be burdening the American taxpayer with increases of 54 and 70 percent for IDA and IDB, respectively, for fiscal year 1979, without being able to make these financial institutions accountable to Congress or the American people.

I certainly feel that the 13- and 17-percent increases, respectively, are consistent with this Nation's commitment to the problems of developing countries.

Therefore, Mr. Chairman, I urge a vote against the Obey amendment and for the Long-Miller amendment.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. FLYNT. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, let me just point out, no one is suggesting that this House is legally bound under U.S. law to uphold the Long amendment. What we are saying is that it is recognized in terms of our international commitments that we have a commitment. If the Long amendment passes, we will be the only country in the world that did not meet its commitment.

Mr. FLYNT. Mr. Chairman, I recognize what the gentleman from Wisconsin is saying, but I also recognize the fact that statements have been made today about prior commitments and that we would be reneging on some of those commitments made in good faith. That is simply not the case.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendments offered by the gentleman from Maryland (Mr. LONG).

Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the genleman from Massachusetts?

Mr. BRINKLEY. Mr. Chairman, reserving the right to object, I do not intend to object, but I will ask the gentleman from Massachusetts (Mr. CONTE) if he would withdraw his request and make a new request after his regular allocation of 5 minutes.

Mr. CONTE. Mr. Chairman, at the request of the gentleman, I will withdraw my request.

The CHAIRMAN. The gentleman from Massachusetts (Mr. CONTE) withdraws his request, and the gentleman is recognized for 5 minutes.

Mr. CONTE. Mr. Chairman, I oppose the motion made by Mr. LONG to reduce the appropriations for the Inter-American Development Bank (IDB) by $254 million and the International Development Association (IDA) by $330 million for a total of $584 million in additional cuts to the $876.6 million reduction the subcommittee has already made in the President's requested budget for International Financial Institutions.

The subcommittee cuts already represent a greater than 25 percent decrease in the total appropriations sought by the President for these institutions. These cuts strike a fair balance between the fulfillment of international obligations undertaken by the past and present administrations, the achievement of important development policy objectives and the necessity to produce a bill which is not excessively burdensome to the American taxpayer.

However, the remaining funds included in the bill for U.S. participation in the International Financial Institutions, are in the words of Treasury Secretary Blumenthal, "the absolute minimum which is compatible with our national interests in the developing countries and our desires to achieve policy changes in the Banks." Additional cuts will wreak havoc.

With respect to the Inter-American Development Bank, cuts in the U.S. capital subscription could have dire consequences. Other members may decide to default on their replenishment subscription or they may pressure the United States to give up her veto power. In either case, there would be a loss of resources, fundamental to the completion of this year's lending program. Additional cuts in the fund for special operations account will interfere with the Banks concessional lending program for the upcoming year. These are the funds that most directly aid the "poorest of the poor."

With respect to the IDA, the soft loan

window of the World Bank, cuts targeted for the fourth replenishment would prevent drawdowns of U.S. funds needed to meet disbursement requirements during the fiscal year, and put the United States in default on a legally binding international obligation. An obligation authorized by Congress in 1974. Any cut in IDA V, the current replenishment plan, would cause the collapse of that replenishment by effectively suspending the second installment of all contributor countries.

It is important to bear in mind that the amendment offered by the gentleman from Maryland (Mr. LONG) would cripple programs that play a vital role in aiding the poorest of the poor, the very group the gentleman claims is slighted by IFI programs. Therefore, a closer look at the IFI programs directly affected by Mr. LONG's cut is in order.

IDB is the principal source of external public financing for the social and economic development of Latin America. In fact, the Bank is the only major source of external concessional funding designed to help the countries of this region meet the basic human needs of the poor. The portion of IDB concessional loans channeled to the poorest nations increased from 12.7 percent in 1970 to 57.7 percent in 1977. During 1977, 36 of IDB's 64 projects went to help people in the most deprived rural areas of Latin America: $845.5 million in funds were allocated to projects directed toward the increase of food production, the provision of health, electrification, sanitation, potable water, education services to the rural population, and assistance in bringing their products to larger markets.

Mr. CHAIRMAN. The time of the gentleman from Massachusetts (Mr. CONTE) has expired.

(By unanimous consent, Mr. CONTE was allowed to proceed for 5 additional minutes.)

Mr. CONTE Mr. Chairman, IDB analysis demonstrates that almost 80 percent of the direct beneficiaries of the small farm, basic infrastructure, service and employment creating development programs, have incomes at or below an amount equivalent to one-half the average per capita income of the recipient countries. Moreover, 60 percent of the beneficiaries have incomes corresponding to one-third or less of the per capita income in the borrowing country. In human terms, these programs benefited 3.6 million people who by any definition, must be considered poor.

With respect to IDA, a recently published report on the International Development Bank, published by the Congressional Research Service indicated that IDA lending to the poorest nations had increased from 79 percent in 1972 to more than 90 percent in 1977. Except for unusual cases, IDA loans go only to those countries with a per capita income of below the level of $520 measured in 1975 U.S. dollars. In practice, 83 percent of IDA commitments for the period of fiscal year 1975–77 were for nations with per capita incomes of below $265. An additional fact—one-third of IDA lending goes for agricultural and rural development projects aimed mainly at the poorest of the poor—those 800 million persons living in poverty with incomes of less than $75 per year. The IDA assisted agricultural and rural development projects approved between July of 1971 and June of 1977 are expected to directly benefit 67 million people. Of these, one-quarter of a million persons will have been settled on new lands. More than three million hectares of productive land will have been irrigated and some 14 million hectares will have been afforded flood protection.

In education also, the emphasis has shifted toward a system geared to the support of national development programs. One cannot underscore the importance of developing local management and evaluative skills, essential to the developing world's eventual control over their own development.

U.S. investment in the IFI program makes good practical sense because of the multiplier effect. The multiplier effect is characteristic of all Bank growth programs. I will invoke the IDB program to illustrate how it works.

Each dollar that the IDB lends for the social and economic development of Latin America mobilizes $3, in other mostly local resources for Bank-supported projects. If we look only at the actual outlays resulting from payments to the paid in capital fund of the IDA (as opposed to callable capital), 4 cents in U.S. subscriptions generates $1 of investment in Latin American development through the IDB. Even on the concessional loan side (FSO), the multiplier effect is impressive. Here, on average, $1 of U.S. contributions generates greater than $10 in social and economic investments for the continent.

Contrary to the impression given in some quarters, these IFI programs bring economic benefits to the United States. The developing countries currently demand 40 percent of the U.S. total merchandise exports, generating 1 million jobs, and these markets have only begun to be developed. Farm exports to the developing countries have increased dramatically from $2.5 billion in 1971 to $7.3 billion in 1977. As the standard of living rises, their diets change, and food imports increase. IDA is a catalyst in this process. U.S. procurement in addition has totaled $5.2 billion and we are the largest single source of supplies necessary to implement IDA programs. With our trade deficit at an unprecedented high, the need to increase exports has become a national priority. The developing nations are a rapidly expanding market for U.S. goods and the IFI programs, directly and indirectly, expedite its development.

Finally, there are two other major reasons why the Long proposal should not be supported: U.S. influence and integrity.

How can the United States keep up the pressure to improve administration of the Banks and convince the IFI's to lend with greater emphasis on basic human needs, if we totally retreat from our replenishment pledge as suggested by Mr. LONG. If these funds are not allocated, our influence within the institutions will be at an alltime low.

Yet, those opposed to the Banks, claim that our present influence in the Bank is questionable. This is simply not true. Through the level of contributions to the various international financial institutions, we have veto power over changes in each of the charters. With respect to the Inter-American Development Bank, our 34.5-percent charter stipulation insures that we have the power to veto actual programs. Though we have never used this veto power, it is not to be viewed lightly. I understand that more than one government has withdrawn its application for a concessional loan, because of the overriding threat of the U.S. veto.

Now, to integrity. The United States has blasted other countries—and rightly so for not coming through with their pledges in other international bodies. Yet, we are guilty of the same shortcoming. And to complicate the issue, it is at a time when we have succeeded in convincing the OPEC nations to increase their subscription, which, in fact, have risen 150 percent from $100 million to $350 million. The IDA cut suggested by the gentleman from Maryland would cut the funds necessary to fulfill our share of the commitment to replenish the IDA IV amount. This is an international agreement among member nations, legally binding in nature. Dishonor will be the consequence if the United States turns her back on this agreement.

After careful weighing of the costs against the benefits, I believe the IFI's are deserving of reasonable support. They help to build a consensus between aid donors and recipients on the objectives of development and other key problems. They have played a key role in the transportation of our relationship with the Third World from one of conflict and confrontation, to one of compromise and cooperation. In performing these functions, they serve the interests of America well and merit the support expressed in H.R. 12931.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

Mr. Chairman, the gentleman spoke a little while ago about commitments and legal obligations. The gentleman realizes, does he not, that when we make these so-called agreements, they are made subject to appropriation by the Congress of the United States? And that it is known worldwide that the Congress must appropriate funds to fulfill any U.S. Government commitments.

Mr. CONTE. The gentleman is absolutely right, but what I am saying to the gentleman and telling this House that President Ford and President Carter made these commitments.

Mr. REUSS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Obey amendment and against the Long-Miller amendments.

Mr. Chairman, I shall not take anywhere near my 5 minutes, except to ob-

serve with sort of a long view of history—not a CLARENCE LONG view, but a lengthy view of history—that about every thousand years the world seems to lose faith in itself. In the first millennium toward its end, the great unifying crown of Charlemagne had fallen apart, the wolves were howling on the outskirts of Paris, and masterless men roamed the streets. The popular belief was that the world was going to end in the year 1000, just 20 or so years off. So people stopped building the cathedrals and edifices and the great things that had engaged them for several centuries.

Here we are, with the year 2000 approaching us in 22 years, and yet we are contemplating action which would strike a near mortal blow to two of the best things we have done, the Inter-American Development Bank and the International Development Association, institutions with international contributors, and with international standards. These are institutions which can impose conditions that no single benefactor could.

I have seen Inter-American Development Bank projects in the Andes, where the poor people with a few tools were constructing farm-to-market roads over the mountains. There were no rich people in sight there scraping off any of the gravy. I have seen in Senegal where the IDA was helping the villagers put in the first wells they have ever had, and there did not seem to be any fat cats dipping into that one.

So let us not knock down these cathedrals, these edifices we have been at such great pains to build in the last 20 years in the apocalyptic belief that the world is going to end in the year 2000. Let us support the bare bones Obey version as against the Long amendments.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. REUSS. I yield to my colleague from Wisconsin.

Mr. OBEY. Mr. Chairman, I would just like to point out that I find it rather strange that the proponents of the Long amendment keep referring only to the increase in the budgeted item under discussion rather than looking at it in the context of the whole bill, because the entire bill, even with the increase for the banks, is still only about 8 percent above last year. The cuts we have already adopted on two occasions give us nothing but an inflation adjustment for this program.

I would also point out that the banks have spent, over the time of their existence, over $2.60 in this country for every dollar we have contributed to the banks. That means that they are good business for the United States.

Mr. REUSS. I thank the gentleman.

Mr. STANTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Long amendment.

Mr. Chairman, this is an extremely important debate we are having here this afternoon, on several different points, not alone necessarily, as we argue—and I am sure it is very difficult for any of us when we get up in billions and hundreds of millions of dollars, to contemplate exactly what that amount of money is. I would like to refer back to a few minutes ago to the gentleman from Wisconsin (Mr. OBEY) when we got into a philosophical discussion, on what do we owe or not owe or what our obligations are.

I would just like to point out to the members of the committee a couple of points in this regard. First of all, I have been on our Banking Committee for 14 years now, and maybe I am naive, but every couple of years there comes before our committee an authorization. This authorization in modern times comes about because the Treasury Department under Republicans or Democrats, discusses participation with the international lending institutions. They decide the amount of money they would like to have. The Treasury then discusses this with our Committee on Banking. We then decide on an amount to ask the House to appropriate.

On April 6, 1977, there was an authorization bill before this committee that far exceeded the amount of money which we are talking about now. We said the purpose of the bill at the very start, of H.R. 5662 on April 6, 1977, stated that if enacted into law it would authorize additional appropriations for the various development lending institutions, and so forth. It covered such amounts for the third and the fourth replenishments of IDA and the World Bank, and so on.

On that authorization 196 people voted for it. They sent a message, as far as I can conceive, to the international lending institutions that, yes, we are going along and we agree to pay a certain amount of money.

I give credit to the gentleman from New York (Mr. WOLFF), and the gentlewoman from Nebraska (Mrs. SMITH) because they voted against the authorization. The gentleman from Florida (Mr. YOUNG) was not here that day 156 people voted against it. They did not want that kind of money for that purpose. But nowhere on that day did anybody stand up in this well and say: "I want to cut 2 percent," or 5 percent. In fact, the author of the amendment, the gentleman from Maryland (Mr. LONG), voted for it.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. STANTON. Certainly. I would be glad to yield to the gentleman from Maryland.

Mr. LONG of Maryland. Mr. Chairman, I feel that the IFI's are the fat belly of the foreign aid. We should not cut off the fingers and toes and the ears and the nose. We should cut the fat.

Mr. STANTON. I gladly yielded to the gentleman to tell him he voted for the authorization.

Our friend, the gentleman from Wisconsin (Mr. OBEY), talked about commitments that Presidents Ford and Nixon made. If we do not pay them this year, we will have to pay part of them next year. Am I wrong on that? Part of this is that the Carter administration has said: "Let us settle our debts and put our books in order."

Mr. OBEY. Mr. Chairman, if the gentleman will yield, he is absolutely correct. The first time this was presented to the House, the House turned it down. When President Ford brought it back, the House approved it, and only after the House approved it did Secretary Simon send the letter to the Banks indicating what our schedule would be.

Mr. STANTON. That is right.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. STANTON was allowed to proceed for 3 additional minutes.)

Mr. STANTON. Mr. Chairman, all I want to do is to reemphasize that we have already authorized more than we are asking the House today to appropriate, 196 members who understood what they were doing on April 6, 1977, voted to fulfill these particular obligations. All I hope is we take that into consideration when we vote today. I ask the Members to look at how he voted on that authorization and then vote the same way today. But if he voted against it, then of course he might vote against it now. But we authorized it and sent a message to the world, and I say let us do it the same way now.

Mr. CARTER. Mr. Chairman, if the gentleman will yield, I remember quite well when the gentleman and I visited Vietnam in 1965—and I might add, at our own expense—but I wish to ask my friend how are you going to explain to your people that you are loaning, at no interest whatsoever, $60 to $90 million to Vietnam today? I would like to know that.

Mr. STANTON. I will tell the gentleman from Kentucky (Mr. CARTER) that the authorizing committee handled this matter. The gentleman from Ohio (Mr. MILLER) offered an amendment with regard to that particular subject at that time. The House voted on it at that particular time. I have no qualms or conscience whatsoever of going back and repeating anywhere what I have said down here in the well of this House.

Mr. CONTE. Mr. Chairman, if the gentleman will yield, I can tell the gentleman how to answer the question and that is that the U.S. representative to the World Bank voted against the Vietnam loan. There are many other countries who contribute to the Bank. If they want their share to go to Vietnam, then that is their own choice, but the U.S. representative voted against the loan to Vietnam.

Mr. LONG of Maryland. Mr. Chairman, if the gentleman will yield, I objected to the amendment offered by the gentleman from Florida (Mr. YOUNG) the other day to cut off indirect assistance to Laos, Cambodia, and Vietnam, but I did it not because I wanted to see any money go to Vietnam, but simply because the banks claim that they cannot take the money.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. CARTER, and by unanimous consent, Mr. STANTON was allowed to proceed for 2 additional minutes.)

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. STANTON. With pleasure.

Mr. CARTER. Mr. Chairman, I say to my good friend, the gentleman from Ohio (Mr. STANTON) that really is it not the duty of this Congress, in acting on this appropriation, to work its own will to do what it thinks is best for the people of the United States?

Mr. STANTON. I would always hope that not only is it our obligation, but I always look at every single Member of Congress and believe that he or she votes the way they happen to think is in the best interest of the people of the United States. That is why you voted against the appropriation because you felt that the money could be used in a better way. I agree with the gentleman that he was consistent. He always is.

Mr. CARTER. I will say to my friend that our constituents at the present time are very tax conscious. That is my feeling. I submit that they are going to hold us liable for any loans that we make, interest free, to a past enemy of ours.

Mr. STANTON. I appreciate what the gentleman from Kentucky (Mr. CARTER) is saying.

But I say to my friend that last April 6 we gave a commitment, we voted to authorize a particular loan. It is just like you make a commitment to buy an automobile. You say to the dealer, "I am going to buy that car but I will not pay for it now, I will pay for it in equal installments down the road." You do not say when the time comes "No, I am not going to pay all that I promised to pay for that car."

If anybody wants to argue on that particular point, I will be glad to listen to their views.

However, I agree that it is not that simple.

Mr. CARTER. My commitment is to the American people.

Mr. THOMPSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Obey amendment and against the Long amendment.

I will address myself mostly to a letter which I received from my distinguished friend, the gentleman from Maryland (Mr. LONG), as did a number of others, on July 12.

In the letter he urges members of the steel caucus to support his amendment to cut $584 million from the IDB and the IDA appropriation requests. The implication in the letter is that Bank lending is responsible for the unfair foreign competition which the U.S. steel industry has experienced. I do not believe the implication is true, and I happen to be very much interested in our steel industry and in its preservation.

In the first place, Mr. Chairman, there have been very few steel projects in the development banks since 1975, and none in the International Development Bank. Moreover, as a matter of lending policy, the international development banks do not finance the production of additional quantities of commodities which are or are expected to be in surplus in world markets. On economic grounds, the banks have discouraged, deferred, or refused more proposals for steel projects than they have financed. Moreover, essentially all steel production that has been financed in the past has been for domestic use. The 12 countries which have been assisted by the World Bank and the IDB in building steel capacity are, in the aggregate, very substantial steel importers. The United States continues to have a surplus in its steel trade with these countries, in marked contrast to its deficits in steel trade with the rest of the world.

During the period 1965 to 1975, domestic steel production of the borrowers as a group doubled, but the net steel imports increased ninefold during that same period. Therefore, it cannot be said that the export markets for U.S. steel were lost as a result of Bank loans. Unfortunately, the United States has failed to obtain a major share in the growing steel imports of these countries, presumably for the same reasons which account for the deterioration of the U.S. domestic steel market. Japan and Western Europe steel producers have improved their competitive production in the steel markets of developing countries, as they were able to do in the U.S. steel market. In short, the attempt to link development Bank lending to the difficulties of our steel industry stretches reality very substantially.

Mr. Chairman, a very large proportion, in terms of economics, of multilateral development banks are, in effect, being misrepresented or not understood here. The ordinary capital loans which are extended to the developing countries are not contributions from the donor nations. The loans are made with funds which the banks borrow in private money markets and which are backed by the guarantees of the donor nations, and thus, the guarantees represent a contingent liability in budgetary outlay in the same sense that a salary-and-expense item is in the budget of a department or agency.

Mr. Chairman, I think the approach of the gentleman from Wisconsin (Mr. OBEY) is the best approach; and I do hope that his amendment is accepted and the Long amendment is defeated.

Mr. ANDERSON of Illinois. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Obey amendments and in opposition to the Long amendments.

Mr. Chairman, the amount requested for IFI contributions, small as it is compared to other items in the federal budget, is in fact even smaller than it looks. For one thing, the Appropriations Committee has already drastically cut it back $876 million from the administration request. Of the remainder, fully 40 percent represents only "callable capital," namely, money which in all probability will never be spent. New budget procedures require that it be appropriated just in case a default occurs and the United States is asked to cover it. The fact is, default on an IFI loan has never occurred. As for the paid-in capital, it is especially hard to begrudge this, since it supplies only the soft-loan windows of the IFIs, financing programs that serve only the poorest of the poor.

Moreover, the request would also be smaller were it not for the fact that: First, more replenishments than usual have coincided; and second, part of the request is to cover arrearages we should have paid in years past.

While proposition 13 fever is understandable, it does not seem very wise to pick on the one item in the budget that lacks a political constituency. Cuts will affect real, live people nonetheless; though they are not American citizens who will be voting in November, still they should count for something. A cut of a few hundred million in this modest budget function will have a much greater relative impact than the same amount cut from other budget functions—which, typically much larger, would be better able to absorb it.

The goal set by the United Nations for the level of foreign aid expected of an advanced industrialized nation is only seven-tenths of 1 percent of that national treasure chest we call the gross national product. Embarrassingly, we have never even come close to achieving this goal. And much of what we classify as foreign aid is in fact military aid—or, if humanitarian or economic aid, is directed, for political purposes, to developing countries whose income levels frankly do not put them in the ranks of the most deserving. By this standard of ability-to-pay, our generosity is regularly surpassed by the Scandinavian countries, and occasionally others.

This is surprising, considering both the hard-nosed and moral cases to be made for foreign aid. Promoting education, population control, land reform, labor-intensive employment or appropriate technology, infrastructure for capital development, improved farming techniques, and the like—these are all ways to raise income and standard-of-living; and, in so doing, they are ways to pre-empt the economic and political instabilities on which revolution, communism, and anti-Americanism thrive.

The United States can do worse than to improve its dialog with developing countries, a part of which is considered to be our role in providing them help through IFI's. This would certainly be less expensive than other actions they have advocated, such as debt moratoriums and commodity price agreements. At a time when we face increasing competition with the Soviet Union in the Third World—and yet shy away from military confrontation—economic and humanitarian aid not only provides concrete political leverage, but is also a way to earn genuine respect and affection.

In terms of access to raw materials, new markets, and strategic locations; and in terms of the potential unrest, and even nuclear capability, that the developing world represents, it is decidedly in both our short- and long-run interest to begin establishing good working relationships.

Increasing income in less-developed countries stimulates considerable demand for U.S. exports, including finished goods, technology, managerial skills, and

whatever is not available locally. Little is, in a primitive developing country. American exports to LDC's are already said to generate one million jobs for American workers.

American firms commonly bid on the projects in LDC's that the IFI's are financing. In addition, the more development spurred in an LDC by the IFI's, the more accessible and attractive it is for American firms to invest on their own. Providing aid through multilateral institutions encourages burden-sharing, since it spotlights what various countries are doing—or not doing.

But this said, there is a simpler case to be made for foreign aid.

Is it hopelessly old-fashioned to be motivated by moral humanitarian concerns, rather than by designs to win friends and influence, to enhance military or political position, to reap dividends of trade and investment, or other such motives ulterior to an act of generosity for its own sake? One hears the good name of our country so often associated with generosity and greatness, that it is no small wonder we can now be preoccupied debating, in essence, whether to share our ample blessings. It is a great country that expects something other than normal satisfaction in return for charity to the desperately poor?

Perhaps we do not receive as much gratitude from recipients as we are due; perhaps foreign aid programs, like those of HEW or any other bureaucracy, are not without their share of fraud and waste; perhaps lending through multilateral arrangements does not permit us as much control over our own contibutions as we would like; perhaps some American money ends up benefiting the deprived population in a country with whose government we are at odds. Is the answer to these frustrations to throw up our hand and withhold aid from those pitiful fellow human beings whose only hope of living in dignity depends on it? Are we so fortunate ourselves, so coddled and sheltered, that we have forgotten how unfortunate others are?

Foreign aid is no academic debate. It is a felt and crying need. Of course the problems of the world are massive, and even our best efforts can make barely a dent; but is that a reason not even to try? I know there is a tax revolt on, that there is still too much unemployment in our own country, that there are a million and one items left to be accomplished on America's own domestic agenda. But we could plunge into another Great Depression and our fortunes would still be infinitely better than many of the world's peoples. In any case, no one is asking that a trade-off be made of CETA jobs programs or a strategic petroleum reserve or F–15 fighter aircraft to make room for our contributions to international financial institutions. The funding requested for IFI's is simply not enough to matter. And neither is anyone asking that we give up our air-conditioners or automobiles or even the $7 billion Californians have recently awarded themselves in property tax relief. We can do our part to relieve the grim conditions of the rest of the world by gestures far short of that. It is not by dint of anything but luck that we were born in the United States and freed from worry about our next meal. Many of the denizens of Zambia, Thailand, Pakistan, and Haiti have not been so lucky. And they do not even have a representative in the halls of Congress to make their pleas. The only thing they have to rely on is the hope that the rest of us have a conscience.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON of Illinois. I yield to the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman for yielding.

I think the gentleman has made very important points. The fact is, as he has indicated, if we pass the Long amendment, we will trigger a reduction in contributions to the Inter-American Development Bank of massive amounts of money. What has happened through the years is that as we have been able to convince other people to participate to a greater degree in the international banks, we have been able to cut back our own share of support for the banks, and we have been able to cut back our own bilaterial assistance in Latin America by an amount greater than the amount that we provide to the IADB. If the Long amendment passes, what happens is that the total amount of bank lending shrinks drastically in Latin America. That means there is greater pressure on the United States to bear the burden alone through our AID programs, and that is not going to help the American taxpayers one dime.

Mr. ANDERSON of Illinois. I think the gentleman is correct, and my memory is, I believe, to this effect: That it is on the order of the magnitude of about $3 that is contributed by other countries for every dollar that we contribute.

Mr. GIAIMO. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the Obey amendment and in opposition to the Long of Maryland amendment.

Mr. Chairman, a number of Members may have questions concerning how this foreign aid appropriations bill relates to the budget resolution and whether this amendment would affect those totals.

Mr. Chairman, the totals of the foreign assistance in the second budget resolution are the same as those which were in the foreign assistance appropriations bill as reported by the Appropriations Committee. The Budget Committee adopted those totals for the second resolution ceiling as they were well below targets we had set in the first resolution earlier this session. Since the House has already accepted amendments reducing the total for foreign aid, the bill is now below the levels in the second resolution.

The Budget Committee intent is to incorporate these reductions and other technical changes in a committee amendment which will be offered during floor consideration on Wednesday of the second concurrent budget resolution.

Let me add that the foreign aid appropriations bill, as amended, is already $400 million below the targets which were set in the first resolution this spring.

I appreciate the mood of the House in wanting to trim foreign aid spending even further. I would support an amendment to trim 2 percent in title III as the gentleman from Wisconsin suggests; however, I do not intend to support any amendments which make major slashes in funding for international financial institutions. The Appropriations Committee has already taken a reduction of $877 million in the estimates for these institutions. If we add to that the 2-percent across-the-board reductions being made, I think we will have made sufficient reductions in this area; so I intend to support the 2-percent reduction amendment and intend to oppose any larger cuts. Whatever the outcome, the totals will be below the ceilings on the second resolution and an amendment will be proposed to correct this appropriation at the proper time.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague yielding, the distinguished chairman of our Budget Committee.

The gentleman understands that the LONG (Maryland) amendment is not a slash. It is merely a restraint on an increase. The gentleman's amendment provides that in both of these two development funds that there be a 13-percent and a 17-percent increase, rather than a 54-percent and a 70-percent increase; so I do not think my chairman meant to leave the impression that it was a slash.

Mr. GIAIMO. Mr. Chairman, if the gentleman wishes to take offense at my use of the term "slash", so be it. I prefer the use of the word and I think we would be better off without this slash in the contributions.

Mr. ROUSSELOT. But it is a restraint on a proposed increase rather than such a substantial increase.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would just like to make the point that to claim there is something significant because this is 17 percent above last year is meaningless. That is like saying that if you go to the doctor and have to have an operation and you did not have to pay the doctor anything last month, so you go to the hospital and have the operation and have to pay the doctor the following month that there is something outrageous about the fact that your doctor bill is much higher this month than last month that is not logical.

We think the commitment was made for this month and we have to keep it.

Mr. GIAIMO. The fact is that this is the year we have to make our payment and meet our commitment to the funds.

Mrs. BURKE of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendments.

Mr. Chairman, I am aware that the

temptation to make this bill the "sacrificial lamb" appropriations bill by incurring more cuts to the IFT's is very appealing to many. This attempt is attractive for all the wrong reasons. The perception that there is no "constituency" for this bill clouds the debate and the potential harm to the pursuance of our national foreign policy interests, and also the damage to our individual constituents.

Let the taxpayer know that this bill has already been cut by $1.1 billion—the largest percentage cut, 13 percent, recommended by the Appropriations Committee on any single bill this year. Of this amount, the international financial institutions (IFI's) were cut by $876.5 million.

Further cuts would result in drawdowns of U.S. funds needed to meet disbursement requirements during this fiscal year. The United States would then be some $835 million in default of its congressionally authorized obligations.

Thirty-seven percent of the amount recommended by the committee is for callable capital subscriptions and therefore does not constitute an actual budgetary outlay. That is, there is no expected cost to the taxpayer.

Massive cuts, such as the one proposed by the Long-Miller amendment, would do even more than damage our international credibility and ability to persuade other nations to vote for loans we favor. Cuts would directly impose financial damage to constituents given the economic spinoffs of the banks to our domestic economy. It is interesting to note that on an annual basis the banks return to our economy an average of $400 million through the purchase of export goods. This fact has not been overlooked by the U.S. Chamber of Commerce in stating its opposition to this amendment. Exports support one of every eight jobs in this country.

The World Bank has done a very good job of deciding the proper uses of capital and skill. By its lending practices to the Third World, the Bank not only helps the economic growth of developing nations and improvement of public and private enterprises, but it also furthers the economic viability of the Western World.

The IFI's are helping the developing nations to invest in food production at their end so that world food prices can become more stable. The Bank aids them in developing their own natural energy resources so that the demand for oil is not greater. If the Third World can better cope with the socioeconomic problems that beset it, we in the Western World can continue economic growth without the concomitant rising inflation.

Mr. Chairman, I would like to address the Inter-American Development Bank and particularly to clarify exactly what we are voting on. In the case of that Bank, 70 percent of the amount that is in this appropriation is really guarantee of the Bank's borrowing, rather than a direct outlay. Ninety percent of this money that is going to the International Bank goes directly to the Special Operation Fund. That Special Operations Fund is one where many countries have continued to make a greater contribution. In order for us to have a veto, we must maintain one-third.

What happen is that if the amount of contributions increases and our contribution is cut we will enganger our real power to have a veto over loans under that Special Operations Fund, which is 90 percent of that Inter-American Development Bank.

Now, exactly where has the money gone to for that Bank? I would like to call your attention to some of the studies, particularly a study by the Congressional Research Services that was requested by the Appropriations Committee.

That study shows that the moneys that have come from that Special Operations Fund have gone to the poorest of poor countries of Latin America, and that the amount in the last 5 years that has gone to the poorest of the poor has been 43 percent of their volume in 1977. There is no other bank that can compare with it. This is where we are talking about cutting.

The IDB has had special programs to bring in and provide assistance to co-ops, to women, to the handicapped, and to other areas, particularly to help people who are in the lowest income groups.

One of the things I would like to emphasize also is: Exactly where does the money ultimately go? Over the last 5 years really the money has come back to the United States.

The point of the gentleman from Wisconsin (Mr. OBEY) must be emphasized. For every $1 we have put into international banking institutions the United States has had contracts for $2.50. This has amounted to something like $400 million on an annual basis to our economy. California, the State I come from, has had some 123,000 jobs tied to those exports and has had $16.7 million worth of contracts to the World Bank alone.

We talk about whether or not the people at home understand this, and I know they do not understand it too well; they think it is foreign aid. But most of the time we are giving a guarantee. Thirty-seven percent of this whole appropriation bill for the banks is a guarantee, not dollar cutlay. And what do we get back for those loans? We get 2½ times our money back, and at the same time we help the poorest of poor countries. This is really the best investment we can make in foreign aid, rather than talking about going to direct aid where it is all money and it all goes out. In this way we can give a portion of the amount in loans, and we get it back three or fourfold.

Mr. Chairman, I support the Obey amendment.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Long-Miller amendment and in opposition to the Obey amendment.

Why I support the Long-Miller amendment? Because even with the Long-Miller cuts—and actually they are not cuts in the budget; they are cuts over the increases from last year—these financial institutions will receive bigger percentage increases over the previous year than President Carter has allowed for social security, for public works, for defense, for energy, and for veterans. Because even with the Long-Miller reductions, the appropriation will be the largest ever for these IFI's—13 percent for IDA and 17 percent for IDB.

Perhaps the figure, "13," is one we ought to keep in mind. As we know, 2 months ago there was a proposition voted on in California that bore the title 13. That was an outstanding example of what the American people think about Government spending.

I must also vote for the Long-Miller amendment because these IFI's are helping nations which are human rights violators, all the way from Vietnam, which we have heard much about, to Chile, Ethiopia, Nicaragua, Paraguay, Uruguay, Argentina, and Uganda.

I must also vote for this amendment because the two banks affected by the Long-Miller amendment, IDA and IDB, pay excessive salaries as well as fringe benefits. As an example, 95 percent of the World Bank staff is located in Washington, and over 40 percent of these employees are earning more than $36,000 a year. Besides that, this income—and this is a nice little deal—is adjusted to cover any U.S. tax which an employee may have to pay. Do your constituents know about this?

The top executives of these institutions receive salaries of over $100,000 a year. Some of the IFI's employees make as much as 57 percent more than those in comparable positions in the U.S. Civil Service.

Personal loans, I am told, run as low as 4 percent. The administration request for the IFI this year is 82 percent over last year's figure and 207 percent over the year before that. And I think this is probably the most important reason: Because there are no independent audits available for the funds. There is no audit by the Congress. I understand from the people on the committee that they have a very difficult time getting information from these banks as to what is going on with these funds. I think it is very inappropriate for us to be appropriating this kind of money, especially the kind of money that would be required without the Long-Miller amendment, without the people having a real say-so about what goes on. We have had enough problems with our domestic programs in the past year.

Mr. OBEY. Mr. Chairman, will the gentleman yield on that point?

Mr. LAGOMARSINO. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would just like to point out that the CRS study examined the audit allegation made and, they do have an audit procedure. The bank is audited by Price Waterhouse.

I would also state that the CRS reports that the World Bank loan supervision system and audit seems to be as rigorous or more rigorous than the loan

supervision system of some U.S. Government agencies, such as EDA and SBA and Foreign Military Sales and the Department of Defense.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

Mr. Chairman, we have gone into that very carefully. There is no such thing as a public audit of the programs administered by these banks. There are only evaluations of their own audits. We cannot find out who gets the contracts or who makes any money out of all these projects. If you want to try that, just approach them. The gentleman from Florida (Mr. YOUNG) tried it. We tried to get an audit that is available for public consumption. We could not get anything resembling an audit. So there is no such thing as what the gentleman from Wisconsin is talking about.

Mr. LAGOMARSINO. That is my understanding. I thank the gentleman for his contribution.

Mr. OBEY. Mr. Chairman, will the gentleman yield further?

Mr. LAGOMARSINO. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, let me say that the Bank does require an independent annual project audit, and a report of those audits is available to the Congress.

Mr. LAGOMARSINO. Mr. Chairman, I just know that the American people are unhappy enough about direct U.S. aid projects over which this Congress does have authority to audit and to have oversight, and I think we are asking the American taxpayers too much if we expect them to provide the funds required by the committee bill. I urge rejection of the Obey amendment and approval of the Long-Miller amendment.

Mr. NICHOLS. Mr. Chairman, I move to strike the requisite number of words. I rise in support of Chairman LONG's proposal and in opposition to the Obey amendments.

Mr. Chairman, I rise in support of Chairman LONG's proposal to trim the fat from the bloated and inflated appropriations for the International Development Bank and the International Development Association.

For too long these organizations have operated outside the area of congressional control or public scrutiny. Their officers are not required to testify on behalf of the appropriations we consider today. Audits, such as they are, do not reach the light of day, but instead are fully sanitized.

We do know that while Congress appropriates these moneys for international development of poor nations, the thanks we get is greater foreign competition in manufactured goods and raw materials.

I would like to remind my colleagues that petroleum imports no longer make up the major source of our deficit problems. Instead the Commerce Department once again confirmed last week that it is manufactured goods that are undercutting domestic industries forcing layoffs and short time.

Finally, Mr. Chairman, the percentage increase of the proposed appropriations of the International Development Bank and the International Development Association is completely and totally out of line with congressional and administration efforts to hold the line on spending. While our own defense budget includes only a 9 percent increase for fiscal year 1979, the IDA and the IDB have respective percentage increase of 54 and 70 percent.

My colleague, from Maryland, has recognized these arguments and proposed an amendment to significantly reduce the appropriation for both of these institutions.

I stand in support of my good friend from Maryland's amendment and I hope that my colleagues will vote to significantly reduce the funding level to a more reasonable amount.

Mr. Chairman, I am privileged to represent one of the largest textile districts in America. It is an industry, Mr. Chairman, which has in the past 6 years seen better than 200,000 jobs displaced from foreign textiles coming into this country in tremendous quantities from Japan, Hong Kong, Taiwan, and Korea. In Alabama's Third Congressional District alone more than 1,700 textile workers have become eligible for trade readjustment assistance money in the past year. This Government program compensates American workers who lose work time due to foreign imports.

Ironically, our own foreign assistance development money has gone to some of these very same foreign competitors who are carving into the American textile market and cutting out American jobs. One garment out of every three sold in America this year was produced from outside the United States with foreign labor. I am told that the International Finance Corporation has made 56 loans to 33 countries for nearly $100 million for textile projects. I am advised that the World Bank has made 11 loans for cotton or synthetic fiber textile projects and that an additional $97 million in textile loans is pending.

Mr. Chairman, such development loans severely damage the textile industry of this Nation and prove costly to the overall economy of the country.

Mr. GRASSLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Long amendments and in opposition to the Obey amendments.

I rise in support of the Long amendment and the opposition to the Obey amendment.

Mr. Chairman, members of the committee, we were told last week by the President of the United States—and we were told through his spokesman, Jody Powell—that we, of the Congress, were irresponsible; that one of the bills that was subject to veto was the domestic public works bill. It was the example of irresponsible spending that the President was going to hold up to the entire country, that we here in the Congress—435 of us in the House and 100 in the Senate—are in fact responsible for inflation, and he is going to veto that bill to set an example.

Now, in that bill are a lot of public works projects such as dams that we are told are inflationary, and it is difficult for the President to fight inflation if the Congress does not set a good example. Hence, he cannot get the labor unions and big business to cooperate with his war on inflation.

Now, let me ask the Members, what is any better of an example of irresponsible spending, particularly irresponsible increases in spending, than that exemplified right over there in this chart, those fantastic increases in spending for foreign aid? A lot of that money, ladies and gentlemen, is going to go for public works projects in foreign countries, for people who do not pay taxes into the Federal Treasury because they are in foreign countries or are foreign nationals.

So, are we to conclude that it is irresponsible for the Congress to appropriate money—not to the extent of increases as demonstrated on this chart for foreign aid—for domestic public works projects, and that they are inflationary, but it is all right, because I have to assume it is all right because the President has not said he is going to veto this foreign bill, that it is all right for us to follow this demonstration of irresponsible spending, but that it is not inflationary? I think it is wrong for the President of the United States to say that this Congress is irresponsible in appropriating money for domestic public works projects for the benefit of the taxpaying citizens in this country, but it is responsible and non-inflationary to do the same thing overseas. I cannot justify that to my constituency. I do not think the President of the United States can justify that to any of the 220 million people in this country. But, that is what we are, in effect, being told.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. GRASSLEY. I will be glad to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague yielding to me. I think he has made an excellent point about the President's criticism of this Congress for not being more responsible in reducing overspending especially when Congress is aware that the money is being misspent.

Mr. GRASSLEY. All I would ask is that the President be consistent.

Mr. ROUSSELOT. Let me add one thing that the Appropriations Committee itself, this committee that brought this bill to the floor, has stated, in their report. I mention the excerpt because several of my colleagues say that this money only goes to the poor people. Yet, their own report says on page 69:

> There are too few examples of multi-lateral money ever getting to the poorest of the poor.

So, even this committee on which my colleagues serve who have tried to advocate not cutting back this tremendous increase, their own committee report says that it does not go to the poorest of the

poor. So, the gentleman from Iowa's point is even more valid since the President has admonished us to be more frugal.

Mr. GRASSLEY. I thank the gentleman.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. GRASSLEY. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. Let me read from the Congressional Research Service study which they have quoted.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. LONG of Maryland and by unanimous consent, Mr. GRASSLEY was allowed to proceed for 1 additional minute.)

Mr. LONG of Maryland. It was not included in the dear colleague letter, but the Congressional Research Service study states:

Whether these intentions to benefit the poor actually . . . benefit the poor would have to be determined by in-field and in-depth evaluation.

So this whole business about their improving the poor and getting better in that respect is merely a statement of what they hope or intend to do. They have not proved they are doing it, according to the research service the gentleman from Wisconsin has been quoting from.

Mr. RICHMOND. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Long-Miller amendments.

Mr. Chairman, we have debated the Long-Miller amendment at great length. I do not think there is much more that can be said, but I think by our supporting the Long-Miller amendment, once and for all we will be giving the two banks, the International Development Assocation and the Inter-American Development Bank, a loud and clear message that the American people and the American Congress demand that they make loans to poor people—not only to the poor nations. As the gentleman from Maryland has stated, many of the poorest nations have as residents some of the richest people in the world. I would like both of these banks to make loans to poor people, to cooperatives, to groups that can become a little less poor, through our financial assistance. We know for a fact these banks are not doing that. That is why I support the Long-Miller amendment.

Another reason why I support the amendment is that the gentleman from Ohio (Mr. MILLER) has committed himself that if we pass the Long-Miller amendment, he will not offer an 8-percent across-the-board amendment, which would emasculate the entire foreign assistance bill. The Long-Miller amendment will give a clear loud message to these banks that we want our money to be loaned to poor people, not to rich people, who can obtain financing through commercial banks.

I am reluctant to see any reductions in foreign assistance, because I believe very strongly in providing humanitarian aid which will benefit the poor and the hungry in other nations.

However, it appears that some further reduction in foreign aid appropriations is inevitable. Should this amendment fail, we can expect our distinguished colleague from Ohio (Mr. MILLER) to offer his amendment to slash all foreign aid appropriations by 8 percent.

If we are then to assign priorities among deserving programs, we must thoughtfully and carefully determine where such reductions will be targeted, and we must avoid any across-the-board cuts.

I support Mr. LONG's amendment as a reasonable alternative to across-the-board reductions which may cut too deeply into appropriations for essential programs. This amendment proposes a reduction which will do the least harm, while furthering our national policy goal of aiding the poorest and the neediest in other lands.

The amendment before us reduces funding for both the IDA and IDB but, nevertheless, the fiscal year 1979 funding levels for these multilateral banks will still exceed those of 1978. The IDA would still receive a 13-percent increase over fiscal year 1978, and the IDB would receive an increase of 17 percent.

Any additional across-the-board reductions in foreign aid would have a devastating effect on programs in vitally important areas such as: Food and nutrition; Peace Corps, population control; refugee assistance; health; and education. Such reductions, granting discretion to the President to determine the specific program reductions that will have to be made, removes from congressional control the vital legislative task of setting foreign assistance levels.

And it is also essential that we maintain as high a level of bilateral humanitarian assistance as possible while the debate continues on the effectiveness of the international financial institutions in alleviating the basic problems of disease, want, and hunger.

Perhaps most significantly, the IDA and IDB have not performed adequately in aiding the rural poor. Lappe and Collins, in their landmark study, Food First, document the charge that the banks have chosen to support export-agriculture at the expense of the needs of the people of the recipient nations.

For example, in the Philippines, the recipient of two World Bank loans designed to help small farmers, only 1 percent of the credit extended went to farmers with less than 7 acres of land.

In Costa Rica, the production of beef for export has doubled under the impetus of an IDB loan, while per capita meat consumption declined 26 percent. Also IDB policy has been indicted for the basic grain shortages that Costa Rica now suffers.

Across-the-board reductions would also have a devastating impact on our programs of military and economic assistance to many nations. If an 8 percent reduction were approved in this legislation, several nations would suffer serious reductions in bilateral assistance.

An 8 percent across-the-board cut would mean that assistance to Israel could be reduced by as much as $150 million. The critically important programs which would be affected are: Economic support assistance; military sales credits; the Israel-United States binational agricultural research fund; aid for resettlement of Soviet and Eastern European refugees; and American schools and hospitals in Israel.

If we must select among the many deserving programs in the legislation before us, I believe that Mr. LONG's amendment is the most effective way to target and control any reduction without curtailing much-needed assistance to the hungry and destitute throughout the world.

The amendment before us makes our stand absolutely clear: We will continue to maintain foreign assistance funding adequate to meet the identified needs of the poor in other nations, and we are not going to let our zeal for cost reductions indiscriminately cut essential humanitarian aid programs.

LONG-MILLER AMENDMENTS, FOREIGN AID APPROPRIATIONS BILL

ARE THE BANKS HELPING THE WORLD'S POOR?

I. Are IDA and IDB providing development funds to the poorest nations?

Facts:

1. Poorest "nations", yes. Poorest "people", NO! Some of the richest people in the world live in the poorest countries; e.g., Jahural Islam, richest man in Bangladesh and chief beneficiary of the IDA tubewell project. Here's how IDA tubewells benefit the rich and not the poor: The tubewells are distributed first to those with political clout, then to those with the highest bribes, typically the largest landlords. The landlords use the tubewells for their own acreage, selling water at high rates to the peasants, then taking advantage of their monopoly on water to buy the land around them, causing an increase in the number of landless peasants.

("Bangladesh: Aid to the Needy?", Center for International Policy, May 1978, Betsy Hartman and James Boyce, pp. 7–8).

2. The World Bank is clearly not reaching the poorest of the poor and "has done little to organize the poor for self-reliant development." Only one out of eight IDB projects is even designed to reach the poor.

(Congressional Research Service study, "An Assessment of the Effectiveness of the World Bank," 1978, pp. 65, 98, 171).

3. "It is clear that the institutions studied, whatever the offcial policy positions, are not ready yet to give high priority to programmes designed to provide assistance to the poorest sectors of the developing societies."

"Although 200 million live in desperate slum conditions, resources devoted to human settlement programmes are pitifully short (1.4 percent of total World Bank lending for 1971–76) . . . The indifference of both governments and international development agencies is quite obvious."

(International Institute for Environment and Development, "Banking on the Biosphere," July 1978, IIED Assessment Project Team, pp. 4, 51, 64).

4. Life for the rural poor is deteriorating:

In India, the proportion of rural people below the basic poverty minimum rose from 39 percent in 1961 to 54 percent in 1970.

In Mexico, only 12 percent of children in outlying provinces are enrolled in primary education compared to 60 percent in Mexico City.

Urban dwellers have 9 times better prospect of medical attention as villagers in India, 11 times in Ghana, and 33 times in Ethiopia.

(The Internationalist, "Streets Paved With Gold," Graham Hancock, June 1978, No. 64, p. 6).

II. Have the banks increased food for the poor?

Facts:

1. The growth rate of food production per capita in the "developing economies" has fallen from .7 percent in 1961–70 to .2 percent in 1970–76.

(The Fourth World Food Survey, Food and Agriculture Organization of the United Nations, Rome, 1977, p. 4).

2. ". . . Despite large imports . . . the nutritional status of large portions of the (Asian) population have declined . . . By 1985, South and Southeast Asia face a shortfall in essential food of 30 million tons."

Far Eastern Economic Review, "Asia's Food Drive Lags," summary of Asian Development Bank study on agriculture, Michael Richardson, August 12, 1977, p. 70).

3. The Banks encourage export argiculture which does not help the poor, "but serves the interests of the elite landholders and consumer groups in underdeveloped countries and the interests of multinational agribusiness."

(Food First, Beyond the Myth of Scarcity, Frances Moore Lappe and Joseph Collins, 1977, p. 204).

Malaysia, a recipient of World Bank palm oil loans, is the largest palm oil producer in the world. Nevertheless, between 1957 and 1970, the poorest fifth of rural hoseholds lost over 40 percent of their average income while the average income of the next fifth fell 16 percent.

("Rural Poverty in West Malaysia," Poverty and Landlessness, E. Lee, 1976, pp. 6–9, as cited in Food First op. cit., p. 426.

Mexico, a recipient of World Bank citrus loans, is facing an acute crisis in supply of basic food for the poor.

(Excelsior, "World Bank and IDB Responsible for the Food Supply of the Country," Aurora Beredejo Arvizu, Tuesday, May 23, 1978).

In Costa Rico, a recipient of livestock loans from the IDB, per capita consumption of meat went down 26 percent while meat production, mostly for export, increased 92 percent from the early 1960's to 1970. (Global Reach: The Power of the Multinational Corporations, Richard Barnet, 1974, p. 179).

"The IDB approach to agricultural development has contributed to Costa Rica's basic grain shortages." (The IDB and Political Influence with Special Reference to Costa Rica, Peter Dewitt, p. 106).

III. Have the banks created jobs for the poor?

Facts:

1. Over 40 percent of the labor force in the poor countries (283 million) are unemployed or underemployed. "Opportunities for productive employment (in developing countries) have mainly gone to a very small part of the total population."

(Employment, Growth and Basic Needs: A One World Problem, International Labor Organization, 1977, pp. 16–18).

2. In Indonesia, "much of foreign aid and loans received in recent years have been earmarked for major capital projects." But they "will not provide the jobs . . . the government must stimulate if it is to neutralize a potential source of major unrest."

(Far Eastern Economic Review, "Weak U.S. Dollar Upsets Indonesia's Balancing Act," Anthony Rowley, July 21, 1978, p. 38).

The World Bank, accepting the Indonesian government's definition of employment—anyone working more than 2 hours a day for at least 2 days a week—claims that unemployment is only 2–3 percent. Unemployment and underemployment come closer to 20 percent.

(Far Eastern Economic Review, "Jakarta Adds On Another Year's Debts," David Jenkins, June 9, 1978, p. 79).

3. Large numbers of tenant farmers in Pakistan were displaced as a result of a World Bank loan to import tractors in the late 1960's.

("Soft Technologies, Hard Choices," Worldwatch Institute, Colin Norman, June 1978, pp. 9–10).

4. "Uprooting of large numbers of poor Brazilian peasants," has resulted from IDB and World Bank financed infrastructure projects in the Amazon because "large scale cattle ranching has replaced peasant small holdings."

(Victims of the Miracle: Development and the Indians of Brazil, Shelton H. Davis, Cambridge University Press, 1977, p. 161).

5. The World Bank and IDB have loaned large amounts ($1.46 billion) for steel plants with $100,000 to $200,000 in capital investment for each job.

(Oversight hearings on U.S. subsidies of foreign steel, 1978, House Appropriations Subcommittee on Foreign Operations).

6. A textile plant in Tanzania funded by the World Bank cost $107 million and provides 4,000 jobs—$260,000 per job. (World Bank News Release, No. 78/126). A thousand times as many jobs could have been created through investment in light capital technology in small farms and cottage industries of the kind we are now trying to promote for unskilled and illiterate workers in poor countries.

IV. Have the banks helped the small farmer?

Facts:

1. In the Philippines, the World Bank made two loans to rural banks which were designed to help small farmers (those with less than seven acres), 73 percent of all farmers in that area, who received less than 1 percent of the credit extended.

(Food First, . . ., op. cit., "What About the World Bank's Assault on Poverty?" revised edition, Ballantine Books, Spring 1979, p. 418).

2. In Kenya, a World Bank livestock project allocated credits in the following way: commercial ranchers, 54 percent; company ranches, 33 percent; 42 individual ranchers, 9 percent; and 25 groups representing 1,500 ranches, 4 percent.

(Ibid., p. 423).

V. Have the banks increased energy supply for the poor?

Facts:

1. While 22 percent of all World Bank lending has gone into the energy field, "almost all energy aid from the agencies (banks) * * * has been * * * designed to serve industrial plants and provide for urban amenities."

(International Institute for Environment and Development, "Banking on the Biosphere," IIED Assessment Project Team, p. 68).

2. In India, only 10 percent of all commercial fuels (electricity and oil) are consumed in the villages which contain 80 percent of the population.

(Atoms for the Poor, Nuclear Power and the Third World, Peter Hayes and Neil Barrett, sec. 5, p. 8).

3. Only one staff member of the World Bank's Energy and Fuel Department works full time on rural energy strategies and planning.

(Op. cit., International Institute for Environment and Development, p. 74).

Mr. HYDE. Mr. Chairman, I rise in opposition to the Long-Miller amendment and in support of the Obey amendment, and I move to strike the last word.

Mr. Chairman, we have heard some fascinating lectures in economics today that range from the primitive to the illiterate, in my humble opinion.

If one stands in front of a slot machine in Las Vegas and can put in $1 and take $2.50 out, one has to have a leak in the think tank to walk away from it. But that is what we are doing. We have a program where we put $1 in and get more than double our money back.

Mr. GRASSLEY. Mr. Chairman, if the gentleman will yield, let us put more money in if it is such a good deal.

Mr. HYDE. It is a good deal and if the gentleman would leave Iowa and just go down to South America and see some of these projects he would learn that they work.

In addition to the economic reasons for supporting this—and it goes beyond simply a better return on the dollar—there is something to be said for stabilizing the economies of the countries in South America. It happens to be, if we check the geography, the closest continent to the United States. We happen to have some friends down there and they happen to have a lot of poverty, and they happen to have a lot of hunger, and they happen to have a lot of illness, and they happen to have a lot of problems. This country has the wherewithal in concert with 130 other countries to put their money together and go in there and initiate projects there to help those people and incidentally, to create markets for ourselves.

Let me suggest if the less developed countries can no longer purchase from us we stand to lose one-third of our exports. Do Members understand and realize that one-third of our exports go to the lesser-developed countries, and that is farm produce and that is manufactured goods, and our deficit of payments, our export imbalance and the falling dollar and all of these things have a direct relationship with the export of goods and services from this country?

There are political reasons, there are economic reasons, and may I be forgiven if I suggest there are humanitarian reasons. The Biblical admonition, I would suggest to my friends, to give food to the hungry and to clothe the naked does not stop when we enter this Chamber. And an aspect of the greatness of this country is the moral leadership we provide. I suggest to the Members that with power goes responsibility and when we can have an operation that politically benefits us, that is in our economic interest, and that permits us to maintain a posture of moral leadership in the world, I just cannot see why we do not go forward with this program.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, I thank my good friend for yielding. I would like to ask him to provide me with some information that I have not been able to get and that is how much international trade has been developed for the United States because of the foreign aid program? In relation to all these exports the gentleman has been talking about to these developing countries who

are buying them from us, could the gentleman tell us in dollars, or in percentages, how much of this is related to foreign aid or how much we would be actually exporting without foreign aid?

Mr. HYDE. I have a list of examples that I have obtained from companies in my area who are very interested in maintaining economic relationships with the lesser developed countries because of the export trade this provides.

Mr. YOUNG of Florida. Of course, I can understand that a company that is selling exports would like that relationship to continue but would the gentleman tell me how much of it is directly related to foreign aid and these other associations we are talking about?

Mr. HYDE. We receive $2.50 for every dollar we invest.

Mr. YOUNG of Florida. But who tells us that?

Mr. HYDE. I do not know who the gentleman listens to, but I listen to the Treasury Department, I listen to the State Department, and I listen to the entrepreneurs in my own district.

Mr. BRINKLEY. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Chairman, I too have the same question as my friend, the gentleman from Florida (Mr. YOUNG). This marvelous slot machine to which the gentleman from Illinois has given reference to, I just do not understand how you can relate one to the other, how we might get back $2.50, or any portion of that from each $1 because I really have not seen any hard and fast evidence, although the gentlewoman from California (Mrs. BURKE) suggested one can depend on the other. It also would seem to be that there are moral and ethical arguments for and against when we start talking about the self-serving end of it and thinking about $1 dollar getting $2.50.

Mr. HYDE. That is what is called a lucky booking in show business, you get paid for doing the moral thing.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mrs. BURKE of California and by unanimous consent, Mr. HYDE was allowed to proceed for 2 additional minutes.)

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, I would like to answer the question by saying that since the beginning of the IFI's since 1976, the United States has made payments to the banks of $4.6 billion and the U.S. economy has received back, not through indirect means, but rather procurement, through contracting on the material, through employment over $10 billion. Considering the fact that we only contribute 18 percent of what the bank spends around the world, and they buy most of their stuff from us, we received back $2.50 for every dollar we have put in.

I would like to address another point, I understand the frustration about the water problem. I remember that I got down in the well and gave the same speech the gentleman from Iowa (Mr. GRASSLEY) gave, on the Labor-HEW bill but, I do not think that because the administration is inconsistent from time to time that we ought to follow it. We are in fact talking about a big difference between the kinds of water projects that are developed in your districts and in mine and the ones in this bill. But we are talking about water projects to provide people with safe drinking water. One of the main causes of death in the underdeveloped world is from diseases, diseases that are water borne. So the water projects we are providing in those countries is to try to stop that. They are not projects of convenience, they are matters of life and death.

Mrs. BURKE of California. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to the gentlewoman from California.

Mrs. BURKE of California. Mr. Chairman, is it not true that the U.S. Chamber of Commerce has projected the amount of the exports and the amount of the lending, and that is the reason they take the position that they do, that they support the international institutions and oppose cutting back on the amount we contribute for this? It is very easy to calculate the amount of money we receive, you take the investment, and the actual number of lenders in the United States, you take the actual number of manufactured goods that are exported, and in many instances the very builders of these projects are American companies and American contracts.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HYDE. Mr. Chairman, I ask unanimous consent that I may proceed for an additional 30 seconds so that I may reply to the gentlewoman from California (Mrs. BURKE).

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HYDE. Mr. Chairman, I appreciate that. The gentlewoman is so right. If we do not accept the Secretary of the Treasury, if we do not accept the State Department, or the rest of the so-called dogooders, then how about the U.S. Chamber of Commerce, which is also very heavily and very strongly for this bill and for full funding?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has expired.

(On request of Mr. YOUNG of Florida and by unanimous consent, Mr. HYDE was allowed to proceed for 1 additional minute.)

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield for a sunshine conversation about the chamber of commerce?

Mr. HYDE. I would be proud to yield to my friend, the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman.

The last time we had this bill on the floor, I read to our colleagues a mailgram from the U.S. Chamber of Commerce saying how all of their members supported the bill and were opposed to a particular amendment that I happened to be offering at the time.

I related to our colleagues the fact that I had just met with chamber of commerce officials from the west coast of Florida just several weeks before that, that was not the position they took. Therefore, I suggest that that mailgram—and I think all of us got it—from the U.S. Chamber of Commerce did not speak the whole truth. I do not think they told their chamber of commerce officials in the various communities throughout this Nation what they told me, and that is the reason I cannot put too much faith in that argument.

Mr. HYDE. Mr. Chairman, if I may regain my time, I just want to say, by negative inference, that I have not heard from other businessmen opposed to this program, and I have heard from many who are for it.

Mr. GONZALEZ. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in my capacity as chairman, as I said on one previous occasion in this debate, of the authorization subcommittee which has jurisdiction of substance of this subject matter.

Although I do feel that the issue which occasioned my speaking before in the preliminary stages of discussion on this precise bill, and with reference to the amendment then pending offered by the gentleman from Florida, may be repetitious, I think it is necessary because of the nature of the flow of the discussion that I have heard this afternoon. I think that it is a responsibility that I must discharge. To remain silent would give the impression that I am acquiescing in the amendment offered by the gentleman from Maryland (Mr. LONG). I do not think that I would want that error to be promoted because it is antithetical to the way I feel.

Mr. Chairman, I have considered the statement of my very distinguished and very dear friend, the gentleman from Maryland (Mr. LONG), and I think he cast himself in the role of a surgeon who wants to remove the fat from the belly. However, I am afraid, after hearing the reasons and the argument and the premise upon which that argument seems to be predicated, that my distinguished friend is more like an aging surgeon who is losing his sight to the point where he is still reaching for that scalpel or that surgeon's knife, but he has taken not the belly but the most indispensable portion of the abdomen, the heart.

Let us not make any mistake about the thrust of this amendment which the distinguished subcommittee chairman is offering.

Mr. Chairman, the reason I say this is for essentially the same reason that I said essentially the same thing about the amendment pending before by the gentleman from Florida, and that is, that stripped of all the arguments which are very hard to argue against in a political year, but which we have confronted every single time we have ever given rise to this discussion or debate, I have no illusions

about any votes that I might be able to change. Very, very eloquent speakers have preceded me and have attempted to focus in on the true nature and extent of the issue pending; but I realize that it is very hard to say that in arguing against a program which appears to be and is described as giving aid and comfort to the needy in faraway lands when we are depriving our own citizens of that type of access to aid.

Distinguished people like the gentlewoman from California have already addressed themselves in a very intelligent, factual, and straightforward way, so the only thing I can say is for the record because I cannot let the record go unchallenged, and that is, make no mistake, we are making a fundamental issue as to policy. There is no question that if the Long amendment is adopted and it survives the bill process and it reaches the President for his signature, and he signs it, that it will in effect cripple President Carter in the most sensitive area of responsibility that a President has, and that is conducting the Nation's business and his relationships with other countries.

The same gentlemen I see here pushing the idea of further involvement in keeping pledges made. Again let us not make any mistake. There is a commitment. We have authorized a commitment in the authorization bills. We have a need for the past 5 years, and there is no other word to describe it. So contrary to what was stated just a few minutes ago, the only message we will be sending to all of these countries—and I think the gentleman from New York made that statement—is not that we are going to tell them that they are not diverting enough funds for the poor; we are saying, Look, we are stopping the world; we are getting off. The United States has given you a clear signal that we are not going to keep our commitments, and you are going to be left holding the bag—most of these other nations who are copartners in this endeavor, for they have advanced their contributions on the contingency that we would keep our pledges and promises. After all, we were the ones who inveigled them into the deal to begin with.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. GONZALEZ was allowed to proceed for 30 additional seconds.)

Mr. GONZALEZ. Again, I must recall to the memory of my colleagues this is the one experiment which now is tested and proved, that has worked, based on a very, very private-initiative type of approach It was initiated under the Eisenhower regime. It was his one great contribution. It has been sustained all through the years because it has worked. The nature of the amendment would make one think that we are asking for more moneys. Actually we are only reaching a point where we are going to be keeping our pledges, which accumulated now and appears to be an increase.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. CARTER, and by unanimous consent, Mr. GONZALEZ was allowed to proceed for 2 additional minutes.)

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Kentucky.

Mr. CARTER. I thank the gentleman for yielding.

I would like to ask my good friend, the gentleman from Texas, if he feels that an appropriation should always reach the level of an authorization?

Mr. GONZALEZ. Each case rests on its own bottom and circumstances to alter things. In this case since the thrust of this amendment will be to completely and radically change our commitment to a national policy that we have upheld, yes, I think it is essential that we keep a commitment that was debated in the authorization bill and which was signaling to these other countries our intention to keep that policy.

Mr. CARTER. If the gentleman would yield further, he well knows that an appropriation rarely approaches an authorization in amount. Many, many times the Committee on Appropriations sees fit to cut the authorization way down, and in cutting this authorization, I will say to my good friend, I submit that we would be following the will of the majority of our constituents.

I thank my good friend for yielding.

Mr. GONZALEZ. I wish to thank my good friend, the gentleman from Kentucky, Dr. TIM CARTER. I respect him and revere him, and I know the thrust of his question. I am not trying to tell him that I do not understand that we have always traveled on this two-track legislative record. I know that. But what I am saying is that in this case the nature of the amendment reaches the essence of the policy. If we do not keep faith with our commitment at this time, it will encumber the President; it will embarrass the President; it will tie his hands and his ability to deal with countries that are critically in need of our attention—and I am speaking of our neighbors here in our front and back yards. It is critical. There would be no hesitation if these moneys were destined for the purpose of raising armies rather than raising standards of living, and I do not think the same gentlemen would be rising to take the position they have if they were to peer into the future and realize what heights of false economy we are reaching in the Long amendment.

If I had the eloquence, I could show that we are making a decision now that will compel us in the future to spend and spend to raise armies and expend American lives, when, alas, it is too late, because of our false economy today.

The CHAIRMAN. The time of the gentleman from Texas (Mr. GONZALEZ) has expired.

Mr. MATHIS. Mr. Chairman, I ask unanimous consent that the gentleman from Texas may proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

Mrs. FENWICK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. YOUNG of Florida. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is not a question of crippling the ability of the President to conduct foreign policy. To the contrary, the President does not really have any authority or jurisdiction in the operation of these World Bank grants. In fact according to some people who work for him in the Treasury Department, he should not. They say we should not politicize the banks. That means you do not use the banks to further your foreign policy. That is their position.

Read the hearing transcripts. That is exactly what they say. This is not going to hamper the ability of the President to conduct foreign policy.

The President said in a much-celebrated speech made at Yazoo City, Miss., not too many months ago that he was against American dollars going to Vietnam in the form of foreign aid. Yet last week the International Association of the World Bank approved a soft loan to Vietnam for $60 million; so even though the President was against it, it still happened.

I think it is important that we find out just where we are in this debate, what we are talking about. We have heard the word "reduction." We have heard the word "cut." We have heard the word "slash"; but let me submit, Mr. Chairman, that we are not slashing anything. If we support the Long amendment, here is what we are doing. The International Development Bank in the fiscal year 1978 bill was $480 million. The fiscal year 1979 bill as reported by the committee is $814 million. With the Long amendment, it would be $560 million, or still $120 million more than last year.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. Mr. Chairman, the gentleman has made a good point. The gentleman realizes that even with the Long-Miller amendment this will be one of the biggest foreign aid appropriations bills in 25 years and the biggest appropriation for these two Banks combined that they have had in their history.

Mr. YOUNG of Florida. Of course, the chairman is correct.

Let me go on. For the International Development Association, the fiscal year 1978 appropriation was $800 million. This bill for fiscal year 1979 is $1,230 million. That is a big increase. The Long amendment would still keep that figure at $900 million, or $100 million more than last year's bill. With the Long amendment, these two items would be $220 million more than they were for fiscal year 1978.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I have trouble conceptually following the gentleman, when the gentleman said that American tax dollars are going to Vietnam. As I understand, we contribute a sum of money to the World Bank and

those funds are commingled with funds from another hundred or so countries, and then a judgment is made on a nonpolitical basis to build an irrigation project in southwest Vietnam where, by the way, some of those hungry people who need the rice were on our side in the late great conflict. I have difficulty understanding why the gentleman says they are our tax dollars, once they are commingled with the funds of the World Bank to build this irrigation project in southwest Vietnam for hungry people.

Mr. YOUNG of Florida. Mr. Chairman, I would say to the gentleman, any American tax dollars going to Vietnam, whether they go directly through AID or whether they go indirectly through the United Nations development program, whether they go through the World Bank or IDA, the American tax dollar going to Vietnam, no matter what the circuitous route might be, is still an American dollar being spent for Vietnam.

Now, on that subject, let me ask this—and I did not intend to discuss that subject at this point in the debate today—Do the Members know that the rice the Vietnamese intend to grow, after they have rebuilt this irrigation system, they intend to grow and use it to reduce their imports to help their balance of trade deficit?

It would be nice, would it not, if somebody would come to the aid of the United States and help us in our fight to reduce our trade deficit, which is running at a rate of more than $30 billion this year?

If this whole idea about foreign aid investment bringing back so much money is true, why is it that every year our foreign aid bill gets larger, so does our balance of trade deficit?

Mrs. FENWICK. Petroleum.

Mr. YOUNG of Florida. The gentlewoman from New Jersey (Mrs. FENWICK) says it is petroleum, but the fact is that petroleum is only 3d item of the list of imports.

The CHAIRMAN. The time of the gentleman from Florida (Mr. YOUNG) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. YOUNG of Florida was allowed to proceed for 3 additional minutes.)

Mr. YOUNG of Florida. Mr. Chairman, petroleum is third on the list today. There are items of manufactured goods of one type or another that come before petroleum as to what is causing our balance of trade problem. I suggest that we need to understand what these banks do.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I think the gentleman from Florida (Mr. YOUNG) has made an excellent point. Some of these loans, both the direct loans and some of them which are very soft, have provisions by which there is no interest paid on them for 10 years.

Mr. YOUNG of Florida. Mr. Chairman, if I may clarify that, there is no interest paid during the 50-year life period of the loans. Nothing is repaid for the first 10 years. Then the principal is supposedly paid over the next 40 years, and no interest is paid during the whole period, only a three-fourths of 1 percent administrative charge.

Mr. ROUSSELOT. No interest at all?

Mr. YOUNG of Florida. There is only one charge of three-quarters of 1 percent.

Mr. ROUSSELOT. I wonder where in this country anyone could get that kind of a loan.

Mr. LONG of Maryland. Mr. Chairman, if the gentleman will yield, there is no interest paid on these loans at all. There is a three-quarters of 1 percent service charge, but no interest rate is charged on the credit. They have 50 years to repay the loan which includes a 10-year grace period.

Mr. ROUSSELOT. Mr. Chairman, if the gentleman will yield further, I appreciate having these points clarified.

One point of interest is that the gentleman informed us that Vietnam is not going to use this rice for the poor and the hungry, but they are going to export it. Is that correct?

Mr. YOUNG of Florida. That is the report I have received.

Mr. ROUSSELOT. Mr. Chairman, may I ask, how does that help the poor and the hungry that we are told about when they turn around and export the product that we gave them the loans to produce?

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. Mr. Chairman, if I yield to the gentleman, will the gentleman ask for some additional time for me?

Mr. JOHN L. BURTON. I would be delighted. I would be honored to. Would the gentleman like to have the additional time now?

Mr. YOUNG of Florida. Yes.

Mr. JOHN L. BURTON. Mr. Chairman, I ask unanimous consent that the gentleman from Florida (Mr. YOUNG) may be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mrs. FENWICK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. YOUNG of Florida. Mr. Chairman, I will yield to the gentleman if I still have any time remaining.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from California (Mr. ROUSSELOT) is recognized for 5 minutes.

Mr. ROUSSELOT. Mr. Chairman, I yield to my colleague, the gentleman from Florida (Mr. YOUNG), an active minority member, who spent a lot of time working on this isssue.

Mr. JOHN L. BURTON. Mr. Chairman, would my colleague then yield to me?

Mr. ROUSSELOT. I will in just a minute. I will have to yield to Members one at a time.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding.

The gentleman from California (Mr. ROUSSELOT) is right. The members of this committee have spent a long time on this issue, but I do not think I have used too much time before this committee yet today on this debate.

There is a lot of information I would like to present to the committee as arguments relative to these amendments we are now considering.

We talked about the amount of the amendments and what the effect was going to be. I would now like to talk about how good some of these programs of the World Bank actually are.

Some of our colleagues have told us they have traveled to various countries in the world and seen projects that are working well. I submit that when a congressional delegation visits a country to see a project, of course, they are going to be shown a project that works well. They are not going to bring out the corruption, for instance, Bangladesh, where $3 million of a $12 million project was ripped off. They are obviously going to hide those projects.

The way to find out whether these projects are really working or not is to take a look at the performance audits of the projects financed by the World Bank, but the problem is they do not really exist.

Mr. ROUSSELOT. Mr. Chairman, let me ask, what did the gentleman find when he really pursued this and asked for those performance audits, the type of audits that we receive from our Federal Reserve bank? What kind of reports did the gentleman get?

Mr. YOUNG of Florida. The first year we asked for them, we did not get any.

Mr. ROUSSELOT. The gentleman did not get any report back?

Can the Members imagine, if we asked the Defense Department for the performance audit or this Committee on Appropriations asked for it and got nothing, what would happen on this floor? I can imagine, and so can the rest of the Members.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield further?

Mr. ROUSSELOT. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, further on this particular point, the General Accounting Office, which is an arm of Congress, did a review of the World Bank operation, and it is interesting to note some of the findings they came up with.

They say, first of all—and I want the Members to get this now—that since the Bank is an international organization, it is outside GAO's audit authority, and GAO did not directly examine the banking operations.

They go on to say:

> Few broad studies have been conducted. Ongoing projects and some activities have never been independently reviewed.

They also go on to say:

> The World Bank's Operation Evaluation Department (OED) has not established detailed policies and procedures for planning and executing the project performance audits which makeup a large portion of its total reviews. Furthermore, it has not given its staff written guidance or training in basic audit techniques.
>
> The Director-General informed us that OED uses on-the-job training to provide the

necessary guidance for basic auditing, techniques; however, no written audit instructions or a systematic training program is given.

Mr. ROUSSELOT. So what the gentleman found is that there has been no real performance audits to determine if many of the multilateral Bank loans really help the poorest of the poor. So what the committee's statement in the report says, that it does not necessarily help the poorest of the poor, is correct.

Mr. YOUNG of Florida. If the gentleman will yield, I cannot say there are no such audits. All I can say is we have not been able to see them.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my distinguished colleague, the gentleman from California (Mr. JOHN L. BURTON), who always has an important contribution to make.

Mr. JOHN L. BURTON. I thank the gentleman for yielding.

Mr. Chairman, I would ask the gentleman this question: Where did the gentleman get the word that none of that rice would be used for domestic consumption for the poor and hungry and that it was going to be used for export? I hope it did not come from that Communist government that we cannot trust.

Mr. YOUNG of Florida. If the gentleman will yield, no, sir. The information on that subject, as a matter of fact, came from a Washington Star newspaper article, which was written after an interview of the unidentified spokesman at the World Bank. In that they report some other interesting items. They say that although the United States voted against the loan, the U.S. representative tacitly supported the loan.

Mr. JOHN L. BURTON. If the gentleman will yield further, if we can put credence in the World Bank, we ought to give them the money. If we can believe what they say, we ought to give them the money; if we cannot believe what they say, we should not give them the money. We cannot have it both ways.

Mr. ROUSSELOT. Mr. Chairman, I wish to make a couple additional points which are brought out in the committee report which I think are important.

My colleague, the gentleman from Florida, and others on this committee, have tried to point out in the past that these loans made by these institutions, under the Long amendment—and that is why I support it—will increase the appropriated dollars by 13 and 17 percent, which is clearly above the inflationary level but is a major contribution. As has already been pointed out, many of these loans are not normal loans. They come through what is called the soft window. In the first 10 years, there is not any payment required. Nothing. The loan is then repaid over the remaining 40 years. Tell me where in this country our constituents can get something like that.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

(By unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Where can our constituents get that kind of treatment?

Additionally, as the gentleman from Florida pointed out, many of these loans go for 50 years—not all of them, but many of them—and no payment is made during the first 10-year period. Those are very, very soft, lenient loans.

What I think our constituents have been trying to tell us is, as President Carter has said, the Long amendment provides for an increase. It does not say, "Stop the world, I want to get off," as one of our colleagues said. It does provide an increase in funds but not the 54 percent and 70 percent.

Mr. Chairman, I compliment the chairman of this committee for bringing this amendment to the floor to show the Members of this House that we can have a minimal restraint on an increase in an area where it clearly is not needed.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has again expired.

(On request of Mr. HYDE and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for 1 additional minute.)

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I would just like to comment that if you compared the soft loans to very poor countries with what our constituents can get——

Mr. ROUSSELOT. Or any group, say, a church group, or some poor group in this country.

Mr. HYDE. I understand. But I hope the gentleman understands that most of his constituents in San Marino, Calif., have a yearly income in excess of——

Mr. ROUSSELOT. But they do not.

Mr. HYDE. May I finish?

Mr. ROUSSELOT. I will allow the gentleman to finish, but let me point out that in Azusa, Calif., and Highland Park, they do not.

Mr. JOHN L. BURTON. If the gentleman will yield, how about Anaheim and Cucamonga?

Mr. ROUSSELOT. That is not in my district.

Mr. McHUGH. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Long amendment.

Mr. Chairman, I think the length of the debate has clearly reflected the importance of this amendment. I hope the members of the committee who are here or are watching on television fully appreciate how significant this is. I think it would be a understatement—perhaps a gross understatement—to suggest that we are considering the foreign aid bill in a very poor climate. There is indeed a tax revolt in the land. The people of our country are understandably concerned about inefficiency and waste in our Federal Government, as we must be. But, I think it is important that we consider the foreign aid appropriations bill in perspective, and that we make an effort to have our constituents see the foreign aid appropriations bill in perspective.

The fact is that this Government spends a little over 1 percent of its total budget on foreign assistance. The fact is that among the developed nations, we are 13th out of 17 in terms of the percentage of gross national product we devote to development assistance. So, I trust that as we consider this amendment, and as we consider other amendments which are offered to this bill, we will not delude ourselves nor our constituents into thinking that we are, in relative terms, doing much more than other developed countries.

It is also important to note that we have succeeded, under both Republican and Democratic administrations, in getting other countries to participate with us in trying to meet the very serious problems of the developing world. Not too many years ago the United States was virtually the only country trying to help with these desperate problems. The fact is that those administrations, both Republican and Democratic, have in recent years obtained the cooperation of many other countries in sharing this burden. And it has been accomplished primarily through these banks which are the subject of Mr. LONG's amendment. It has been done by gettng them to participate in these nonpolitical institutions.

We should not delude ourselves into thinking that if the United States does not meet its commitments to those banks, the other nations will. As I mentioned, it was we in the first instance that got them to participate. And it has worked to our advantage. A good example is provided by the World Bank. The United States in the last replenishment provided 34 percent of the total contribution. At the present time, we are providing 18 percent of the total contributions, which I think rather dramatically reflects how successful we have been in getting other countries to participate, and thereby reduce our own relative share.

Our subcommittee considered very carefully this particular amendment offered by Mr. LONG. We have, as has been noted before, cut the Administration's budget request for the banks by over 25 percent, a cut of $876 million. When this amendment was offered by Mr. LONG in our subcommittee, it was defeated by a 10-to-3 vote. Mr. LONG then took his amendment, this very same amendment, to the full Committee on Appropriations. That is not a committee which is generally associated with liberal foreign aid policies. The amendment by Mr. LONG was then defeated by the full Appropriations Committee, as it was in subcommittee.

Now Mr. LONG, as is his right, comes to the full House and asks all of us to approve an amendment which was twice rejected for very sound reasons. I hope that this full committee will not adopt it. The amendment would not just send a signal that we are concerned about the banks' policies, but it would in fact be a shift of policy, a policy which has been consistently followed under Republican and Democratic administrations for years.

So, I hope that we will act responsibly, and rise above the political climate in which we find ourselves.

The CHAIRMAN. The time of the gentleman from New York (Mr. McHUGH) has expired.

Mr. McHUGH. Mr. Chairman, I ask unanimous consent that I be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. EVANS of Colorado. Mr. Chairman, reserving the right to object, and I will not object, I think we have been educated and reeducated on this subject. I wonder if we cannot vote and pass on to something else.

I do not object, but I hope we can wind up this debate.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. LONG of Maryland. Mr. Chairman, reserving the right to object, I want to make the comment that there are several people who have been waiting very patiently for their 5 minutes, and after that time I would like to move to close the debate at some reasonable hour.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. There being no further objection, the gentleman from New York is recognized for 2 additional minutes.

Mr. McHUGH. Mr. Chairman, we have discussed this amendment at great length. There is very little that can be said new, perhaps nothing new, but this is an important amendment. This is a case where our contributions to the banks are consistent with our humanitarian values as well as our economic self-interest. As was pointed out previously, we receive from the banks in procurement, salaries and other benefits $2.50 or $2.60 for every dollar we put in. That is not why we contribute to the banks, I trust, but nevertheless it is an economic fact which serves our self-interest.

Beyond that, in the long term, the developing countries are essential to the growth of our export markets, particularly in our agricultural sector which now exports one-third of our domestic production, much of it to those developing countries. It is important in terms of our trade balance that these countries develop so they can purchase an increasing share of our commodities.

Frankly, I do not think the Obey amendment to cut 2 percent more from these two banks is necessary in substantive terms. Our committee has already imposed deep cuts. However, if the Members believe a vote is necessary to send a signal to their constituents, then by all means, I hope they will vote for the Obey amendment and reject the Long amendment.

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in opposition to the Obey amendment. I move to strike the last word.

Mr. Chairman, not long ago I got returns, over 20,000 of them, from the questionnaire I had sent to my district, and 95 percent of the people said: "Cut foreign aid."

When I brought this up in the Appropriations Committee, people all around me said: "Oh, my constituents feel just the same way."

Well now, Mr. Chairman, it is their money, and the judgment of the American people is what we are elected to come here and represent. They see too much waste, they see too much graft, they see too high salaries, they see that this program has not encouraged food production around the world, and it certainly has not made friends for us.

Yes, I got a telegram from the U.S. Chamber of Commerce. Probably in my district I have more active chambers of commerce than most of the Members. I have 307 towns in my district. I have never heard from one single chamber of commerce any word in support of the foreign aid program, but I have had many hundreds of letters againts it. In 4 years I have had a total of three letters from the one-half million people in my district who wanted to increase this program.

I think we ought to listen to the people at home and make enough of a cut to show we are listening; and we are going to demand that these banks shape up.

Mr. YOUNG of Florida. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, the argument is always made, every time we go to work on these bills, about how the U.S. share is being reduced every year, but nobody ever goes on to say what about West Germany?

What about West Germany? Their share also is reduced. What about France, Canada, Japan, the United Kingdom, Australia, Austria, Belgium, Denmark, Finland, Iceland, Ireland, Italy, Luxembourg, Netherlands, New Zealand, Norway, South Africa, and Sweden? They all reduced their share of contributions to the bank.

Here is an interesting point: Switzerland made a loan of 52 million Swiss francs to IDA, for the second replenishment, a loan of 130 million Swiss francs to the third replenishment, and proposed an intended loan of an additional 200 million Swiss francs under the fourth replenishment. This 200 million Swiss franc loan was rejected by the people of Switzerland in a nationwide referendum.

So what the gentlewoman from Nebraska (Mrs. SMITH) is saying about how the people in her district feel is true and could be said about the people all over America, just as it was proven in Switzerland in a nationwide referendum. There they rejected Switzerland's contribution to IDA.

I think that is something we ought to pay attention to. While our percentage is going down, so are the percentages of contributions of each of these other nations that I have just mentioned.

Again I thank the gentlewoman from Nebraska (Mrs. SMITH) for yielding to me.

Mrs. SMITH of Nebraska. I thank the gentleman from Florida (Mr. YOUNG) for the comments he has made.

Mr. Chairman, I hope my colleagues will vote down the Obey amendment and support the Long of Maryland amendment.

Mr. ROYBAL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Long of Maryland amendments and in opposition to the Obey amendments.

Mr. Chairman, the debate this year has not differed one iota from the debate held on the same bill last year or for the last 10 years.

We are constantly told that we receive $2.50 for each dollar we invest. That is all well and good but the fact of the matter is that these banks were not established for that specific purpose. They are supposed to be reaching the very poor in underdeveloped countries. The question then must arise on whether or not they are in fact reaching the poor. Every year we are told that they are not. Everyone, regardless of what side he happens to be on refers to some statistics, or to some study that has been made in support of his position. But when officials of the bank testify before the Committee on Foreign Operations, they will be the first to admit that they are not really reaching the poorest of the poor. They say, "We as a bank, are doing the very best we can, we have not completed our job. We need more money so that we can complete our job and really start reaching the poorest of the poor."

Then again when the same individuals testify on matters of human rights, they tell the Congress that they have instructed our representatives to vote against lending money to countries that violate human rights. The truth of the matter is that these banks are making loans to Argentina, to Chile, to Haiti, to Nicaragua, and to Paraguay. These are countries that we definitely know are violating human rights.

But we are consoled by the fact that our representatives votes against it, therefore it is all right.

I say to you that it is not right for these banks to continue to make available funds to countries that do in fact violate human rights.

One other myth that we hear every year is that, "If you don't vote for our requested appropriation we as a contributing country are going to lose influence."

What influence?

Our country's vote against loans to countries that violate human rights has absolutely no influence at all.

Mr. Chairman, I sit on the Committee on Foreign Operations, and every year we are told that if we do not make available the funds demanded by the banks that we will not be living up to our commitment.

Who makes those commitments? Not the Subcommittee on Foreign Operations, not the House of Representatives, nor the Congress of the United States. Those commitments are made by bank executives who go before their peers and commit their Nation and this Congress to a specific amount of money every year. Then we have to bail them out every time this bill comes before this Congress.

Mr. Chairman, I am tired of having to rubber-stamp the demands of those who make commitments without consulting with or even touching base with the Committee on Appropriations, the Subcommittee on Foreign Operations, or any one Member of the House of Representatives.

I must also bring to the Members' attention the fact that the banks seeking these funds are the biggest violators of affirmative action programs in the Federal Government. Just look at their own statistics. Look at what they do insofar as the hiring of women is concerned, and one can be convinced that there is not much opportunity for women in these banks. Insofar as minority groups are concerned, one finds that percentagewise the number of Hispanics and other minorities working for these particular banks is among the very lowest in the Federal Government.

Therefore, Mr. Chairman, I believe that if all of these things are taken into consideration that this House will support the Long amendment. Whatever happens, these banks are going to continue to do their jobs, seeking more funds each year, but in the process I believe that this House and not the banks should at least make some determination as to the dollar amount that they can spend in their operation.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I, of course, rise to oppose the Obey amendment and urge that it be defeated and that the Long-Miller amendment be passed. I think the gentleman from Ohio (Mr. MILLER) should get a little more credit in this matter than I have seen given him in the past.

Mr. Chairman, let me ask the gentleman from Wisconsin (Mr. OBEY) a question so as to get this clear in the RECORD: My amendment, the Long-Miller amendment, reduces the amount to the banks by $584 million. It is my understanding that the Obey amendment only reduces it by a very tiny fraction of that, $25 million; am I correct in that?

Mr. OBEY. If the gentleman will yield, Mr. Chairman, my amendment reduces it by the equivalent of 2 percent, which is $25 million.

Mr. LONG of Maryland. It is $25 million, so we have the Obey amendment as a clear contrast.

As I have said and I am fond of saying, the banks are the fat belly of foreign aid. If we are going to reduce anything, let us reduce the fat belly. Let us not cut off the ears, the nose, the toes, and so on. All the gentleman from Wisconsin (Mr. OBEY) wants to do is to trim the toenails. That is no cut at all. I do not think it is worth this House's time.

Mr. Chairman, the gentleman from Wisconsin (Mr. OBEY) wants a cut of one-twentieth of the amount of money that I propose to cut. I hope we will reject the Obey amendment resoundingly.

With respect to this business that these contributions are commitments we must satisfy, let me say that nobody has committed the U.S. Government to anything until the entire U.S. Congress acts. To say otherwise is to say that we are just here to be messenger boys, to run errands, to do what other people tell us. We surely have a function, and that is to save money and to try to save it where we think it is important to save it. There is no commitment unless the Committee on Appropriations recommends the appropriation and the Congress approves it.

There have been references to legal commitments or moral commitments. I do not know of any commitment that we had any part in. Over and over again, I said, "Before you make these commitments to other countries, why do you not talk to Members of Congress?"

They do not come to any of us before they make all of these commitments in these international conferences. They go ahead and make them, and then they come back and have the unmitigated gall to say, "You are committed." I do not think we are committed to anything. We are here to exercise our function as an Appropriations Committee. For heaven's sake, let us exercise it and do not let anybody else talk us out of it.

Mr. CHAPPELL. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Florida.

Mr. CHAPPELL. I thank the gentleman for yielding.

I commend the gentleman on his amendment, and I rise in opposition to the Obey amendment. Is it not true that the banks, these banks we are talking about, are irresponsible in disbursing funds for the development of industries which are in direct competition with our own country, especially true in the field of steel and citrus and palm oil, sugar, and things of this nature? Is that not true?

Mr. LONG of Maryland. The gentleman is absolutely correct. There has been a billion and a half dollars provided by the World Bank complex and IDB for steel alone. Let me speak to those Members who keep calling us protectionists when we want to stop this practice. What on earth is protectionism about? Is trying to prevent a subsidy of our foreign competition protectionism? I thought free trade meant no subsidies—no subsidies to our own people and no subsidies to foreign competitors.

Let me quote the Congressional Research Services study:

> However, it appears that the Bank's efforts in directly meeting basic needs have been modest to date, and it has done little to organize the poor for self-reliant development.

The report also says:

> . . . The Bank is clearly not reaching the poorest of the poor.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. LONG of Maryland was allowed to proceed for 2 additional minutes.)

Mr. LONG of Maryland. The report further states:

> But generally the IDB does not as yet appear to have a structured overall strategy for initiating, drafting, and carrying out loans in which the poor are significant beneficiaries.

The report also states:

> A large portion of project proposals neglected to examine or establish who is actually to benefit from the project.

When one points out that they have not helped the poor, they say, "Oh, well, they helped sell American goods." There is an old Arab proverb: "He who rides two camels can fall in between." We are either out to help the poor or we are out to sell American goods. If we are out to help the poor, for heaven's sake, let us help the poor. If we are out to sell American goods, I have got a better idea. I know millions of Americans who will buy American goods if we give them the money to do it. And we have the advantage. The money stays here and the goods stay here instead of being sent abroad.

I know a gentleman over here who wants to sell Caterpillar tractors. I have seen Caterpillar tractors in India and elsewhere. The reason we have to send Caterpillar tractors abroad, is because we are not building public works projects in the United States that could use and buy Caterpillar tractors.

It is also pointed out that we have to keep our veto in these IFI's. Let me point out we have no project veto no matter how much we give to the International Development Association. None. Zero. No veto. We do have a project veto for the FSO of the IDB, but let me tell the Members something: We never use it.

Mr. SCHEUER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to support the Obey amendment and to oppose the Long amendment. I do this very reluctantly because of my high personal regard for the gentleman from Maryland, Dr. LONG, both as an outstanding Member of the House and as a topnotch professional economist. I do this reluctantly because we have identical interests in encouraging high-priority treatment for foreign assistance programs designed to help the poorest of the poor in the so-called Fourth World.

I do so reluctantly because I agree with my friend that the World Bank, the International Development Association, and the Inter-Americar. Development Bank can—and should—do more in helping the poor of the world. I agree with Dr. LONG that they should target more of their programs to create jobs and conditions which can lead to better lives for the billion poorest of the poor who have largely been left behind by conventional world development and strategies based on high technology.

And I hope we can send these two Banks a very strong signal that will help them concentrate their minds because, if they do not do a better job in helping the poorest people of the Fourth World in the next year, I think I and many Members of Congress are going to make an agonizing reappraisal of the situation. We may very well come to the conclusion

that, if the International Banks cannot do the job better, then maybe we ought to do the job ourselves bilaterally and not rely on the Banks.

Now, I have talked to the World Bank people, the "soft loan window" and the "hard loan window." They know they ought to be doing a better job of helping the rural poor. They know they ought to be encouraging technology that is labor intensive and not capital intensive. They know the elite of the world are not using these loan programs properly—to the detriment of their country's development prospects. They know they are subsidizing low-interest rates and making labor artificially more expensive and thereby warping normal economic forces to make high technology improvements seem to be more desirable, which the elite own, which the elite profit from.

The World Bank people know this, but they say, "We are limited by the decisionmaking process." The decisionmaking process is composed of some people of the developing nations, the Third World elitists themselves who are bringing in high technology projects that profit the poor very little. And the decisionmaking process is also misguided by decisionmakers from the developed world whose products they are selling and which may not be in the best interests of the developing world.

I would rather see more resources made available directly to the third world directly in bilateral relationships if the international lending agencies cannot get their act together. I think they should be tougher in order to overcome whatever impediments may exist in the form of decisionmakers—both those who want to sell their high capital projects and Third World decisionmakers and those who are the governing elite in those countries and want to profit from certain high technology installations that their countries may not need at all.

If these international lending institutions cannot do something to counteract the destructive effects of these kinds of decisions, I for one in the future may have to come reluctantly to the conclusion that the international lending agencies are not up to the job of helping the poor, and that our agencies may have to take on more of the tasks.

Just a couple of weeks ago we had hearings before a Subcommittee on Science and Technology, which I chair, that has oversight jurisdiction over international scientific cooperation, planning and analysis, and the gentleman from Maryland (Mr. CLARENCE LONG), the chairman of this Subcommittee on Appropriations, testified eloquently, knowledgeably and professionally, without doubt one of the finest economic minds in this country, about the inadequencies of the international lending program in the developing world and how they are persistently and systematically bringing into the developing world high technology projects that do not provide for their needs and provide very little for their people.

Sander Levin, an Assistant Director of the AID program, when I asked, "Well, wouldn't it make sense to have some seminars at the Harvard Business School or MIT and bring some of these decisionmakers up from the developing world for maybe a week or 10 days in a business-like place? We could perhaps explain to them the destructive effects on their economy of making these persistent and systematic decisions toward high technology, when that is the last thing they need."

He looked at me and, said, in effect, trying to be polite, "You are a very naive, well-meaning fellow, but don't believe for a minute that these decisionmakers don't know what they are doing." His actual response was as follows, if I may read it:

> I am not sure it would. I think they know these things. In my judgment it is more of a question of the power dynamics within those countries. * * * I think one of our purposes must be to encourage the leadership of developing countries to indeed be concerned fundamentally with the needs of the poor majority and not to bend to the needs of the elites within those countries. I really don't think that seminars at Harvard Business School, a wonderful place, really will tell them much that they don't know on those points.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. SCHEUER was allowed to proceed for 1 additional minute.)

Mr. SCHEUER. This leads me to believe that they know that focusing mostly on high technology is not the way that is going to help their country. Yet it is going to profit them and until they are subjected to sufficient forces and sufficient political pressure to concentrate their minds in making entirely different levels of decisions, nothing is going to happen.

However, I am concerned that the large reductions could be counterproductive by hurting the very growing emphasis in foreign assistance programs on the problems of the poorest of the poor, which my distinguished colleague advocates so effectively.

The distinguished gentleman from Maryland has been a powerful influence in bringing about this changing emphasis which has been underway since about 1973. He can take much credit for the "new directions and new strategies" both in AID's priorities and programs and those of the multilateral lending institution.

And, it goes without saying that I share his impatience and exasperation that more has not been done more rapidly. As I mentioned earlier, 2 weeks ago the Science and Technology Subcommittee, which I chair, held 3 days of hearings on development strategies and the use of appropriate technology. Put simply, appropriate technology means helping nations find better ways to use the right kind of technology to help themselves—and to help the "poorest of the poor" lift themselves out of poverty, hunger, illness, and despair.

The distinguished gentleman from Maryland has been a leader in promoting development strategies based more extensively on the ideas involved with appropriate technology. Our hearings provided ample testimony that my friend from Maryland is correct in pressing for greater efforts and attention to appropriate technology—and for commensurately less emphasis on the large-scale "trickle-down" development strategies of the past, based upon the "feed the horse to feed the sparrows" principle.

I share my distinguished colleague's long-range objectives and interests, his exasperation and impatience. However, for the time being, my proposed alternative to large-scale cuts below the already large $1.1 billion cut in the administration's request is as follows:

Congress should continue to exert a high degree of pressure and encouragement for AID and the multilateral Banks to speed up and expand their present efforts in helping the poorest of the poor, especially in improving the status of women.

I believe that AID, the World Bank and other multinational institutions will be receptive to firm and reasonable pressure to increase such efforts—and the application of appropriate technologies. As specific measures, I would suggest:

First. Pressing for expanded funding on small-scale, light-capital projects.

Second. Asking for the establishment of "special purpose" contingency funds to finance small-scale, light-capital, labor-intensive programs which might otherwise be overlooked.

Third. Requiring AID and the U.S. Executive Directors in the World Bank and the Inter-American Development Bank to act to encourage the use of small-scale, light-capital, labor-intensive and other appropriate technologies by:

Reviewing the choice of technology in all financial decisions—inquiring in each case what alternatives were considered and why they were rejected as well as stimulating consideration of different technologies.

Encouraging experimentation, innovation, and pilot projects which demonstrate which small-scale, light-capital, and other appropriate technologies work and which do not.

Promoting AID, World Bank, and Inter-American Development Bank involvement in all phases of development from research and development through the pilot stage to the diffusion and application of the appropriate technologies.

For now at least, we should rely on continued persuasion, pressure, and encouragement—and not the large additional budget cut recommended in the Long-Miller amendment.

The CHAIRMAN. The time of the gentleman from New York (Mr. SCHEUER) has expired.

(On request of Mr. ROUSSELOT, and by unanimous consent, Mr. SCHEUER was allowed to proceed for 1 additional minute.)

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SCHEUER. Yes, I will yield, but first I want to say one last sentence.

Mr. Chairman, I support the Obey amendments. With the greatest reluctance, I oppose the Long amendments,

but a year from now, if there has not been a demonstrable, definable, identifiable change in the strategy and tactics of the international lending agencies, then I fear that the kind of amendment the gentleman from Maryland (Mr. LONG) is sponsoring will get my support.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield now?

Mr. SCHEUER. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman's yielding.

Does the gentleman not think the suggestion by both the chairman of the subcommittee—and the gentleman in the well has praised him for his work on this subject—and the gentleman from Florida (Mr. YOUNG) has been a correct one when they say there should be performance audits on these loans so we can see where they go, what they are really doing, and whether they are really helping the poor?

Mr. SCHEUER. I could not agree more than there should be performance audits, and they ought to be made available to every single one of the participating countries.

Mr. ROUSSELOT. Then does the gentleman not think that the amendments offered by the gentleman from Maryland (Mr. LONG), which request a 13-percent increase and a 17-percent increase, would be a way to send these agencies a signal that we need this kind of cooperation?

The CHAIRMAN. The time of the gentleman from New York (Mr. SCHEUER) has expired.

Mr. LONG of Maryland. Mr. Chairman, I ask unanimous consent that all debate on these amendments and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

Mr. GONZALEZ. Mr. Chairman, reserving the right to object, I certainly do not want to intervene here to prolong this anymore than is necessary, but the chairman of the subcommittee and the gentleman who was in the well have made statements that would lead the House to believe that certain things presented in the name of factual information are indeed not so.

Therefore, I would like to ask the gentleman if he thinks 10 minutes will give us enough of a chance to try to clarify this issue, and I wonder if he would amend his request to 15 minutes.

Mr. LONG of Maryland. Mr. Chairman, I withdraw my prior unanimous-consent request, and I ask unanimous consent that all debate on these amendments and all amendments thereto close in 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was agreed to will each be recognized for 40 seconds.

(By unanimous consent, Mr. DAVIS and Mr. PHILLIP BURTON yielded their time to Mr. MATHIS.

(By unanimous consent, Mrs. SMITH of Nebraska yielded her time to Mr. YOUNG of Florida.)

(By unanimous consent, Mr. CARNEY yielded his time to Mr. LONG of Maryland.)

The CHAIRMAN. The Chair recognizes the gentleman from Georgia (Mr. MATHIS).

Mr. MATHIS. Mr. Chairman, we have heard a lot of debate today relative to the Long amendments and the Obey amendments thereto, but there is one thing that keeps coming back during the debate, and that is the statement that the United States has a commitment to the World Bank. We have heard it said time after time that the United States has a commitment to the World Bank.

My question, one that I would like to have any Member answer, is this: Does the World Bank have a commitment to the United States? Obviously the answer is, no, it does not have a commitment to the United States.

In total disregard for what this Congress has voted over the past several years, particularly the last 2 years, the World Bank and its various windows have disregarded what this Congress intended in terms of the loan to Vietnam and in terms of palm oil production—items which we explicitly have instructed our delegates to the World Bank to vote against.

The loan to Vietnam that was mentioned by the gentleman from Florida (Mr. YOUNG) is in direct opposition to what a majority of the Members want. We have tried to instruct the members of the World Bank as to how we want them to vote, as to how we want them to conduct their business. They have failed to do so. Our only recourse is a rejection of the Obey amendment and to adopt the amendment offered by the distinguished gentleman from Maryland (Mr. LONG).

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. CHAPPELL).

Mr. CHAPPELL. Mr. Chairman, I rise in support of the Long amendment, and I would remind the Members again that we have increased our budget for 1979 over 1978 from 17 percent to 54 percent for IDA and from 17 percent to 70 percent for IDB, while at the same time we have reduced our domestic community and regional development budget by 11 percent, public works by 11 percent, and only increased our national defense 9 percent, energy 12 percent, and social security 13 percent. I think this is a good amendment that the gentleman from Maryland (Mr. LONG) has offered. I support it and I hope we will vote down the Obey amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. DAN DANIEL).

Mr. DAN DANIEL. Mr. Chairman, I rise in support of the Long amendment. The foreign aid bill was commenced in the late 1940's, known as the Marshall plan, designed to rehabilitate the war-torn countries of Western Europe, a very sound objective. The American people were promised that this program would last 4 years and cost $17 billion. It has lasted until now, and we have spent over $200 billion, including interest. We have fewer friends in the world than when we spent the first dollar. It has been said that the foreign aid program was not intended for that purpose, and that is true; but neither should we lose friends as a result of it. So I ask, Mr. Chairman: How long will this House continue to abuse the patience of the American taxpayer.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, one focus has been missing in all this debate—and I have sat through all of it—and that is: How does all of this fit into the overall strategy of the United States?

I can understand why our friends in the Soviet Union would oppose any increase here, because wherever there is lack of progress, wherever there are difficulties, wherever there are severe problems or poverty, they move in. But for us to not back up the leaders of our country on this I think is absolutely not in our own strategic interest. I strongly support the Obey amendment and I rise in opposition to the Long of Maryland amendments.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, there are two ways in which this country may get its fiscal house in order. One is to take a meat-ax approach and have a certain percentage cut right across the board. The other way is to exercise our own good judgment in assessing priorities and to pick and choose the good ones as opposed to the bad ones or the lower priorities. This is probably a good program but it should be at the very bottom of our priority list and, therefore, we should support the amendment offered by the gentleman from Maryland (Mr. LONG).

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Chairman, the statement just made is an illustration of the thing I was trying to correct. The gentleman from New York referred, not to an official or spokesman of these development banks, but to an official from one of our own bilateral agencies. Therefore, that is a questioinable judgment.

It is the same thing with reference to what has been said here all afternoon, principally by the chairman, the gentleman from Maryland (Mr. LONG), that the record shows that these moneys and these loans from these development institutions are not reaching the poor. We in our oversight hearings, at which the distinguished gentleman from Maryland appeared, and appeared there exhaustively to reach that question, the evidence we got was to the contrary. The hearings conclusively established a very definite concern on the part of the banks to do exactly what the gentleman from Maryland has been asking be done.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Chairman, I feel it is very important that we do support the Long-Miller amendment and not the Obey amendment. The Obey amendment would reduce the bill before us by $24 million. The Long-Miller amendment would reduce the bill by $584 million.

As we look to the south, and we heard that we need friends in South America—and it is so true—but we also see countries that we have aided in the past, such as Venezuela and the high petroleum cost that they are charging us for their crude oil today, and Brazil, of course, is holding up the price of coffee. We have many problems in paying high prices for many of the items that we purchase in that area. If the Long-Miller amendment is approved, I will not be offering the 8-percent reduction I sent out information on just a few days ago.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. MCHUGH).

Mr. MCHUGH. Mr. Chairman, in 1973 the United States joined with the other countries that participate in the World Bank and made a pledge to contribute to IDA IV, a replenishment necessary to aid the developing world. By 1976, every other country but the United States had fulfilled its pledge. At the present time, the United States is 50 percent short of its pledge.

The administration came to our committee and to this Congress asking us to make up that deficit, which of course explains why the budget request was higher this year. Our committee has cut $876 million out of that request. That is quite enough, and I hope the Long amendment will be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, while I have the attention of the gentleman from New York, I would like to point out that while there is a great deal of uproar this year about the World Bank not aiding the "poorest of the poor," this is unfounded. In fact, Chairman LONG is basing a great deal of his argument for cutting Bank funds on this misconstrued fact. Yet, a closer look at his sources—a CRS study conducted in 1977, and numerous articles written in 1977 and early 1978—will reveal that in this instance, the information may be out of date.

I do not have to tell you how quickly things change. This is now 1978, August of 1978. And the Banks in the last 2 months alone have funded numerous projects—in fact 17 out of 24 of those approved—whose benefits go directly to the poorest of the poor. I would like to give some examples.

First, $34.5 million for an agricultural project in Burma.

Goal: Protect land from flooding and saltwater inundation. Annual increases in production of rice will be 90,000 tons, of jute will be 2,000 tons, and of pulses, groundnuts and other products, 19,000 tons.

Beneficiaries: 19,500 farm families of which 500 are presently landless. This will provide farmland to about 70 percent of the landless families in the area.

Second, $65 million for agricultural settlement project in Indonesia.

Goal: Development of the rubber sector through settlement of poor and landless families on unproductive land.

Beneficiaries: 7,600 families will be settled on 38,000 hectares of land. Priority will be given to the landless families in the area.

Third, $30 million to Indonesia for rural credit.

Goal: Long term investment capital for the purchase of livestock and to improve the fisheries.

Beneficiaries: 40,000 small farmers and fishermen.

Fourth, $150 million for cooperative dairy development in India.

Goal: A national dairy development project to increase India's milk production and rural income.

Beneficiaries: At full development, the project will improve the incomes and living standards of some 20 million people with an average per capita income of 50 dollars.

Mr. Chairman, these are just four of the many projects of this type funded in June and July alone. I have more, in fact I have 4 pages of projects geared for the direct benefit of the poorest people on the earth. And these are the cream of the crop of the total. Would you like to hear about these?

One thing is obvious. The World Bank, and IDA in particular, is dedicating millions of dollars to benefit the truly poor. And, if we do not appropriate the funds for the fourth replenishment, these poor are the ones who will bear the burden of these cuts. Time does have a way of changing things. These projects are concrete proof of the "New Direction" of foreign aid.

LOANS WHICH DO IN FACT AID THE POOREST OF THE POOR

First, $34.5 million for an agricultural project in Burma.

Goal: Protect land from flooding and saltwater inundation. Annual increases in production of rice will be 90,000 tons, jute will be 2,000 tons, and for pulses, groundnuts, and other products, 19,000 tons.

Beneficiary: 19,500 farm families of which 500 are presently landless. This will provide farmland to about 70 percent of the landless families in the project area.

Second, $65 million for agricultural settlement project in Indonesia.

Goal: Development of rubber sector through the settlement of poor and landless families on unproductive land.

Beneficiaries: 7,600 families will be settled on 38,000 hectares of land. Priority will be given to the landless families in the area.

Third, $30 million loan to Indonesia for rural credit.

Goal: Long-term investment capital intended for the purchase of livestock and to improve the fisheries.

Beneficiaries: 40,000 small farmers and fishermen.

Fourth, $150 million for cooperative dairy development in India.

Goal: A national dairy development project to increase India's milk production and rural incomes.

Beneficiaries: 3.5 million subsistence farmers directly. At full development the project will improve the incomes and living standards of some 20 million people with an average per capita income of $50.

The increased milk production also leads to additional employment creation and higher levels of nutrition for the children.

Fifth, $10 million for an irrigation project in Guyana.

Goal: Rehabilitate and extend irrigation and drainage facilities and provide supporting services to increase agricultural production on over 75,500 acres.

Beneficiaries: 6,000 farm families, 98 percent of whom have per capita incomes of less than $180. About 83 percent operate farms of less than 10 acres.

Sixth. $10.7 million for agricultural project in Malawi.

Goal: Improve agricultural extension services, expand fisheries development program, improve village health facilities, extend networks of rural roads.

Beneficiaries: 350,000 will benefit through social and infrastructure services, 40,000 small holder families are expected to increase annual farm income from $75 to $120.

Seventh, $16.5 million for Afghanistan water and sewerage project.

Goal: To supply 70 percent of the Kabul urban population with clean drinking water, alleviate unsanitary living conditions, and reduce waterborne diseases which contribute to Afghanistan's mortality rate being the highest in the world.

Beneficiaries: 630,000 urban dwellers, many in the absolute poverty category.

Eighth, $8 million for second urban project in Botswana.

Goal: Provide minimally serviced, upgraded and settlement plots for about 6,500 households, low-cost sewered plots for about 300 households, house improvement loans and primary infrastructure.

Beneficiaries: 38,000 low income people.

Ninth, $16 million for national seed project in India.

Goal: Increase food grain production through increased supply of high quality cereal seed.

Beneficiaries: 7 million persons.

Tenth. $9 million for water supply and technical assistance to Somalia.

Goal: Improved access to water and a reduction in effective water charges to customers.

Beneficiaries: Urban poor living in low-cost and temporary housing (in the city of Mogadishu).

Eleventh, $15 million for agricultural research in Sudan.

Goal: Improved production systems for livestock and crops, conserving and rehabilitating national resources and improving the standard of living of subsistence farmers and pastoralists.

Sudan is the potential breadbasket of the continent with 200,000 arable acres still to be cultivated.

Twelfth, $17 million for population and family health project in Malaysia.

Goal: Reduce the birth rate from 30.3 per thousand to 26 per thousand.

Beneficiaries: Total nation from improved prospects for development as population decreases.

Thirteenth, Six loans totaling $469.5 million to Mexico, $200 million for agricultural credit.

Goal: Provide credit for investments in crop, livestock, and agro-industrial development.

Beneficiaries: 67,000 farm families (390,000 people). One-third is earmarked for low-income producers. Will create 9,000 additional jobs in the livestock sector.

Fourteenth, $100 million for industrial development; $56 million for tropical agricultural development.

Goal: Develop and bring into intensive agriculture production, 2.4 million hectares in the largest underexploited region in the country.

Beneficiaries: 3,000 farmers with incomes of $700 per year.

Fifteenth, $47 million for small and medium scale industry; $16.5 million for an urban development project.

Goal: Relieve critical shortage of low-cost shelters and other basic urban services and provide increased job opportunities in the region.

Beneficiaries: 50,000 low-income residents; $50 million for tourism development.

Members are saying that we ought to send a message. The committee wanted to send a message to family planning and it was my amendment that restored the money for that particular item, and I know how interested the gentleman from New York (Mr. SCHEUER) is in that subject. Now everyone has to have a "whipping post" and without really making a study, without looking in depth at what these banks are doing, they begin to criticize. I say, before we send a message, let us have real proof that such a message is necessary. As of now, none has given me such proof and my information says just the contrary. With this in mind, I hope the Long amendment is soundly defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Chairman, I want to point out that the committee has already cut this bill to the Banks by 25 percent. My amendment would cut 2 percent more. It gives us a chance of maintaining the commitment that was made by Presidents of the United States, and President Carter is trying to live up to that commitment.

We cannot keep complaining about a weakened President, we cannot have our President go to Geneva and engage in a summit conference in which he makes agreements with other countries to do certain things in the international community, and then when he returns from that conference, the Congress immediately cuts his legs off and puts the United States in violation of international agreements we made many years ago.

I urge the Members to cast a responsible vote and vote for my amendment.

● Mr. ALEXANDER. Mr. Chairman, as bread is the staff of life, water is the drink of life; for plants, and animals, and humans. Even while acknowledging that too much water, in the form of floods, means damage and death to people, homes, crops, and businesses, we know that too little water also means damage and death. Our people have a long history of using private and public investment to deal with both kinds of situations.

In addition, we have developed a tradition through our bilateral aid programs and our participation in international financial institutions of aiding the people of other nations with water resource development efforts.

There has cropped up in recent years increasing debate over the appropriateness of continued Federal participation in the development of our Nation's water resources. Indeed, the discussions seem to be trending further and further in the direction of a water resource nondevelopment policy for our own people even while we continue to participate in international financial institution support of development of water resources in other nations.

The House has rejected this nondevelopment policy for water resources by its action last year and again this year. We know that there are urgently needed projects that are worthy of and deserving of Federal investment. One such project, Cache River Basin, is located in the congressional district in Arkansas that I represent. It has been, and still is under attack, even though the planned design is one that balances food production and environmental protection needs.

As proposed, the Cache project can bring aid to flood control efforts of families, business, and farmers even while it helps to insure the protection, conservation, and enhancement of fish and wildlife habitat in the river basin. The region it serves is just one of the many across the Nation that would be betrayed by the adoption of a national policy of nondevelopment of water resources.

Water is one of our Nation's most abundant and most essential natural resources. Failure to manage this resource in such a way that it works for us while at the same time protecting its environmental values would be to fail the best interests of our people.

The contrast between what many propose for our own people in the area of water resources and what our Nation supports for the people of other countries is clearly evident in the developments of 1977.

In that year the Congress was faced with deciding how to deal with proposals to cut $177.4 million from the original budget request for investment in U.S. water resources. At the time the debate on this was going on the United States, as a participant in the Inter-American Bank and the International Development Association was assuming responsibility for helping finance 23 water resource projects in 19 countries. At the most conservative estimate, the U.S. responsibility for those projects was $232.86 million.

Those of us who recognize the urgent need in our Nation and the rest of the world to manage our resources in such a way that water serves our needs to its fullest potential while at the same time we respond to the need for protecting its environmental values must continue to wage our battle to educate and persuade people to an understanding of the need for wise, orderly, and managed development.

Because I believe my colleagues will be interested in the contrast I mentioned between U.S. water projects in 1977 and those we helped underwrite for other countries I am including a chart, at this point, providing some pertinent information. (Chart follows.)

COMPARISON OF U.S. AND FOREIGN WATER RESOURCE PROJECTS (1977)

U.S. PROJECTS ON "HIT LIST" FOR DELETION IN 1977

State	Type	Name	Original estimate (millions)
Oregon	FC R. WQ	Applegate Lake	$7.4
Louisiana	N	Atchafalaya River and Bayous Boeuf, Black and Chene	5.1
Do	FC. E	Bayou Bodcau and Tributaries	2.4
Arkansas	FC	Cache Basin	2.0
Kansas	FC, WS, R	Grove Lake	1.0
Do	FC, WS, WQ, R	Hillsdale Lake	14.0
Wisconsin	FC, R	La Farge Lake	2.0
Oklahoma	FC, WS	Lukfata Lake	.2
Missouri	FC, R, WS	Meramec Park Lake	10.0
Georgia and South Carolina	HP, R, E	Richard B. Russell	$21.0
Mississippi	R, FC, WS, WQ	Tallahala Creek Inlet	5.0
Kentucky	R, FC, WQ, E	Yatesville Lake	7.2
Tennessee	E, R, WS	Columbia Dam	20.0
California	I, HP, R	Auburn	39.7
Colorado	I	Fruitland Mesa	7.7
Do	I, R	Narrows unit	9.7
South Dakota	I, R, WS	East Oahe	17.0
Colorado and Wyoming	I	Savery-Pot Hook	6.0
Total			$177.4

FOREIGN PROJECTS FUNDED BY INTER-AMERICAN DEVELOPMENT BANK AND INTERNATIONAL DEVELOPMENT ASSOCIATION IN 1977

Nation	Type [1]	Cost (millions)	Loan terms: Interest rate	Loan terms: Payment years
Brazil	HP	$69.8	8	20
Colombia	HP	70.0	8	20
Ecuador	I	11.8	[2] 1	
			[3] 2	
El Salvador	HP	45.4	[2] 1	
			[3] 2	
		45.0	8	25
Guyana	FC, I	49.5	[2] 1	
			[3] 2	
Jamaica	I	12.5	2	36
Mexico	I	54.0	8.4	20

Sri Lanka	I	19.0	.75	50
Do	I	5.0	.75	50
Malawi	PD	8.0	.75	50
Burma	PD	10.0	.75	50
Cameroon	PD	10.0	.75	50
Honduras	PD	5.0	.75	50
Total		$689.5		

[1] FC—Flood control; R—Recreation; WQ—Water quality; N—Navigation; E—Employment; WS—Water supply; HP—Hydropower; I—Irrigation; PD—Power development.

[2] In 10-yr grace period.
[3] In 30-yr payment period.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Chairman, while the Obey amendment is supposedly accomplishing a 2-percent cut in this particular account, and while it is a 2-percent cut in the IDB fund, it is only seven-tenths of 1 percent in the International Development Association. Just a quick calculation I think will establish that particular figure.

On the argument about whether the World Bank projects are good or bad, whether they work or do not work, I am satisfied we can pick out projects that work, and I can show Members a number of projects that do not work.

I am saying if we do not begin to focus attention on these projects, if we go ahead year after year approving them, then without concern for the adverse, then we will not get rid of the bad ones. That is what we are doing today, focusing on the bad ones.

At this point I am going to submit for the RECORD this international policy report, from the Center for International Policy, in Washington, D.C., that is full of examples of fraudulent practices in some of these programs. It cites specifically examples of how the World Bank officers knew about some of these ripoffs and advised their people in the field to ignore them and go ahead with the loan.

Mr. Chairman, the report follows:

BANGLADESH: AID TO THE NEEDY?

(By Betsy Hartmann and James Boyce)

(Betsy Hartmann and James Boyce were in Bangladesh from 1974 to 1976 on grants from Yale University. They are currently writing a book about the village in which they lived for nine months.)

[Figures not printed in RECORD.]

Each year almost $1 billion in aid flows to Bangladesh, much of it from the United States and U.S.-supported international financial institutions. Roughly a third of the country's food aid comes from the U.S. Yet poverty and famine persist.

Though 90 percent of the population is rural, only one third of government rationed foodgrains go to rural areas and often not to the most needy. In a country where survival often depends on access to arable land, 33 percent of the households are landless and another 29 percent eke out an existence from holdings of an acre or less.

Bangladesh's poverty is rooted in a social order which benefits a small elite at the expense of the poor majority. This elite holds power from the national government down to the village level, and it is through this elite that foreign aid is channeled. Under such conditions Americans can expect their foreign aid dollars to perpetuate rather than alleviate poverty in Bangladesh.

Since its violent birth in 1971, Bangladesh has become famous for its poverty. In the world press, the devastation and displacement of the independence war have been followed by stark reports of hunger and overpopulation. Today no country better symbolizes the plight of the poorest of the poor.

Bangladesh is the world's eighth most populous nation. Its 83 million people live in an area smaller than the state of Wisconsin, and its population density is the highest of any country in the world except Singapore and Hong Kong. Per capita income is around $100 and life expectancy is 46 years, compared to 70 years in most developed countries. Less than a quarter of the Bangladesh population is literate.

Most deaths in Bangladesh are due to malnutrition and infectious diseases. World Bank figures indicate that over half of all Bangladesh families consume less than the minimal 1,500 calories per day and more than two-thirds of the population suffers from protein and vitamin deficiencies. Infant mortality is high; approximately one-quarter of Bangladesh's children die before reaching the age of five. Health care is poorly developed and concentrated in the few urban areas.

Nine out of 10 of Bangladesh's people live in rural areas where most make their living from the land. Agriculture accounts for 60 percent of the country's GNP; and jute, the number two crop after rice, provides four-fifths of Bangladesh's exports.

The country's low level of industrial development is a legacy of colonialism. Before the British conquest in the eighteenth century, Bengal was one of the richest provinces in India. The fine muslin cloth produced by the weavers of Dacca was famous throughout the world, and both agriculture and commerce thrived in the area. To meet the needs of its industrial revolution, the British transformed East Bengal into an agricultural hinterland, producing raw materials for the Empire.

With the end of British rule in 1947, predominantly Muslim East Bengal became East Pakistan. However, the area fared no better under Pakistani rule. The majority of Pakistan's population lived in the eastern wing, yet West Pakistanis dominated the military and civil service. Although East Pakistan's jute was the main source of the nation's foreign exchange, development expenditures were concentrated in West Pakistan. Per capita income rose in the western wing but not in the east. East Pakistan's agricultural production stagnated and the area, long an exporter of rice, had to import food by the mid-fifties to meet its needs.

Tensions between the two wings culminated in the Bangladesh independence struggle of 1971 under the leadership of Sheikh Mujib. Independence brought hope that the country, freed at last from the shackles of colonialism, could develop its economy and address the basic needs of its people. The challenges were tremendous. On the surface, if ever there was a country deserving of foreign assistance, it is Bangladesh.

Within three years of independence, the new nation received $2.5 billion in aid commitments, more than it had received in its 25 years as East Pakistan. Today aid flows to Bangladesh at a rate of almost a billion dollars per year. Much of it comes from the U.S. and U.S.-supported international financial institutions. (See Table 1.) In the current fiscal year, estimated U.S. economic assistance amounts to $128 million, placing Bangladesh among the top recipients of U.S. aid. Since independence, Bangladesh has been second only to India as a recipient of aid from the World Bank's soft-loan affiliate, the International Development Association (IDA).

This massive influx of aid comes from three types of sources: bilateral government-to-government agreements, multilateral organizations, and private sources. (See Figure 1.) Bilateral assistance accounts for two-thirds of total aid, and most is provided by Western nations, with the United States the leading donor. Since 1975 aid from the Soviet bloc and from India has decreased, while aid from the OPEC nations has grown. Multilateral aid, accounting for 30 percent of the total, includes assistance from the World Bank, the International Monetary Fund, the Asian Development Bank, various U.N. agencies and the European Economic Community. Private sources, including voluntary agencies and private suppliers' credits, provide only 4 percent of the total aid flow.

Foreign aid to Bangladesh can be divided into three broad categories: food aid, commodity aid, and project aid. (See Figure 2.)

Food aid consists primarily of rice and wheat, most of it given to the government for sale through its ration system. The foremost food donor is the U.S., through its P.L. 480 programs. Canada and Australia are also major donors.

TABLE 1.—AID COMMITMENTS FOR U.S. BILATERAL AND U.S.-SUPPORTED MULTILATERAL OUTLETS, FISCAL YEARS 1972-77

[In millions of dollars]

Fiscal year [1]	Bilateral		Multilateral			
	AID	P.L. 480	IDA	IBRD	ADB	IMF
1972	199.1	87.2				
1973	101.7	59.4	212.9		9.2	67.9
1974	28.9	50.9	74.1		17.3	7.3

1977	62.2	83.1	127.0		68.5	71.3
Total	489.9	705.6	782.1	54.9	198.7	303.9

[1] Bilateral data as of fiscal year 1977 is by new U.S. fiscal year (Oct. 1-Sept. 30), with transitional quarter (July 1-Sept. 30, 1976) included in fiscal year 1976.

[2] By consolidation loan-credit agreement, Bangladesh assumed liability for $54,900,000 in IBRD loans and $37,500,000 in IDA credits disbursed in East Pakistan.

Note: Abbreviations: IDA = International Development Association, IBRD = International Bank for Reconstruction and Development (World Bank), ADB = Asian Development Bank, IMF = International Monetary Fund.

Sources: AID, "U.S. Overseas Loans and Grants," July 1, 1945, to Sept. 30, 1976, and to Sept. 30, 1977; International Monetary Fund, "International Financial Statistics," March 1978.

Commodity aid pays for the import of nonfood items. The U.S. Agency for International Development, for example, supplies funds for fertilizer, and IDA provides import credits which the government uses to buy such items as spare parts for its jute mills and raw cotton for its textile mills. Commodity aid is often tied to purchases from the donor country, so that prices paid are sometimes substantially above those available on the world market.

Project aid channels assistance to specific development projects in all spheres of the economy, including industry, agriculture, and infrastructure such as roads, bridges and communications. In theory, the Bangladesh government takes the initiative by requesting aid for particular projects. But in practice, the donors make funds available for projects of their own design and choosing, and the Bangladesh government makes its requests accordingly. The details of the project are worked out in negotiations between the government and the donor, and the final outcome reflects the objectives of each. Though the donors control the pursestrings, their power is circumscribed by the government's control over project implementation.

In recent years major aid donors have sought to coordinate their efforts, partly to increase their leverage on the Bangladesh government. In the fall of 1974 a Bangladesh Aid Group, patterned on the aid consortiums for other developing countries, was formed under the leadership of the World Bank. The Aid Group currently includes 24 nations and institutions which together provide 80 percent of Bangladesh's foreign aid. The World Bank's position as chair of the Aid Group adds to its considerable influence in Bangladesh.[3]

Most Americans support foreign aid in the belief that it helps the millions who live in what World Bank President Robert McNamara calls "absolute poverty": "a condition of life so degraded by disease, illiteracy, malnutrition, and squalor as to deny its victims basic human necessities."[2] But many Americans are puzzled by the fact that despite years of foreign aid involving billions of dollars, the world's poor are becoming even poorer.

Many aid donors have come to recognize that even if a developing nation succeeds in raising its GNP, this does not necessarily benefit the poorest segments of the population. In fact, a rising GNP may reflect an increase in the income of the well-to-do, while the conditions of the poor continue to deteriorate. For this reason, donors have begun to shift their attention from economic growth to meeting "basic human needs": the right to adequate food, shelter, clean water, health care and education.

To meet these basic needs, McNamara and many other aid officials conclude that resources must be redirected to the rural areas where 70 percent of the people in the developing countries live. In particular, aid programs must benefit small farmers, for as McNamara says, "Without rapid progress in smallholder agriculture throughout the developing world, there is little hope either of achieving long-term stable economic growth or of significantly reducing the levels of absolute poverty."[5]

U.S. legislation on foreign assistance reflects this new concern with redirecting aid to meet the basic needs of the rural poor. Congress has mandated that development assistance and food aid be channelled to countries which stress selfreliance, involve the poor in the development process, and take steps to increase the productivity of the small farmer. AID has assimilated this language into many of its project descriptions.

TABLE 2.—*U.S. food aid to Bangladesh—fiscal years 1972–78*

[In millions of dollars]

Fiscal year	Title I loans	Title II grants	Total
1972	-----	87.2	87.2
1973	-----	59.4	59.4
1974	41.2	2.7	50.9
1975	237.3	4.5	241.8
1976*	181.7	2.5	183.2
1977	61.8	19.3	83.1
1978*	91.2	9.8	104.0

* Fiscal year 1976 includes the transition quarter (July 1 to September 30, 1976; 1978 figures are proposed).

NOTE: Aid figures are commitments.

SOURCES: AID, U.S. Overseas Loans and Grants, July 1, 1945 to September 30, 1976, and September 30, 1977; fiscal year 1976 submission to Congress, February 1977.

But while it is easy to speak of meeting the basic needs of the poor, it is far more difficult to ensure that aid will actually further this objective. Programs which on paper are supposed to help the needy often look very different in the field.

FOOD AID—WHO GETS IT?

For the nine months in 1975, the authors did research for a book in a village in northwestern Bangladesh. To minimize the differences between the villagers and themselves, they lived in a small bamboo house, spoke Bengali and wore local clothing. By approaching the villagers as equals, they eventually were able to win their trust. They learned that the supposed beneficiaries of foreign aid, the small farmers and the landless, were the last to receive it. While commodity aid did not directly affect them, food and project aid did. Instead of reaching the poor, such aid benefited those who needed it least.

Our village was typical of many in Bangladesh. The majority of its 300 inhabitants were small peasant farmers, most owning less than two acres of land apiece. One-quarter of the villagers were completely landless, and many others owned so little land that they drew their main source of income from share-cropping or working for daily wages of five taka (roughly 35¢) of the lands of others. Except for the few rich peasants who owned over 10 acres apiece and the landlords who owned over 50, life for most of the villagers was a constant struggle for survival.

In the fall of 1974, Bangladesh experienced a serious famine centered in our district where an estimated 100,000 people starved to death. Emergency measures to feed the hungry were belated and inadequate. In the nearest town, five miles from our village, the government set up a few gruel kitchens where destitute people stood in line all day to receive a single roti (unleavened wheat cake).

Aid officials concede that the mass starvation of the famine was due not so much to a lack of supply of food grains as to inadequate distribution. Merchants hoarded grain, and the government's distribution system broke down. Villagers reported that food intended for the hungry wound up on the black market where it sold at exorbitant prices. Food donations from private organizations met a similar fate. During our stay in the village, milk powder imported by a church-affiliated group for local feeding programs was sold freely on the black market in the town bazaar.

The 1974 famine was not an isolated incident. While we were in Bangladesh, hundreds of thousands of tons of rice and wheat arrived as food aid. Ninety percent of this went to the government for sale through its urban-oriented ration system. Only the remaining 10 percent was earmarked for relief and food-for-works projects, and not all of this reached the poor.

The U.S. provides roughly a third of Bangladesh's food aid, under Titles I and II of the Agricultural Trade Development and Assistance Act (P.L. 480). Under Title I, the Bangladesh government buys American food by means of concessionary loans and then distributes it according to its own policies. Title II food, given as a grant for disaster relief and humanitarian purposes, is usually disbursed through private voluntary agencies. Since 1974, 94 percent of American food aid has come to Bangladesh under the Title I program, giving the Bangladesh government virtually total control over food aid distribution. (See Table 2.)

The Bangladesh government sells the Title I food at subsidized prices through its ration system. Ironically, most goes to those who could best afford to pay the market price: the urban middle class. Twenty-seven percent of rationed food-grains is allotted to members of the military, police, and civil service and to the employees of large enterprises; another 30 percent goes to the predominantly middle-class ration holders in the six urban areas. Nine percent is supplied to mills which sell flour to bakeries catering to the urban consumer.[4] (See Figure 3.) It is no secret that the primary purpose of the ration system is to keep prices low for the politically volatile urban population.

Although 90 percent of Bangladesh's people live in rural areas, they receive only one-third of the government's rationed foodgrains and have last access to government stocks. In theory their ration is half that of a city dweller, in practice they receive even less. The rural ration dealers siphon off a substantial portion of the foodgrains and sell them on the black market. For this reason, a dealership is a key form of political patronage. The local dealer in our area received the job because his father-in-law had

Footnotes at end of article.

been head of the local administrative body, the union council.

During our nine month stay, the people of our village were able to buy rationed foodgrains on only five occasions. Each time their quota was only half a pound of grain per family member. On one occasion we did see food aid reaching needy people. While visiting an adjacent area affected by floods, we saw a union council member handing out cornmeal biscuits from a tin dated 1963 and labeled, "Office of Civil Defense, U.S. Department of Defense." The biscuits had evidently been produced for American fallout shelters during the days of the bomb scares. After more than a decade, the U.S. government decided to dispose of them. They were reportedly on their way to Cambodia when Phnom Penh fell, at which point they were redirected to Bangladesh. Each villager received one rather stale biscuit.

Food aid does increase the overall availability of foodgrains in Bangladesh. However, very little of it reaches the poor whose problem is not lack of supply but lack of purchasing power. Even when rice was plentiful and selling at a reasonable price in the local bazaar, the poor of our village went hungry. After Sheikh Mujib's death in August, 1975, rice prices plummeted from seven *taka* to three *taka* per kilo, partly because hoarders, fearful of reprisals by the new government, hastily unloaded their stocks on the market. While rice prices were at their lowest level in many months, Hari, a landless peasant of our village, died of slow starvation. Unable to find work in the slack period before the autumn harvest, he could not provide food for himself and his family. He was caught in a vicious cycle: without work he could not eat and became weak, and because he was weak, employers were less likely to hire him. When Hari caught a cold, his body, weakened by hunger, could not resist it. Within a week he was dead.

As long as villagers like Hari lack the means to earn a livelihood, no amount of food aid will solve the problem of hunger in Bangladesh. With its present bias in favor of the urban middle class, food aid not only fails to give short-term relief to the poor; it also has adverse long-term effects.

Despite the stipulation in P.L. 480 that American food aid should relate to "efforts by aid-receiving countries to increase their own agricultural production,"[5] the U.S. Embassy in Dacca acknowledged in a 1976 cable that, "The incentive for Bangladesh government leaders to devote attention, resources, and talent to the problem of increasing domestic foodgrain production is reduced by the security provided by U.S. and other donors' food assistance."[6] The budget priorities of the Bangladesh government reflect this fact. While agriculture generates 60 percent of gross domestic product, it receives only 30 percent of the government's development expenditures. Moreover, food aid undermines domestic food production by reducing the government's need to procure grain from local farmers and thus support prices at harvest time.

The sale of foodgrains through the ration system is a major source of government income, providing about one-fifth of the revenue budget in fiscal year 1977. To ensure continuing food aid and income from its sale, the Bangladesh government is said by aid officials to consistently under-estimate the amount of each harvest in its reports to the international donors.[7] Bangladesh might even now be self-sufficient in the production of foodgrains.

PROJECT AID—A TUBEWELL FOR THE LANDLORD

Project aid would seem to offer donors greater scope for translating their concern for the poor into concrete action. Much project aid is directed to the rural areas, where most of Bangladesh's needy people live. The World Bank's IDA, the foremost donor of project aid to Bangladesh, devotes about half its project aid to agriculture and rural development. (See Table 3.)

Though Bangladesh is often described as a land of "small farmers," the reality in the villages is more complex. On the one hand, a large percentage of rural people own no land at all. They work for wages and are chronically underemployed. On the other extreme are landlords whose holdings, though modest by American standards, are large enough to free them from the necessity of working in the fields for a living. They let out their land to sharecroppers, usually on a 50–50 basis, or else cultivate with hired labor.

A recent AID-commissioned study on the hierarchy of interests in land in Bangladesh reveals that less than 10 percent of rural households now own more than half the country's cultivable land, while more than 60 percent of rural families own less than 10 percent of the land. (See Figure 4.) One-third of rural families own no cultivable land at all, and by including those who own less than half an acre, the study concludes that 48 percent of the families of rural Bangladesh are "functionally landless." Pointing to the difficulties of collecting reliable data, the authors of the study note that these figures probably *underestimate* the actual extent of landlessness and the true level of concentration of land ownership.[8]

Not surprisingly, the small minority of families who own over half the land are, in the words of the study, "at the apex of the structure of power in rural Bangladesh; the political economy of the countryside is controlled by them." A "dichotomy between ownership of land and labor on it" is widespread, and disparities between rich and poor are growing. This then is the economic and social context within which rural development efforts and attempts to help the poor take place. Our village was typical in this respect.

Project aid reached our village in the form of a deep tubewell, one of 3,000 installed in northwestern Bangladesh in an IDA project. The tubewell, designed to produce enough water to irrigate 60 acres of land, is a valuable asset, for with it irrigation farmers can grow an extra rice crop during the dry winter season. Irrigation also insures the regular spring and monsoon season crops against drought, and allows earlier plantings which reduce the risk of flood damage.

On paper, the tubewell will be used by a farmers' cooperative formed especially for this purpose. According to the press release which announced the project, each tubewell "will serve from 25 to 50 farmers in an irrigation group."[9] But in reality the tubewell in our village was considered the personal property of one man: Nafis, the biggest landlord of the area. The irrigation group, of which, Nafis was supposedly the manager, was in fact no more than a few signatures he had collected on a scrap of paper.

Nafis inherited his 70 acres of land from his father, who had become rich by serving as a rent collector and procurer of village women for the local zamindar, the great feudal landlord of the colonial era. While attending college, Nafis joined the late Sheikh Mujib's Awami League and soon became an influential figure in local politics. Shortly after independence he was appointed vice chairman of the union council, in which position he misappropriated the few blankets and sheets of corrugated tin which came to the village as postwar relief supplies.

The IDA tubewell was by far Nafis' greatest patronage plum. Though each tubewell cost the donors and the government more than $12,000, Nafis paid less than $300 for his, mostly in bribes to local officials. The tubewell sits in the middle of a 30-acre tract of Nafis' best land. Since it will yield enough water to irrigate twice that area, Nafis says the smaller farmers who till adjacent plots will be able to use his water—at a price. But the hourly rate he intends to charge is so high that few of his neighbors are interested. As a result his tubewell will not be used to its full capacity.

The inefficiency of this arrangement is compounded by the fact that large landowners like Nafis tend to cultivate their lands less intensively than small owners. The small landowning peasant, who tills the soil with his own hands, knows that his work determines how much he and his family will have to eat. He invests more labor in his agriculture, and strives to use every bit of land and every drop of water to its utmost. The landlord's incentive is not so great, and that of the sharecroppers and wage laborers who work his land is often minimal.

A sharecropper knows that half the fruits of his labor will go to the landlord, so he saves his extra efforts for the little land he owns himself. Hired laborers worry about their wage, not about the landlord's yields, and since he must pay for their labor, the landlord uses it more sparingly. So giving a deep tubewell to Nafis is not only inequitable, but also inefficient.

At first we were surprised that the beneficiary of the World Bank's aid should be the richest man in our village, but on closer investigation we learned that this was not so strange. A foreign expert working on the project told us, "I no longer ask who is getting the well. I know what the answer will be, and I don't want to hear it. One hundred percent of these wells are going to the big boys. Each thana[10] is allotted a certain number of tubewells. First priority goes to those with political clout: the judges, the magistrates, the Members of Parliament, the union chairmen. If any are left over, the local authorities auction them off. The rich landlords compete, and whoever offers the biggest bribe gets the tubewell. Around here the going price is 3,000 taka (less than $200)."

"You see," he explained, "On paper, it's a different story. On paper, all the peasants know these tubewells are available. If they want to have one, they form themselves into a democratic cooperative, draw up a proposal and submit it to the union council, which judges the application on its merits. the union council then passes the proposal to the Thana Irrigation Team, which again judges the case on its merits. If the proposal is accepted, the foreign consultants verify that the site is technically sound. So on paper it all sounds quite nice. Here are the peasants organizing to avail themselves of this wonderful resource. When the high-level officials fly in from Washington for a three-day visit to Dacca, they look at these papers. They don't know what is happening out here in the field, and no one is going to tell them."

An evaluation sponsored by the Swedish International Development Authority (SIDA), which helped to finance the tubewell project, confirms that the experience of our village was typical. The evaluator concluded after examining 270 tubewells:

"It is not surprising that the tubewells have been situated on the land of the well-to-do farmers, or that it is the same well-to-do farmers who are the chairmen and managers of the irrigation groups. It [would have] been more surprising if the tubewells had not been located on their land, with the existing rural power structure, maintained largely because of the unequal distribution of the land."[11]

Given the social realities of rural Bangladesh, the outcome of the World Bank's tubewell project was entirely predictable.

Footnotes at end of article.

TABLE 3.—*IDA loans to Bangladesh by sector (as of November 30, 1977)*

[In millions of $]

Project AID:	
Agriculture and rural development	$215.9
(of which irrigation is)	(113.9)
Transportation and telecommunications	67.1
Industry	28.0
Cyclone rehabilitation	25.0
Education	22.6
Urban water supply	22.1
Population planning	15.0
Miscellaneous	49.0
Project AID total	444.7
Commodity AID (import credits)	425.0
Total IDA loans	869.7

Source: IDA, Statement of Development Credits, November 30, 1977.

The village potentates of northwestern Bangladesh were not the only beneficiaries of the project. Corrupt government officials took their share in the form of sundry bribes and kickbacks. The SIDA evaluation notes that the tubewells provided certain officials with "a source of additional income, as they could protract or expedite matters in the decision-making process relating to the allocation of their tubewells. Most actions or non-actions could (and can) be priced." [12] But the man who appears to have benefited most from the tubewell project is neither a government official nor a village landlord. He is a private businessman named Jahural Islam, reputed to be Bangladesh's richest citizen.

Islam was a patron of the late Sheikh Mujib, whose wife sat on the board of directors of Dacca Fibers, one of Islam's companies. After months of behind-the-scenes maneuverings, the details of which remain shrouded in secrecy, Dacca Fibers won the contract for supply of the pumpsets for the IDA tubewell project. In the process, the price tag on the pumpsets jumped to $12 million, although another company had reportedly offered to provide them at the World Bank's original cost estimate of $9 million. According to a report in the Far Eastern Economic Review, at this point the Dacca staff of the Bank urged that the project be postponed or cancelled altogether, but they were overruled in Washington.[13] In the words of one official, Islam's extra $3 million was "easier than robbing a bank."

For the poor of our village, the only conceivable benefit of the project will be the employment generated by Nafis' extra rice crop. Nafis plans to work part of his tubewell land with hired labor and to lease part to sharecroppers. (Since the yields on this irrigated land will be higher, Nafis intends to take two-thirds rather than his customary half of the crop; "After all," he says, "I bought the well.")

Against any employment benefits one must weigh the negative effects of the tubewell: with his extra income, Nafis will be better able to buy out smaller farmers when hard times befall them, driving them into the ever-growing ranks of the landless. He already has an eye on the plots nearest his tubewell.

Aside from buying more land, Nafis is unlikely to invest his extra income in agriculture. He is more likely to spend his money on imported luxuries, such as the Japanese motorcycle he bought while we were in the village. In fact, little of the new wealth which foreign aid has bestowed upon the rich of Bangladesh is ever channeled into productive investment. Many wealthy Bengalis prefer the security of foreign bank accounts.

Footnotes at end of article.

Although Bangladesh is desperately short of industrial capital, Jahurul Islam has not invested his millions in factories, preferring instead the quick and easy profits of the import-export trade. As Bangladesh's most successful entrepreneur, he has now gone multinational, shifting his headquarters to London and focusing his business skills on the oil-rich nations of the Middle East. Meanwhile, the luxury imports and capital exports of the rich cut into Bangladesh's troubled balance-of-payments, undermining the economy.

What lessons has the World Bank drawn from this project? "The Bank is not blind to these things," explains one official, "but our ability to do anything about them is limited. If the government doesn't have the will to help the small farmers, we can't force them to do it. We can advise, we can write provisions into our projects, but without that genuine commitment on the part of the government it just won't work." Most Bank officials seem willing to accept this as a regrettable fact of life. What disturbs them most about the project is not that rich landlords received the tubewells, but that owing to fragmentation of holdings they won't use them to capacity. The latest World Bank irrigation project for northwest Bangladesh remedies that fault by relying on a more "appropriate" technology: 10,000 shallow tubewells designed to irrigate a more modest 15 acres each.

The shallow tubewells have several advantages. They are easier to install and maintain than the deep tubewells. Most importantly, they "require much smaller groups of farmers for optimal utilization," for as the Bank cautiously concedes, "problems have occurred in organizing farmers' groups large enough to use the DTW's (deep tubewells) to capacity." [14] For these reasons shallow tubewells have suddenly become quite fashionable among Bangladesh's aid donors; altogether 35,000 of them are to be installed in the next five years, not only by the IDA but also by the Japanese, the Germans, the Indians and the Asian Development Bank.

What about the rural poor? The World Bank admits, "In a project such as this where the major result is to increase the productivity of the land, to a large extent the distribution of direct benefits must reflect the existing land ownership pattern." But there is hope: "In setting up the institutional arrangements for the project, however, particular attention was paid to ensuring that small farmers get at least a fair chance to benefit from the project." [15] Indeed, the Bank estimates that two-thirds of the families to directly benefit from the project will have incomes below subsistence levels, and that they will own 40 percent of the land to be irrigated.

How will the allocation of the tubewells insure this distribution? Some will be sold for cash or on commercial bank credit to individual buyers, who will undoubtedly be large landowners as only they could afford such an investment. But half the tubewells will be reserved for cooperative groups, formed under the government's Integrated Rural Development Program (IRDP). According to a Bank press release, "For a farmer's group to be eligible for credit at least 50 percent of the land to be irrigated must belong to farmers owning a total of three acres or less. This insures that small farmers will benefit from the project." [16]

Judging from past experience, the impact of such provisions on what actually happens in the village will be minimal. There is little reason to expect the IRDP cooperatives to avoid the pitfalls of the deep tubewell "irrigation groups." A January 1976 report by a Senate study mission notes two weaknesses in the IRDP:

"(1) The larger farmers tend to gain control and decide policy and programs to suit their own profit, and (2) the IRDP workers assigned at the thana level are generally more responsive to their superiors in the bureaucracy rather than to the peasants whom they are intended to serve." [17]

Given these realities, the Bank's assurances concerning small farmers seem curiously naive.

In the social context of rural Bangladesh, powerful large landowners will inevitably secure a disproportionate share of scarce aid-provided resources, notwithstanding the good intentions and special provisions of the aid donors. Like the deep tubewells before them, the World Bank's shallow tubewells will add to the wealth of the country's landed elite. Though excluded from direct benefits, small farmers will feel the indirect effects of such aid as the larger farmers use their increased leverage to buy them out.

What of the landless, who already comprise one-third of the families of rural Bangladesh? Obviously, the donors cannot give agricultural inputs to those who have no land. But the Bank maintains that the landless will indirectly benefit, since irrigation generates employment. One wonders if giving aid to the rich so that they can hire more poor people to work for them at subsistence wages is really the best way to help the poor. Moreover, increased employment is offset by growth in the numbers of landless, which aid to the large landowners only accelerates. How much consolation can a small farmer who is forced to sell his land derive from the prospect of rising employment opportunities in the landlord's fields?

FAMILY PLANNING—EXTENSION WORK IN THE VILLAGES

Family planning is another important focus of project aid to Bangladesh. In fiscal year 1978, AID is giving over $9 million for population planning in Bangladesh, roughly 15 percent of the total aid package. Most of this money is earmarked for the supply of birth control pills and condoms. But given the nature of government family planning services in Bangladesh, it is unclear how much of this will actually reach the poor.

We found great interest in birth control in our village, especially among those who already had enough children to help in the fields and provide for them in their old age. In fact, within a few weeks of our arrival, several village women begged us to help them get pills. They recognized the advantage of birth control; their problem was getting access to it.

Despite the fact that AID had already given large amounts of pills to the Bangladesh government to be distributed free of charge, the only pills the villagers had seen were marketed by a travelling merchant woman at a price of eight *taka*, more than the average daily wage, for a month's cycle. Several daring women had bought them without their husband's knowledge, but lacking instructions on how to use the pills, they soon became pregnant.

In response to the villagers' pleas, we visited the government family planning office in the nearest town and requested that extension workers come to our village. After their arrival, we learned why the demand for birth control in the villages was not being met. Wearing expensive jewelry and silk saris, the extension workers were educated, middle-class town women, separated from the village women by a gulf of arrogance and indifference. They addressed the villagers in upper-class Bengali and in their presence asked us how we could stand the "inconvenience" of living in a "dirty village." After they left, the villagers inquired if they were our sisters from America.

The family planning workers promised to return within three days with a supply of

pills, but it was many weeks before the villagers saw them again. They claimed that they could not come because their jeep had broken down, and they were unable to walk the five miles to the village from the town, a distance many villagers covered by foot every day. This explanation did not inspire confidence, nor did the ensuing discussion. The extension workers began by telling the village women it was immodest not to wear blouses beneath their saris. Unable to afford blouses, the village women sat for a moment in an embarrassed silence. Although the extension workers left behind a carton of pills, the villagers doubted they would ever return to replenish the stock, much less to supervise the women's taking of the pills.

Our village's encounter with the family planning service demonstrates the fact that outsiders cannot simply deliver development to the poor. Drawing its staff from the country's elite, the Bangladesh government not only lacks the will to effect changes that would help the poor at the expense of the rich, it lacks the ability to carry out even those programs which would benefit the poor at no cost to anyone. The concept of public service is alien to those who look upon the majority of their compatriots with disdain. For them, villages are to be escaped, not to be served.

Aid donors are now recognizing the limitations of using upper-class government servants for extension work in the villages. The government's newest $45 million population project, funded by the World Bank and six bilateral donors, provides for the training of 12,000 village women as basic health and family planning workers in a new "barefoot doctor" approach. However, as basic literacy requirement will limit employment to those few women with a primary school education, and these are usually the most well-to-do women in the villages. It remains to be seen whether this approach will succeed in bypassing the deeply rooted social prejudices which block assistance to the poor.

Family planning is closely tied to the whole system of health care delivery in Bangladesh. Although the donors have taken some steps to fund village-oriented programs, they continue to emphasize a technology-intensive, centralized form of medical services. The Bangladesh government is currently under pressure to allow the U.S.-supported Cholera Research Lab on the outskirts of Dacca to be converted into an International Institute for Health, Population and Nutrition Research. The Institute will be funded and controlled by a group of international agencies, including AID.

Critics charge that the Institute will exacerbate the already pronounced urban bias of medicine in Bangladesh. Over three-quarters of Bangladesh's doctors serve the 10 percent of the population who live in urban areas; there is only one doctor for every 40,000 people in the rural areas.[18] The glamor and high pay of the Institute can be expected to lure trained personnel away from efforts to improve health care in the countryside. Moreover, control of the Institute will be in the hands of foreign researchers who often are more concerned with the collection of data than with the delivery of services.

Dr. Zafrullah Chowdhury, the head of a successful small-scale, village-oriented health care project in Bangladesh, writes that in the case of the Institute and similar projects, "The preponderance of foreign research stultifies any growth of local efforts, making a monopoly of health science. The population is used, while the effective solutions to the problems of health and family planning are subtly avoided."[19] The Institute is yet another example of project aid which may harm rather than help the needy.

THE IMPACT OF AID ON HUMAN RIGHTS

Foreign aid is extremely important to the Bangladesh government. Aid currently finances four-fifths of the development budget and provides approximately half of the Government's total financing. (See Figure 5.) Aid is now equivalent to more than 10 percent of the country's gross domestic product, another indication of its colossal scale. Aid fills the country's large trade deficit, which is almost double its current level of exports. (See Table 4.) This dependence on aid tends to undermine initiatives towards self-reliance, for the government finds it much easier to rely on the flow of capital from abroad than to make the hard decisions necessary to develop the economy from local resources. Aid can also prevent political change by keeping regimes afloat which would otherwise sink under the weight of popular discontent.

TABLE 4.—FOREIGN AID AND IMPORTS/EXPORTS, FISCAL YEARS 1973-78

[In millions of dollars]

Fiscal year	Imports	Exports	Trade deficit	Foreign aid disbursements	Aid as percent of trade deficit
1973	727	340	387	420	109

In Bangladesh aid has financed narrow, elite-based governments which cling to power by suppressing political dissent. Sheikh Mujib, whose overwhelming electoral victory in 1970 precipitated the independence struggle, originally enjoyed tremendous popular support. After the war, as "Father of the Nation," he returned from his incarceration in West Pakistan to a hero's welcome in Dacca. But within two years popular enthusiasm for the Sheikh waned as the corruption and nepotism of his ruling Awami League provoked widespread disenchantment.

Smuggling of foodgrains to India and hoarding by merchants pushed rice prices to astronomical levels; by 1974 the inflation rate reached 100 percent and the black market flourished. In late 1974, Mujib responded to his mounting opposition by declaring a state of emergency in which he suspended civil liberties and instituted press censorship. In January 1975 he scrapped the parliamentary system, outlawed all political parties except his own and declared himself President.

Mujib's rule ended abruptly in August 1975 when he was assassinated by disgruntled junior army officers, paving the way for a series of coups. In November 1975, rank-and-file soldiers mutinied against their officers and toppled the government. Under the leadership of the J.S.D. (*Jatiyo Samajtantrik Dal*—Socialist Nationalist Party), a socialist party which owes allegiance to neither Moscow or Peking, the soldiers demanded the release of all political prisoners and called for the creation of a government in "the interest of the poorer class." In the wake of the mutiny, Major-General Ziaur (Zia) Rahman, a well-known nationalist and friend of Colonel Abu Taher, leader of J.S.D.'s armed wing, assumed leadership of a new martial law regime. He soon turned against the J.S.D., imprisoning its leadership (which had just been released from jail) and launching a concerted crackdown against the party's supporters throughout the country.

In July 1976, a special martial law tribunal, meeting in secret within the confines of Dacca Central Jail, convicted a number of J.S.D. leaders of conspiracy and antistate activities. Taher, a hero of the independence war, received a death sentence and was hung in Bengal's first official political execution since the days of British colonial rule.

While promising a swift return to civilian government, Zia instead consolidated his military regime by silencing political opposition. In its 1977 Annual Report, Amnesty International estimates that there are 10,000 to 15,000 political prisoners in Bangladesh, most held without trial. The majority of prisoners are said to belong to the J.S.D., but followers of the late Sheikh Mujib and members of numerous other parties are also incarcerated. Trials, when held at all, often take place in secret before martial law tribunals; defendants do not have the right to legal counsel. Amnesty International has expressed concern about the "wide jurisdiction" of these martial law courts, which are empowered to try both civilians as well as members of the military not only for martial law offenses but also for offenses "punishable under any other law."

Within the jails, Amnesty International reports that the treatment of prisoners "borders on conditions that are inhuman."[20] Jails are grossly overcrowded and food, sanitation and health care are inadequate. Criminal gangs operating with official connivance terrorize political prisoners. Last June, rampaging prison guards attacked inmates at Dacca Central Jail in a blood incident which the government has yet to explain. According to the *Far Eastern Economic Review*, "When order was finally restored, over 3000 prisoners out of a total of 5000 (though Dacca Central Jail's official capacity is 2900) were found to have fallen victim to violence."[21]

Zia has attempted to legitimize his rule by giving it the facade of democracy. He declared himself President in April 1977 and in May held a "referendum" in which he claims to have won 98 percent of the vote. *The Nation* reports that, "Voters were given the choice of publicly placing a marble in either a black box or a box displaying Zia's face."[22] On December 15, 1977, Zia announced the formation of his own political "front," apparently in preparation for national elections later this year. In any elections held under the present circumstances of martial law, Zia will enjoy the obvious advantage. Major opposition parties, including the J.S.D. and the Democratic League of former President Mushtaque, remain banned and freedom of the press is curtailed.

Zia's strong-arm methods have failed to bring stability to the country. Last October a convulsive mutiny again broke out in the armed forces, in what appears to have been a spontaneous expression of rank-and-file discontent. Zia responded with mass executions, setting yet another ominous precedent for the subcontinent. According to a State Department cable revealed by the *Washington Post*, 217 military personnel were executed in the wake of the mutiny, and "30 to 34" of these may have been executed prior to the formalization of military courts."[23] The London *Sunday Times* reports 600 executions.[24] The mass executions have prompted Amnesty International to declare Bangladesh an urgent action case.

To secure his grasp of power, Zia has increasingly devoted scarce government resources to building up his security forces. (See Table 5.) Expenditures for defense, justice and the police have grown from 20 percent of the revenue budget in Mujib's time to 30 percent today. Fearing unrest in the army, Zia in 1976 militarized the police, creating a 12,500-man special task force to carry out "special drives, mopping-up operations and other activities requiring training and techniques."[25]

TABLE 5.—*Government expenditures on "defense, justice and police" fiscal year 1973–1977*

[In millions of taka]

Fiscal year	Expenditures	Percent of total current expenditures
1973	513	17.6

Zia has received military assistance from both Great Britain and the United States. The British government is providing $1.3 million worth of telecommunications equipment to the Bangladesh police, and eight senior British military officers are helping to set up a military staff college north of Dacca. The U.S. is channelling security assistance through the International Military Education and Training Program (IMET). The administration's fiscal year 1979 IMET budget request for Bangladesh of $250,000 (up from $200,000 last year) is intended to bring 27 Bengali officers to the United States to study "management techniques." In the context of Bangladesh's martial law regime and the country's small military elite, such assistance acquires a significance far beyond the modest expenditure involved. By strengthening internal security forces, IMET funds could well contribute to a further deterioration of the human rights situation in Bangladesh.

The U.S. State Department is not unaware of human rights abuses in Bangladesh. In compliance with legislation prohibiting food aid to countries with "gross violations" of human rights unless the food goes to needy people, the State Department recently delayed the signing of a P.L. 480 contract with Bangladesh until the government accepted a clause specifying that the food would go to the needy.[26]

The State Department's 1978 human rights report on Bangladesh, however, minimizes the extent of human rights violations in the country. For example, it estimates the current number of political prisoners as "up to 2,000" and reports prisoner releases, while failing to mention fresh arrests which have led Amnesty International to conclude that "there is no ground to revise" its estimate of 10,000 to 15,000 political prisoners.[27] Similarly, the State Department notes "some physical abuse of ordinary prisoners," neglecting to mention the brutal incident at Dacca Central Jail.

As a mitigating factor to human rights abuses, the State Department cites "encouraging evidence that President Zia is moving to implement economic policies designed to meet the needs of the vast bulk of the rural population—nearly all of whom can be defined as the "poorest of the poor'." But the fact that the Bangladesh government finds it necessary to violate human rights and suppress opposition to maintain itself in power, suggests that the regime's policies are not very popular. A narrowly based government, drawing support from the country's small elite, is not only likely to violate human rights, it is also unlikely to advance the economic rights of the poor. In such a context, human and economic rights are inseparable.

Footnotes at end of article.

ECONOMIC RIGHTS

In Bangladesh where millions of people suffer from lack of food, shelter, clothing, education, clean water and health care, the new emphasis of aid donors on meeting "basic human needs" would seem to be singularly appropriate. But the examples of aid in our village demonstrates the difficulties of translating this concern into concrete action.

We have seen how agricultural development projects, which are supposed to indirectly benefit the landless by generating employment, also have the indirect effect of increasing the numbers of landless by accelerating the concentration of land in a few hands.

Similarly, rural works projects are supposed to help the landless by providing them with jobs. These, however, have not been a priority in Bangladesh; and even if more aid were channelled through such projects, the extent to which the landless would benefit is open to question. As an AID-sponsored study points out:

"Such projects (e.g., the building of a farm to market road) provide income to rural workers for a specified period, but do nothing generally to change the fundamental economic conditions that produced unemployment in the first place. At the same time, such projects tend to provide long-term benefits to landholders who, in this example, use the road to gain access to local markets." [28]

In the same vein, the World Bank warns that the scope of reducing unemployment and poverty through rural works projects "would be offset by the inequitable distribution of secondary benefits of the program." [29] As one experienced aid official told us, "It's hard to see much we can really do for the landless." Lacking the means to earn a livelihood, the landless seem doomed to live and die in absolute poverty.

As for the small farmers, who though somewhat better off are still among the poor, the current strategy of the government and the aid donors is to provide them with agricultural inputs and credit through cooperatives. The favored vehicle for instituting such cooperatives is the Integrated Rural Development Program, which now covers about half of the country's 410 thanas. The World Bank has recently embarked upon an ambitious $16 million rural development project in seven thanas, building upon the IRDP and involving rural works, credit for the purchase of farm inputs, construction of government buildings, and agricultural extension. According to a press release, "One of the most important goals of the project will be to reduce the domination of rural institutions by the more prosperous and politically influential farmers and to make farm credits and agricultural inputs . . . available to 'small farmers' through the cooperative system." [30]

How the Bank will accomplish this laudable goal is far from clear. To quote from the conclusions of the Swedish International Development Authority's evaluation of the IDA tubewell project:

"Cooperatives of different types and with different functions have been introduced to the farming community of the subcontinent again and again. There is a long "tradition" of establishing cooperative societies—a tradition which can be said to have set a record in at least one respect—the number of failures. . . .

The reasons behind this are not difficult to understand, as democratically functioning cooperatives never can work if land holdings continue to be as unevenly distributed as they are today. To try to keep the big landowners outside the cooperatives—if they realize that there is something to be gained from being a member—is nothing but wishful thinking.[31]

The social realities of rural Bangladesh stand in the way of aid to the small farmer as well as to the landless.

Rather than springing from the villagers' own initiative, these cooperatives are introduced to the village from outside. While paying lip service to local initiative ("the rural poor must participate in designing and operating a program which involves so many of them" [32]), the World Bank in practice relies on its own experts to design its projects and on government servants to implement them.

In Bangladesh today, rural development, financed by foreign aid and directed by an elite-controlled government, primarily benefits the rural rich. As World Bank President McNamara noted in his 1973 Nairobi speech, "The politically privileged among the landed elite are rarely enthusiastic over the steps necessary to advance rural development."

Writing in Foreign Affairs, Escott Reid, a former senior World Bank official, has gone further than McNamara in spelling out the implications of this fact:

"The power structure in many rural areas of the low-income countries, notably in India, Pakistan and Bangladesh, is a serious obstacle to the success of any large programs of rural development works. The rural elite will try to get control of any development works program to abort or twist it to serve their own purposes. . . .

"Governments . . . have to work out measures providing reasonable assurance to the Bank Group that the projects will be so organized and monitored that they will help the rural poor. In the long run . . . this means that in many very poor countries the governments will have to help the poorer farmers, the underemployed artisans and the landless laborers to organize themselves against those who hold power in the villages." [33]

This prescription sounds oddly naive. Certainly no one acquainted with the present military regime of Bangladesh could entertain illusions about the government helping to organize the poor against the rich in the villages. One must ask how many third world governments are determined to help the rural poor at the expense of the rural rich, and why it is that the rural elite is singled out for abuse but not the urban elite which controls the government. Though there are certain conflicts of interest between the two elites, both benefits from the present order of society and wish to preserve it. Moreover, in Bangladesh most members of the urban middle and upper classes are first or second generation city dwellers with roots still in the villages. The urban elite which controls the government and the rural elite which controls the villages are not only natural allies, they are also blood relations.

These elites monopolize the resources which flow into Bangladesh as aid. But they do not invest their new wealth in ways that will have maximum benefit for Bangladesh, preferring instead to focus on land and commercial ventures or luxury imports and capital exports. Meanwhile, they block any steps toward the social reconstruction which alone could bring development to the poor majority of their compatriots. Against these realities the humanitarian hopes of aid donors are dashed.

DEVELOPMENT THAT MEETS BASIC NEEDS

Certainly, with fertile land, abundant water and other vast untapped resources, Bangladesh has the potential to afford all its citizens a decent livelihood. The primary obstacles to realizing this potential are social rather than technical. Of paramount importance is the question of control of the country's most basic productive resource: the land.

Because there are so many landless in Bangladesh, simply dividing up the largest holdings among them would give each only

a small piece of land. If a ceiling of 10 acres per family were perfectly implemented and the excess land redistributed among the landless, each family would receive less than 0.4 acre. A more drastic four acre ceiling would yield enough surplus to provide each landless and near landless family with a total of 0.86 acre.[34] But even if such a radical reform were carried out, over time lands would be subdivided among children, and for one reason or another some peasants would end up selling out to others, so that eventually a landless group would reemerge. This suggests that land reform, though necessary, would not alone be sufficient to overcome the roots of poverty in Bangladesh. Access to land is only half of the answer to the needs of the rural poor; the other half of the answer lies in the cooperative use of the land.

Cooperation in agricultural production would enable the peasants of Bangladesh to undertake self-help development projects which would remain impossible as long as agriculture is organized on a fragmented, individual basis. Through labor intensive construction of irrigation facilities, drainage canals and embankments, the peasants could collectively begin to master the forces of nature in the face of which single individuals are powerless. As the people of our village remarked, "One bamboo alone is weak; many bamboos lashed together are unbreakable." The certainty that the peasants themselves would reap the fruits of their labor, rather than the village landlords, would release tremendous popular energy and initiative.

Western experts tend to disparage such an alternative approach to development. The authors of the AID study, for example, dismiss this possibility in a single paragraph.

"The least credible of cooperative institutions in contemporary Bangladesh would seem to be joint farming societies. A committed ideologue—with an eye on allegedly successful communes in the People's Republic of China—might hope to foster joint farming experiments in Bangladesh utilizing in the first phase of such a program previously landless agricultural laborers on government lands. But such experiments would have limited economic or political meaning unless the joint farming exercises were implemented on a national scale and were themselves preceded by radical redistribution of existing rights to land. More significantly, the success of joint farming cooperatives would seem to require a total transformation of people's attitudes toward the land. It is difficult to imagine the people in the countryside (even the landless), committed as they are by tradition to venerate individual rights in land, being amenable to joint farming activities of any kind. Only under circumstances in which the state was able and willing to employ extraordinary coercive power can such joint farming cooperatives be envisaged in Bangladesh. Therefore, for reasons that are practical rather than ideological, joint farming cooperatives do not appear to be a viable option within a general program for rural development."[35]

But are joint farming cooperatives in Bangladesh really such a far-fetched idea? Certainly no one should underestimate the difficulties involved in such a major social transformation, but one must distinguish between difficulties and insurmountable obstacles.

The assertion that the peasants of Bangladesh are committed by tradition to "venerate individual rights in land" is an overstatement. Land ownership in Bangladesh has been far from stable. After 1947, the migration of Hindus to India and the breakup of the zamindari system resulted in the transfer of ownership of three-quarters of the country's land to new hands. It was through such a transfer that the father of Nafis—the recipient of the IDA deep tubewell in our village—acquired his extensive landholdings. The villagers recall this with bitterness; they hardly venerate Nafis' rights to the land.

While we were in the village, we witnessed the constant turnover of land, the buying and selling through which small farmers are being gradually dispossessed. Certainly, land is more than just another commodity to the peasants of Bangladesh, for land ownership can spell the differences between survival and starvation. But this is a question of economic security, not of quasi-religious attitudes.

Furthermore, the notion of cooperation was far from alien to the peasants of our village. Many small landowners worked together in informal mutual aid groups. Five or six peasants would join together during the plowing, transplanting or weeding of the fields or at harvest time, working one day on one man's land, the next day on another's and so on. Mostly this was done by small farmers, but sometimes landless friends would join the group, being paid by whoever owned the land that was worked on a particular day. The villagers explained, "When you work alone, time passes slowly. Working in a group, we talk and sing and the work gets done much faster."

A transition to joint farming in Bangladesh would necessarily pass through stages, perhaps building at first upon the existing tradition of mutual aid groups. It would have to rely on the peasants' own initiative—it could never be *imposed upon* them. Once convinced that change was possible, the landless and small farmers could be expected to actively support land redistribution and the growth of agricultural cooperation, for these would bring them improved living standards as well as greater control over their lives and labor.

Rich landowers would probably be less than enthusiastic about such changes, and force might be necessary to break their resistance. Coercion and the violence of state repression, as well as the more subtle violence of starvation, are today routine in Bangladesh. What would be "extraordinary" about and coercion involved in a social reconstruction would not be its scale but rather the fact that it would be employed against the wealthy minority, instead of against the poor majority.

To suggest that the road to development in Bangladesh lies in this direction is not to say that the "Chinese model" can or should be exactly duplicated in the country. The people of each country must chart their own path of development. What the Chinese have shown is that change is not impossible and that starvation is not inevitable. Development is a great challenge, one which can only be met through the mobilization of the talents and energies of the poor themselves.

There is no natural barrier to the satisfaction of the basic human needs of Bangladesh's people. But there is the man-made barrier of a social system which benefits the few at the expense of the many. Governments of, by and for Bangladesh's wealthy elite are clearly unsuited to the task of leading the social reconstruction which alone could bring development to the country's poor. Aid which shores up such governments, even if given in the name of the needy, only postpones an attack on the roots of poverty in Bangladesh.

POLICY IMPLICATIONS

U.S. foreign aid springs from a combination of impulses, some humanitarian, others involving the promotion of trade or the wielding of political influence. Speaking before the World Bank's Board of Governors in 1973, McNamara stated that in his view, "The fundamental case for development assistance is the moral one," but the previous year he alluded to other motives:

"When the highly privileged are few and the desperately poor are many—and when the gap between them is worsening rather than improving—it is only a matter of time before a decisive choice must be made between the political costs of reform and the politicial risks of rebellion . . . Social justice is not merely a moral imperative. It is a political imperative as well."

While McNamara sees a happy coincidence between his moral and political objectives, in practice humanitarian goals may conflict with the dictates of economic and political interests. Sometimes political interests block humanitarian assistance. In Laos a severe drought has raised the specter of famine, but the same cold war mentality which justified our massive bombing of that country now blocks the possibility of U.S. food aid.[36] In other cases, as in Bangladesh, aid of questionable humanitarian value may be supported by those whose overriding concern is short-term political "stability" and by those with an economic interest in the multimillion dollar aid program.

As McNamara argues, in the long run economic development may be the key to political stability. But it does not follow that in the short run political stability is the key to economic development. This is especially true if what is stabilized is the political power of a narrow elite which puts its own interests above those of the country's poor majority. Indeed, the entrenched power of such an elite may itself be a fundamental obstacle to meaningful development.

Unfortunately, aid donors usually gloss over these complexities. For example, in introducing its $205 million budget request for Bangladesh for fiscal year 1978, AID states:

"The U.S. political interests in Bangladesh are limited and reflect a concern for the impact that instability in Bangladesh could have on the subcontinent as a whole. The primary U.S. objective in Bangladesh is developmental and humanitarian."[37]

The extent to which developmental and humanitarian objectives conflict with the interests of the present regime's elite constituency is ignored. As justification for its fiscal year 1978 request for $200,000 for training Bangladesh military officers under the IMET program, the State Department remarks, "We will help to improve an institution which contributes to stability in Bangladesh and in the region."[38] But the stability to be purchased by propping up a narrowly-based military regime in Bangladesh is likely to prove illusory.

The conflict between humanitarian motives and political expediency is not limited to bilateral forms of aid. Some have argued that multilateral institutions such as the World Bank, which are supposedly "above politics," would be a better channel for U.S. development assistance. Under its Articles of Agreement, the Bank is indeed required to base its lending decisions solely on economic criteria and not on political considerations. But the political nature of the World Bank's aid was graphically demonstrated when it cut off all aid to Chile during the three years of Allende's government, only to resume it once the military junta seized power.

The underlying assumption of aid donors' "basic human needs" strategy is that aid can be reformed to live up to its humanitarian and developmental goals, even in countries like Bangladesh. Our experience in Bangladesh suggests that while aid can perhaps be improved, it can never solve the problems of the poor because it fails to address their social roots. To what extent can aid to Bangladesh be redesigned to better help the poor? Appropriate technology, for example, offers scope for limited improvement. Cheap,

Footnotes at end of article.

manually operated tubewells, designed to irrigate only an acre or two, would be more likely to benefit the poor than the sophisticated, expensive tubewells of the current IDA projects. If these small tubewells were plentiful enough—that is, if the countryside were flooded with hundreds of thousands of them—the large farmers would not be able to monopolize their use. Besides being more accessible to small farmers, the operation of such tubewells would be labor-intensive, bringing substantial employment benefits to the landless. But the potential for helping the poor through such technical changes is limited by the social realities of Bangladesh. Production gains from irrigation would still be distributed in proportion to land owned, so that the rural rich would still tend to benefit more than the poor.

A more promising direction for project aid might lie in the development of services for the poor: health care, education, family planning, and the provision of clean drinking water. But as our village's encounter with the government family planning service indicates, one can not assume that such aid will automatically benefit the poor. Clearly, the training of personnel drawn from the villages and a reversal of the present urban orientation of public services are prerequisites for bringing the benefits of such aid to the poor. Successes are possible, as demonstrated by the World Health Organization's tremendous achievement in eradicating smallpox in Bangladesh.

Food aid would obviously be of more benefit to the poor if they received it instead of the rich, but the political nature of food aid in Bangladesh makes such a change unlikely. Proponents of continued food aid to Bangladesh argue that even though the vast majority of it goes to feed the middle and upper classes, still the poor would be worse off without it. Without food aid to supply the ration system, the rich would have to buy their rice on the market. If domestic foodgrain falls short of the country's requirements, market prices would then soar beyond the reach of the poor. So the rich of Bangladesh are in a sense in a position to blackmail the donors: if you cut off our food aid, we won't be the ones to starve.

But as we have noted, the extent to which there is a shortfall between the country's production and its consumption needs is not clear. Moreover, even when food is plentiful and prices low, poor people starve; their problem is access, not supply. Dependents on food aid in fact undermines any impulse towards self-sufficiency. In the words of a Senate study:

"Simple relief aid may solve some guilty consciences, but it will do little to avoid greater catastrophes in the future. It may even have the consequence of allowing the government to defer necessary but difficult policies in the expectation that outside assistance will always be forthcoming."[39]

For this reason the Senate study recommends the phasing out of food aid to Bangladesh over a five-year period, following the advice of experts who believed that a commitment to terminate food aid "was the only way to force the government to take the necessary actions for eventual self-sufficiency."[40] This of course raises the question of why it should be necessary to "force" a government to act in the interests of its own people.

While the reform of aid along these lines would undoubtedly represent an improvement over the present situation, in the end no amount of aid can substitute for the major social changes which alone could mobilize the energies of the poor themselves. Too often aid donors view development as simply a matter of providing the right resources to the right people at the right time. Such an approach is conveniently suited to technocratic management from offices in capital cities around the world. This narrow view underlies many aid programs which in the name of helping the poor actually make their situation worse.

In judging whether a given aid program will help the poor, one must carefully weigh the potential benefits against the negative effects. In particular, aid which has the effect, whether intentional or not, of shoring up the large landowners in the villages or of propping up a repressive, elite-based government is inconsistent with attempts to help the poor. Programs which look good on paper often look very different in the field, and there is a clear need for closer evaluation of the actual effects of aid throughout the world. The American people have the right to know who benefits from the programs they are financing, and Congress has not only the right but the responsibility to review the use of the money it appropriates for both bilateral and multilateral aid-giving institutions. The Swedish evaluation of the deep tubewell project may save the Swedish taxpayer from financing such mistakes again in the future.

Existing legislation provides grounds for a cut-off of aid to Bangladesh which does not directly benefit the poor. Section 502B of the Foreign Assistance Act specifies that "no security assistance may be provided to any country the government of which engages in a consistent pattern of gross violations of internationally recognized human rights," and Section 116 places the same restriction on economic aid, "unless such assistance will directly benefit the needy people."

Bangladesh's martial law regime not only violates the human rights of its citizens in order to retain power; it also uses foreign aid to strengthen its elite constituency, while blocking social reconstruction which could bring genuine development to the poor. While foreign aid cannot be expected to solve Bangladesh's problems, at least it should not exacerbate them.

Is Bangladesh an "International Basketcase?"

In December 1971 at a meeting of the National Security Council, Under Secretary of State U. Alexis Johnson remarked that the new nation of Bangladesh was likely to become an "international basketcase," to which Henry Kissinger replied that it would not necessarily be "our basketcase." When columnist Jack Anderson revealed the minutes of this meeting a month later, the phrase "international basketcase" became an integral part of Bangladesh's reputation. Since that time, reports in the news media have done little to change this image. Photographs of starving Bengali children illustrate articles on hunger in the third world, and accounts of famine, flood and disaster have given the country an aura of hopelessness. But poverty is not the only reality of Bangladesh. In fact, it is a lush, green, fertile land with vast resources waiting to be tapped.

Bangladesh lies in the delta of three great rivers, the Ganges, the Brahmaputra and the Meghna, which flow through it to empty into the Bay of Bengal. The rich alluvial soil

deposited by the rivers and their countless tributaries gives Bangladesh land which is among the most fertile in the world. According to a 1973 report of the U.N. Food and Agriculture Organization (quoted in Food First: Beyond the Myth of Scarcity), the rivers provide inland fishery resources which are "possibly the richest in the world."

Abundant rainfall and warm temperatures make the climate of Bangladesh ideal for agriculture. A special Senate report notes, "The country is rich enough in fertile land, water, manpower and natural gas for fertilizer, not only to be self-sufficient in food, but a food exporter, even with its rapidly increasing population size."

Current agricultural output is far below potential. Bangladesh's present rice yield is only 1.2 metric tons per hectare, compared with 2.5 tons in Sri Lanka and 2.7 tons in Malaysia, which have similar climates, and four tons per hectare in Taiwan where labor input is greater. Bangladesh has no shortage of labor power, and it has more than twice as much cultivated land per person as Taiwan. Irrigation would allow tremendous production increases in the dry winter season, but despite vast surface and ground water resources, only 12 percent of Bangladesh's cultivated land is presently irrigated. Bangladesh's extensive deposits of natural gas could make the country self-sufficient in fertilizer in a matter of years.

Bangladesh has another great resource: the labor of its people. Now chronically underemployed, the rural poor represent a huge, untapped workforce for labor-intensive agricultural and industrial projects. Mobilized for development, Bangladesh's large population could be transformed from a drain on the economy to a powerfu asset.

Bangladesh is far from being a hopeless basketcase. The country's poverty is due not to a lack of resources but rather to the uneven distribution and inadequate utilization of those resources. One does not have to be an optimist to believe that in the future Bangladesh could once again be a land of plenty.

The CHAIRMAN. The Chair recognizes the gentleman from Maryland (Mr. LONG) to close the debate.

Mr. LONG of Maryland. Mr. Chairman, the gentleman from Illinois (Mr. SIMON) raised a very important point. My observation has been and I may be wrong, that people do not mind being poor if everybody around them is poor, but our foreign aid program and especially the IFI's have made millionaires all over this world and probably have done more to create a glaring contrast between the misery of the average person and the tremendous wealth of the few people around them. If that has not exacerbated the movement toward communism, I do not know what has.

Let me point out if we put in the Obey amendment, that the gentleman from Ohio (Mr. MILLER) has stated to me, and has said just now, that he will offer his 8-percent, across-the-board cut. We all want to get through here today. For heaven's sake, let us get rid of the Obey amendment, and then we can vote up or down the Long amendment. But if we vote it down or if we vote for the Obey amendment, then we will still have to deal with the Miller amendment, and we will have a long evening ahead of us.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Wisconsin (Mr. OBEY) to the amendments offered by the gentleman from Maryland (Mr. LONG).

The question was taken; and on a division (demanded by Mr. LONG of Maryland) there were—ayes 35, noes 34.

RECORDED VOTE

Mr. LONG of Maryland. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 241, noes 153, not voting 38, as follows:

[Roll No. 692]

So the amendments, as amended, were agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

For payment to the International Bank for Reconstruction and Development by the Secretary of the Treasury, $300,000,000 for the United States share of the increase in subscriptions to the (1) paid-in capital stock, and (2) callable capital stock, as authorized by the Act of October 3, 1977 (Public Law 95–118), to remain available until expended: *Provided*, That no such payment may be made while the United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code.

AMENDMENT OFFERED BY MR. MATHIS

Mr. MATHIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MATHIS: Page 17, lines 8 and 9, strike ", to remain available until expended".

Mr. MATHIS. Mr. Chairman, the amendment I am offering at this point would make the appropriation for the World Bank effective only for fiscal year 1979. At the present time the United States is the only major contributor to the Bank which appropriates unpaid capital to the Bank prior to any call on that capital.

Congress has granted authority to the Secretary of the Treasury to pay over to the Bank the full amount of our contribution, almost $8 billion since 1945, if there is a call on the capital for that amount or for less. The other large contributors to the Bank, such as the United Kingdom, Germany, Belgium, and the Netherlands, require an act of their legislatures at the time the call is made, on a case-by-case basis. Only the United States makes this blanket commitment years in advance of any call on capital. In fact, there has never been such a call, but we have had our funds obligated for many years.

Under the amendment I am offering, the Secretary of the Treasury would retain this authority, but only on a year-by-year basis, as is done by the United Kingdom and other countries. This would give us in Congress a chance to review how these funds were being used before reappropriating the funds for fiscal year 1980 and beyond.

Mr. Chairman, it might be said this is a form of sunset amendment. It maintains the obligation of the United States to the Bank. If there is a call on capital, which the supporters of the bill would agree is unlikely, the U.S. Government will remain the only major contributor that meets the call without obtaining permission from its legislature at the time the call is made.

The bill as written will unnecessarily tie up these funds for years. We can maintain our commitment to the Bank just as well on a yearly basis, and I would urge adoption of this very simple sunset amendment.

Mr. OBEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Georgia is correct. It is a very simple amendment. It is a very simple amendment and very simply what it does is eliminate our ability to participate in the Bank just as a number of other amendments have done today.

The purpose of the callable capital is simply to be there as a reserve against which the banks can borrow funds. That callable capital is in this bill because the Congress has said to the Executive: "Hey, fellows, do not hide the fact that this money is out there as an eventual obligation. Put it in the bill so the Congress knows about it."

They have compiled with the request. If we take out the language which is stricken by the amendment offered by the gentleman from Georgia, we do not have any callable capital against which the banks can borrow, and that means they are out of business and they cannot accept, again because this is another of the limitations, they cannot accept the funding and our participation is therefore ended.

I would also point out this is very similar to a problem we have with a lot of other agencies. There are a lot of agencies around to whom we appropriate funds but they are not immediately expended. For instance, the Defense Department right now has over $40 billion which is committed but not disbursed. This is the normal practice of doing business in the Government for long-term contract items.

I repeat again it would eliminate our ability to participate in the banks. Much as it would be convenient for the committee to accept it, we simply cannot if we want to be a participating partner in the arrangement.

Mr. MATHIS. Mr. Chairman, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Georgia.

Mr. MATHIS. Mr. Chairman, if there were to be a call on capital, how would the United Kingdom and how would Australia and the other nations respond? Why should we entitle them to respond in a different way than we do?

I think the gentleman is simply wrong when he says the World Bank cannot accept our contribution. This is in no way a restriction. All I am saying is we ought to be treated just exactly like every other major member of the World Bank. What is wrong with that?

What I am simply saying is that it is the Congress that requested that the callable capital be included in the bill. Since we have requested that we have to be consistent with all our requests, and if you take out the language the gentleman is talking about, you do have, in fact, a limitation on funding and they cannot accept the money.

Mr. MATHIS. I am asking the Congress to look at it so as to change that and say, "Look, we want to look at it on an annual basis."

Mr. OBEY. The fact is, under those conditions, the Treasury could not make the subscription because there would, in fact, be no real money available against which they could call.

Mr. MATHIS. Does the gentleman think a call on this capital is about to come?

Mr. OBEY. Of course, I do not. A call on this capital has never been made. That is why the amendment is not needed.

Mr. MATHIS. If a call is not going to come, it simply means that my amendment is harmless.

Mr. OBEY. I have stated the reasons why the gentleman's amendment is not harmless.

I yield back the balance of my time.

Mr. CONTE. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment offered by the gentleman from Georgia (Mr. MATHIS).

Mr. Chairman, I rise in opposition to the amendment of the gentleman from Georgia which deletes the phrase "to remain available until expended" from the appropriation of $300 million for additional U.S. subscriptions to paid-in and callable capital stock in the World Bank. This amendment would require that no portion of the $300 million be turned over to the World Bank after September 30, 1979.

If this amendment is adopted, it would open up a legal can of worms, the issue being whether it is possible for the United States to subscribe to the capital funding for the World Bank with appropriations from this bill.

The Treasury Department thinks not. Ninety percent of our subscription to the World Bank is in the form of callable capital which, as has been stated many times, will only be called up if there is a simultaneous cessation of all repayments by many major borrowers. This has never happened and should never happen unless the world slides into a gigantic depression.

The problem with callable capital is that under the charter, the United States, like all other members, must be ready to make payment on a call at some indefinite future time should the need arise. The definite time limit placed on the sum of money which would be available as a result of this amendment makes such a potential payment impossible. Therefore, it constitutes a restriction on the charter, which the Banks claim, makes acceptance of funds impossible.

Why we are dealing with this issue is beyond me. The possibility of a call on capital is so slight and the circumstances in which such a call would arise so grave as to render this amendment a mere excuse for a debating exercise. If the economic situation worsens to the extent where a capital call is needed, this language will have little meaning. Let us get on to the more serious amendments and avoid unnecessary legal entanglements that adoption of this amendment would raise. For these reasons, I urge its defeat.

Mr. MATHIS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Georgia.

Mr. MATHIS. Mr. Chairman, I thank the gentleman for yielding. We could have voted 5 minutes ago.

Mr. CONTE. What did the gentleman say?

Mr. MATHIS. I said to the gentleman we could have voted 5 minutes ago.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Georgia (Mr. MATHIS).

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. MATHIS).

The amendment was rejected.

The CHAIRMAN. Are there any further amendments?

If not, the Clerk will read.

The Clerk read as follows:

CONTRIBUTION TO THE INTERNATIONAL FINANCE CORPORATION

For payment to the International Finance Corporation by the Secretary of the Treasury, $39,000,000, for the United States share of the increase in subscriptions to capital stock, as authorized by the Act of October 3, 1977 (Public Law 95-118), to remain available until expended.

Mr. BUCHANAN. Mr. Chairman, I move to strike the requisite number of words.

(By unanimous consent, Mr. BUCHANAN was allowed to speak out of order.)

BAPTISTS IN PSYCHIATRIC CONFINEMENT IN THE SOVIET UNION

Mr. BUCHANAN. Mr. Chairman, tomorrow in a small town east of Moscow, another courageous Soviet dissident will stand "trial" on charges of slandering the Soviet State. Tomorrow the world will once again be treated to the spectacle of one of the superpowers so timid in the face of the unfettered truth that Aleksandr Podrabinek must stand trial for telling it.

Podrabinek is a remarkable 25-year-old who has taken it upon himself to document Soviet abuse of psychiatry. Last year he smuggled out of the USSR a manuscript, "Punitive Medicine," which tells of 200 prisoners in Soviet psychiatric "hospitals." In the past year, Podrabinek has been active in the Working Commission on the Abuse of Psychiatry for Political Purposes and has helped obtain the release of psychiatric prisoners such as Vladimir Borisov and Yuri Belov.

I want to bring to the attention of my colleagues the case of a Soviet Baptist who has recently been declared "paranoid schizophrenic" after the authorities found religious manuscripts in his apartment. Aleksandr Yankovich, born in 1923, is a Russian Baptist who has lived most of his life in the village of Mostovsky, in the Krasnodar region of the Russian Republic. After a search of his place of residence revealed manuscripts, tapes and, 450 rubles, Yankovich was arrested and charged under article 190.1 of the Russian Criminal Code—the same article under which Podrabinek is being accused. After a psychiatric commission held him not responsible for his actions, Aleksandr Yankovich was sent to the Chernyakhovsk Special Psychiatric Hospital where he is being punished for his religious beliefs.

It is with thanks to Aleksandr Podrabinek that we know something of the fate of Soviet Baptists such as Aleksandr Yankovich. Information about Yankovich was made public in one of the bulletins of the Working Commission. Unfortunately, there are many other devoutly religious Soviet citizens who are incarcerated in Soviet labor camps and psychiatric hospitals. It is up to us to weigh how such evidence of Soviet inhumanity to its own citizens should affect our own relations with the U.S.S.R.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

For payment to the International Development Association by the Secretary of the Treasury, $43,000,000 for the United States contribution to the fourth replenishment as authorized by the Act of August 14, 1974 (Public Law 93-373), to remain available un-

til expended and $800,000,000, for the second installment of the United States contribution to the fifth replenishment as authorized by the Act of October 3, 1977 (Public Law 95-118), to remain available until expended: *Provided*, That no such payment may be made while the United States Executive Director to the International Bank for Reconstruction and Development is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level IV of the Executive Schedule under section 5315 of title 5, United States Code, or while the alternate United States Executive Director to the Bank is compensated by the Bank at a rate in excess of the rate provided for an individual occupying a position at level V of the Executive Schedule under section 5316 of title 5, United States Code.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: On page 18, line 22, strike the period, and insert the following: ": *Provided further*, That none of the funds appropriated or otherwise made available by this paragraph shall be obligated or expended to finance any assistance or reparations to the Socialist Republic of Vietnam."

Mr. LONG of Maryland. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Maryland reserves a point of order on the amendment.

Mr. YOUNG of Florida. Mr. Chairman, last week the World Bank did what many of us have been talking about for a long time. They approved the first of five loans to Vietnam through IDA, the International Development Association. It was a soft loan.

In a newspaper article which came out after this loan was approved, it was suggested that Mr. McNamara had held off presenting the loan until after the House had spoken on the foreign aid bill. In effect, what they said in this interview was that in view of the voting record of the House during that last week period, it was fairly obvious that the House supported this type of activity. They went ahead then and approved the loan to Vietnam.

Let me say this, Mr. Chairman: There is nothing in this amendment that would have anything to do with UNICEF or the United Nations development program, no other paragraph, except the International Development Association. It relates only to the soft loans for Vietnam. My position is this: If, in fact, the World Bank is correct and if the mood of this House is prevailing in support of World Bank activity on behalf of Vietnam, then I think we ought to make that decision on an up-or-down vote. I do not think the World Bank should assume that based on any other amendments which we voted for or against in the last month or so.

Mr. Chairman, this amendment would give us an opportunity to make that decision. Whatever the decision of the House, of course, I am going to live with it; at that point there is nothing I could do about it anyway. However, I think we ought to have an up-or-down vote on whether or not we actually are going to allow our money to be used indirectly for Vietnam.

Tran Duong, one of their officials, said that the United States was going to pay reparations to Vietnam in the amount of $4.75 billion. He said it would not be accomplished directly, but it would be accomplished indirectly through IDA of the World Bank.

The Members can read that statement if they would like to do so. I have a copy of the wire dispatch here at the desk.

Mr. Chairman, let me say this: Let us understand that this is the same Vietnamese Government, the very same people who were responsible for the killing of 50,000 Americans in Vietnam during our unfortunate involvement there. This is the same government and these are the same people who tortured, who starved, who humiliated thousands of Americans who were held prisoners of war throughout Vietnam.

Mr. Chairman, this is the same Vietnam, the same government, the same people that have refused to make a total or accurate or thorough accounting for Americans who are now listed as missing in action. So for the first time in this debate I make the question of this country, Vietnam, the issue. I think it is time that we decide, Is the World Bank right? Is our prevailing position now one that we support the World Bank's attempts to use our money for Vietnam? If that is the case, let us say it loudly and clearly. But if we do not believe that, if we do not want to turn over American money for the benefit of this same Vietnamese Government that caused so much grief in the thousands and thousands of homes in this land of ours, then we will vote for this amendment and we will say to the World Bank: "No matter what you think, World Bank; no matter what you think, Mr. McNamara, we really do not want American dollars going to Vietnam, directly or indirectly."

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the amendment by the gentleman from Florida (Mr. YOUNG), which prohibits International Development Association financing to Vietnam. It is appropriate and timely that this body expresses itself with regard to financial assistance to Vietnam at a time when that nation is exploring initiatives toward normalcy of relations with our Nation and exploring the possibilities of assistance from our Nation, while at the same time failing to take any substantive steps in providing an accounting for our missing in action.

For more than a year there has been meaningless negotiations, dormant discussions, without any significant accomplishment in resolving the long-lingering, painful issue of our missing in action.

It is a courageous stand that our colleague from Florida has taken in speaking out against aid to that nation, and I join with him, and my other colleagues in voicing my support for his position.

Americans should not be required to contribute any tax dollars for assistance to the Republic of Vietnam, nor should they be made to feel responsible in any way for reparations for the recently ended Vietnam war. Too many Americans have given their lives and the lives of their relatives. Too many American families have grieved too many years of uncertainty without any word about their loved ones missing in Southeast Asia. Too many of our POW's suffered in Vietnam prisons too long.

The IDA (International Development Association) through the World Bank is proposing to assist the Republic of Vietnam in various projects. Such aid has noble, humanitarian objectives, but America's human rights are not being honored by that nation—some 2,000 missing in action not having been accounted for. Until such time as the Republic of Vietnam determines that Americans have the same human and moral rights as the Vietnamese, American funds should not be allocated for their assistance.

In testimony before the Subcommittee on Asian and Pacific Affairs last week, members of the committee heard a heart-rending account of Americans being held by the Vietnamese as late as April 1977. A Vietnamese refugee contended that it is a well-known reason throughout Vietnam that some prisoners are being held captive by the Vietnamese until Americans pay the reparations allegedly promised by President Nixon. The Vietnamese have caused untold grief to the hundreds of families of our MIA's by failing to account for our missing servicemen. Despite pleas from our Government, the Vietnamese have dragged their feet, not giving any information concerning the whereabout of our Americans in Vietnam.

Until such time that the Vietnamese fulfill their humanitarian responsibility and released all information of our missing and all remains of our soldiers, not 1 penny of American aid should go to that nation. Until such time as the Vietnamese accommodate our Nation's request for an accounting of our missing, we should not provide any assistance.

Mr. Speaker, I urge my colleagues to recognize and understand the necessity for this amendment, and to support its adoption. Americans have no moral obligation to finance the Communist regime of Vietnam.

If and when Vietnam finally responds to our demands for an accounting of our missing, then we can duly consider the questions of normalcy of relations and financial assistance.

I am hoping that my colleagues will join with the gentleman from Florida (Mr. YOUNG) in showing the rest of the world how our Nation feels about Vietnam's lack of concern for this humanitarian issue.

The CHAIRMAN. Does the gentleman from Maryland (Mr. LONG) insist on his point or order?

Mr. LONG of Maryland. I withdraw my point of order, Mr. Chairman.

Mr. OBEY. Mr. Chairman, I rise to oppose the amendment.

Mr. Chairman, I think the gentleman from Florida should be fair to the Members of the House who are going to have to vote on this question. He has said that this vote is an up-or-down vote on the question of whether Members of Congress want foreign aid money to go to Vietnam. There is no such thing. As we have said almost ad nauseam over the last 2½ weeks, the question is the same whether we are talking about aid to Chile or aid to the Philippines, or aid to Haiti or aid to Vietnam, or aid to Timbuktu. This is not a bilateral program. This is a multilateral program and as such we have no power—much as we might like it—to eliminate aid to any specific country. All we can do is eliminate our participation in the Bank, which ends our influence on the Bank on all questions surrounding it because the Bank cannot accept our contributions if we limit the funds in any way whatsoever. They cannot accept the contributions from any other country if they limit their contribution in any way whatsoever either.

I would also point out the gentleman drags up this old red herring about the statement of Tran Van Dong that they are going to obtain aid from the United States and reparations from the United States through the device of the International Bank. I wonder how many other statements of Tran Van Dong the gentleman from Florida believes. I would just point out one thing: The idea that we can somehow indirectly provide aid to Vietnam through this device is patently ridiculous. No one would allow U.S. contributions to rise to that level. I would point out that the potential rate of lending from all member countries to the Bank is so low that at $160 million, which is the maximum amount that Vietnam might get in 1978, it would take over 50 years for Vietnam to net the $4.75 billion that Vietnam had allegedly been asking the United States for. I do not think there is a Member of the House who wants to see aid to go to Vietnam.

But the question we have to look at is this: Do we simply want to exercise our unhappiness with the few countries we do not like if the cost is to imperil the U.S. participation in the international banking structure, because that is what we do?

We do not cut off Vietnam's nose. We cut off our own. I submit it is not in the national interest of the United States to do that.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

I certainly do not want to see any aid go to Vietnam, but the only chance we had of getting that message across was to have passed the Long-Miller amendment a little while ago.

Mr. OBEY. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. Not quite yet; I will be glad to yield a little bit later.

Mr. Chairman, we want to send a message to the Banks, and that is that the Congress does not want any of our money to go to Vietnam. The Government has told us, the President has told us, the Treasury has told us, that the Banks will not take the money with indirect restrictions. Frankly, I am very doubtful about that. I have read the charters and I think it is very dubious that they are not able to take that limitation.

What happens? The Senate will not accept these restrictions.

We go to conference. The Senate rejects the language. They buy the statement of the President that they cannot take the money. We come crawling back to the House. We wait awhile and finally we take it back to conference. Then we get the prohibitions eliminated.

So I say, we might as well bite the bullet, as long as we are voting money for these Banks, money is going to go to Vietnam, whether we like it or not.

On that, I am inclined to agree with the gentleman from Wisconsin (Mr. OBEY), although I do not agree with the gentleman on other issues.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, there is nothing in this amendment, do not get it confused with other amendments, there is nothing here that says directly or indirectly. It does not go to the World Bank or any other agency. It only relates to the International Development Association, the soft loan window of the World Bank.

Mr. OBEY. Mr. Chairman, will the gentleman yield on that point?

Mr. LONG of Maryland. I yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Chairman, if the gentleman is trying to leave the impression that, therefore, there is no impediment to the Bank accepting our money, the gentleman is again misleading the House. This goes to IDA. That is an international institution. This is an indirect limitation and the gentleman knows it as well as everyone else in this Chamber.

Mr. YOUNG of Florida. Mr. Chairman, if the gentleman will yield further, I disagree very strongly with the gentleman from Wisconsin. That is not what the articles of agreement of the International Development Association say. The gentleman can argue all day long, but will not convince me until the words are changed in these articles of agreement. I have read these articles. I have had the Congressional Research Service read these articles and they say there is nothing in here that limits the IDA fund.

Mr. OBEY. Mr. Chairman, if the gentleman will yield further, the gentleman from Florida is talking about the CRS original letter. They have amended that letter to change their position, and as we said last week, eight former Secretaries of the Treasury say the gentleman from Florida is wrong.

Mr. YOUNG of Florida. Mr. Chairman, I do not care what eight former Secretaries of the Treasury say, I am not wrong. I have read these articles, and I submit to the gentleman that if he would read them also, he will find out I am not wrong.

I just wonder how many of those eight former Secretaries have in fact read these articles. Or were they just told by the present Secretary or by Mr. McNamara that is what they want them to say? I do not know. I wish the gentleman would produce one of those Secretaries who has actually read these articles.

Mr. LONG of Maryland. Mr. Chairman, I have read the articles, and I came to the conclusion myself that if the Banks wanted to amend the charters, they could amend them in such a way that these restrictions would be accepted, but they do not want to amend the charters. They do not want the money on these terms.

It is not that they cannot take this action, but they do not want to amend the charters, and our Treasury does not want to retain the limitations. It is as simple as that.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. LONG) has expired.

(On request of Mr. MAHON, and by unanimous consent, Mr. LONG of Maryland was allowed to proceed for 2 additional minutes.)

Mr. MAHON. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the chairman of the committee.

Mr. MAHON. Mr. Chairman, I have listened to the debate on the pending amendment and the gentleman from Wisconsin (Mr. OBEY is right; I do not know of any Member in this House who wants to make any loans or contributions to Vietnam or to certain other countries we might mention, but, under the circumstances and with this amendment, there is nothing we can do about that at this time under the facts before us.

So, Mr. Chairman, I support the position of the gentleman from Maryland (Mr. LONG), and I hope we can soon come to a vote on this issue and finish this bill by 8 o'clock.

Mr. LONG of Maryland. Mr. Chairman, let me say that, while I sympathize very much with the gentleman from Florida (Mr. YOUNG), because I think on the whole he is right, I have to differ with him on practical grounds. As a practical matter, we cannot get that restriction through, get an agreement in the Senate-House Conference, and get a bill enacted into law this year. Good programs are going to suffer if we do not eliminate this restriction.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, this is a serious amendment on my part, and I really mean this: We have been told by the gentleman

from Wisconsin (Mr. OBEY) that we have no power, and we have been told by the chairman of the committee, my friend, the gentleman from Texas (Mr. MAHON), not less than a minute ago that there is nothing we can do about it.

Well, Mr. Chairman, that may be true. Maybe we have no power. Maybe there is nothing we can do about it, but I will bet the Members one thing: We are never going to know for sure until we try it. We do not know if the Senate is going to accept this or not. We do not know whether or not the World Bank will take the money. We have a lot of assumptions on these subjects, but I suggest that we ought not to sit here and talk about how little power we have and how little we can do about something like this, at least without trying.

Mr. MAHON. Mr. Chairman, will the gentleman from Ohio (Mr. MILLER) yield?

Mr. MILLER of Ohio. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Chairman, if we want to belong to the World Bank and the other multilateral institutions, we can belong; if we do not want to belong, if we want to withdraw, we can withdraw from these multilateral institutions. Congress has that power. We have plenty of power to withdraw if we want to.

But these multilateral banks are supposed to be nonpolitical. They are not political organizations. They operate in a political vacuum insofar as we are concerned, and if we want to belong, OK; if we do not want to belong, let us get out. But as long as we belong, this kind of amendment is not appropriate and will not become the law. I would hope we can dispose of the matter and move on to the next question.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield further?

Mr. MILLER of Ohio. Yes; I yield to the gentleman from Florida.

Mr. YOUNG of Florida. Believe me, Mr. Chairman, I do not like to be in a position of differing with the chairman of the Committee on Appropriations on this, but I just do not feel I am doing my job for the people who sent me here, and I do not believe I am doing my job for the Members of this House if I just capitulate.

Just because somebody tells me I cannot do it, does not mean I am just going to roll over and play dead. I am going to keep on trying to keep Vietnam from getting any of the dollars that come out of the pockets of the taxpayers who live in my district and in this great Nation of ours.

Mr. Chairman, we might as well face up to it. This is the way it is going to be as long as I hold the job I hold as the ranking minority member of this subcommittee.

Mr. Chairman, it has been suggested that we tried to do the same thing to Chile and Haiti and some other countries. But there is no comparison. As far as Chile and Haiti are concerned, I do not think they have ever killed 50,000 Americans in all the time they have existed. I do not think either one of them ever held Americans as prisoners of war. I do not think either of them has ever suffered American prisoners of war to undergo the degradation and the torture and the humiliation that the Vietnamese have inflicted on American fighting men. I do not think Chile and Haiti have ever made the families of American fighting men suffer like Vietnam did. There is just no comparison.

Mr. Chairman, I say that maybe one day the time will come that we might be able to work out some advantageous relationship with Vietnam, but I submit to the Members that that time has not yet come. We have taken the first step. We have allowed Vietnam admittance into the United Nations. We welcomed them with open arms. They are getting money through the United Nations development program. There are all kinds of American dollars going to them through many international organizations. And now we have just seen the first of five loans totaling $170 million approved by the World Bank. Maybe Mr. McNamara is trying to salve his conscience, I do not know. Maybe he feels responsibility for some of the destruction that took place in Vietnam, I do not know. But I do know that, so far as this Member is concerned, the time to tax my taxpayers and send their money to Vietnam has not yet arrived. Whether I have any power to do something about it, I do not know. Whether I can do something about it or not, I am going to fight that fight, and I am not going to give it up just because someone disagrees with me.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

Mr. Chairman, I have listened for several days over a period of weeks to the debate on this bill and the earlier debate on indirect and direct aid to various countries. The gentleman from Florida has just put his finger on the most vexing problem for most of us. I do not think any of us have failed over the last few years to be deeply moved after meeting with mothers, parents, wives, or families who have been disrupted by the Vietnam war. Many still do not know what happened to the MIA's. To use the argument against this amendment that because the directors of this particular international lending institution do not like proposed restrictions on loans is the same as arguing in favor of permitting aid to a country that hardly 3 years ago was slaughtering Americans, killing our fighting men. That to me is just beyond comprehension. I would certainly urge a vote for this amendment.

Mr. DORNAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I, too, have followed this debate with great interest, and I want to explain very carefully and precisely why I am supporting the amendment offered by the gentleman from Florida (Mr. YOUNG), and why I believe it is a very, very serious amendment. Fifty-nine MIA American remains returned in 5 years, 6 months, and 14 days—that is why. I do not know if my feet will be in concrete against aid to Vietnam for the rest of this century or even this decade. I do not know if I will join some of our colleagues who believe we can turn Vietnam into some sort of Yugoslavia and even there we forgive the killing of dictator Tito, whose secret police still murders people in our country to this year. Maybe we will swallow any indignity to keep Vietnam out of either a Chinese or Soviet orbit. I do not know if I will ever choose to play the so-called "Vietnam card" the way we hear intellectuals talking about playing the "China card" and thereby plunge a dagger into Taiwan's back, a loyal friend.

But this I do know: 5 years, 6 months, and 14 days ago, Mr. Le Duc Tho and our Secretary of State at that time, Mr. Kissinger, worked out a peace proposal calling for an MIA accounting for which they were both given the Nobel Peace Prize. Mr. Kissinger accepted the prize money of $50,000 and very graciously gave that money, I believe, to MIA families for scholarships for children of our missing-in-action heroes. Le Duc Tho turned down the peace award and its $50,000, which I thought was consistent since the Communists barely stopped killing for an instant. In the 5 years, 6 months, and 14 days that have gone by—and I want my colleagues to try and memorize this figure—59 small boxes of bones have been returned for decent burial—out of over 1,300 missing that our State Department and our Defense Department say the Vietnamese conquerors can absolutely account for, as for instance men who crashed in their planes at the corner of Main Street and Broadway, or whatever that symoblic intersection is in downtown Haiphong or Hanoi. What about those pilots who came down in their parachutes at the front door of the foreign ministry, or who descended into the lakes and parks of downtown Hanoi? Hundreds of them—and the Communists have returned exactly 59 small boxes of remains. When the last 23 boxes were returned I asked if I could go to Hanoi to escort our heroes' remains home.

The response I got was a classic: The State Department said, "Congressman, we are trying to accomplish this quietly and bring them back to our country without any fuss." I said, "Really? Have you asked the families if they reject a congressional escort? I will pay my own way at least to Hickam AFB." Then DOD asked the gentleman from Mississippi (Mr. MONTGOMERY) to accompany me, so that the journey to and from Hickam became an official trip. Remember except for the two young marines mortared to death on the last day of the war, April 30, 1975, at Ton Son Nhut Airfield 59 small boxes is all we received back to be taken to the forensic laboratory at Hickman. I am asking you my colleagues why we are not trying at least to send a clear message to these North Vietnamese conquerers of Indochina. I remember they slaughtered in 1 year alone, 1967, over 10,000 innocent civilians in the hamlets and villages, including children and school teachers. These are the Tojos, the Mussolinis, the Hitlers who

won who are in control of millions of lives that they suppress. They run concentration camps still. The refugees still flee by the hundreds and the conquerors laugh in our face over our missing while the world turns its back on our pleas for justice but not on our money.

For them to literally spit in our faces and account for only 59 out of dozens of known alive POW's and hundreds of missing men is an outrage. Now we have yet another Hanoi trip leaving at the end of the week to beg for more bags of bones. A trip I specifically have been blocked from going on. Why, when I have worked on this tragic issue for 13 years? If this August of 1978 journey to Hanoi produces no more remains then this great Nation is truly in its autumn. Can we not send a loud, clear message about our missing to these world banks. Can we not at least try.

This blood money, directly or indirectly, is a travesty upon the human rights issues that this House has been discussing over the past month. We say we care about everything from Nicaragua to Chile to Zimbabwe to the Philippine Islands. Well, how about the human rights of the MIA families whose sons and husbands and fathers went to Vietnam under Mr. McNamara.

When I took my two sons on a trip in 1975 through 10 national parks in the West, I drove them to see the $1 million McNamara mansion on the ski slopes of Snowmass at Aspen. I wanted them to see the grandeur of just one of the homes of the president of the World Bank. The man who gave us the ugly vocabulary of no-win war No. 2 "gradualism, escalated response, freefire zones, sanctuaries, forbidden airbase targets, and body counts." There were not 50,000 dead, but over 57,500 Americans who died, because I include heroin overdose deaths, automobile, motorcycle accidents, and noncombat flying accidents because deaths would not have happened if these young men had stayed in the United States or been on assignment away from the lessened safety of a combat zone.

We are still adding to that death toll with PFOD status changes now, MIA to "presumtive finding of death."

We have Robert McNamara riding around now in a chauffeur-driven limousine, accountable to no one, with no audits of these world banks, and never having to come before our congressional committees. He goes on Meet the Press, Face the Nation, or Issues and Answers with the explicit arrangement—hard ground rules—that not a single aspect of the Vietnam War will ever be discussed. Not the MIA issue, the peace settlement, the loans to Vietnam, none of it. What a travesty. What agony for the families whose men went to Vietnam under Robert Strange McNamara as Secretary of Defense.

My two young sons who are now of draft age learned vividly standing there at the driveway and tennis court of McNamara's Aspen mansion with its decorative outdoor natural gas lights burning around-the-clock that not everyone in life is required to answer for his arrogance and folly. Mr. McNamara and his World Bank associates simply must receive a message from this House, and that is why I support the Young amendment and urge you to do the same, so that the MIA families will know we have not given up putting pressure on Hanoi and Laos for a just accounting.

Please vote yes on the Young amendment.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I just wanted to note for the record that it was Lyndon Johnson and Richard Nixon who sent to Vietnam the 50,000 Americans who died there. It was Richard Nixon that ordered the bombing of Hanoi on Christmas Eve. I do not think we can claim that we had nothing to do in bringing about these tragedies.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken, and on a division (demanded by Mr. YOUNG of Florida) there were—ayes 30; noes 31.

RECORDED VOTE

Mr. YOUNG of Florida. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 234, noes 152, not voting 46 as follows:

[Rollcall Vote No. 694]

AYES—234

Abdnor	Coughlin	Horton

Harrington	Quie	Young, Tex.
Kasten	Richmond	
Krueger	Risenhoover	

The Clerk announced the following pairs:

On this vote:

Mr. Ellberg, for, with Mr. Dingell against.

Mr. McDonald for, with Mr. Shipley against.

Mr. Sikes for, with Mr. Mitchell of Maryland against.

Mr. Le Fante for, with Mr. Miller of California against.

Mrs. Lloyd of Tennessee for, with Mr. Richmond against.

Mr. Breaux for, with Mr. Clay against.

Messrs. MOORE, LOTT, and PEPPER changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there further amendments? If not, the Clerk will read.

The Clerk read as follows:

CONTRIBUTION TO THE AFRICAN DEVELOPMENT FUND

For payment to the African Development Fund by the Secretary of the Treasury, $25,000,000, for the United States contribution to the increase in resources as authorized by the Act of October 3, 1977 (Public Law 95–118), to remain available until expended.

AMENDMENT OFFERED BY MR. MATHIS

Mr. MATHIS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MATHIS: Page 19, immediately following line 3, add the following new provision:

"LIMITATION ON UNITED STATES CONTRIBUTION TO THE INTERNATIONAL FINANCIAL INSTITUTIONS

"None of the funds appropriated or made available to the International Financial Institutions pursuant to this Act shall be used for the purpose of establishing or expanding the production for export of steel, grains, sugar, palm oil, citrus crops, tobacco, or tires."

Mr. MATHIS. Mr. Chairman, this amendment is another limitation. Despite the fact that the members of the Committee on Appropriations, I think, have honest disagreements as to whether or not these international institutions can receive funds that have so-called strings attached, we in this body have just passed an amendment that does, in fact, put restrictions on funds.

My amendment does the same thing.

My amendment would provide that none of the funds we appropriate here today could be made available for the purpose of establishing or expanding production of steel, grains, sugar, palm oil, citrus crops, tobacco, or tires.

Mr. Chairman, this is a pretty broad amendment. In fact, it is broader than the amendment the House adopted last year. In fact, the House on two previous occasions has adopted restrictive language in regard to agricultural products, palm oil, citrus crops, sugar, and so on last year. Of course, these restrictions were watered down when the conferees went to conference with the other body and they brought back a virtually meaningless piece of legislation that instructs the delegates to vote no and to oppose any of these loans if, in fact, a judgment is made and the commodities are in surplus or that they have so-called injurious effects to Americans or American institutions.

Mr. Chairman, notwithstanding the fact that this Congress last year instructed our delegates and representatives to the World Bank to oppose these loans, there have still been a number of loans made that provide for palm oil and sugar production to increase, tobacco products, and even in the case of Vietnam, horror of horrors, to increase peanut production.

Also, we know that the World Bank within the past month has made a loan to Yugoslavia for the purpose of producing radial tires for export.

We are talking about a $9.3 million loan in competition with an industry that is already in trouble in this country.

We also know there have been steel loans made to countries that are involved in the production of steel; so what we are trying to do simply here, without redebating the issues that have been debated in the House, is to put a limitation on these funds.

I am sure the gentleman from Wisconsin (Mr. OBEY) is going to tell us that there is no way any of these international institutions can receive money, despite the limitations. I am not certain who will make the argument, but I am certain it will be some of my friends on the Committee on Appropriations.

Mr. Chairman, let me point out that the appropriations bill that the committee brought to the floor has a number of restrictions already present; so I think their argument simply does not hold water.

We have a limitation, for example, that limits the amount of salaries that can be paid to employees of the World Bank. The World Bank obviously accepted the money last year with this restriction on it.

I would also point out to the distinguished chairman of the subcommittee that on page 21, title V, General Provisions, section 503, is also restrictive in nature, because it says:

SEC. 503. No part of any appropriation contained in this Act shall be used to furnish assistance to any country which is in default during a period in excess of one calendar year in payment to the United States of principal or interest * * *

I have not heard anybody make the point that the World Bank or any of the windows in the World Bank would refuse to receive this appropriation based on this kind of restriction; so I think it is simply a red herring.

In fact, the gentleman from Maryland (Mr. LONG) has conceded that he thinks the World Bank can in fact receive these funds even though there is a restriction on them. The gentleman from Wisconsin (Mr. OBEY) does not believe so, but I believe we ought to give him an opportunity to find out.

Let us put the restrictions on, and let us protect the interests of American workers who depend on these items that are covered in this bill for their livelihood.

Mr. Chairman, I urge the adoption of the amendment.

Mr. LONG of Maryland. Mr. Chairman, I rise in opposition to the amendment.

I agree with the gentleman from Georgia (Mr. MATHIS) that we have a serious problem here. We are subsidizing production facilities all over the world. Other countries are sending imports into the United States. We are losing jobs here in the United States to these foreign producers.

My opposition to the amendment offered by the gentleman from Georgia (Mr. MATHIS) is simply on practical grounds, as has been my opposition to the other indirect amendments.

The international banks have said they cannot accept the U.S. contribution with restrictions attached. Since the consideration of last year's bill, we have been fed all kinds of legal opinions from the general counsels of all the banks, and they all echo the same thing. Like a chorus, they say that legally they cannot take the money with this type of restriction.

I do not believe that myself. I think they can take the money. I do not think they want to take the money under those terms.

Mr. MATHIS. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. Mr. Chairman, after I have finished, I will be happy to yield.

The Senate concurs in the view that restrictive amendments to the IFI's are not acceptable. It is impossible to make them bend on this issue in conference. If we persist in this, we are going to do the same thing we did last year: We are going to have to delay the bill past October 1.

We had our chance to tell these banks how we feel about this, and we had a chance to send them a message. We could have just reduced our contributions. The amendment that was offered a little while ago would have cut the money, and that is language that the IFI's understand. We would not have to have any lawyers to deal with that. But unfortunately, the House decided not to accept that cut.

Mr. Chairman, that is the problem we are up against.

Mr. MATHIS. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Georgia.

Mr. MATHIS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman from Maryland (Mr. LONG) has made the best possible argument he could for my amendment. He has stated my argument very eloquently in terms of what we are doing to subsidize foreign competition and produce a loss of jobs for American workers.

Let me say this to the gentleman: I hope we have not arrived at the point in this body where we are going to be dictated to by the other body as to what kind of legislation we can pass. I do not believe that time has come. I think this House is willing to stand up and do what is right, and I do not think we have to kowtow to what the other body wants.

Mr. LONG of Maryland. Mr. Chairman, if I may respond to the gentleman from Georgia (Mr. MATHIS), I wish we did not have to, but I have a practical problem. As the manager of the bill and as the chairman of the subcommittee,

I must try to get the bill signed into law. The Senate will not agree to these restrictions.

Mr. MATHIS. Mr. Chairman, will the gentleman yield further?

Mr. LONG of Maryland. I yield to the gentleman from Georgia.

Mr. MATHIS. Mr. Chairman, I thank the gentleman again for yielding.

I, too, have been here long enough that I have been on a conference committee or two, and I know that we do not have to give in to the Senate on all occasions, I would say to the gentleman.

Mr. LONG of Maryland. Mr. Chairman, let me say to the gentleman that I chair a subcommittee which probably does not share all my views 100 percent.

Mr. MATHIS. Mr. Chairman, if the gentleman will yield further, I view the gentleman from Maryland (Mr. LONG) as a champion of this cause, and if he is willing to lead the troops in battle, I think this House would support the gentleman.

Mr. LONG of Maryland. Mr. Chairman, let me say that I will try to support the House position on all these amendments.

As a matter of fact, I think the supporters of the banks are making the greatest mistake of their lives letting this type of thing go on. The day is going to come when we will have a revolt of the kind we had with proposition 13.

Mr. MATHIS. Mr. Chairman, let me ask this question: What would happen, let me ask the distinguished chairman of the subcommittee, if in fact he went to conference with the other body and no agreement could be reached? What would happen in that event?

Mr. LONG of Maryland. Mr. Chairman, I am afraid that is impossible.

Mr. MATHIS. Mr. Chairman, I will repeat the question to the gentleman.

If that were to happen, legislatively what is the next step? Would we fund at last year's level?

Mr. LONG of Maryland. There would be no bill, and we would have to operate on a continuing appropriation.

But as chairman of the subcommittee, I have the responsibility of managing this bill, and I am sure the gentleman can appreciate that.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. LONG) has expired.

On request of Mr. CHARLES WILSON of Texas, and by unanimous consent, Mr. LONG was allowed to proceed for an additional one-half minute.)

Mr. CHARLES WILSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Texas.

Mr. CHARLES WILSON of Texas. Mr. Chairman, will the gentleman from Maryland (Mr. LONG) clarify for the benefit of the House whether he is speaking for or against the amendment?

Mr. LONG of Maryland. Mr. Chairman, I just got through saving that I oppose the amendment on practical grounds.

Mr. CONTE. Mr. Chairman, I rise in opposition to the amendment.

In fact, I am surprised at the gentleman from Georgia. I have here a list of the 30 products that had been investigated by the U.S. International Trade Commission under section 201 of the 1974 Trade Act, to determine whether such increased imports had been a substantial cause of serious injury. And aside from my own amendment of dingleberries last year, they have birch plywood door skins, asparagus, zippers, stainless steel table flatware, gloves, shrimp, honey, cast-iron cooking ware, fresh cut flowers, cast-iron stoves, clothespins, and so forth. Maybe before this is over, I may offer an amendment to the gentleman's amendment and incorporate these, because no one should be left out. This language, if the Members have read the bill, is really additional language, in light of sections 508 and 509, and I urge everyone to look at that part of the bill which prohibits funds for the production of commodities which are in world surplus and which would cause substantial injury to U.S. producers. So there is no need for the amendment offered by the gentleman from Georgia.

Mr. Chairman, I am opposed to the amendment of the distinguished gentleman from Georgia which would require the U.S. executive directors of the Development Banks, here funded, to oppose loans for palm oil, sugar, citrus, tobacco, grains, oilseeds, and steel which would directly reduce either U.S. employment or the U.S. share of domestic and foreign markets.

This language is superfluous in light of sections 508 and 509 of this bill which prohibits funds for the production of commodities which are in world surplus and which would cause "substantial injury" to U.S. producers.

A closer look at the World Bank groups funding with regard to many of these commodities contained in these amendments reveals that the banks already do not make loans which would lead to the production of goods intended for export activity if there is presently an excess supply in the world market. In addition, the use of restrictive language such as this serves only to complicate, but not solve, the basic problem of overproduction.

Let us look at two of the commodities which appear in this amendment's "hit list"—grains and steel.

GRAINS

The issue of cereal grain production is an especially complicated one. We must weigh the benefits to our domestic producers against the costs of adequate food supply for the escalating populations. The market demand for these basic foodstuffs in many nations is growing more rapidly than what can be supplied by the domestic producers. In fact, experts predict that unless significant action is taken a deficit of 100 million tons will become a reality by 1985. A shortfall of this magnitude would cause prices to soar. Lest we forget, it was only 3 years ago that a decline of 3 percent in grain production resulted in a price rise of 300 percent because of inelastic demand More importantly, a similar decline would virtually guarantee the reassertion of a massive human tragedy—the death of millions by starvation. Grain imports for the developing world continue to increase and the United States has carved herself a large share of this market. But as part of an overall development strategy, the developing world must facilitate local food production. This is the rationale behind the IFI's concentration on agricultural and rural development projects. There is a great enough demand that the U.S. suppliers can maintain an adequate market while the developing nations simultaneously embark on the quest for greater self-sufficiency in food production—a key facet of the general plan for development. Moreover, it has been shown that development will encourage rather than discourage the overall future demand for food.

STEEL

Loans made by the IFI's have not contributed in any significant way to the problems faced by the steel industry of America today. Before approval, projects must demonstrate economic feasibility which includes an expected rate of return of about 20 percent. The present excess supply of this commodity has been the crucial factor behind the World Bank's denial of funding for numerous steel projects. In fact, no loan for steel has been approved for 3 years. And considering the present situation, it is not expected that any project, barring those geared strictly for domestic consumption, would be approved.

It is in the interest of no one, development banks included, to finance projects which will increase the supply of a commodity beyond the level of what is demanded. Each project's approval is contingent upon this fact. The language proposed by the gentleman from Georgia, I believe, sidesteps the whole problem. It is not an adequate means by which to assure that the U.S. markets are not eroded by foreign competition. The admonition of the United Steelworkers of America, given in testimony before this House, is applicable to each of the commodities in question:

> The Global Crisis in the steel industry can be alleviated only through international multilateral negotiations on the General Agreements on Trade and Tariffs and discussions within the Overseas Economic Community for Development.

This is the crux of the problem—we cannot find satisfactory local solutions by ignoring the fact that trade and overproduction are worldwide in scope. Even nationally, protection of one sector of the American economy can cost jobs from developing in another area. Besides, as evidenced in steel production, the relationship between supply and demand rapidly changes. Congress ought not to try to control it by raising or lowering supply. Experience indicates that the economy can do this better when left to its own devices.

In sum, picking out 1, 2, or 12 commodities for special treatment will not

solve the problem of oversupply or in the long run save very many jobs.

Multilateral agreements, not restrictive amendments are the means by which the economic order of the United States and world can be strengthened and simultaneous assure that our share of the market is safeguarded. Too much is at stake for the United States to use anything less than the most opportune and well-considered solution. This amendment does not provide such a solution.

I ask the House to defeat this amendment.

Mr. FOLEY. Mr. Chairman, I move to strike the requisite number of words. and I rise in opposition to the amendment.

Mr. Chairman, I do not normally find myself in disagreement with the distinguished gentleman from Georgia, who is an effective and ranking member of the Committee on Agriculture. On this particular occasion I do disagree with him, and I disagree in the name of agriculture as I see the interests of agriculture. I believe agricultural interest would be harmed by this amendment. Five of the seven commodities named in this amendment are agricultural products. Some of them are products that we export in great volume. Others are products that we import into the United States to some degree, but in no case, in my judgment—in no case—can it be established that activities of the World Bank or of its regional banks have financed developments which have resulted in serious harm to domestic agricultural markets or threatened our export position.

The palm oil situation was perhaps the most significant that could have led to this suggestion, but palm oil is an inferior product to soybean oil, and import levels have dropped in recent months. We are, on the other hand, constantly increasing our soybean exports from the United States, including exports to developing countries. Of the $25 billion of agricultural exports which the United States boasted last year $7 billion were in sales to developing countries. Only improvement in economic circumstance has made those imports by developing countries possible.

It would be most unwise for the largest agricultural exporter in the world, the United States of America, to take actions which would diminish the movement toward economic development of Third World countries who will otherwise become an increasingly important market for these agricultural commodities.

We produce three times as much wheat in the United States as we consume, and that is only possible because of exports. This amendment could only hurt the development of future export markets. We must protect—and I believe the Congress should soon act to protect—a viable sugar industry. We import great quantities of sugar and currently cannot meet our domestic needs from domestic production. The price of world sugar is destructively low and a strong domestic program as well as an international sugar agreement is needed. This amendment is both unnecessary and ineffective in protecting our sugar industry.

If we adopt this amendment with its seven named commodities the list will inevitably expand as many commodities will insist on some similar recognition. Other contributing countries can then join the game that no funds could be loaned for any long list or series of their allegedly threatened commodities. Orderly international development policies cannot operate in such an environment. Dangerous as this amendment is, it is not even plausibly needed. Take tobacco—one of the five agricultural commodities of this amendment. Tobacco producers are receiving record prices for tobacco in the United States; record prices. There is no indication at all that imports are crippling the tobacco-producing industry. There has never been such a high price for tobacco, and I am glad of it. I think the tobacco program has helped support higher prices for tobacco to the benefit of hundreds of thousands of farmers in this country. Higher prices for tobacco discourage smoking more than encourage it because if tobacco were cheaper it would certainly be used more rather than less. In any case the tobacco producer does not need this amendment and would not be benefitted by it.

The general policy of the banks is and I hope will continue to be, one that discourages loans to development production of commodities already in surplus.

The bill contains the instruction to the U.S. Directors to vote against any proposal for loans that would harm domestic production. The restrictive language that the gentleman from Georgia suggests would attempt to limit loans to a narrower list, but with dangerous consequences. This amendment would have the same effect through commodity restrictions that others sought to accomplish by country restriction. The effect is the same in either case—to threaten continued participation in the banks by the United States.

If we retreat from participation others may follow and international economic development will suffer gravely. All sectors of our economy have much at stake in continued economic expansion throughout the world.

The CHAIRMAN. The time of the gentleman from Washington has expired.

(By unanimous consent, Mr. FOLEY was allowed to proceed for 1 additional minute.)

Mr. FOLEY. Mr. Chairman, American agriculture particulary needs an expanding world economy. The only way we can continue to increase the volumes we sell abroad to help our domestic farmers with those crops that we produce in great surplus, such as wheat and feed grains and others, is to insure a developing and expanding world economy. For us to strike at one of the instruments by which the this economic development is accomplished not only is not helping the American farmers and is not only wrong, but it is perverse. And with the understanding that this will not help American agriculture but would harm it, I hope that all those who would otherwise be tempted to support the amendment will reject it.

The CHAIRMAN. The time of the gentleman (Mr. FOLEY) has again expired.

(On request of Mr. MATHIS, and by unanimous consent, Mr. FOLEY was allowed to proceed for 1 additional minute.)

Mr. MATHIS. Mr. Chairman, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Georgia.

Mr. MATHIS. I thank the gentleman very much for yielding.

The gentleman shares my concern for American agriculture and there is no way the gentleman would ever do anything to harm any segment of agriculture, but I ask the chairman of the Agriculture Committee if he feels the 400,000 tons of palm oil that flooded into this country in 1975 did not harm American soybean producers?

Mr. FOLEY. I think there was a period of adjustment, but the gentleman will recall that the import level has been sharply reduced in recent months, and if there was such a problem it is now rapidly evaporating.

The gentleman might agree with me that in the course of trade the United States has always succeeded with relatively open channels of trading in agriculture exports.

Mr. MATHIS. If the gentleman would yield further, we could debate the merits of the palm oil situation all day. The gentleman knows full well we have yet to see the full impact of the loans that have been made because all this palm oil is not yet in cultivation.

The CHAIRMAN. The time of the gentleman from Washington has again expired.

(On request of Mr. MATHIS, and by unanimous consent, Mr. FOLEY was allowed to proceed for 1 additional minute.)

Mr. MATHIS. Mr. Chairman, if the gentleman will yield for one final question, and I thank the gentleman for yielding, I wonder if the gentleman could tell us how the American farmers would not be harmed by the $105 million World Bank loan for grain storage quadrants in Argentina, which is not a good agricultural customer of ours but in fact is in competition with us since, as the gentleman full well knows, they are the fourth largest exporter of grain in the world today.

Mr. FOLEY. I suppose from a very narrow standpoint our American farmers might wish Argentina would not be a competitor in wheat export but on the other hand if we are going to encourage development in other countries so we can have expanded markets, we must expect that development might lead to some competition occasionally. Argentina is a long way from our principal competitor and harvests in importing countries are more critical to us.

Besides, I think the American wheat farmers can compete in world markets as long as those markets are open. Increased cash markets for grain as distinguished from food aid will depend importantly on economic stimulation in

the Third World countries. I come back to the basic point—all agricultural exporting countries have an interest in expanded markets which result from development but none more than the United States.

Mr. MICHEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first I want to take this opportunity to commend the gentleman who preceded me in the well for the very fine statement he has made, particularly with respect to our stake in exports of agricultural commodities and what that all means to the American economy.

Obviously I am in opposition to the amendment. The author of the amendment mentioned steel production. I happen to have a steel plant in my own district, but here again I think the facts will show—as the gentleman from Massachusetts indicated there had been no loans approved within the past 3 years. However over the previous 10 years, there were loans approved and made to 12 underdeveloped countries for steel production and we still enjoy a trade surplus with all 12 of those countries. More important is the fact that while domestic production of steel doubled in those 12 countries, our exports of steel to them had increased ninefold.

So, whether it is on the industrial side or the agricultural side, we have a great deal at stake here. We can whet the appetite in those countries for consumer goods with these loans and then benefit from their desire to have more than they can possibly produce domestically. We have the resources to produce industrially and agriculturally for that increased consumer demand abroad and we ought to look at it in this light.

Finally, Mr. Chairman, it was just 2 weeks ago that this House wisely rejected an attempt to add commodity restriction language to the Ex-Im authorization bill. You will recall that, initially, Members were not altogether apprised of what was involved and there was a switch down in the well of about 10 or 11 or 12 votes to make the difference. I hope that we will not have to go through that kind of exercise here today, and feel confident the arguments have been made well enough so that we can soundly defeat this amendment.

Mr. CHARLES WILSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Texas.

Mr. CHARLES WILSON of Texas. Mr. Chairman, the soybean surplus in the United States that we have referred to here today that occurred in 1975, does the gentleman know how many of those foreign facilities were financed with loans from the World Bank or the International Development Bank?

Mr. MICHEL. I cannot say that I do.

Mr. CHARLES WILSON of Texas. The answer is: None of them.

Mr. CHARLES WILSON of Texas. Mr. Chairman, if the gentleman will yield further, I come from one of the heaviest soybean production areas in the United States, and I have done considerable research and there was no money furnished from the international institutions in that respect.

Mr. MICHEL. I thank the gentleman for clarifying the record.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. MATHIS).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. MATHIS. Mr. Chairman, I demand a recorded vote and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Georgia (Mr. MATHIS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 143, noes 239, not voting 50, as follows:

[Roll No. 695]

Krueger	Quie	

The Clerk announced the following pairs:

On this vote:

Mr. Gammage for, with Mr. Eilberg against.

Mrs. Lloyd of Tennessee for, with Mr. Dingell against.

Mr. McDonald for, with Mr. Le Fante against.

Mr. Risenhoover for, with Mr. Mitchell of Maryland against.

Mr. Sikes for, with Mr. Richmond against.

Mr. Teague for, with Mr. Shipley against.

Mr. Breaux for, with Mr. Miller of California against.

Mr. LAGOMARSINO changed his vote from "aye" to "no."

Mr. BUCHANAN changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. WRIGHT. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to comment upon the progress we have thus far made on this bill and to express the firm hope and intention of the leadership that we shall conclude this bill this evening.

We have been on the bill for 3 full days and for 4 legislative days. The debate has been full; it has been enlightened, it has been, at times, provocative; and the House has behaved, in general, in a most thoroughly responsible way.

Surely, no Member could contend that he has been shut off or denied the the privilege of speaking on any and/or all amendments. It is the firm hope of the leadership that we shall conclude this bill tonight.

Therefore, I would simply take this time to urge Members to be cooperative. There are, as I understand it, three and possibly four amendments remaining. We want to conclude the bill today, and we want to adjourn prior to 9 o'clock.

The CHAIRMAN. Are there additional amendments to this section? If not, the Clerk will read.

The Clerk read as follows:

SEC. 506. None of the funds appropriated in this Act shall be used for any form of aid or trade, either by monetary payment or by the sale or transfer of any goods of any nature, directly to Cuba.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: On page 22, line 10, insert "or indirectly" immediately after "directly".

Mr. ASHBROOK. Mr. Chairman, the purpose of my amendment is simple. It would prohibit indirect aid as well as direct aid to Cuba.

This amendment should be familiar to my colleagues. It is basically the same amendment that I have offered on several other occasions and which has received overwhelming House support. When we considered the foreign assistance appropriations bill last year, for instance, the House approved my amendment prohibiting direct or indirect aid to Cuba by a vote of 274 to 112.

The fact that his bill already contains a prohibition on direct aid to Cuba is a small step forward. It is still short of the mark, however. If we really do not want American tax dollars going to Cuba directly, we should not want them going indirectly either. Whether direct or indirect aid, it is essentially the same thing albeit a circuitous route.

Cuba has certainly given us no reason to consider providing either direct or indirect aid. Fidel Castro has followed a policy of international adventurism, using his Cuban troops like a mercenary army on behalf of Soviet interests throughout Africa.

In fact, an estimated 30,000 to 40,000 Cuban soldiers are stationed in 19 different African and Arab countries. They have fought to preserve and expand Moscow's influence while the Soviet Union foots the bill.

I cannot justify allowing even $1 of U.S. money to go directly or indirectly to Cuba. It is ridiculous for the United States to give money to such organizations as the United Nations Development Program and have them turn right around and give the money to Cuba. I find it especially ironic that anyone would argue that Cuba is free to export communism throughout Africa but we are totally unable to prevent our tax dollars from indirectly assisting them.

I urge the adoption of my amendment.

Mr. McHUGH. Mr. Chairman, I rise in opposition to the amendment. I will take 1, or at the most 2 minutes, simply to say that we have been through this many times, with the same arguments being made.

This is an amendment which affects not just Cuba, but affects all of our contributions to all of the Banks because, as has been pointed out before, the Banks by their charters are unable to accept any contributions from any country, including the United States, with restrictions such as this attached. Therefore, I think we should be clear that this is another red herring amendment, and specifically would preclude us from participating in the Banks at all.

Second, it might be noted that Cuba is not a member of any Bank, and therefore under present conditions could not be a recipient of our contributions. Therefore, it is misleading to suggest that Cuba is being aided by us directly or indirectly through the Banks.

Accordingly, Mr. Chairman, I hope the committee will reject the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: On page 23, after line 19 insert the following new section:

"SEC. 510. The President shall direct the United States Governor of the International Bank ofr Reconstruction and Development, the United States Governor of the International Finance Corporation, the United States Governor of the International Development Association, the United States Governor of the Inter-American Development Bank, the United States Governor of the Asian Development Bank, and the United States Governor of the African Development Fund, to propose and seek adoption of an amendment to the Articles of Agreement for their respective institutions to establish human rights standards to be considered in connection with each application for assistance."

The CHAIRMAN. The gentleman from Florida (Mr. YOUNG) is recognized for 5 minutes in support of his amendment.

Mr. LONG of Maryland. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to my chairman.

Mr. LONG of Maryland. Mr. Chairman, the various members of the subcommittee have examined this amendment and have no objection to it.

Mr. YOUNG of Florida. I thank the gentleman.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding.

I do not want to prolong this any longer than anyone else on the floor, but I think the gentleman has come up with a really good amendment to get our Directors in these Banks to take some positive action to get other member countries to change the charter of the world banks so that one of the factors they have to take into consideration in making these loans is the human rights factor.

I compliment the gentleman for offering this amendment.

Mr. YOUNG of Florida. I thank the gentleman from Iowa.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. YOUNG).

The amendment was agreed to.

The CHAIRMAN. The clerk will read.

The Clerk read as follows:

This Act may be cited as the "Foreign Assistance and Related Programs Appropriations Act, 1979".

AMENDMENT OFFERED BY MR. HANSEN

Mr. HANSEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HANSEN: On page 23, after line 19, add the following new section:

"SEC. 511. Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act shall be obligated or expended to provide, review or administer any assistance, credits, guarantees or insurance in or for Panama.

POINT OF ORDER

Mr. LONG of Maryland. Mr. Chairman, I reserve a point of order on the amendment.

Mr. Chairman, I reserved my point of order because I believed we had passed the point in the bill to which this amendment would apply when this amendment was offered, and we did not have a copy of the amendment.

Mr. HANSEN. Mr. Chairman, I stood

to be recognized at that point in the bill.

The CHAIRMAN. Technically the point of order is well taken because the clerk had read a new paragraph beginning on line 20 through line 21 and the gentleman proposes to place the amendment after line 19.

Are there further amendments at the end of the bill?

AMENDMENT OFFERED BY MR. HANSEN

Mr. HANSEN. Mr. Chairman, I offer an amendment at the end of the bill as a new section.

Mr. CONTE. Mr. Chairman, a point of order.

The CHAIRMAN. Does the gentleman from Idaho have an amendment at the desk?

Mr. HANSEN. Mr. Chairman, I offer the amendment, and I have it at the desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HANSEN: At the end of the bill add the following new section:

"SEC. 511. Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act shall be obligated or expended to provide, review or administer any assistance, credits, guarantees or insurance in or for Panama.

POINT OF ORDER

Mr. CONTE. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. CONTE. Mr. Chairman, the gentleman's amendment is outside the scope of the bill. The bill has been closed and finished. He adds a new section 511. There is no section 510 in the bill

The CHAIRMAN. The Chair will state for the gentleman that the amendment is still in order at the end of the bill as a new section and it is a general provision. The amendment offered by the gentleman from Florida (Mr. YOUNG) added a new section 510.

Mr. CONTE. Even though the Clerk had read the last line of the bill?

The CHAIRMAN. That is correct. The amendment is at the end of the bill. The Clerk read the last line of the bill. The gentleman from Idaho (Mr. HANSEN) offers an amendment that comes at the end of the bill. The amendment is in order. The Chair overrules the gentleman's point of order.

The Chair recognizes the gentleman from Idaho (Mr. HANSEN) for 5 minutes in support of his amendment.

Mr. HANSEN. I thank the Chairman.

Mr. Chairman, my amendment is very simple. I will repeat it:

Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act shall be obligated or expended to provide, review or administer any assistance, credits, guarantees or insurance in or for Panama.

Mr. Chairman, I think it is important that this is not necessarily to cut off assistance to Panama forever and forever, it is just to say that since the passage this spring of the Panama treaties by the other body, I think it is of vital importance that this type of legislation which includes any type of credit, any type of funding, any type of aid, be considered in the appropriate legislation which is supposed to be submitted for a vote on implementation of these treaties.

I feel that it is important at this time that these appropriations be taken out of the regular order of legislative business and reserved for that special type of consideration.

I might mention that since the treaties have been passed that the government of Panama has issued a new foreign policy, one provision calling for the United States to get out of Guantanamo, another for the Israelis to get out of the Arab lands, another for us to free Puerto Rico and a number of other things. Also a resurgence of human rights violations is occurring which I think is important to this body of Congress as well as to the other which makes reconsideration of treaty approval under articles I and IV of the Constitution a vital matter.

In my amendment we are talking about cutting $20 million worth of foreign aid funds and about $80 million worth of credits and guarantees. I think it is important that these assistance programs for Panama as well as any other costs regarding the proposed Panama Canal transfer be taken care of in separate appropriate legislation and not be considered on an ongoing basis through the regular foreign assistance authorization and appropriations process.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Idaho (Mr. HANSEN) and I have discussed the amendment, and, while I might have preferred that the gentleman cut part of the money instead of all of it, I think that in all great likelihood the Senate will take a different approach and we will have an opportunity in conference to bargain on the actual amount of the cut.

The gentleman makes a valid point in making the claim that we are really being asked to buy a pig in a poke; we are being asked to buy the funding in this bill plus who knows what will be in the implementing legislation.

Perhaps this amendment might encourage the administration to actually come forth with that legislation so that we can know what we are talking about. The gentleman pointed out the change, or at least a statement of the change in Panama's new foreign policy, and in that respect I might also add that the Archbishop of Panama, Archbishop McGrath, who has been quite supportive of the Panama Canal treaties and General Torrijos, has recently attacked the General down there, pointing out that there is a great amount of human rights violations.

So, Mr. Chairman, I would urge my colleagues to adopt this amendment.

Mr. HANSEN. Mr. Chairman, I thank the gentleman from California (Mr. LAGOMARSINO) for his comments.

Mr. Chairman, the Government of Panama issued a new foreign policy on July 19. It gives further confirmation of the Communist influence in the Torrijos regime and its close adherence to the Moscow line, that is, U.S. Get Out of Guantanamo, Israel Get Out of Arab Lands, U.S. Free Puerto Rico. Other clauses raised doubt of Torrijos' intention to honor new canal treaty commitments.

The Panama Committee for Human Rights has detailed a June–July resurgence of repression, documenting the jailings without trial of dissidents and newsmen and recent tortures and murders.

Now, Mr. Chairman, today we are being asked to approve the first of many payments to the Republic of Panama in connection with the constitutionally questionable Panama Canal treaties recently approved by the Senate. In a business as usual request in the current foreign aid appropriations legislation, we are being asked for $100 million in loans, grants, insurance, and aid to Panama despite the fact that such consideration should now be handled under separate implementing legislation.

It is highly inappropriate for us to now consider such proposals under the regular foreign aid bill. The American taxpayer deserves to see one price tag for this treaty, as would occur in the long-promised implementing legislation. Therefore, I am proposing that all aid to Panama in this measure before us today be suspended and embargoed until it can be considered as part of one implementing package of legislation in order for the Congress and American citizens to see just what total costs are involved in the proposed transfer of the Panama Canal.

Recent developments in Panama demand this action now more than ever. To proceed without special scrutiny of the total aid package slated for Panama during the next year and the years to follow would be a gross injustice to American citizens and to the citizens of Panama as well. This is particularly true since such massive assistance can be expected to prop up the crumbling and corrupt dictatorship of General Omar Torrijos, a guarantee of continued repression of human rights within Panama, the endangering of lives of many Panamanian citizens, and virtual assurance of increased Communist activity jeopardizing Canal operations.

Mr. Chairman, I must point out that the Carter administration at first emphatically stated that the treaties would not cost the American taxpayer a single dollar. Then in February of this year they admitted in a letter to every Senator that there would be a $600 million cost to the treaties in addition to anticipated loans, guarantees, and other non-direct programs. In fact, this was reluctantly acknowledged in a letter signed by Secretary of State Cyrus Vance, Secretary of Defense Harold Brown, and Secretary of the Army Clifford Alexander that the treaties would require $633 million in

appropriated funds and lost revenues to the U.S. Treasury. The appropriated funds and lost revenues added to the loans and guarantees promise a total assistance program to Panama of billions of U.S. tax dollars.

The Senate's ratification of the Panama Canal treaties makes it imperative that the House resist business as usual and insist that aid to Panama be considered separately in special implementing legislation. Under articles I and IV of the U.S. Constitution, the House of Representatives has the authority and responsibility to approve or disapprove the large transfer of U.S. property and taxpayer dollars envisioned in the Panama Canal treaty not to mention protecting the peoples' right to know the total amounts involved.

Concerns which should be dealt with by the Congress prior to any decision to transfer the Panama Canal and huge amounts of American dollars are:

First. The recent foreign policy statement by the Panamanian Foreign Ministry that the United States should get out of Guantanamo; allow self-determination for Puerto Rico, and force Israel to withdraw from all occupied Arab lands.

Second. Human rights violations within Panama and the statement of the Catholic Church condemning the present state of affairs under General Torrijos and demanding a change.

Third. The recent attempt of the U.S. Army to spend $40 million without congressional authorization in efforts to prepare for the preimplementation of the Panama Canal treaties.

Fourth. The recent disclosure of Panama's Minister of Housing that $18 million of U.S. aid was missing and unaccounted for.

Fifth. The refusal of the Panamanian Government to negotiate a settlement with American citizens whose Panama property has been nationalized. Over 100 American citizens have been seeking relief in vain from the government of General Torrijos.

Sixth. Panama's specific rejection in the protocols relating to the exchange of instruments of ratification of the DeConcini reservation and other treaty provisions.

Again, Mr. Chairman, I strongly urge this body to support my amendment to embargo all assistance to Panama in the Foreign Aid Appropriations bill before us until such time as proper answers to key questions can be obtained in the course of consideration of duly constituted treaty implementation legislation. This means cutting out all aid to Panama in this bill—provisions which can later be reinstituted in implementation legislation and subsequent supplemental appropriations bills. This request is in keeping with the spirit of House Concurrent Resolution 347, which has well over half the Members of Congress as cosponsors and three similar amendments to previous legislation passed overwhelmingly in this body during recent months.

Mr. Chairman, let us stop the $100 million per year tax dollar rip-off to implement the Panama treaties. Giving up the canal is a sad mistake, but to give up billions with it is to compound the tragedy.

Mr. Chairman, I urge the adoption of the amendment.

Mr. WRIGHT. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Idaho (Mr. Hansen).

It is obvious that the gentleman from Idaho is angry because the other body ratified the Panama Canal treaties. Perhaps many in this body might have voted differently on that question. But that does not excuse nor give any of us justification to vent our pique by arbitrarily treating the people of Panama differently than we have treated every other country in the world.

I would ask the Members to listen to the wording of the gentleman's amendment so that they can see how broad is its exclusion. It states:

> Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act shall be obligated or expended to provide, review or administer any assistance, credits, guarantees or insurance in or for Panama.

It would allow nothing by way of beneficial contact with Panama—no loans, no grants, no cooperative agreements; not even loan guarantees; not even insurance; not even any funds to review or administer any existing program.

No other country is treated in that way. There is no reason that Panama should be. We do not know what the emerging Government of Panama will be like. Elections have been promised for next year.

Would the gentleman deny to the State Department and to the President of the United States and to those who conduct relations with Latin America the privilege of working with whatever government may emerge from the elections in Panama next year?

I know that there was some dissatisfaction arising from news reports which purported to quote from comments made by General Torrijos following the ratification of the treaties in the other body. In April I wrote a letter to the President of Panama, Demetrio Lakas, insisting upon an explanation of exactly what was said and exactly what was intended.

I received a reply.

Mr. Chairman, I shall include in the Record a copy of my letter and of the English translation of the reply. At this point, however, let me simply quote from the letter from Omar Torrijos very briefly, as follows:

> Our two nations have arrived at an agreement which serves as an example of a negotiated solution. The lack of understanding of those who do not live from the solution but rather the problem, turned the process into a scene of insults and threats; in this respect I do not exclude the bad Panamanians who preached violence as the only possible solution. God enlightened us and the truth was imposed on those who preached violent action.
>
> After the ratification of the treaties—there by the Congress, here through a plebiscite, I can assure you that never, in this century, have the relations between our two nations been better; and that never has expeditious, indiscriminate, flowing transit been so sure as now.
>
> The coordination that we have begun to establish with the authorities of the Canal Zone and the existent ones between the armed forces of your country—South Command—and the National Guard, guarantee us that with a deep sense of a team today and always we will be in a condition to eliminate, eradicate or put down any movement tending to damage the Canal.

Mr. Chairman, this letter was written in answer to questions which I had posed in my letter. Together with my original letter, the entire text will be published in the Record following my remarks.

Certainly we do not want to act out of a fit of childish pique. I do not think we want to grandstand on a question as important to all of Latin America as the solution that has been achieved in Panama. I do not think we want to close the door to the possibility that that country may, indeed, emerge as a truly democratic nation.

Mr. Chairman, to pass an amendment of this kind would be simply gratuitously insulting. It would make harder the development in Panama of the very democratic forces which I think all of us want to see emerge.

For that reason, I hope that we will not treat Panama in a way that is any different from the way we treat every other country in the world.

Mr. Chairman, I hope the Members vote "No" on this amendment.

The letter and English translation referred to by Mr. Wright follow:

> Office of the Majority Leader,
> *Washington, D.C., April 25, 1978.*
>
> Hon. Demetrio Lakas,
> *President,*
> *Republic of Panama.*
>
> Dear Jimmy: The comments made by General Torrijos immediately following the Senate vote to ratify the second of the Panama Canal Treaties are being interpreted in various ways in the United States. Some interpretations placed upon the General's comments, if not clarified and corrected, could cause serious difficulties in the enabling legislation which must be passed by both House and Senate.
>
> To be specific, numerous U.S. news accounts have portrayed General Torrijos as threatening to destroy the Canal or to launch a military attack upon the Zone aimed at its physical confiscation, in the event the Treaty had not been ratified. As a result of these news stories, many people in the United States believe that this is what he said.
>
> It is my impression that he did not make nor intend any such overt threat but simply was expressing the apprehension that there could have been a general public uprising which could have destroyed or threatened the safety of the Canal in the event the Senate had rejected the Treaty.
>
> References also have been made to supposed military "contingency plans" on the part of the government of Panama. Some profess to believe that such plans existed with the aim of seizing or destroying the Canal. I prefer to believe that any such plan as may have existed would have had as its purpose the protection, rather than the destruction, of the Canal, since the destruction of that installation would make no sense whatever to the future of Panama or the best interests of the Panamanian people.
>
> There is, of course, a great deal of difference between the two interpretations—and I earnestly hope and trust that my interpretation is the correct one. If I am incorrect

in my interpretation, I think I need to know it. It could make a serious difference in the actions of the House as well as the Senate in regard to the implementing legislation.

In any event, I believe that it needs to be clarified. Could I hear from you and General Torrijos in this regard?

Very best wishes.

Sincerely,

JIM WRIGHT,
Majority Leader,
U.S. House of Representatives.

PANAMA, May 31, 1978.

DEAR JIM: I remember when, in the middle of the Darien jungle, you accompanied us to the celebration of a ceremony that for Panama has had great importance; which consisted of going by helicopter to that place to representatives of the BID and, in the presence of Ortiz Mena and the most outstanding leaders of the indigenous tribes of that region, we promised to make the first contribution to what later would become the highway that, running through Tapón del Derién, would join Alaska with Patagonia. On the Bayano River, which served as a silent and eternal witness to that ceremony, the dam that you saw under construction now being raised; and many people are now traveling over that project, thanks to the cooperation of the most conscientious leaders of your country, among which I include you with all fairness.

Our two nations have arrived at an agreement which serves as an example of a negotiated solution. The lack of understanding of those who do not live from the solution but rather the problem, turned the process into a scene of insults and threats; in this respect I do not exclude the bad Panamanians who preached violence as the only possible solution. God enlightened us and the truth was imposed on those who preached violent action.

After the ratification of the treaties—there by the Congress, here through a plebiscite, I can assure you that never, in this century, have the relations between our two nations been better; and that never has expeditious, indiscriminate, flowing transit been so sure as now.

The coordination that we have begun to establish with the authorities of the Canal Zone and the existent ones between the armed forces of your country—South Command—and the National Guard, guarantees us that with a deep sense of a team today and always we will be in a condition to eliminate, eradicate or put down any movement tending to damage the Canal.

To say it briefly, for the first time Americans and Panamanians are acting in peaceful coexistence.

Your friend,

OMAR.

Mr. LONG of Maryland. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the bilateral budget requests for fiscal year 1979 for Panama total $17,555,000.

The committee has made significant reductions in various forms of bilateral economic assistance and has made a 20-percent reduction in the applicable military assistance accounts, so Panama will not necessarily be able to receive the total budget request.

Mr. Chairman, the various assistance programs should not be tied to the Panama Canal Treaty or to the use of canal revenues to be received by Panama. The treaties have been approved, and the complex implementing legislation will go through this body at a later time. The House will be able to deal with the various details at that point. There are no funds in this bill to implement the Panama Canal Treaty, so this amendment is not needed and should not be included. The amendment would, as the majority leader has said, be especially injurious to United States-Panamanian relations. Whether we like it or not, we have to get along with the people down there and it is important that these relations be maintained at this time.

Mr. Chairman, on May 31 the House amended H.R. 12598, the Foreign Relations Authorization Act of 1978, to include a provision which prohibits the use of any of the funds to be appropriated to effect implementation of the Panama Canal Treaty without a specific act of Congress authorizing such implementation.

The proper place to consider this type of restriction is when the implementing legislation is before the House, and I, therefore, ask that the amendment be defeated.

Mr. BAUMAN. Mr. Chairman, will the gentleman from Maryland yield at that point?

Mr. LONG of Maryland. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

Regardless of the outcome of the pending amendment's adoption or defeat, I do think that one point ought to be made very clear. The majority leader spoke of the cooperation that is occurring between the so-called Republic of Panama and the United States.

I had occasion a few days ago to receive from a friend in Panama City a copy of the Panama Herald containing a news story which has been virtually ignored by the American press. About 10 days ago the chief negotiator of the treaties who is also Minister of Information, Romulo Escobar Betancourt, spoke to a group of Panamanians who work at the canal and who are employees of the U.S. Government. He publicly accused the U.S. Government and the Panama Canal Company of sabotaging the canal right now. He said that the United States is engaged in hostile acts and that the slowdown of traffic which occurred this summer—which actually was seasonal—was the result of a deliberate plan on the part of the U.S. Government. Ambassador Jorden felt compelled to write a letter of protest to the Panamanian Government within 24 hours, not only denying this but citing this as a lack of cooperation which is needed if the terms of the treaties are to be properly implemented.

It does appear to me that if the character of the officials of the Government of Panama is such that a wild charge would be made almost on the heels of the signing of the treaties by President Carter, there is ample reason for the House of Representatives to go slow in providing funding for this agreement, and that we really ought to wait and see. I do not expect Panamanian cooperation. I think this is another good example of why the treaties are a mistake. I would suggest that not all is sweetness and light and the amendment offered by the gentleman from Idaho (Mr. HANSEN) is, I think, in good order.

Mr. LONG of Maryland. As the gentleman from Maryland knows, this is the type of situation which lends itself to demagoguery. We are a big country; we are a great country; and I suppose we have to put up with a certain amount of that type of aggravation and be philosophical about it. I think this is one of those situations.

Mr. OBEY. Mr. Chairman, will the gentleman yield for a quick point?

Mr. LONG of Maryland. I yield to the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman for yielding.

Since Archbishop McGrath's name was mentioned, I simply want to read one sentence from a telegram from the Rev. J. Bryan Hehir, Associate Secretary of the Office of International Justice and Peace, U.S. Catholic Conference:

> . . . we, at the U.S. Catholic Conference, would not associate ourselves with measures to deprive Panama of needed economic assistance, especially at this crucial moment of their political history.

Mr. LONG of Maryland. I thank the gentleman.

AMENDMENT OFFERED BY MR. HARKIN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. HANSEN

Mr. HARKIN. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

> Amendment offered by Mr. HARKIN as a substitute for the amendment offered by Mr. HANSEN:
>
> SEC. 511. None of the funds appropriated or made available pursuant to this act shall be made available for military training and military credit sales to Panama.

Mr. HARKIN. Mr. Chairman, I, too, have followed a little bit the events that have been unfolding in Panama. I also have some serious questions about the state of human rights in the nation of Panama under its present dictator, Omar Torrijos.

It is true that last month the Catholic Church under Archbishop McGrath condemned the Torrijos regime for a wide variety of different abuses. One of those, however, was the serious violation of human rights that is taking place in that country. They pointed out the number of different human rights violations going on: Beatings; torture; arrests; detention without any kind of trial; and a group of farmers who were arrested in one of the areas, thrown into jail, beaten, and one of them died, as a matter of fact, in prison at that time. So there is firm evidence of violations of human rights in the nation of Panama.

However, I do not feel that we ought to punish the people of Panama themselves for what their dictator may be doing to them. So what I have done in my substitute amendment is to say that out of the $17.5 million that is going to Panama, let us not punish the people of Panama by taking away $15 million for agriculture or for rural development or for nutrition programs. Let us not take

away the $500,000 that is going down there for population planning and health. Let us not take away the $500,000 that is going down there for education. Let us not take away the $50,000 for technical assistance.

Rather, let us take the $1.5 million that goes down there for military training and military credit sales, because this is the kind of money, this is the kind of aid that Torrijos is using for his national guard to suppress the legitimate human rights of his people.

Ambassador Bunker testified before that the national guard is, "really a police system and not a military force"; so by giving them these military training and these military credit sales, we enable Torrijos to use that national guard to suppress the human rights of his people; so I am saying that I support the amendment of the gentleman from Idaho to a certain degree, as long as we can in some way affect the human rights situation down there by cutting off some military aid or instruments that they use to repress people and put them in jail or torture them. But let us not punish the people of Panama. Let us not take away the agricultural and nutrition programs so badly needed down there. This has been my feeling all along on these human rights situations. We cannot punish the people of a country for what its government, a government that is a dictatorship, is doing to them.

Let us keep these good programs, but cut off the military training and credit sales.

Mr. Chairman, I ask adoption of my amendment as a substitute for the amendment offered by the gentleman from Idaho.

Mr. LONG of Maryland. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the subcommittee has spent a lot of time on this problem of military aid to countries that are gross and persistent violators of human rights. Of course, we recognize that it is also hard to keep current in this field. The situation changes from day to day and certainly from year to year. It would be very hard for us as a Congress or the committee to say that we honestly know what the human rights situation is in a country at a given moment. You can read a document, but that does not necessarily tell you what it is. The State Department comes in and says, "Oh, no, that might have been true 6 months ago, but that is not true any more. They are improving rapidly."

We would not know how much to cut, anyway. The subcommittee cut 20 percent from the military training and military credit sales accounts. Then we placed a list of countries in the report which we thought the State Department should take into consideration when allocating these reductions. Let me read, as follows:

There have been serious questions raised about the human rights situations in a number of countries.

The Committee has received testimony, information, and expressions of concern from Members and public witnesses about alleged human rights violations in the following countries: Afghanistan, Argentina, Bangladesh, Bolivia, Cameroon, Chad, Dominican Republic, El Salvador, Ethiopia, Ghana, Guatemala, Haiti, Indonesia, Mali, Morocco, Nepal, Nicaragua, Panama, Paraguay, Philippines, South Korea, Sudan, Thailand, Tunisia, Uruguay, Yemen, and Zaire.

It was our intention to cut the overall accounts and put the burden on the State Department to allocate the specific reductions. I think that was the responsible way to handle it and not deal with it country by country, or to handle the situation moment by moment when we do not know what the situation is.

Mr. Chairman, I oppose the gentleman's amendment.

Mr. HANSEN. Mr. Chairman, I rise in opposition to the substitute amendment.

Mr. Chairman, I will not take much time, but I do think it is important to point out that what the gentleman from Iowa (Mr. HARKIN) is introducing by the substitute is pretty much a manicure when an amputation is needed. He is talking about cutting a million dollars or so, and I am talking about cutting a hundred million dollars.

If the gentleman can go before his congressional district in this election and stand before his people and say, "I not only allowed the Panama Canal to slip into other hands, but I paid them to take it, and we will continue to pay them $100 million each year," then he has a different kind of constituency than I have.

Mr. Chairman, we also have a human rights crisis in Panama which we need to talk about. If we really want to put our money where our mouth is on stopping human rights violations around the world, then we have to ask people to clean up their act before we give them funds for assistance and not just hope they will do it after they get the money.

Mr. Chairman, I urge defeat of the substitute and yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN) as a substitute for the amendment offered by the gentleman from Idaho (Mr. HANSEN).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Idaho (Mr. HANSEN).

The question was taken; and on a division (demanded by Mr. HANSEN) there were—ayes 31, noes 48.

RECORDED VOTE

Mr. HANSEN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 172, noes 202, not voting 58, as follows:

[Roll No. 696]

The Clerk announced the following pairs:

On this vote:

Mr. Gammage for, with Mr. Eilberg against.

Mr. McDonald for, with Mr. Richmond against.

Mr. Risenhoover for, with Mr. Mitchell of Maryland against.

Mr. Sikes for, with Mr. Hawkins against.

Mr. Teague for, with Mr. Dingell against.

Mr. ROONEY changed his vote from "aye" to "no."

Mr. MOORE changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. YOUNG of Florida. Mr. Chairman, I offer an amendment. The Clerk read as follows:

Amendment offered by Mr. YOUNG of Florida: On page 23, after line 21, add the following new section:

SEC. . Of the total budget authority provided in this Act, except for budget authority for payments required by law and for direct or indirect assistance, credits, loans, or loan guarantees to or for Israel or Egypt, two per centum shall be withheld from obligation and expenditure: *Provided*, That of the budget authority provided in this Act for each appropriation account, activity, and project, except for budget authority for payments required by law and for direct or indirect assistance, credits, loans, or loan guarantees to or for Israel or Egypt, the amount withheld shall not exceed five per centum.

Mr. YOUNG of Florida. Mr. Chairman, this is the Miller-Conte-Bow-Harkin-Obey-Young, and so on, and so forth amendment, ever since proposition 13. It is a 2-percent across-the-board, and it exempts Egypt and Israel, and it says not more than 5 percent would come out of any particular amount.

While we are on the subject of reducing this bill, there is one subject I would like to mention.

Mr. Chairman, our colleague, the gentleman from Florida (Mr. SIKES) was not able to be here today on the floor, but he had intended to discuss one item with the chairman of the subcommittee. At this point I will do that in his behalf.

His concern is that foreign aid or funds made available through the Export-Import Bank or the Overseas Private Investment Corporation are being used in some cases for establishing or expanding production of commodities which are counterfeits of American trademarked or trade-named products.

The Levi Strauss Co. estimates that it may be losing several million dollars per year on trademarked jeans; Walt Disney Productions has estimated an annual loss of some $10 million; Bausch & Lomb estimates sales losses on Ray-Ban sunglasses at $8 million; Estee Lauder, Inc. estimates losses in the millions on counterfeit cosmetics.

I would like to engage in a colloquy with the chairman, the gentleman from Maryland (Mr. LONG) very briefly as to what he thinks of the concern of the gentleman from Florida (Mr. SIKES) and what he thinks we might be able to do to pay some attention to this matter?

Mr. LONG of Maryland. Mr. Chairman, if the gentleman will yield, I have had the opportunity to examine some of the concerns, and it does seem to me that they are serious concerns and that they merit very careful scrutiny. Obviously we cannot deal with that kind of thing in an appropriation bill because it is far too complicated and because we do not yet know all of the facts. Let me say to the gentleman that I will consult with the other members of the subcommittee with the possible view of holding an oversight hearing into this problem to see what the nature of the problem is and how serious it is and whether any legislation is required to remedy it.

Mr. YOUNG of Florida. I thank the gentleman from Maryland (Mr. LONG) very much for his comments. I am sure the gentleman from Florida (Mr. SIKES) will appreciate that response.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. MILLER OF OHIO TO THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. MILLER of Ohio. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. MILLER of Ohio to the amendment offered by Mr. YOUNG of Florida: In line 4 of the amendment strike "two" and insert "eight".

In line 9 of the amendment strike "five" and insert "twenty".

Mr. MILLER of Ohio. Mr. Chairman, I do not intend to take the 5 minutes.

With respect to the original amendment offered by the gentleman from Florida (Mr. YOUNG), that amendment would exempt the funds in the bill for Israel, which amount to $1.4 billion. It also would exempt the funds in the bill for Egypt, which amount to $750 million. My amendment to the Young amendment does not change that.

The bill now comes out to just over $7 billion after we deduct the cuts to date. After we deduct the $1.4 billion for Israel, $750 million for Egypt, and $24 million, which is a mandatory payment to the foreign service retirement and disability fund, we have just over $5 billion.

Mr. Chairman, eight percent of that amount of budget authority of $5 billion comes to $403 million. That is the amount of the cut: $403 million.

Mr. Chairman, I ask for a vote on the amendment.

Mr. LONG of Maryland. Mr. Chairman, I rise in opposition to the amendment.

I doubt that there is anything I have to say which we have not said over many, many times about this type of cut.

Mr. Chairman, I cannot accept it, and I therefore oppose it and ask that it be voted down.

Mr. CONTE. Mr. Chairman, I move to strike the last word.

I want to ask the author of the original amendment a question.

We have adopted a 2-percent cut in different sections of the bill, every section, I believe. Is this over and above the 2-percent cut, thus becoming a 4-percent cut?

Mr. YOUNG of Florida. If the gentleman will yield, Mr. Chairman, this particular amendment relates to the overall bill.

Mr. CONTE. And the other amendments we adopted to several titles would be in addition to this bill; is that correct?

Mr. YOUNG of Florida. Yes, but none of the other amendments went to the overall bill. They were just to specific sections or titles of it.

Mr. CONTE. I am well aware of that. That is my question. The bottom line, then, is that the gentleman is cutting 4 percent?

Mr. YOUNG of Florida. If the gentleman will yield further, the dollar amount of the amendment that I have offered would be just over $100 million.

Mr. CONTE. But the gentleman has not answered my question. We cut 2 percent section by section, did we not?

Mr. YOUNG of Florida. Yes. In certain sections.

Mr. CONTE. Now the gentleman is coming in with a 2-percent cut across the board for the entire bill. The bottom line is, is this a 4-percent cut on the bill?

Mr. YOUNG of Florida. If the gentleman will yield further, it is not a 4-percent cut on the bill. It is a 2-percent cut plus those other 2-percent cuts which were added on specific titles.

This would be just over $100 million in addition to the other cuts we have already made. The other 2-percent cuts did not relate to the entire bill. They related only to certain sections.

Mr. CONTE. They related to every section of the bill; section by section we made the cuts.

Mr. YOUNG of Florida. No, we did not, only in certain specific cases.

Mr. CONTE. I thank the gentleman, Mr. Chairman.

Mr. OBEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to both amendments.

I want the Members simply to know a few numbers.

This committee cut the bill $1.1 billion before it ever hit the floor. This House on three separate occasions has cut a total of $162 million from the bill below the committee figure. That means we have cut this bill $1,262,000,000, the largest cut of any appropriation bill in this fiscal year.

Mr. Chairman, I want to point out one other thing. Besides being a cut on top of a cut in some areas of the bill, as the gentleman from Massachusetts (Mr. CONTE) has pointed out, both amendments are simply unjust because both of them exempt Israel and Egypt from the other cuts. Without in any way trying to criticize any aid being provided to any country, I simply want to state that under this bill every man, woman, and child in the State of Israel will receive $500 in aid from the United States in this bill. Yet what this amendment does is to exempt those two countries, Israel and Egypt, from further cuts, and it cuts countries where the per capita income for a year is $250. I do not think that is morally defensible. I do not think Israel would want it; I do not think Egypt would want it; and I do not think the American people would.

Mr. Chairman, I yield back the remainder of my time.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words. I will not take the full time.

Since my colleague was not able to yield, this bill, still at $7.2 billion represents a very, very substantial increase over last year. Last year it was $6.7 billion. So the gentleman from Ohio (Mr. MILLER) and the gentleman from Florida (Mr. YOUNG) have merely tempered that increase. They have not in any way done damage to the aid to Israel, and, therefore, I did not think the impression should be left that the committee had really drastically cut that much. They had done a better job than they could have done, but the restraints on increases were not anywhere near as substantial as many of us feel they should have been. The effect of the Miller amendment or the Young amendment are to provide restraint on increases; it is not a drastic slice.

Mr. BAUMAN. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

I am informed by the gentleman from Florida (Mr. YOUNG) in direct answer to a question I just put to him that this is still the largest single annual foreign aid appropriation ever considered by the Congress of the United States.

Mr. ROUSSELOT. This bill is indeed the largest single foreign aid appropriation. And it would be still the largest bill with either the Miller or the Young amendment.

Mr. BAUMAN. With the cut.

Mr. ROUSSELOT. Either with the Miller or the Young amendments.

I yield back the remainder of my time.

AMENDMENT OFFERED BY MR. HARKIN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. YOUNG OF FLORIDA

Mr. HARKIN. I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN as a substitute for the amendment offered by Mr. YOUNG of Florida: In lieu of the matter proposed by the YOUNG of Florida amendment, insert the following:

SEC. 511. Of the total budget authority provided in this Act, except for the appropriations for activities, programs, and projects in title I, title II, and the Inter-American Development Bank and the International Development Association, two percentum shall be withheld from obligation and expenditure. Of the amount provided in this Act for each appropriation account, activity and project, except for payments required by law, the amount withheld pursuant to this paragraph shall not exceed five per centum.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. MILLER) to the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. MILLER of Ohio. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 184, noes 199, not voting 49, as follows:

[Rollcall Vote No. 697]

Mr. Breaux for, with Mr. Miller of California against.

Mr. Sikes for, with Mr. Tsongas against.

Mr. Teague for, with Mr. Shipley against.

Mrs. HECKLER, Mr. D'AMOURS, and Mr. ANDREWS of North Carolina changed their vote from "no" to "aye."

So the amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN) as a substitute for the amendment offered by the gentleman from Florida (Mr. YOUNG).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. CHARLES WILSON of Texas. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—Ayes 289, Noes 95, not voting 48, as follows:

[Rollcall Vote No. 698]

Hawkins	Quie	

Mr. BEILENSON changed his vote from "aye" to "no."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

Mr. BUCHANAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the legislation before us today is important in many respects. First, it is in the economic and security interest of the United States and secondly, it is vital to the virtual survival of millions of human beings who are less fortunate than we are.

During the course of the debate on this legislation, we have heard reference made to the fact that the American people do not support foreign aid giveaway programs. I would venture to guess that if you asked the average American, "Do you favor foreign aid giveaways?" the answer would be a resounding "no."

On the other hand, I sincerely believe that if you asked the average American whether he or she were willing to contribute a small portion of the vast resources to this Nation to save the lives of perhaps a million children expected to die in the Third World this year from starvation and diseases long conquered in this country, the answer would be an overwhelming "yes."

We have seen in recent months increased activity by the Governments of the Soviet Union and Cuba in Africa in the introduction of weapons of war in Africa. With the funds provided in this bill, we will have the opportunity to do good in the face of Soviet evil and to provide the weapons of peace instead of the weapons for war.

I would say to my colleagues that our weapons for peace will have a substantially more far-reaching and long-lasting effect on the future of this portion of the world than Cuban soldiers and Soviet tanks.

The United States is in an unique position to provide assistance because of our technological superiority, our concern for mankind and our vast wealth.

Notwithstanding this wealth, however, we do have a substantial deficit in our balance of payments. The legislation before us can help to alleviate that deficit. I think this is underlined by the broad support expressed for this bill as reported by the Appropriations Committee by both business and industry.

The chamber of commerce vice president, Hilton Davis, in endorsing this bill said:

> International financial institutions' work is vital to continue growth of developing nations. Expansion of third world markets offers valuable opportunity to improve U.S. export performance and reduce serious trade deficit.

AFL–CIO President George Meany who also called for the passage of this bill without further cuts said:

> Unless the western industrialized nations contribute to the development of economic and social infrastructures in the Third World, the inequities that characterize income distribution under the shadow of totalitarian forms of government that prevails in many of these countries will persist.

These leaders express their support because they believe this legislation to be in our own national interest.

In my own State of Alabama, some 13,000 jobs are directly related to exports. In the 4 years from 1972 to 1976, exports in the primary metal industries increased some 80 percent alone.

As the vice chairman of the steel caucus, I am deeply concerned about the future of the steel industry in the United States. The funds provided by this legislation can help to create new markets abroad and expand existing ones, thus this bill has drawn the endorsement of the United Steelworkers.

I would also like to take this opportunity to underline that much of the money appropriated in this bill will be spent in the United States for goods and services, indeed, a substantial portion of the Agency for International Development funds are spent right here at home.

The most recent figures for Alabama show that some $4.8 million in foreign aid money was spent in our State for goods and services while an additional $21.6 million in foreign aid money was spent for contracts for technical services in Alabama last year, including continued substantial sums for Auburn University's great aquaculture program, which is primarily funded by AID.

In recent years, AID has spent more than $77 million in Alabama for such programs.

In addition, some $3 million in contracts from the World Bank and International Development Association are in effect in Alabama.

While there are substantial economic reasons for our foreign assistance programs, there are also overriding humanitarian concerns. Such noted American religious leaders as Dr. Jimmy Allen and Dr. Foy Valentine of the Southern Baptist Convention, Rabbi Mark Tannenbaum of the American Jewish Committee, Most Rev. Thomas Kelly of the Catholic Conference and Archbishop Iakovos of the Greek Orthodox Archdiocese of North and South America and many others have endorsed this legislation.

In a letter which I believe most Members received, they said, and I quote,

> As the prophets spoke in behalf of the orphans and the widows, so must we address ourselves to the needs of those throughout the globe who live in conditions of absolute poverty, deprived of basic nutrition, without adequate shelter, education, health care or employment. We have both pressing needs and poor people here in our own society, but the added burden of the global poor is that they have even less voice and visibility in our midst.

I would like to take this opportunity to commend the Southern Baptist Convention for its concern for the poor of the world as reflected by the adoption of a resolution on world hunger and its scheduling of a world hunger conference this Fall.

The resolution, which cited the Biblical mandate to feed the hungry, called on all Southern Baptists to "exercise responsible and vigorious Christian citizenship on behalf of the hungry people of the world".

The funds appropriated by this legislation are small in comparison to the total budget of this country, but their impact can be substantiai.

The voices of the starving in the Sahel and in Bangladesh cry out. They look to us for their very survival. We can ill afford to turn a deaf ear to the voices of those who, without our help, face a bleak future if, indeed, they face any future at all.

I, therefore, urge the adoption of this bill without cutting amendments damaging to our own interest and of tragic consequences to those we seek to help, and who without our help will surely suffer, and, in many cases, die.

● Mr. MIKVA. Mr. Chairman, I intend to vote for H.R. 12931, the fiscal year 1979 foreign aid appropriations, because the bill will allow the United States to maintain its position as the most influential voice in the world.

It is common practice for politicians to make Fourth of July speeches about reducing Federal spending. Unfortunate-

ly, some of those speeches ignore the significance of the July 4 date in U.S. history. July 4 marked the emergence of the United States as the leading democracy in the world. That is a position we have maintained for two centuries, and it is a position which all of us want to continue.

Mr. Chairman, I would suggest to my colleagues that if we cut the fiscal year 1979 foreign aid appropriations bill any further we will jeopardize the role of the United States in the world community. The bill before us already has been reduced by over $1 billion from the amount requested by the administration. That is a cut of over 13 percent and it makes this bill the smallest appropriation bill before the Congress except for the District of Columbia appropriation.

In deference to the concern of many Members of Congress about the participation of the United States in international financial institutions (IFI's) like the World Bank, the Inter-American Development Bank, and the International Development Association, almost $900 million has been cut from the amounts requested by the administration for U.S. contributions to the IFI's. To make further cuts in IFI contributions, Mr. Chairman, would be irresponsible. Not only would it jeopardize the economies of many countries throughout the world, but it would also destroy them as markets for U.S. goods and seriously destabilize their governments.

The long-term damage to the United States caused by further reductions to the IFI's could be even more serious, however, it would send out a clear signal that the United States is no longer interested in the problems of the world. Further cuts in U.S. contributions would require the other successful countries in the world to give more, and since we would continue to deal with the recipients of assistance the United States would be reaping the benefits of foreign aid without shouldering its share of the burdens.

Basically, Mr. Chairman, those who want to further reduce this bill are hoping to set the clock back to the days when the United States could "go it alone" in the world. That is one legislative effort that cannot succeed. This bill is an effort to deal with the real world—both internationally and domestically. Under this bill, the United States can exercise its considerable influence in the world without exceeding the very tightest fiscal constraints on our ability to participate in the international lending institutions. I urge my colleagues to support the bill and resist efforts to cut the measure.●

● Mr. SIKES. Mr. Chairman, I am deeply grateful to my distinguished and able friends, the gentleman from Louisiana (Mr. LONG) and the gentleman from Florida (Mr. YOUNG) for their consideration in bringing to the attention of the House the serious problem brought on for American manufacturers by foreign counterfeiting of American products.

It is felt that U.S. foreign aid funds are being used to some extent in that practice. Obviously it is a highly objectionable practice which should be curbed forthwith.

It was necessary that I be away from the Capitol and in my district at the time the subject was discussed. I am deeply concerned with the matter and had it been possible for me to be present I would have joined in the discussion in an effort to find a solution to the problem. I would urge that at the earliest possible time an amendment be adopted or other steps taken to specifically prohibit direct foreign aid or funds made available through the Export-Import Bank or the Overseas Private Investment Corporation to be used for establishing or expanding production of commodities which are counterfeits of American trademarked or trade named products.

I know of no aggregate figure which purports to represent the value of the international market in counterfeit merchandise. However, as has been widely reported in the press, individual American companies have made estimates of losses to counterfeiting. Levi Strauss Co. estimates that it may be losing several millions per year on trademarked jeans; Walt Disney Productions has estimated an annual loss of some 10 million; Bausch & Lomb estimates sales losses on Ray-Ban sunglasses at 8 million, Estee Lauder Inc. estimates losses in the millions on counterfeit cosmetics.

There are laws against commercial counterfeiting in most nations but most of these do not have adequately strong economic sanctions to deter counterfeiters. We do not believe that any foreign government would condone such commercial counterfeiting activity. There should be stronger incentives to foreign governments to step up their existing activity against such international pirates. In my way of thinking it would be unthinkable for one American dollar to be used to support any business abroad which is deliberately attempting to injure American industry. The committee is strongly on record against financing foreign producers of competitive commodities which are in surplus on the world market, if that assistance will cause substantial industry to U.S. producers of the same, similar, or competing commodity. However, further steps are needed. I urge that a full congressional investigation be launched into the despicable practice of international product counterfeiting. I believe that we need to bring the full extent of this problem to the attention of the Congress, the executive branch, and the American people. In the meantime I urge my colleagues to support a product counterfeiting amendment, or to take other steps which will function as a stop-gap until a full range of legislative weapons can be developed against this practice.●

Mr. LONG of Maryland. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. KAZEN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 12931) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. CEDERBERG

Mr. CEDERBERG. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. CEDERBERG. I am in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CEDERBERG moves to recommit the bill, H.R. 12931, to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device; and there were—yeas 223, nays 167, not voting 42, as follows:

[Rollcall Vote No. 700]

The Clerk announced the following pairs:

On this vote:

Mr. Mitchell of Maryland for, with Mr. Gammage against.

Mr. Richmond for, with Mrs. Lloyd of Tennessee against.

Mr. Hawkins for, with Mr. Teague against.

Mr. Tsongas for, with Mr. Breaux against.

Mr. Miller of California for, with Mr. McDonald against.

Mr. Krueger for, with Mr. Russo against.

Until further notice:

Mr. Stokes with Mr. Abdnor.

Mr. Evans of Colorado with Mr. Young of Alaska.

Mr. Flowers with Mr. Madigan.

Mr. Murphy of New York with Mr. Cohen.

Mr. Patterson of California with Mr. Broyhill.

Mr. Harrington with Mr. Quie.

Mr. Le Fante with Mr. Caputo.

Mr. Metcalfe with Mr. Symms.

Mr. Moss with Mr. Schuster.

Mr. Roncalio with Mr. Kemp.

Mr. Milford with Mr. Kasten.

Mr. Risenhoover with Mr. Del Clawson.

Mr. Shipley with Mr. Findley.

Mr. Sisk with Mr. Ruppe.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 13468. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 13468) entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LEAHY, Mr. DECONCINI, Mr. BUMPERS, Mr. MAGNUSON, Mr. MATHIAS, Mr. WEICKER, and Mr. YOUNG to be the conferees on the part of the Senate.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 12931

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent that the Clerk may be authorized to make any necessary corrections in section numbers, punctuation, and cross references in the engrossment of the bill, H.R. 12931.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 13468, DISTRICT OF COLUMBIA APPROPRIATION ACT, 1979

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13468) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

The Chair hears none, and appoints the following conferees: Messrs. NATCHER, GIAIMO, and MCKAY; Mrs. BURKE of California; and Messrs. CHARLES WILSON of Texas, BENJAMIN, MAHON, BURGENER, KEMP, and CEDERBERG.

THE FUNERAL IN ROME OF HIS HOLINESS, POPE PAUL VI

(Mr. GIAIMO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GIAIMO. Mr. Speaker, I have just returned from one of the most moving experiences of my life—the funeral in Rome of His Holiness, Pope Paul VI.

I was privileged to attend as a member of the official U.S. delegation, named by the President and headed by Mrs. Rosalynn Carter. The other members of the delegation were Senator EDWARD M. KENNEDY, of Massachusetts; Governor Hugh

Carey, of New York; Leonel J. Castillo, the U.S. Commissioner of Immigration and Naturalization; and the President's Special Representative to the Vatican, the Honorable Daniel M. Walters.

Mrs. Carter, our First Lady, was a most warm and gracious representative at these solemn ceremonies. In addition to attending the funeral mass itself in St. Peter's Square, she led the U.S. delegation the next day on a visit of condolence to the cardinals of the church, who had come to Rome from throughout the world, in the magnificent Consistory Hall of the Vatican. On Saturday, the day of the funeral, the delegation was visited earlier in the day by the American cardinals at the residence of the U.S. Ambassador. At all of these impressive ceremonies, I think the U.S. group felt a special sense of pride that our delegation was headed by such a lovely and sensitive First Lady.

The funeral, with the size and splendor of the facade of St. Peter's as a backdrop, was an occasion for sadness at the passing of a great Pope Paul. But it was also an occasion for rejoicing that this good man, who had contributed so much to world peace, love, justice, and understanding, was with the God he served so faithfully and for so long.

For me, a son of Italian immigrants who left Italy near the turn of the century for the opportunities of this great Nation, being chosen as a member of the official U.S. delegation was a particularly thrilling experience. The funeral rites were beautiful beyond description with the piazza of St. Peter's bathed in a late afternoon sunshine, which also lit the Eternal City of Rome, stretching away to the left of where the U.S. delegation was seated.

I am grateful to have been chosen by the President to represent my country at the ceremonies. I commend Mrs. Rosalynn Carter as a most appropriate and able leader of our delegation. With millions of others. Catholic and non-Catholic alike, I will remember Pope Paul for his goodness and his tireless efforts in the defense of truth and justice and peace among men.

AGRICULTURAL FOREIGN INVESTMENT DISCLOSURE ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 20 minutes.

● Mr. GRASSLEY. Mr. Speaker, I introduced legislation on June 14, 1978, which requires reporting and registration of U.S. agricultural land held, acquired or transferred by foreign interests. The bill was developed by Congressmen KREBS, NOLAN, and myself to assure Congress of obtaining accurate and complete data on foreign ownership. The bill requires foreign investors to report holdings to the Secretary of Agriculture and further directs the Secretary to analyze this information and determine the effects this ownership may produce. I am especially concerned about the effects of foreign ownership on the family farm system and thus feel legislation requiring concrete data is essential.

All investors, foreign and local, recognize farmland as a limited resource and know its value will inevitably increase. The limited quantity of agriculture land makes investment very desirable and using land as a hedge against inflation only increases this desirability.

In June, the General Accounting Office released a preliminary study on foreign investment. The GAO revealed they had studied 25 counties in 5 States to determine the extent of land purchases by foreigners. Their findings showed 0.3 percent of the total acres in these counties were foreignly owned; however the GAO stressed uncertainty in the completeness of the information.

Iowa and Minnesota are the only States requiring all nonresident aliens and corporations to file annual reports on their agricultural landholdings. Figures of 1977 for Iowa showed foreign ownership represented 0.03 percent of their farmland while Minnesota reported 0.09 percent. Although data from these States does not indicate extensive foreign investment or trends in that direction, no information is available as to what is happening on a nationwide basis.

Most other States have collected very little data on foreign ownership of farmland; and while a few do have information, compilation methods vary widely enough that the data is inconclusive.

Several problems exist in the State registration systems, thus making it difficult to determine foreign ownership. In many instances, buyers are listed as corporations and, therefore, the beneficial owners cannot be determined. Other foreign investors use American agents. And still other systems fail to be complete as only those owning a certain number of acres or those holding land valued at a minimum price are required to register, thus those States cannot determine the total acreage owned by foreigners.

Because of these and other variations in systems, there is no uniformity of data between States; no way even to compare their situations, much less come up with anything that could give us a good idea of the situation nationally.

According to the Agriculture Department, farmland prices rose from a nationwide average of $219 per acre to $490 per acre in the last 6 years. This is a price escalation at a rate of 2½ times the rate of inflation. Although part of this price increase comes from farmers bidding against each other for land, some of the increase may stem from investment by foreign buyers.

There is concern that if foreign investors actually are buying land at inflated prices, the price will rise out of reach of small farmers, further threatening the survival of the family farm. Another concern is that foreign ownership, and absentee ownership generally, may cause deterioration of good conservation practices. Still others worry that rural communities may be weakened because farm returns may not be spent locally.

Hearings on the issue were held by the Family Farms, Rural Development, and Special Studies House Agriculture Subcommittee, of which I am the ranking minority member, on June 20, July 19, and July 28. Some witnesses testified foreign investment was beneficial to the United States because of important contributions to the economy and because it reduces the balance-of-payments deficit. Others testified foreign investment was likely to force the family farm out of business. But regardless of the stand on regulation, the hearings confirmed the lack of national data and in my mind raised serious question about the administration's willingness or desire to even find out the extent of foreign investment in U.S. farmland.

There is a basic difference between foreign investment in business and industry and investment in farmland which the administration refuses to acknowledge. Foreign capital in business and industry is job creating and an economic stimulus, while investment in U.S. farmland is not, and some contend may have even the opposite effect. The administration seems to be telling us that we should pay for our oil by selling our land.

The hearings confirmed that more facts are needed on the extent of foreign investment in U.S. agricultural land. Current estimates about the volume of farmland owned by people or institutions overseas are bound on little more than speculation, and this is an area in which speculation and educated guesses are simply not good enough. A nationwide reporting system is essential before Congress will be able to observe the investment trends and make a rational policy decision concerning foreign investment.

The legislation which we have introduced, the Agriculture Foreign Investment Disclosure Act, is a reliable registration system which is both comprehensive and inexpensive. It requires persons, corporations, trusts, and other groups who acquire, hold, or transfer interests in agricultural land to report such transactions and holdings to the Secretary of Agriculture and directs the Secretary to analyze information contained in such reports and determine the effects such transactions and holding have, particularly on family farms and rural communities. Other requirements of the bill include registration within 90 days after acquisition or transfer. Violators are subject to a stiff civil penalty not to exceed 25 percent of the fair market value of their interest in the unreported land.

The bill also alleviates any burden on local government. In its recent report, the GAO stated a federally legislated nationwide registration system would be the simplest and most feasible approach of the five systems studied.

H.R. 13356 was reported out of the Subcommittee on Family Farms, Rural Development, and Special Studies on August 8. The Senate passed a similar

Foreign Investment Act (S. 3384) on August 11.

Mr. Speaker, the need for disclosure of foreign investment in U.S. agricultural land is clear. H.R. 13356 is scheduled to be marked up in the full Agriculture Committee on August 15. I urge my colleagues to support the Foreign Investment Disclosure Act as a comprehensive and reliable system for obtaining accurate data. Included is a section by section analysis of H.R. 13356, as amended by the Subcommittee on Family Farms, Rural Development, and Special Studies.

AGRICULTURAL FOREIGN INVESTMENT DISCLOSURE ACT OF 1978 SECTION-BY-SECTION ANALYSIS

SHORT TITLE

Section 1 designates the "Agricultural Foreign Investment Act of 1978" as the short title of the bill.

REPORTING REQUIREMENTS

Section 2(a): Transactions after enactment.—Section 2(a) provides that any foreign person who acquires or transfers any interest, other than a security interest (i.e., mortgage), in agricultural land must file a report with the Secretary of Agriculture within 90 days after such acquisition or transfer. The report shall contain:

(1) the legal name and address of such foreign person;

(2) the citizenship of such foreign person, or

(3) the principal place of business and country where such foreign person is created or organized if such person is not an individual;

(4) the type of interest in agricultural land;

(5) the legal description and acreage of such land;

(6) the purchase price paid for such interest;

(7) and in cases where the foreign person is a transferor of such interest, the name, address, citizenship, or the principal place of business (of such transferee.)

(8) the agricultural purposes for which such foreign person intends to use the land; and

(9) such other information as the Secretary may require.

Section 2(b). Previous holdings.—Section 2(b) provides that any foreign person who holds any interest (other than a security interest) in agricultural land on the effective date of this section must submit a report within 180 days after such date.

The report shall contain essentially the same information as required in Section 2(a).

Section 2(c). Discretionary authority to require additional reports.—Section 2(c) provides that with respect to those individuals required to report under this act, the Secretary may in addition require

(1) such person to submit a report containing the legal name and address of each person who holds an interest in such person plus the citizenship or principal place of business and/or country of organization of such holder.

(2) with respect to the name of any person contained in any report submitted pursuant subsection 2(c)(1), the Secretary may take any action he deems necessary to determine the name, address, citizenship, principal place of business, and/or country or organization of any person whose legal name is contained in such report.

CIVIL PENALTY

Section 3(a) provides that if any foreign person fails to submit a report or submits a report which such person knows to be incomplete, misleading, or false, such person shall be subject to a civil penalty imposed by the Secretary and recoverable in a civil action brought by the Attorney General of the United States.

Section 3(b) provides the amount of the civil penalty imposed under subsection (a) shall be appropriate to carry out the purposes of this act but shall not exceed 25% of the fair market value of the agricultural land in question.

STUDIES

Section 4(a) provides that the Secretary shall submit (1) a report based on his findings and conclusions regarding his analysis of the information obtained under section 2 particularly as they relate to family farms and rural communities; and (2) his findings and conclusions regarding the effectiveness and efficiency of such reporting requirements in providing the information required.

Section 4(a) establishes a timetable for the Secretary to follow in submitting the reports of his findings and conclusions:

(1) with respect to the information obtained in the first 6 month period, within 3 months after the end of such period;

(2) with respect to the information obtained during the first 12 month period, within 3 months after the end of such period;

(3) with respect to each calendar year following the first 12 month period, within 3 months after the end of such calendar year.

PUBLIC INSPECTION

Section 5 provides that any reports submitted to the Secretary under section 2 shall be available for public inspection not later than 10 days after the date on which such report was received.

REGULATIONS

Section 6 requires the Secretary, not later than 90 days after the date of enactment of this act, to prescribe final regulations necessary to carry out the provisions of this Act.

DEFINITIONS

Section 7 defines the term used in this Act.

(1) "Agricultural Land" means any land used for agricultural, forestry, or timber production purposes as determined by the secretary under regulations;

(2) "Foreign Government" means any government other than the federal government or the government of any state or political subdivision of a state;

(3) the term "foreign person" means:

(a) any individual who is not a citizen or a national of the United States or citizen of the Northern Mariana Islands or the Trust Territory of the Pacific Islands, or who is not lawfully admitted for permanent residence or paroled into the United States under the Immigration and Nationality Act;

(b) any person other than an individual or government, created or organized under the laws of a foreign government or with its principal place of business outside of all the states.

(c) any person other than an individual or government created by the laws of any state which is substantially controlled (as determined by the Secretary) by any individual or combination of individuals referred to in subparagraph (a) or (b).

(d) any foreign government.

(4) "person" includes any individual, corporation association, partnership, society, or any other similar organization;

(5) "Secretary" means the Secretary of Agriculture;

(6) "State" means any of the several states, the District of Columbia, the Commonwealth of Puerto Rico, the Northern Mariana Islands, Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or any other territory or possession of the United States.

EFFECTIVE DATES

Section 8. This Act shall become effective on the date of its enactment with the exception of section 2 which shall become effective on the date on which final regulations become effective.●

THE SOVIET SILENCING OF ONE MORE OUTSPOKEN VOICE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. FENWICK) is recognized for 5 minutes.

● Mrs. FENWICK. Mr. Speaker, it is perhaps ironic that Soviet dissident Aleksandr Podrabinek, who is known in the Soviet Union and abroad for his outspoken criticisms of Soviets practices, was arrested largely because he refused to speak out against a fellow dissident, Yuri Orlov, as a state witness in Orlov's trial. Now Podrabinek is being forced to take the stand in his own defense at his own trial which is scheduled to begin sometime this week.

Podrabinek is one of the youngest of the Helsinki monitors and has already, in the brief 25 years of his existence, compiled a remarkable record of strength and courage in the face of increasingly repressive forces. Last year, he wrote a detailed exposé of the use of psychiatric treatment as a means of political punishment in the Soviet Union and has kept extensive files on instances of such abuse up to the date of his arrest on May 15, 1978. Through his book, "Punitive Medicine," he let the world know of cases such as that of Anna Chertkovas, a 51-year old Pentecostalist, who was forced to enter a phychiatric hospital in 1973 because of her religious beliefs. Prior to her institutionalization, Soviet authorities refused to grant her a residence permit and bulldozed the small hut she had built outside Alma-Ata on two separate occasions. In an attempt to censor news of such inhuman behavior, the Soviets have responded in the only way they know how—by inhumanely arresting the bearer of such news and threatening him with 3 years imprisonment.

In charging Podrabinek with defamation of the Soviet State social system, the Soviets are also making good on their threat last year to arrest the young dissident if he did not cooperate with the KGB during their investigation of the Orlov case.

Mr. Speaker, I am afraid that what we are seeing is a systematic and ugly campaign by the Soviet Government against all those brave and lonely souls who have dared let the world know of the brutality of their rulers. The silencing of these voices is not only a personal tragedy for the individuals involved, but a critical loss for those in the world who desperately care about the fate of the little known and long-suffering Mrs. Chertkovas.●

COMMEMORATION OF THE ANNIVERSARY OF THE INVASION OF POLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, 39 years ago a tragic event occurred in the history of Poland and the world's

free nations. It was during September, 1939, that the peaceful state of Poland was invaded by the forces of Nazism from the west and the forces of communism from the east. Poland became a tryrannized and persecuted country, deprived of half its territory and millions of its people.

Alone and unaided, the Polish army fought heroically against the overwhelming odds and inhuman terror unleashed by the invaders. Nevertheless, the military might of the enemy proved too strong for the regular army. Thousands of Polish infantry, navy, and air force troops fled the country and took up arms once more with the Allies.

As the Polish army slowly disintegrated, an underground movement was formed, directed by the Polish Government-in-exile. Stray divisions of the Polish army joined together with civilian men, women, and children in fighting the enemy, reacting consistently with spirit and conviction. Refusing to betray their national honor and collaborate with the enemy, 6 million Poles preferred self-respect and death to capitulation and cringing life.

Even in 1945, when World War II ended, there was no peace for Poland. The Polish people suffered deportation and imprisonment in labor camps as the Communists systematically attempted to destroy Polish cultural and religious life. Absorbed by Soviet imperialism, the Poles have continued to fight for personal liberty and national integrity.

Those Poles who have emigrated to the United States have brought with them their love of liberty and their respect for law and order. They have contributed socially, economically, politically, and culturally to the advancement of our Nation. They have helped to make the United States one of the greatest countries in the world.

I take this opportunity, Mr. Speaker, to give recognition to the great number of Polish Americans who reside in the 11th District of Illinois whom I am proud to represent in the Congress. They form a substantial part of the group of solid hard-working Americans who are the backbone of our country.

As we again observe this anniversary in the House of Representatives, I am honored to join Americans of Polish descent in Chicago and all over the Nation in their hopes and prayers for the reentry of Poland into the community of free nations. The long-suffering Polish people still look to a strong America for moral support in their continuing struggle to achieve their just aspirations to national liberty.

Mr. Speaker, a poem entitled "The Polish Credo" was recently written by my constituent "Harry the Horse" Lyons. Mr. Lyons dedicated his poem to my good Aloysius Mazewski, President of the Polish National Alliance and the Polish American Congress, a man who has rendered outstanding service over the years to Polish-Americans all over the United States. The poem follows:

THE POLISH CREDO

Oh I am a Pole.

In my veins flows the blood of Patriots, Scholars, Scientists and Kings. I am the Descendant of a Copernicus who would reach for the stars, a Madame Curie unraveling the mysteries of nature, and a Jan Paderewski uplifting the soul of man.

Yes, I am a Pole.

My heart beats with love for my Ancestral Homeland and for my adopted Country, this young America. When tyranny or despotism have threatened, I have always been first to resist.

I was with Sobieski lifting the siege of Vienna, Thaddeus Kosciuzko at Valley Forge and the RAF over Channel skies in the battle of Britain.

I am a Poet like Adam Mickiewicz, an Artist like Jan Matejko, an Author like Josef Konrad and a Musician like Frederick Chopin.

I believe in the Dignity of the Human Spirit and oppose Godlessness.

If any man would choose to be my friend, Welcome, as he will know what I stand for.

If not; then let him know that enduring here, I wait and watch . . . For I am a Pole!

"HARRY THE HORSE".●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. OTTINGER) is recognized for 5 minutes.

● Mr. OTTINGER. On rollcall No. 690, final passage of the Electional Funds Transfer Act, which passed 314 to 2, I was unavoidably absent due to having to leave to make a previous commitment in my district. Had I been present I would have voted "aye." ●

MONTHLY LIST OF GAO REPORTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

● Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The June 1978 list includes:

SUMMARIES OF REPORTS

NATIONAL DEFENSE

Benefits And Problems Associated With Improving The Ratio of U.S. Combat Troops To Military Support Personnel In Europe. LCD–78–408A, June 7.

Review Of Navy's Fiscal Year 1979 Appropriation Request For Funds To Construct Trident Base Support Facilities And For Community Impact Assistance. LCD–78–328, June 14.

THE McCARRAN-FERGUSON ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, as you know, the business of insurance is presently regulated almost exclusively by the individual States, with virtually no Federal involvement. This exemption from Federal regulation is set forth in the McCarran-Ferguson Act, passed by Congress in 1945 in response to the Supreme Court's decision the preceding year in United States against South-Eastern Underwriters' Association. That case held for the first time that insurance was "commerce" and hence subject to Federal regulation—specifically in that case, regulation under the Federal antitrust laws.

The McCarran-Ferguson Act was hastily conceived and was enacted with scant legislative history. In recent years, it has been the source of increasing litigation, and the subject of much criticism.

I have introduced today four bills amending and or repealing the McCarran-Ferguson Act. At this time, I am not entirely sure what role the Federal Government should play in regulating the insurance industry. I am, however, firmly convinced that the present system of exclusive State regulation of insurance is ineffective.

The four proposals vary across a broad spectrum. They include: First, outright repeal of the McCarran-Ferguson Act; second, amending McCarran-Ferguson to require effective State regulation to obtain the exemption from Federal regulation; third, amending McCarran-Ferguson to clarify that the "business of insurance" includes only true insurance matters—and does not include such extraneous activities as, for example, advertising; and fourth, deleting from the McCarran-Ferguson Act only that portion of it exempting the business of insurance from Federal regulation.

These bills represent alternative approaches that may be taken. While I certainly do not contemplate floor action on any of them during 1978, I sincerely hope that they will focus attention on this important problem. Further, I hope that committee hearings can begin on these measures during the remainder of this session. Perhaps with guidance from the National Commission on Antitrust Laws, which is presently considering the McCarran-Ferguson exemption, Congress may gain a better understanding as to the proper route upon which to proceed.

We are all aware of problems back home regarding virtually all types of insurance, including automobile liability insurance, product liability, and homeowners insurance to name a few. Congress must begin focusing its attention on these difficulties, not in an ad hoc manner, as it has done in the past, but with a view toward the total regulatory environment—so that future insurance "crises" may be avoided before they occur.●

SOME THOUGHTS ON AMERICA'S PUBLIC SCHOOLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 10 minutes.

● Mr. BAUCUS. Mr. Speaker, I would like to discuss today the importance of two major education proposals pending before Congress—tuition tax credits and the 1978 ESEA amendments.

Citizens rightfully demand that their tax dollars be used in the most effective and efficient means possible. It is no surprise, then, that as Americans increasingly view education as a worthwhile and productive venture the demand to invest more Federal funds in education grows.

However, as in most cases of Government intervention, the degree and means of Federal involvement are not clear. The most controversial issue concerning the use of Federal education funds has centered about tuition tax credits for parents with children attending private schools.

TUITION TAX CREDITS

The controversy over tuition tax credits is not unwarranted or unexpected. As the economy continues to suffer from heated inflation, we all naturally look for some type of "break" that will alleviate the pressure. However, when we consider any type of public financing, we must take into account:

First. The cost;

Second. Who will bear that cost; and

Third. Who will benefit from it.

With respect to cost, the price tag for most tax credit bills being considered today runs at least $1 billion a year and some are more than four times that amount.

As to who will benefit from such proposals, suffice it to say that most families in my home State of Montana will not—despite the fact that nearly everyone in our State is feeling the squeeze of reduced buying power due to inflation

and other economic problems. Why? The answer, quite simply, is that most families in Montana do not have children in private schools. That does not mean that they are free of the inflationary pressures of higher taxes and that they do not need some type of tax relief.

Ironically, tuition tax credit proposals are both too narrow and too broad. On the one hand, the category of taxpayers they are designed to help is too limited because it does not include families who do not have children in private schools but yet are having a tough time dealing with the "stagflation" that has been with our economy for the past few years. On the other hand, the tax credit proposals are too broad because they provide tax relief to wealthy families who do not need it. That is, a millionaire who sends a child to a private school would qualify for a tax credit in this proposal, while a family struggling to eke out a living would not if they do not have children in private schools.

In most cases, moreover, tuition tax credits would not relieve the financial burdens now afflicting parents with children in private schools. Economic principles tell us that inflation would eat up most benefits tuition tax credits have to offer. Furthermore, since teachers' salaries in private schools are substantially below those in State or public schools, commonsense suggests that if more funds were available to pay private school costs, private school teachers would seek salaries which are comparable to their public school counterparts.

A far better way to provide tax relief is through "across-the-board" cuts in our income tax table—providing, of course, that such cuts do not stimulate inflation.

1978 ESEA AMENDMENTS

The most constructive use of Federal education dollars has been to improve and expand public school facilities so that they reach a greater number of people and provide more services. In passing legislation to extend the Elementary and Secondary Education Act (ESEA), the House has taken an important step forward to revitalize existing educational programs.

The bill's philosophy is a simple one. By more logically restructuring current education programs, eliminating unnecessary bureaucracy, and progressively changing outdated eligibility requirements, all the States should receive substantial support in Federal education funds. Of course, the total impact will not be clear until the bill goes through the Senate, but it is a reassuring sign to know that both Congress and the administration are working together to promote progressive education programs.

In such areas as impact aid, basic education grants, and poverty concentration programs, Montana should receive over $2.5 million of education money. Other States will likewise reap in substantial funds to boost their educational endeavors. While some funding is not as high I would like to see it, especially for impact aid, the ESEA represents a step in the right direction.

The attractiveness of the 1978 Elementary and Secondary Education Act does not depend solely on its substantial monetary support. The bill is especially responsive to local educators and has accordingly adopted several new "target" programs. Among its provisions, the ESEA has extended community education programs for 5 years. As a result, school facilities are being opened during evening hours and often on Saturdays and Sundays, even in the summer, to offer a wide range of recreational and educational programs for children and adults. This will allow us to get more use out of existing facilities and extend tight budgets so that each dollar spent works harder.

It is rare for any governmental activity to offer not only better public services, but also an efficient use of taxpayers' dollars. The key now will be to insure that there is no loop between the goals of the ESEA and results which affect a broad range of taxpayers.●

GENERAL LEAVE

Mr. CAVANAUGH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from New York (Mr. LUNDINE).

The SPEAKER pro tempore (Mr. GIAIMO) Is there objection to the request of the gentleman from Nebraska?

There was no objection.

CONFERENCE REPORT ON H.R. 6669

Mr. TEAGUE submitted the following conference report and statement on the bill (H.R. 6669) to establish a national climate program, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 95–1489)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6669) to establish a national climate program, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "National Climate Program Act".

SEC. 2. FINDINGS.

The Congress finds and declares the following:

(1) Weather and climate change affect food production, energy use, land use, water resources and other factors vital to national security and human welfare.

(2) An ability to anticipate natural and man-induced changes in climate would contribute to the soundness of policy decisions in the public and private sectors.

(3) Significant improvements in the ability to forecast climate on an intermediate and long-term basis are possible.

(4) Information regarding climate is not being fully disseminated or used, and Federal efforts have given insufficient attention to assessing and applying this information.

(5) Climate fluctuation and change occur on a global basis, and deficiencies exist in the system for monitoring global climate changes. International cooperation for the purpose of sharing the benefits and costs of a global effort to understand climate is essential.

(6) The United States lacks a well-defined and coordinated program in climate-related research, monitoring, assessment of effects, and information utilization.

SEC. 3. PURPOSE.

It is the purpose of the Congress in this Act to establish a national climate program that will assist the Nation and the world to understand and respond to natural and man-induced climate processes and their implications.

SEC. 4. DEFINITIONS.

As used in this Act, unless the context otherwise requires:

(1) The term "Office" means the National Climate Program Office.

(2) The term "Program" means the National Climate Program.

(3) The term "Secretary" means the Secretary of Commerce.

SEC. 5. NATIONAL CLIMATE PROGRAM.

(a) ESTABLISHMENT.—The President shall establish a National Climate Program in accordance with the provisions, findings and purposes of this Act.

(b) DUTIES.—The President shall—

(1) promulgate the 5-year plans described in subsection (d)(8):

(2) define the roles in the Program of Federal officers, departments, and agencies, including the Departments of Agriculture, Commerce, Defense, Energy, Interior, State, and Transportation; the Environmental Protection Agency; the National Aeronautics and Space Administration; the Council on Environmental Quality; the National Science Foundation; and the Office of Science and Technology Policy; and

(3) provide for Program coordination.

(c) NATIONAL CLIMATE PROGRAM OFFICE.—The Secretary shall establish within the Department of Commerce a National Climate Program Office not later than 30 days after the date of the enactment of this Act. The Office shall be the lead entity responsible for administering the Program. Each Federal officer, employee, department and agency involved in the Program shall cooperate with the Secretary in carrying out the provisions of this Act.

(d) PROGRAM ELEMENTS.—The Program shall include, but not be limited to, the following elements:

(1) assessments of the effect to climate on the natural environment, agricultural production, energy supply and demand, land and water resources, transportation, human health and national security. Such assessments shall be conducted to the maximum extent possible by those Federal agencies having national programs in food, fiber, raw materials, energy, transportation, land and water management, and other such responsibilities, in accordance with existing laws and regulations. Where appropriate such assessments may include recommendations for action;

(2) basic and applied research to improve the understanding of climate processes, natural and man induced, and the social, economic, and political implications of climate change;

(3) methods for improving climate forecasts on a monthly, seasonal, yearly, and longer basis;

(4) global data collection, and monitoring and analysis activities to provide reliable, useful and readily available information on a continuing basis;

(5) systems for the management and active dissemination of climatological data, information and assesments, including mechanisms for consultation with current and potential users;

(6) measures for increasing international

cooperation in climate research, monitoring analysis and data dissemination;

(7) mechanisms for intergovernmental climate-related studies and services including participation by universities, the private sector and others concerned with applied research and advisory services;

(8) experimental climate forecast centers, which shall (A) be responsible for making and routinely updating experimental climate forecasts of a monthly, seasonal, annual, and longer nature, based on a variety of experimental techniques; (B) establish procedures to have forecasts reviewed and their accuracy evaluated; and (C) protect against premature reliance on such experimental forecasts; and

(9) a preliminary 5-year plan, to be submitted to the Congress for review and comment, not later than 180 days after the enactment of this Act, and a final 5-year plan to be submitted to the Congress not later than 1 year after the enactment of this Act, that shall be revised and extended biennially. Each plan shall establish the goals and priorities for the Program, including the intergovernmental program under section 6, over the subsequent 5-year period, and shall contain details regarding (A) the role of Federal agencies in the program. (B) Federal funding required to enable the Program to achieve such goals, and (C) Program accomplishments that must be achieved to ensure that Program goals are met within the time frame established by the plan.

(e) ADVISORY COMMITTEE AND INTERAGENCY GROUPS.—(1) The Secretary shall establish and maintain an advisory committee of users and producers of climate data, information and services to advise the Secretary and the Congress on the conduct of the Program. Members of such committee shall not be employed by the Federal Government and may receive compensation at the daily rate for GS–16 of the General Schedule for each day engaged in the actual performance of their duties for the committee and while so serving away from their homes or regular place of business may be allowed travel expenses, including per diem in lieu of subsistence.

(2) The Secretary shall establish and maintain such interagency groups as are necessary and appropriate to assist in carrying out responsibilities under this Act.

(f) COOPERATION.—(1) The Program shall be conducted so as to encourage cooperation with, and participation in the Program by, other organizations or agencies involved in related activities. For this purpose the Secretary shall cooperate and participate with other Federal agencies, and foreign, international, and domestic organizations and agencies involved in international or domestic climate-related programs.

(2) The Secretary and the Secretary of State shall cooperate in (A) providing representation at climate-related international meetings and conferences in which the United States participates, and (B) coordinating the activities of the Program with the climate programs of other nations and international agencies and organizations, including the World Meteorological Organization, the International Council of Scientific Unions, the United Nations Environmental Program, the United Nations Educational, Scientific, and Cultural Organization, the World Health Organization, and Food and Agriculture Organization.

(g) BUDGETING.—(1) Each Federal agency and department participating in the Program, shall prepare and submit to the Office of Management and Budget, on or before the date of submission of departmental requests for appropriations to the Office of Management and Budget, an annual request for appropriations for the Program for the subsequent fiscal year. The Office of Management and Budget shall review the request for appropriations as an integrated, coherent, multiagency request.

(2) Section 304 of the Act of October 18, 1962 (31 U.S.C. 25) (relating to preparation of horizontal budgets for meterology), is amended—

(A) by inserting "and of the National Climate Program established under the National Climate Program Act" after "meterology", and

(B) by striking out "aspects of the program" and inserting in lieu thereof "aspects of the programs".

The amendments made by the preceding sentence shall apply with respect to budgets submitted for fiscal years beginning 6 months or more after the date of the enactment of this Act.

SEC. 6. INTERGOVERNMENTAL CLIMATE PROGRAMS.

(a) ESTABLISHMENT.—The Secretary shall establish a program for Federal and State cooperative activities in climate studies and advisory services. The Secretary is authorized to make annual grants to any State or group of States, such grants to be made available to public or private educational institutions, to State agencies and to other persons or institutions qualified to conduct climate-related studies or provide climate-related services. Such grants may be made for not more than 50 percent of the costs, in any one year, of the research conducted or services provided under the grant. Federal funds received from other sources shall not be used to pay the remaining share of the cost of such research or services. The Secretary shall work with other appropriate mission agencies in conducting this program.

(b) DETAIL OF THE INTERGOVERNMENTAL PROGRAM.—The intergovernmental program shall provide, among others, the following State and regional services and functions:

(1) studies relating to and analyses of climatic effects on agricultural production, water resources, energy needs, and other critical sectors of the economy;

(2) atmospheric data collection and monitoring on a statewide and regional basis;

(3) advice to regional, State, and local government agencies regarding climate-related issues;

(4) information to users within the State regarding climate and climatic effects; and

(5) information to the Secretary regarding the needs of persons within the State for climate-related services, information and data.

(c) INTERGOVERNMENTAL PROGRAM REQUIREMENTS.—Prior to making a grant to any State or group of States under this section, the Secretary shall find that—

(1) the State, or each of the States in a group, has adopted a State climate program in accordance with the provisions of this Act and rules and regulations promulgated by the Secretary; and

(2) the State, or each of the States in a group has—

(A) integrated its climate program with the Program; and

(B) established an effective mechanism for consultation

and coordination with Federal and local government officials and users within the State.

The Secretary shall insure that grants made to a State or group of States under this section are made on an equitable basis.

SEC. 7. ANNUAL REPORT.

The Secretary shall prepare and submit to the President and the authorizing committees of the Congress, not later than January 30 of each year, a report on the activities conducted pursuant to this Act during the preceding fiscal year, including—

(a) a summary of the achievements of the Program during the previous fiscal year;

(b) an analysis of the progress made toward achieving the goals and objectives of the Program;

(c) a copy of the 5-year plan and any changes made in such plan:

(d) a summary of the multiagency budget request for the Program of subsection 5(g); and

(e) any recommendations for additional legislation which may be required to assist in achieving the purposes of the Act.

SEC. 8. CONTRACT AND GRANT AUTHORITY; RECORDS AND AUDITS.

(a) Functions vested in any Federal officer or agency by this Act or under the Program may be exercised through the facilities and personnel of the agency involved or, to the extent provided or approved in advance in appropriation Acts, by other persons or entitles under contracts or grant arrangements entered into by such officer or agency.

(b)(1) Each person or entity to which Federal funds are made available under a contract or grant arrangement as authorized by this Act shall keep such records as the Director of the Office shall prescribe, including records which fully disclose the amount and disposition by such person or entity of such funds, the total cost of the activities for which such funds were so made available, the amount of that portion of such cost supplied from other sources, and such other records as will facilitate an effective audit.

(2) The Director of the Office and the Comptroller General of the United States, or any of their duly authorized representatives, shall, until the expiration of 3 years after the completion of the activities (referred to in paragraph (1)) of any person or entity pursuant to any contract or grant arrangement referred to in subsection (a), have access for the purpose of audit and examination to any books, documents, papers, and records of such person or entity which, in the judgment of the Director or the Comptroller General, may be related or pertinent to such contract or grant arrangement.

SEC. 9. AUTHORIZATION FOR APPROPRIATIONS.

(a) GENERAL AUTHORIZATION OF APPROPRIATION.—In addition to any other funds otherwise authorized to be appropriated for the purpose of conducting climate-related programs, there are authorized to be appropriated to the Secretary, for the purpose of carrying out the provisions of this Act, not to exceed $50,000,000 for the fiscal year ending September 30, 1979, and not to exceed $65,000,000 for the fiscal year ending September 30, 1980.

(b) AUTHORIZATION OF APPROPRIATION FOR GRANTS.—There are authorized to be appropriated to the Secretary sums not to exceed $10,000,000 for the fiscal year ending September 30, 1979, and not to exceed $10,000,000 for the fiscal year ending September 30, 1980, as may be necessary for grants under section 6 of this Act, to remain available until expended.

Amend the title so as to read:

An Act to establish a comprehensive and coordinated national climate policy and program, and for other purposes.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6669) to establish a national climate program, and for other purposes submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The amendment of the Senate struck out all after the enacting clause in the House bill and substituted new language. The Senate bill was passed subsequent to the House bill and incorporated many of the provisions contained in the House bill. The committee of conference agreed to accept the Senate amendment with certain amendments and stipulation proposed by the conferees which would have the effect of including House provisions not fully considered in the Senate version.

The substantive changes made by the Senate amendment, together with further amendments and modifications by the committee of conference are explained as follows:

TITLE

The conferees agreed that because the main action proposed by the legislation is the establishment of a program for action, the word "program" should be added to the short title making it the "National Climate Program Act."

FINDINGS

The conferees noted that the findings of both Houses in section 2 were similar and often overlapping. The conferees agreed to adopt the Senate "Findings" of section 2 with one important addition. The House bill had included utilization of land as a factor affected by climate, and it was agreed that this concept should be included in the conference report. With this amendment the findings of both Houses are included in the language of the conference report.

PURPOSE

Section 3 describes the purpose of the act and the conferees agreed to accept the Senate version with one amendment, which would encompass the House language. The amendment to the Senate amendment would change the word "adapt" to "respond" so that the act would include in its scope the possibility of informed, intelligent action in response to climate as opposed to more passive adaptation to climate.

DEFINITIONS

The conferees agreed that the Senate definitions in section 4 were sufficient. The House bill had included several additional definitions of terms the most important of which was "climate." The conferees decided not to attempt to define in legislation a term which has so many different operational definitions. For the purpose of this legislation "climate" must be considered broadly in some uses and narrowly in others.

Typically, climate is taken to mean the average or statistical state of the weather over extended periods of time and a large geographical area. In contrast, "weather" refers to the atmospheric (and other) conditions at a localized time and place. Therefore, the term "climate" would not refer to short-term weather forecasting nor to purposeful short-term weather modification, but would include seasonal forecasting and long-term modification of the weather such as that caused by the buildup of carbon dioxide in the atmosphere or by a persistent urban plume.

The climatic time scale of principal interest is seasonal or annual, but longer or shorter scales would also be of interest for some purposes. Similarly, the typical geographical scale of interest would be regional, but local as well as national and global climate would also be important in some cases.

Another potential area of confusion in the definition of climate is the inclusion of such nonatmospheric components as the Earth's oceans, snow cover, and ice masses. Because of the close physical coupling between the oceans and the atmosphere, climate must include, in some instances, a consideration of the state of the oceans. However, ocean phenomena certainly are not all strongly climate connected and thus they should not all be considered "climate" phenomena. Similarly, the Earth's snow cover and ice masses are so closely related to climate as to be considered part of it for some considerations but not for others.

Finally, it should be pointed out that the term "climate change" as used in the act should be taken to include all types of changes; that is, changes from one prevailing climate state to another, variability of climate, and climate anomalies. Thus, the conferees recognize that climate change has many manifestations, and they intend that all manifestations be considered under this Act.

NATIONAL CLIMATE PROGRAM

Establishment

Both the House and Senate bills provide that the President shall establish a National Climate Program. The conferees agreed to use the structure of the Senate bill in describing the Program. In setting forth the duties of the President, the conferees agreed to drop the Senate language that the President establish Program priorities and incorporate in place thereof the House provision that the President promulgate a 5-year plan. The development of this Plan would include choices on Program priorities and therefor would be consistent with the langauge in the Senate bill. The 5-year plan is discussed later in this report. The conferees agreed with the Senate provisions that the President shall define the roles of various Federal departments and agencies in the Program and provide for Program coordination. In assigning this duty to the President the conferees intend to emphasize that the Program is to be a national, multiagency Program.

Office

Both the House and Senate bills establish a National Climate Program Office. The conferees agreed to the Senate provision, section 5(c), that this Office be established within the Department of Commerce and added the House provision that such establishment take place not later than 30 days after enactment of this act. The Conferees intend that this Office should be the focal point in the Federal Government for administering the Program, and shall coordinate, plan and serve national, not just Department of Commerce efforts in climate.

The conferees note that in anticipation of the passage of this Act the Department of Commerce has acted to designate an office in the National Oceanic and Atmospheric Administration as a focal point for their climate activities. Some (but not all) of the mission agencies have detailed personnel to this NOAA Office. The conferees believe that such detailing of mission-agency and user-agency personnel to the Program Office would be one excellent way to help insure participation in the Program by the agencies.

Program Elements

The conferees agreed to accept the Senate description of the elements of the National Climate Program with certain amendments to include key House provisions. In general, the Senate language was broader and the House language more detailed. Thus, the House language is encompassed by the amended Senate language.

The Senate language, section 5(d)(1), that provided for procedures for assessing the effect of climate on agricultural production, energy use, water resources, transportation, human health, and national security was amended to provide that the assessments, not only procedures for assessments, would be developed. The conferees also agreed to adopt from the House version additional areas that would be affected by climate—specifically the natural environment and land resources.

The conferees intend that the assessments conducted pursuant to this Act include analyses, studies and recommendations for action concerning—

(1) The impact of small changes in climate on agriculture, the economy, commerce, technology and other areas of human endeavor;

(2) Appropriate changes in agricultural, economic, commercial, technological, and other practices to respond to the effects of climate; and

(3) Appropriate strategies to respond to man-induced changes in global and regional climates.

The conferees agreed that in conducting such assessments it would not be in the national interest to duplicate the capabilities for impact assessment found in existing mission agencies. Therefore, the primary mission agencies would be the first choice for doing assessments of impacts upon activities under their jurisdiction. The Office would be responsible for conducting assessments if they identify gaps in existing efforts.

The conferees agreed to accept the Senate language describing the climate research program. Section 5(d)(2), with the understanding that the comprehensive Senate language include several points made in the more specific House provision. Thus, the conferees intend that the research program be broadly interdisciplinary—encompassing physical, chemical, biological, geological, archeological, and historical investigations as detailed in the House version. The research program should study causes of climate change including the relationships among the atmosphere, the hydrosphere, and the biosphere, that affect the climate. It is hoped these studies would lead to the development of climate models which can be used to predict climate changes.

A concept in the Senate bill which the conferees specifically endorsed was that the research program should include activities to improve the understanding of the social, economic, and political impacts of climate change. This kind of research is necessary to support the impact assessments described in section 5(d)(1).

Section 5(d)(3) of the Senate bill to which the conferees agreed, provides for the improvement of monthly, seasonal, yearly, and longer term forecasts.

With respect to data gathering, the conferees agreed to two amendments to the Senate language of section 5(d)(4) in order to include points contained in the House version. The first amendment adds data "analysis" to the required activities. The second amendment provides that the information so generated must be "useful and readily available." These amendments add to the Senate-passed bill the idea that raw data must be transformed into information—that is, analyzed—and made available to users. The conferees intend that this emphasis on users and data application be reflected in activities carried out in the Program.

The same emphasis, based on the same intent of the conferees, is achieved by adoption of two amendments to the Senate version of section 5(d)(5). That paragraph provides for data and information dissemination. The first amendment broadens the scope of the Senate version to include data "management" and also provides that the data dissemination be "active." By "active," the conferees intend that data dissemination should involve outreach to users rather than being content with mere publication of

information. Further, stressing usefulness, the second amendment to the Senate version adds "climate impact assessments" to the material to be disseminated, and provides for consultations between users (including potential users) of this material and the providers of the material. In referring to "potential users" the conferees intend to include those who are impacted by climate and who could make use of certain climate information were it readily available in the proper form.

The conferees intend that the data and information generated be made accessible and useful by (1) processing, storage analysis, indexing and dissemination in ways to promote its use—for example, informats suitable to user requirements; (2) the preparation and broad publication of reports, inventories, and indices describing and cataloging it; and (3) appropriate affiliation with other data and information systems.

The conferees agreed to the language of section 5(d)(6) making the international cooperation authorized in section 5(f) of the Senate version a Program element. Provisions of the House bill allowed and encouraged international cooperation, but did not make mechanisms for it a specific Program element.

The conferees agreed to the provision, included in both the House and Senate bills, to establish mechanisms for intergovernmental climate-related studies and advisory services, section 5(d)(7), that would include participation by universities, the private sector and others concerned with applied research and advisory services. The conferees provided for an intergovernmental program as an integral part of the national Program under section 6, as described below.

The conferees agreed to drop a separate section in the Senate-passed bill to establish experimental climate forecast centers, and instead agreed to incorporate that provision as part of the national Program established under section 5(d)(8). The forecast centers established under the Senate bill are consistent with the House provision that would provide for climate forecasts, but they would not be the only mechanism to produce improved climate forecasts. The Senate amendment was amended further to provide that the experimental climate forecasts be evaluated for accuracy.

The conferees agreed to a substitute for the Senate language which provided for a 5-year Program plan, section 5(d)(9). The substitute similarly provides for a 5-year plan, but also includes several important points from the House bill.

The Plan provided for in this paragraph is to be promulgated by the President pursuant to section 5(b)(1). Thus, the conferees intend that the plan be developed according to the procedures described below, and be set in motion by the President.

The amendment provides for the development of a preliminary Plan which shall be submitted to the Congress for review and comment. The conferees expect that review of this preliminary Plan will assist the Congress in its oversight responsibilities, and that for the purpose of such review background information and program staff will be available to the Congress in a timely fashion. After considering comments of the Congress and other interested parties and agencies, the preliminary Plan is to be forwarded in final form to the President for promulgation.

The conferees are aware of the need to provide for flexibility in authorizing legislation. Thus, in several instances they have agreed to delete many of the specific details of the Plan that were in the House bill in favor of more general Senate language in order not to be restrictive. Therefore, the conferees agreed to provide for submission of a preliminary plan to the Congress for review to determine if implementation of the program follows congressional intent.

Because of the broad organizational and substantive scope of the activities comprising the program, the conferees consider the plan to be a very important part of the program. That is, the Plan will represent the Program in document form; in one place an interested party will be able to find a description of program goals, objectives, priorities, and agency roles. The conferees intend that the Plan be specific so that agency roles are presented not only as general statements, but also as specific activities to be carried out by the agencies. The Plan must also contain information as to the levels of resources necessary for each activity and the timing of the activties.

The conferees foresee that the Program Plan will have a very broad organizational and disciplinary scope and the effort required to prepare it will be substantial. Further, because the basic program goals are long-range and arrived at after much consideration, they should not be changed frequently. Therefore, the conferees agreed that it would be appropirate to require that the 5-year plan be extended only once every 2 years—that is, every 2 years an additional 2 years would be added to the Plan. Of course the normal vicissitudes of the annual appropriations process would require annual revisions of activities to be carried out without the 5-year Plan and there is a requirement that such revisions be described in the annual report of section 7. Further, the Plan should be revised as often as necessary to deal with unforeseen changes in Program circumstances, goals or objectives especially during the first few years of the Program when agency activities may change substantially. The conferees expect that this updated plan will be the basis for the annual budget request of section 5(g). Provision for the regular biennial extension of the Plan does not imply that authorizations for appropriations should be biennial.

Advisory Committee and interagency groups

Section 5(c) as amended by the conferees provides for an advisory committee and for interagency groups to assist in carrying out the act.

Section 5(e)(1) directs the Secretary to establish an advisory committee balanced between users and producers of climate data, information and services. The breadth of the membership of this advisory committee shall reflect the scope of the Program from data acquisition to application and across many discipines. It is the intent of the conferees to insure that users are strongly represented on such a committee.

The conferees intend that the advisory committee will, (1) continually review the Nation's climate activities, and based on its findings, advise and report to the Secretary and the Congress on the conduct and priorities of the Program, particularly with respect to the scientific rigor of the Program and the delivery of services under the Program: (2) make recommendations with respect to actions the United States should take to strengthen international efforts to understand and respond to changes in the climate.

The conferees intend that the advisory committee be familiar with the entire Program and would expect that the Congress will draw on their knowledge and expertise as necessary in carrying out its oversight responsibility.

While the advisory committee would be the principal advisory body for the Program, for special purposes the Secretary is encouraged to consult with other groups and individuals as appropriate. Two such standing groups could be the Climate Research Board of the National Academy of Sciences and the National Advisory Committee on Oceans and Atmosphere.

The conferees are aware of the delays associated with appointment of standing advisory groups, yet they would encourage the Secretary to seek the input of appropriate outside groups as soon as possible in formulating the initial 5-year plan of section 5(d)(9). Effort should be made to obtain the input of those users of climate information and services who would not normally be aware of the planning process of section 5(d)(9).

Section 5(e)(2) directs the Secretary to establish interagency groups where appropriate to assist in carrying out the act. The purpose of interagency groups is to provide for the participation in the management of the Program of all Federal agencies having a legitimate interest in the Program, both producers and users of climate information. The conferees intend that one interagency group be at a policy level in order to assure substantive agency participation in formulating Program policy.

The conferees believe that the National Climate Program is a prototype of the class of programs which can only succeed if involved organizations are able to transcend the classic patterns of bureaucratic rivalry and inhibited information flow. The entire point of making climate the focus of a national program is to emphasize that it is a subject which cannot be confined in ordinary organizational boundaries, and that it must be considered as a critical element of strategic planning in almost all areas of human endeavor.

The Secretary of Commerce and the Office have an important and challenging responsibility. They must carry out their leadership responsibility in such a way that the other Federal agencies, as well as State and local governments and private interests, perceive the climate program not as a Department of Commerce effort, but as a national partnership, utilizing the best talents and capabilities of all participants in both planning and execution. It is in this context that the organization and utilization of the interagency groups will be critical, and the conferees wish to emphasize the importance of these groups.

Interagency groups should have a major role in developing the program plan of section 5(d)(9), and they should also advise the Program Office on the conduct and priorities of the Program.

Cooperation

With respect to cooperation—section 5(f)—the conferees agreed that the House and Senate provisions are complementary. Therefore, they agreed to amend the Senate amendment by adding the House language as section 5(f)(1) while retaining the Senate language as section 5(f)(2). As a result, the first paragraph broadly authorizes both domestic and international cooperation while the second paragraph provides for cooperation with the State Department in regard to international matters.

Budget request

Section 5(g) deals with the budget request for the Program, and the conferees agreed that certain provisions of the House and Senate versions were complementary and that both should be adopted.

Thus section 5(g)(1) is a provision in the Senate-passed bill which states that each agency should submit its own budget request to the Office of Management and Budget, and that OMB should consider these requests as an integrated, coherent, Program budget. The role of the OMB is very important to ensure that overall Program priorities are reflected in the allocation of resources to the agencies.

Under the language agreed to by the conferees, the OMB will be assisted in its review of the multiagency budget request by the Plan of section 5(d)(9) which will specify Federal funding required to enable the program to achieve its goals. Participation of

the interagency groups in the development of the Plan should help insure that the agency requests to OMB are compatible with the Plan.

Section 5(g)(2) provides for the preparation by OMB of a horizontal budget for the climate program. A horizontal budget cuts across agency lines and presents all the climate-related budget items in one document. Such a document can be used to assure the various groups in the executive and legislative branches which must consider budget requests that there is no duplication of requests. Since many agencies are likely to be requesting appropriations for climate-related activities under the authority of this and other acts, it is important that the requests be coordinated and that such coordination be manifest. Therefore, the conferees agreed to incorporate House language calling for preparation of a unified, horizontal budget which would show how the budget requests of all the program elements relate one to another.

INTERGOVERNMENTAL CLIMATE PROGRAMS

The Senate-passed bill provided the basis for section 6. Intergovernmental Climate Programs. The conferees made two main changes to the Senate language to emphasize the distinction between this component of the National Climate Program and the climate research activities emphasized elsewhere in the act, and the interagency involvement in the intergovernmental climate program.

First, the conferees agreed to substitute the term "studies" for "research" so that the Federal/State program would be one of climate studies and advisory services. The conferees do not intend that the research conducted under this part of the national program to be basic research. Rather the research should be broad based and applied. The broader term "studies" would also allow for the conduct of impact assessment at the State, regional or local level.

The second amendment was the addition of language reflecting the House bill which provides that "the Secretary shall work with other appropriate mission agencies in conducting this program." Thus, the intergovernmental program would not duplicate existing field organizations of mission agencies and where appropriate should work through the field offices, an example being the agricultural extension service.

The committee of conference views as a high priority component of the program the need to greatly expand and improve upon existing climate-related services to user groups throughout the Nation. Too often Federal programs are developed without attention to user group needs and mechanisms for dealing with them. A user group focus for the National Climate Program is essential since the Congress, in passing this act, wishes to emphasize that the Program is not to be viewed as only, or even primarily, a climate research effort. Interactions with user groups, are to be considered as an integral part of the entire Program, and the Congress will carefully review the implementation and administration of the intergovernmental climate program to insure that aggressive Federal leadership and financial support is provided for this activity. The conferees also wish to emphasize their intent that the intergovernmental program be two-way in nature. That is, it should serve as a channel for climate information available under the program to flow to the States, and also to serve as a channel for information on user needs to flow into the Program.

The conferees wish to call attention to the language in section 6 which refers to States or groups of States as participants in the intergovernmental climate program. For certain purposes climate influences are best understood on a regional, as opposed to State basis. Similarly services and information dissemination needs could be common to groups of States within a given climate zone, and then could be handled most efficiently on a regional basis.

Wherever it appears that a program could not be organized on a State level the conferees urge the Secretary to provide incentives for regional organization of the intergovernmental program.

The conferees expect that a separate intergovernmental climate program office with adequate staff and financial resources, be established and maintained within the Program Office.

ANNUAL REPORT

Both the House and Senate versions provided for an annual report, and the conferees agreed to adopt the Senate version as section 7 with amendments to include key House provisions. Both Houses clearly intended that the Program generate a useful, informative annual report. The amendments agreed to would have the annual report high-light any changes made in the 5-year plan of section 5(d)(9) and include a summary of the multiagency budget plan of section 5(g). With these amendments, the conferees intend to emphasize the importance which the Congress attaches to the cooperative, multiagency planning provided for in this legislation, tying together the Program Plan of paragraph 5(d)(9); the horizontal budget of subsection 5(g); and the annual report of section 7.

The report should present a coherent picture of the Program status and progress. Because of the broad scope of the Program it is important that its managers annually assess and describe its achievements, progress, and plans in one document so that any gaps or inconsistencies can be more easily recognized. The Congress would find the report very useful in its oversight role.

The annual report, like the Program Plan, would be an important management tool, and would be a useful mechanism for communication with users and potential users of Program results and services.

The conferees wish to make clear the relationship between the biennial revision and extension of the Program Plan of section 5(d)(9) and the changes in the Plan to be commented on in the annual report under section 7. It is very likely that the Plan will have to be revised to some extent every year in order to reflect the Program response to the difference between appropriations and requests. On the other hand it is not necessary that the Plan be extended a year every year; it can be extended 2 years every 2 years after thorough review and revision.

CONTRACT AND GRANT AUTHORITY; RECORDS AND AUDITS

Section 8 of the conference report is House language to which the conferees agreed. The provisions are intended to facilitate the operation and oversight of the Program. Thus section 8(a) gives general authority for Program activities to be carried out by the pertinent Federal agency either in-house or by contract or grant to an outside performer. The purpose is to insure that the Program is not hindered, for example, by procurement regulations that have been developed for a particular agency's mission that do not apply to a multifaceted effort like the climate Program.

Section 8(b) is standard language recommended by the General Accounting Office to assist them in auditing the Program. This would in turn enable GAO more effectively to assist the Congress in its oversight function.

AUTHORIZATION FOR APPROPRIATIONS

The conferees agreed to the Senate-passed funding levels and the provision in section 9(a) that the authorization of funds for the Program be made available to the Secretary of Commerce. As the lead entity for administering the Program, the conferees agreed that the Secretary should have sufficient resources to assist in carrying out the provisions of the Act. Funds appropriated to the Secretary of Commerce could be expended within that agency or department, or through outside grants or contracts.

The conferees agreed further that since the program must involve many agencies and departments, funds authorized to the Secretary of Commerce could be made available to other agencies and departments on a passthrough basis if those agencies or departments are best suited to carry out certain activities under the act.

Finally, the conferees realize that a number of agencies and departments have existing mission-specific authorities through which they have been, and will continue to receive funds to carry out climate-related activities. The conferees do not intend to hinder these agencies and departments in any way in their efforts to carry out those mission activities.

The conferees agreed to these fundings levels and mechanisms with the expectation that they would be used to support a broad program with the participation of several agencies.

Section 9(b) authorizes $10 million for each fiscal year 1979 and 1980 for the intergovernmental program of section 6. The conferees agreed that this program should be separately authorized and that the authorization should go to the Secretary of Commerce as the lead agency in the program and since there must be a single person making the grants to the State (or groups of States).

TERMINATION

The House bill had contained a provision terminating the authorities in the bill on December 31, 1979—a "sunset" provision. The conferees agreed to drop this provision intending that limiting the authorization to fiscal year 1980 would serve to put the program on notice that it would be subject to extensive oversight by the appropriate Committees of Congress before reauthorization beyond fiscal year 1980.

CONFERENCE REPORT ON H.R. 12928

Mr. BEVILL submitted the following conference report and statement on the bill (H.R. 12928) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes.

CONFERENCE REPORT (H. Rept. No. 95–1490)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12928) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 6, 8, 30, 32, and 33.

That the House recede from its disagreement to the amendments of the Senate num-

bered 1, 4, 5, 10, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 25, 26, 28, 31, 34, 35, and unnumbered Senate amendment changing title, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,067,971,000"; and the Senate agree to the same.

The amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$137,978,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,343,711,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$221,572,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$233,000,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$322,301,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 2, 11, 12, and 24.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12928) making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

Report language included by the House which is not changed by the Report of the Senate, and Senate Report language which is not changed by the Conference is approved by the Committee of Conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

The Committee of Conference notes that many appropriations will have substantial carryovers of unobligated balances of appropriations from 1978 as has been the case the past several years. To bring these balances to more manageable levels at the end of fiscal year 1979, the Conferees are agreed that designated unobligated balances at the end of 1978 will be applied to the 1979 program. This amount is not to be construed as savings and slippage to be applied as project reductions in 1979.

Amendent No. 1: Changes language of the enacting clause to provide appropriations for "energy and water development" as proposed by the Senate instead of "public works for water and power development and energy research" as proposed by the House.

TITLE I—DEPARTMENT OF ENERGY

ENERGY, SCIENCE AND DEFENSE ACTIVITIES

OPERATING EXPENSES

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating $4,818,431,000 instead of $4,865,437,000 as proposed by the House and $4,839,850,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The funds appropriated for Operating Expenses are allocated as shown in the following table:

DEPARTMENT OF ENERGY
ENERGY, SCIENCE, AND DEFENSE ACTIVITIES
OPERATING EXPENSES—BUDGET AUTHORITY

Program	Fiscal year 1979 budget estimate	Conference allowance
ENERGY RESEARCH AND SOLAR ENERGY		
Solar thermal applications:		
Heating and cooling of buildings	$33,100,000	$40,000,000
Heating and cooling demonstration program	41,000,000	55,000,000
Agricultural and industrial process heat	11,000,000	11,000,000
Subtotal, solar thermal applications	85,100,000	106,000,000
Technology utilization:		
Solar satellite	4,600,000	4,600,000
Other	14,500,000	9,500,000
Subtotal, technology utilization	19,100,000	14,100,000

Policy and program analysis	2,905,000	859,000
General systems studies	17,000,000	14,000,000
Institutional relations	29,660,000	28,457,000
Consumer affairs	1,250,000	650,000
Public awareness	3,250,000	3,250,000
International cooperation in nonnuclear technologies	3,250,000	3,250,000
Subtotal, policy and external relations	57,315,000	50,466,000
In-house energy management	3,600,000	3,600,000
Security investigations	13,900,000	13,900,000
Equal employment opportunity	4,332,000	4,332,000
Decontamination and decommissioning	28,000,000	25,000,000
Cost of work for others	22,600,000	22,600,000
Changes in inventories and working capital	35,313,000	−6,000,000
Subtotal, other supporting services	107,745,000	63,432,000
Miscellaneous revenues	−54,000,000	−112,900,000
Total, program support	111,060,000	998,000
Total, policy, management and support	405,056,000	293,579,000
APPROPRIATION FINANCING		
Appropriations transfers	500,000	500,000
Unobligated balances brought forward	−12,300,000	−172,770,000
Total, net appropriation financing	−11,800,000	−172,270,000
Total, operating expenses-budget authority	4,881,368,000	4,818,431,000

DEPARTMENT OF ENERGY—PROGRAM COSTS

	Fiscal year 1979 budget estimates	Conference allowance
Energy research and technology development programs:		
Solar energy	$357,700,000	$374,550,000
Geothermal energy	124,300,000	132,550,000
Fuels from biomass	21,000,000	23,750,000
Hydroelectric power development	22,000,000	23,000,000
Fusion energy	221,000,000	227,000,000
Electric energy systems	36,550,000	36,550,000
Energy storage	48,000,000	48,000,000
Light water reactors	236,215,000	258,715,000
Liquid metal fast breeder reactor	358,760,000	497,960,000
Other advanced reactor concepts	122,140,000	110,000,000
Space nuclear systems	42,100,000	38,350,000
Environmental research and development	181,038,000	186,300,000
Basic energy sciences	169,500,000	163,875,000
Advanced technology and assessment	8,590,000	5,000,000
Total, energy research and technology development programs	1,948,893,000	2,125,600,000
Uranium supply and enrichment activities:		
Uranium resource assessment	66,800,000	55,150,000
Isotope separation technology	$115,650,000	$115,650,000
Uranium enrichment activities	898,039,000	898,039,000
Less uranium enrichment revenues	−1,013,689,000	−1,022,600,000
Total, uranium supply and enrichment activities	66,800,000	46,239,000
General science and research programs	302,800,000	306,600,000
Atomic energy defense activities:		
Weapons activities	1,195,594,000	1,170,850,000
Special nuclear materials	476,400,000	476,400,000
Inertial confinement fusion	92,800,000	101,950,000
Nuclear materials security and safeguards	35,089,000	35,089,000
Intelligence and arms control	27,400,000	27,400,000
Naval reactors development	241,100,000	241,100,000
Total, atomic energy defense activities	2,068,383,000	2,052,789,000
Salaries and expenses	334,300,000	332,885,000
Program support	91,053,000	10,331,000
Total, policy, management, and support	425,353,000	343,216,000
Total, operating expenses	4,812,229,000	4,874,444,000

The Conferees agree that within the funds provided for Solar Energy Development—Thermal Applications, the allowance includes funding for the Federal share of the agriculture buildings solar heating and cooling development and demonstration program in Springfield, Illinois, to match the State share for this project.

The Conferees agree that within the $118,500,000 provided for the Solar Photovoltaics subprogram, $39,000,000 is for the Research and Development element; $8,000,000 is for the Concentrator Technology element; and $37,000,000 is for the Market Pull-Test Applications element. The allowance of $118,500,000 includes initial funding for the paired solar energy experiment to permit testing of various solar alternatives in paired situations under actual conditions.

The Conferees agree that the additional funds provided over the Administration request for the Photovoltaic subprogram element, Market Pull-Test Applications, are for procurement and installation of photovoltaic arrays and associated equipment for use by Federal agencies in life cycle cost effective applications, and in a manner to result in long-term cost reductions for photovoltaic systems.

The Conferees are in agreement on the following levels of funding in the Wind Energy subprogram: Development and Technology Improvement, $10,100,000; Farm and Rural Systems, $14,800,000; Small Wind Systems, $10,900,000; Large Scale (megawatt scale) systems, $19,100,000; Large Scale (multi-unit) systems, $4,400,000.

The Conferees agree that within the funds appropriated for Ocean Thermal Energy Development, $1,000,000 is provided to evaluate the tropic grazing pilot plant concept, and $2,000,000 is for the Federal share of the cost-shared land-based test facility.

The Conferees agree that within the funds provided for Geothermal Energy Development, $4,000,000 is included in the Hydrothermal Technology Applications over the budget request for the Raft River 5-megawatt plant; $27,600,000 is included in Advanced Technology Applications for geopressured resources development activities; and $4,000,000 is included in Utilization Experiments for a second 50 MW demonstration plant in order to demonstrate both the flash

conversion and binary cycle conversion technologies.

The Conferees agree that within the Fuels from Biomass subprogram, $3,000,000 is for Anaerobic Digestion; $5,500,000 is for Fermentation; $21,900,000 is for Thermochemical Conversion, including $10,000,000 for the 1,000 ton per day direct combustion wood burning plant near Lincoln, Maine; and $10,000,000 is for Production and Collection, of which $2,500,000 is for research into the production, collection and conversion of Marine biomass.

The Conferees are in agreement that the allowance for Magnetic Fusion Energy is to provide for additional efforts on experiments, particularly Doublet III and the Polodial Diverter, advanced concepts, alternatives to the Tokamak and Mirror Systems and the realignment of effort in the 14 Mev irradiation testing program.

The Conferees agree that within the funds appropriated for the Nuclear Fuel Cycle subprogram, $32,000,000 is included for Alternate Cycle Technology to support R&D on improved fuel cycles with improved nonproliferation potentials, research on the use of low enriched uranium cycles for university and research reactors, and inclusion of the Barnwell facility in the nuclear fuel cycle program at a level of $16,000,000 for FY 1979. The Conferees agree with the Senate Report language directing that $2,500,000 out of the Department's safeguards budget be provided to continue the Barnwell program in safeguards equipment testing and verification in fiscal years 1978 and 1979. The Conferees further agree with the Senate Report language regarding the expectation that this will be the final year of Federal support for the Barnwell facility.

The Conferees also agree that within the funds appropriated for the Nuclear Fuel Cycle subprogram, $18,850,000 is included for Thorium Fuel Cycle Technology of which $8,850,000 is for research and development for the High Temperature Gas Reactor fuel cycle.

The Conferees note with regret that, as was the case last year, the Congress has not resolved the status of the Clinch River Breeder Reactor project which the Administration has proposed to terminate. The Committees on Appropriations have supported consistently the Clinch River Demonstration project in view of the need to determine at an early date the licensing, technical and economic issues that must be resolved if there is to be a viable breeder reactor option for this Nation. Recognizing the continuing discussions between the Administration and cognizant congressional committees, as well as the differences in the legislative action taken by the House of Representatives and legislation now pending before the Senate, the Conferees have provided an allowance of $172,400,000 to carry out the breeder reactor demonstration project or project alternative approved by Congress in authorizing legislation, and for no other purpose.

The Conferees are in agreement that the allowance for Biomedical and Environmental Research over the amount requested is for the purpose of increasing research on the environmental effects of coal combustion and conversion processes, carbon dioxide in the atmosphere, high voltage transmission lines and low-level radiation exposure.

The Conferees agree that the Department should allocate $1,000,000 in Plant Engineering and Design funds for the Environmental and Energy Technology Facility at Richland, Washington, to carry out the necessary design work so that this project can be considered for funding in the FY 1980 budget.

The Conferees agree that the allowance for Weapons Production and Surveillance includes initial funding for the production of a new strategic bomb (a modified version of the B–77) in lieu of the B–77 or the modified B–43. The allowance reflects the substantial slippage in weapons production resulting from delays in production decisions, technical problems and the necessary start-up time for new and modified systems.

The Conferees note that the Department recently has signed a multi-year contract for continuing work related to the civilian applications of inertial confinement fusion in a non-federally owned facility. This work traditionally has been funded along with that related to military applications in the Inertial Confinement Fusion program. The Conferees agree that this is the more appropriate budget treatment for FY 1979 and the allowance of $104,000,000 includes funds necessary for the continued support of civilian applications of inertial confinement research at non-federally owned installations.

The Conferees agree with the Senate Report language regarding the continuing need for assistance to the communities of Oak Ridge, Tennessee; Los Alamos, New Mexico; and Richland, Washington. The Conferees agree that within the total provided for Institutional Relations, $2,000,000 is for the work by the National Bureau of Standards for energy inventions evaluations.

The allowance for changes in inventories provides for the following increases for inventories, which are budgeted in both program and central accounts:

	1979 request	Conference allowance
Common use stores	$15,313,000	$10,000,000
Special material production	35,100,000	22,100,000
Weapons inventories	9,500,000	8,500,000
Naval reactors	6,600,000	5,600,000
All other programs	11,600,000	10,600,000
Total	78,113,000	56,800,000

The Conferees note that with the increase of $56,800,000 provided for fiscal year 1979, the Department will have Program and Common use inventories totaling more than $635,000,000 which is up from $421,000,000 in FY 1976. The Conferees consider that with improved management of inventory accounts, adequate funds are available for all essential purposes, including operation of the Heavy Water Production plants at Savannah River at an appropriate level.

The reports of both the House and Senate express the serious concern of the Committees on Appropriations with the Department's staffing allocation for its full-time permanent personnel. Data supplied to the Committees reflect large increases for Departmental staff activities over comparable activities in Department of Energy predecessor organizations, and a shifting of technical and program management positions to staff and overhead positions. Each Assistant Secretary, except for defense programs, appears to have established large staff offices, ranging from 40 to 60 positions for administration and overhead functions, also at the expense of technical program positions. The Conferees reaffirm the Committees' concern and the requirement in the reports of both Houses that the Department work with the Committees' staffs to establish a suitable format and detail for the FY 1980 budget to permit a thorough review of Federal staffing in relation to program responsibilities. The Conferees are in agreement with the employment tables for full-time permanent positions for FY 1979 as shown in the Committees' reports.

PLANT AND CAPITAL EQUIPMENT

Amendment No. 3: Appropriates $1,067,971,000 for plant and capital equipment instead of $1,120,856,000 as proposed by the House and $1,020,971,000 as proposed by the Senate.

The funds appropriated for Plant and Capital Equipment are allocated as shown in the following tables:

DEPARTMENT OF ENERGY
ENERGY, SCIENCE, AND DEFENSE ACTIVITIES
OPERATING EXPENSES—BUDGET AUTHORITY

Project No. and project title	Fiscal year 1979 budget estimate	Conference allowance
CONSTRUCTION		
SOLAR ENERGY		
79-1-m: Ocean thermal energy conversion	$13,500,000	$13,500,000
76-2-b: 10-MW central receiver solar thermal powerplant, Barstow, Calif	28,000,000	28,000,000
79-1-q: Solar Energy Reserarch Institute (SERI) Facility, Golden, Colo		3,000,000
Total, solar	41,500,000	44,500,000
FUSION ENERGY		
MAGNETIC FUSION		
79-6: General plant projects	1,400,000	1,400,000
78-3-a: Mirror fusion test facility, Lawrence Livermore Laboratory, Calif	40,000,000	40,000,000
76-5-a: Tokamak fusion test reactor, Princeton Plasma Physics Laboratory, Plainsboro, N.J	42,000,000	42,000,000
78-3-b: Fusion materials irradiation test facility, HEDL, Washington		6,900,000
Total, fusion energy	83,400,000	90,300,000
LIGHT WATER REACTORS		
NUCLEAR FUEL CYCLE		
78-5-b: Advanced fuel recycle integrated equipment test facility, Oak Ridge, Tenn	6,000,000	6,000,000
79-1-p: Spent LWR fuel storage facility, site undetermined		5,000,000
79-6: General plant projects	750,000	750,000
Total, nuclear fuel cycle	6,750,000	11,750,000
Waste Management (Civilian Applications)		
78-5-a: Facilities for the national waste terminal storage program, site undetermined (land acquisition and long-lead procurement)	25,000,000	25,000,000
LWR Safety Facilities		
79-1-j: Reactivation of radioactive material laboratory and hot cell annex, Test Area North, Idaho National Engineering Laboratory, Idaho	3,000,000	3,000,000
Total, light water reactors	34,750,000	39,750,000
LIQUID METAL FAST BREEDER REACTOR		
Base Development Program		
79-1-b: Modifications to reactors	4,000,000	4,000,000
79-1-c: Security improvements, Richland, Wash	4,500,000	4,500,000
79-1-d: Second power tieline, Idaho National Engineering Laboratory, Idaho Falls, Idaho	2,600,000	2,600,000
79-1-e: Fire safety and protection improvements, Idaho National Engineering Laboratory, Idaho Falls, Idaho, and Argonne National Laboratory, Argonne, Ill	3,100,000	3,100,000
79-1-f: Radioactive waste treatment facility, Idaho National Engineering Laboratory, Idaho Falls, Idaho	2,000,000	2,000,000
79-1-g: Test area north radioactive liquid waste storage and transfer system, Idaho National Engineering Laboratory, Idaho Falls, Idaho	1,000,000	1,000,000
79-h-1: Maintenance and storage facility, Richland, Wash	3,000,000	3,000,000
79-6: General plant projects	14,985,000	14,985,000
78-6-c: Safety research experimental facility, Idaho National Engineering Laboratory, Idaho (A–E, long-lead procurement only)		4,000,000
78-6-d: Experimental breeder reactor II modification, Idaho Falls, Idaho (A–E and selected long-lead procurement only)		5,000,000

Project No. and project title	Fiscal year 1979 budget estimate	Conference allowance
LIQUID METAL FAST BREEDER REACTOR—Continued		
Base Development Program—Continued		
78-6-e: Liquid metal engineering center facility modifications, Liquid Metal Engineering Center, Santa Susana, Calif. (A-E and long-lead procurement only)	$4,000,000	$4,000,000
78-6-f: Fuels and materials examination facility, Richland, Iand, Wash	15,000,000	20,000,000
78-7-a: Modifications to utility system, 300 area, Richland, Wash	900,000	900,000
78-7-b: Test reactor area steam distribution system upgrade, Idaho National Engineering Laboratory, Idaho	600,000	600,000
77-4-c: High performance fuel laboratory, Richland, Wash		5,000,000
77-4-d: Fuel storage facility, Richland, Wash	6,800,000	6,800,000
Total, liquid metal fast breeder reactor	62,485,000	81,485,000
OTHER ADVANCED REACTOR CONCEPTS		
Water Cooled Breeder Reactor		
79-1-i: AWBA test and examination facilities, Bettis Atomic Power Laboratory, West Miffin, Pa	9,000,000	9,000,000
ENVIRONMENTAL RESEARCH AND DEVELOPMENT		
Biomedical and Environmental Research		
79-3-a: Modifications and additions to biomedical and environmental research facilities, various locations	4,000,000	4,000,000
79-6: General plant projects	6,000,000	6,000,000
Total, environmental research and development	10,000,000	10,000,000
BASIC ENERGY SCIENCES		
Materials Sciences		
79-1-k: Intense pulsed neutron source-1, Argonne National Laboratory, Argonne, Ill	6,400,000	6,400,000
78-13-a: National synchrotron light source, Brookhaven National Laboratory, Upton, N.Y	10,000,000	10,000,000
Total. materials sciences	16,400,000	16,400,000
Chemical Sciences		
79-6: General plant projects	2,900,000	2,900,000
78-13-b: Combustion research facility, Sandia Laboratories, Livermore. Calif. (SLL)	3,400,000	3,400,000
Total. chemical sciences	6,300,000	6,300,000
Total, basic energy sciences	22,700,000	22,700,000
URANIUM SUPPLY AND ENRICHMENT ACTIVITIES		
Uranium Resource Development		
79-6: General plant projects	1,500,000	1,500,000
Isotope Separation Technology		
U^{235} Process development		
79-2-d: Technology test facilities, various locations (A-E and long-lead procurement only)	7,000,000	7,000.000
78-14-a: Centrifuge facilities modifications, various locations	16,000,000	16,000,000
Total, isotope separation technology	23,000,000	23,000,000
Uranium Enrichment Activities		
79-2-a: UF-6 tails cylinders and storage yards. gaseous diffusion plants	$11,000,000	$11,000,000
79-2-b: Coal and ash handling modifications, Portsmouth gaseous diffusion plant, Portsmouth, Ohio	2,300,000	2,300,000
79-2-c: Upgrade uranium recovery, Portsmouth gaseous diffusion plant, Portsmouth, Ohio	3,600,000	3,600,000
79-6: General plant projects	15,000,000	9,000,000
78-14-b: Process control modifications, gaseous diffusion plants	5,600,000	5,600,000
78-15-a: Water system improvements, gaseous diffusion plant, Paducah, Ky	2,000,000	2,000,000
77-9-a: Expansion of feed vaporization and sampling facilities, gaseous diffusion plants	3,000,000	4,000,000
76-8-g: Enriched uranium production facilities Portsmouth, Ohio	250,000,000	150,000,000
71-1-f: Process equipment modifications, gaseous diffusion plants	97,000,000	97,000,000
Subtotal, uranium enrichment activities	389,500,000	284,500,000
Less uranium enriching revenues	−156,700,000	−256,700,000
Total, uranium supply and enrichment activities	257,300,000	52,300,000
GENERAL SCIENCE AND RESEARCH PROGRAMS		
High Energy Physics		
79-9-a: Hadron bubble chamber facility Fermi National Accelerator Laboratory. Batavia, Ill	2,200,000	2,200,000
79-9-b: Energy saver/doubler, Fermi National Accelerator Laboratory. Batavia, Ill	10,000,000	12,000,000
79-9-c: Fire protection improvements, Brookhaven National Laboratory, Upton, N.Y	1,300,000	1,300,000
79-9-d: Accelerator improvements and modifications, various locations	4,500,000	4,500,000
79-6: General plant projects	3,800,000	3,800,000
78-10-b: Intersecting storage accelerator (Isabelle) 400 by 400 Gev, Brookhaven National Laboratory, Upton, N.Y	23,000,000	23,000,000
75-6-c: Positron-electron joint project, Lawrence Berkeley Laboratory and Stanford Linear Accelerator Center, Stanford, Calif	14,700,000	14,700,000
Total, high energy physics	59,500,000	61,500,000
Nuclear Physics		
79-9-e: Accelerator improvements and modifications, various locations	1,500,000	1,500,000
79-6: General plant projects	2,900,000	2,900,000
78-12-b: High intensity uranium beams, Lawrence Berkeley Laboratory, Berkeley, Calif	6,000,000	6,000,000
Total, nuclear physics	10,400,000	10,400,000
Total, general science and research programs	69,900,000	71,900,000
ATOMIC ENERGY DEFENSE ACTIVITIES		
Weapons Activities		
Research and development		
79-7-a: Tonopah Test Range upgrade, phase II, Sandia Laboratories, Albuquerque, N. Mex	4,000,000	4,000,000
79-7-b: Fire protection improvements, Los Alamos Scientific Laboratory, New Mexico (A-E and long-lead procurement only)	2,000,000	2,000,000
79-7-c: Proton storage ring, Los Alamos Scientific Laboratory, New Mexico	16,700,000	2,000,000
79-7-d: Water cooling station upgrade, Lawrence Livermore Laboratory, California	$2,300,000	$2,300,000
79-7-1: Systems R. & D. laboratory, Sandia Laboratory		1,000,000
79-6: General plant projects	21,400,000	18,400,000
78-16-c: High explosive flash radiography facility, LLL		5,900,000
18-76-g: Radioactive liquid waste improvement, Los Alamos Scientific Laboratory, New Mexico	9,700,000	5,700,000
78-16-i: Laboratory support complex, Los Alamos Scientific Laboratory, New Mexico	14,000,000	11,000,000
78-17-c: Core facilities office building, utilities, and roads, Lawrence Livermore Laboratory, California	9,300,000	9,300,000
79-7-P: Facilities for modern strategic bomb—various locations		15,500,000
Total, research and development	79,400,000	77,100,000
PRODUCTION AND SURVEILLANCE		
79-7-e: Production and assembly facilities, Pantex Plant, Amarillo, Tex	10,000,000	2,000,000
79-7-f: Stockpile quality evaluation facility, Y-12 plant, Oak Ridge, Tenn	2,300,000	2,300,000
79-7-g: Facilities for B43 modernization, various locations	18,000,000	
79-7-m: Weapons materials analytic laboratory, Amarillo, Tex		1,500,000
79-7-n: Utility systems, Y-12		2,200,000
79-7-0: Universal pilot plant, HE Amarillo, Tex		3,500,000
79-8: Plant engineering and design	10,000,000	10,000,000
78-16-d: Weapons safeguards, various locations	11,000,000	9,000,000
78-17-a: Production component warehouse, Pantex Plant, Amarillo, Tex	800,000	800,000
78-17-d: Steam plant improvements, Y-12 plant, Oak Ridge, Tenn	5,000,000	5,000,000
71-9: Fire, safety and adequacy of operating conditions projects, various locations	5,000,000	5,000,000
Total, production and surveillance	62,100,000	41,300,000
Total, weapons activities	141,500,000	118,400,000
Special Nuclear Materials		
Production		
79-7-h: Utilities replacement and expansion, Idaho chemical processing plant, Idaho National Engineering Laboratory, Idaho Falls, Idaho	10,500,000	5,000,000
79-7-i: Transmission and distribution systems upgrading, Richland, Wash	14,000,000	2,600,000
79-7-j: Pollution discharge elimination, Savannah River, S.C	9,000,000	9,000,000
79-6: General plant projects	16,200,000	13,100,000
79-8: Plant engineering and design	1,500,000	1,500,000
78-18-e: Environmental, safety and security improvements to waste management and materials processing facilities, Richland	30,000,000	13,000,000
77-13-a: Flourinel dissolution process and fuel receiving improvements, Idaho chemical processing plant, Idaho	100,400,000	47,000,000

Total, plant and capital equipment	1,438,416,000	1,067,971,000

POWER MARKETING ADMINISTRATIONS

OPERATIONS AND CONSTRUCTION

Amendment No. 4: Appropriates $145,473,000 for operations and construction as proposed by the Senate instead of $143,473,000 as proposed by the House.

Amendment No. 5: Earmarks $105,738,000 for the Western Area Power Administration as proposed by the Senate instead of $103,738,000 as proposed by the House.

The Conferees are in agreement that the allowance of $2,000,000 over the request for the Western Area Power Administration provides sufficient funding for an additional 171 full-time permanent positions for WAPA since only partial year costs will be incurred in bringing the additional personnel on board.

GENERAL PROVISION

Amendment No. 6: Restores language proposed by the House prohibiting the use of funds in title I for certain activities related to the Waste Isolation Pilot Plant in New Mexico and deletes language proposed by the Senate that would make the appropriation contingent on the enactment of authorizing legislation.

With regard to the Waste Isolation Pilot Plant (WIPP), the Conferees agree to the funding as proposed by the Senate, $10,000,000, and the language in Section 101 of the Bill as proposed by the House.

WIPP has been authorized as a facility for the permanent disposal of defense transuranic waste and for R. & D. on other waste forms including high level waste. As presently authorized, licensing of WIPP is not required.

A limited demonstration of the permanent disposal of up to one thousand commercial spent fuel assemblies has been proposed by a DOE task force. Such a demonstration and possible attendant licensing requirements have not been agreed to by cognizant committees of Congress and there is opposition to the Department's proposal by certain of these committees.

The action by the Conferees would preserve the existing status of the project to allow thorough review of this matter by the cognizant committees and resolution of the project authorization issue by the Congress.

TITLE II—DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

GENERAL INVESTIGATIONS

Amendment No. 7: Appropriates $137,978,000 for general investigations instead of $140,014,000 as proposed by the House and $137,138,000 as proposed by the Senate.

The Conferees have included $150,000 for a two-year study of the proposed lower site for the Lukfata Lake, Oklahoma project.

The Conferees understand that existing authorization is not sufficient to allow initiation of construction of the modifications to the Cleveland Harbor project in Ohio. The project has an excellent benefit to cost ratio of 7 to 1 and is essential to the economic stability of northeastern Ohio. Further, the project has the enthusiastic support of labor, industry, and various civic groups in the area. Therefore, the Corps of Engineers and other executive agencies are expected to vigorously proceed with the required actions necessary to fulfill the authorization requirements so that phase I planning can proceed at the earliest possible time.

The Corps is to investigate and determine the authorities needed and the requirements for improvement of the Lake Charles channel, Louisiana, to handle LNG tankers. A preliminary report should be forwarded to the Committee by October 30, 1978.

The Conference recommendation for the Passaic River Basin Phase I, New Jersey project effort takes into consideration the overall District capability and overall unobligated balances based on the latest testimony. The Corps of Engineers is to insure that sufficient additional resources are allocated to this work as are necessary for any interim action studies and measures as contemplated in the authorization and consistent therewith. There should be no delays in the work attributed to funding.

Because of recent and continuing erosion and deterioration of the Bethel, Alaska waterfront, $65,000 from within available funds was recommended in the Second Supplemental Appropriations Bill for 1978 to initiate the study of bank stabilization and other problems prior to the onset of winter weather, thereby preventing another year's delay before preliminary study work could commence.

The Committee recommends that the Corps of Engineers allocate from within available funds $105,000 to continue this study effort in fiscal year 1979.

The Conferees recommend that, upon the Corps' receipt of the appropriate study requirements, an amount not to exceed $135,000 be allocated from within available funds for a study of the feasibility of redeveloping the hydroelectric capacity of the Jackson Mills Dam and the Mines Falls Dam at Nashua, New Hampshire.

Amendment No. 8: Deletes language proposed by the Senate relating to the study of the Diversion of Lake Michigan Water at Chicago.

The Conferees direct that no funds shall be made available to divert water from Lake Michigan in connection with the study during fiscal year 1979.

The funds appropriated are to be allocated as shown on the following table:

General Investigations—State and project	Fiscal year 1979 Budget estimate	Fiscal year 1979 Conference allowance
ALABAMA		
(FDP) Brewton and East Brewton	$86,000	$86,000

CONSTRUCTION, GENERAL

Amendment No. 9: Appropriates $1,343,711,000 for construction, general, instead of $1,392,515,000 as proposed by the House and $1,342,147,000 as proposed by the Senate.

Within the funds provided or available the Chief of Engineers is directed to establish and maintain in the interest of safe navigation an adequate anchorage area with approprate dimensions, in the Mississippi River above Head of Passes in the vicinity of Pilottown, La. U.S. Coast Guard recommendations in 1977 identified this anchorage requirement as high priority immediate need.

The Committee has agreed to provide $5,300,000 for the Missouri Levee System. Within this amount, the Corps should initiate construction of Unit L611-614.

The Conferees believe that it would be highly desirable to create an enduring memorial to the late Congressman Jerry L. Litton, who served the sixth district of Missouri with distinction from 1972 until his tragic death in 1976. Accordingly, with funds provided for the Smithville Lake project, the visitor center — administration buildings complex that is now being planned should be named after Jerry L. Litton and modified to provide a fitting and appropriate exhibit area, to memorialize his accomplishments. In addition to Federal funds which may be up to (but shall not exceed) the limitation established by Corps of Engineers regulations for a regional type facility, these modifications should be carried out with such contributed funds, memorabilia and related curatorial services that may be made available.

The Conferees are aware of the hazardous entrance conditions at the Umpqua River, Oreg., navigation project. The Corps of Engineers has been unable to adequately maintain the authorized project, and through much of the year shoaling results in inadequate channel depths and widths, and dangerous breaker waves at the entrance bar, and dangerous cross currents in the channel. Over 41 lives have been lost at this project since 1951 and the operational problems have been a contributing factor in the general decline of the local economy in the project's tributary area. Douglas County has experienced substantial unemployment since 1970, and is designated as a redevelopment area by the U.S. Economic Development Administration.

The Conferees regard these operational problems to be clear evidence of a design deficiency. Historically, the Corps has corrected design deficiencies under the basic authority used for construction of the deficient project, without seeking additional authorization. The Corps is directed to proceed with corrections to the existing project with the $2 million provided for initiation of these corrections in fiscal year 1979. The Corps of Engineers is expected to proceed with the plan of improvement set forth in the report of the Portland District Engineer dated June 1976.

The Conferees have not included funds in the bill for the Tallahala Creek Lake, Mississippi project pending the report on the discovery of oil in the reservoir area.

Amendment No. 10: Deletes language proposed by the House providing that no part of the funds provided under Construction, General shall be used for projects not authorized by law or limiting the amount to be appropriated.

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds language relating to the Willow Creek Lake, Oregon project.

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate allocating $4,000,000 for bank stabilization measures on the North Branch of the Susquehanna River in the vicinity of Forty Fort, Pennsylvania.

The funds appropriated are to be allocated as shown on the following table:

Construction, general—State and project	Budget estimate, fiscal year 1979 Construction	Budget estimate, fiscal year 1979 Planning	Conference allowance, fiscal year 1979 Construction	Conference allowance, fiscal year 1979 Planning

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

Amendment No. 13: Appropriates $223,035,000 for flood control, Mississippi River and tributaries, as proposed by the Senate, instead of $232,930,000 as proposed by the House.

The recreation development roads are to include the local road in Lafayette County known as the Coontown road and Mississippi local road 315, known as the Blackjack road in Panola County to recreation areas on the south side of Sardis Lake.

The Conferees direct that work on the Ascalmore-Tippo and Opossum Bayous project shall proceed together in Tallahatchie and Quitman Counties.

No funds are provided in fiscal year 1979 for the Cache Basin, Arkansas project.

The Corps is directed to examine the bank erosion problem at Point Leflore at the confluence of the Yalobusha, Tallahatchie and Yazoo Rivers in Mississippi to determine what can be done to solve the problem and report back to the Committee on Appropriations with their findings.

The Corps is directed to keep the streams above Enid, Grenada, Arkabutla and Sardis Lakes in Mississippi free from log jams, sediment deposits and other obstructions.

The funds appropriated are to be allocated as shown on the following table:

FLOOD CONTROL MISSISSIPPI RIVER AND TRIBUTARIES

	Budget estimate	Conference allowance
1. General investigations:		
(a) Surveys:		
(1) General studies:		
Boeuf-Tensas basin, south Arkansas and north Louisiana		$100,000
Helena, Arkansas and vicinity	$100,000	100,000
St. Francis River basin below Wappapello Lake, Ark., and Mo	165,000	165,000
West Memphis, Ark	22,000	22,000
Mississippi River, Cairo, Ill., to Baton Rouge, La	260,000	260,000
Atchafalaya basin (water and land resources), Louisiana	410,000	410,000
Berwick lock-Atchafalaya basin, Louisiana	100,000	100,000
Louisiana State Penitentiary levee, Mississippi River, La	75,000	75,000
Larto Lake, Saline Area, La		30,000
Mississippi and Louisiana estuarine area, Mississippi and Louisiana	120,000	135,000
Yazoo River basin, Mississippi	300,000	650,000
Obion and Forked Deer Rivers and tributaries, Tennessee and Kentucky	65,000	65,000
Wolf and Loosahatchie Rivers and Nonconnah Creek, Tenn. and Miss	102,000	102,000
St. Francis Mitigation Study, Mo		25,000
Mississippi River-East Bank Levees, Tenn. and Ky		50,000
(2) Phase I stage of advance engineering and design:		
Horn Lake Creek and tributaries, including Cow Pen Creek, Miss. and Tenn	150,000	215,000
St. John's Bayou and New Madrid Floodway, Mo	110,000	145,000
Nonconnah Creek, Tenn. and Miss	150,000	170,000
(b) Collection and study of basic data	160,000	160,000
Subtotal, general investigations	2,289,000	2,979,000
2. Construction and planning		
Eastern Rapids-South Central Avoygelles Parishes, Louisiana		$70,000
Harris Fork Creek, Kentucky and Tennessee	$170,000	170,000
Mississippi River levees	27,700,000	28,000,000
Channel improvement	39,890,000	45,123,000
Lake Neark, Ark., recreation	(0)	(123,000)
Old River, La	2,500,000	2,500,000
Lower Red River, south bank, levees, Louisiana	1,200,000	2,000,000
Atchafalaya basin, Louisiana	26,000,000	29,000,000
Cache basin, Arkansas	2,820,000	
St. Francis basin, Arkansas and Missouri	11,700,000	12,000,000
Tensas basin, Arkansas and Louisiana	(9,300,000)	(13,200,000)
Boeuf and Tensas Rivers, except Lake Chicot pumping plant	500,000	500,000
Boeuf and Tensas Rivers, Lake Chicot pumping plant	5,070,000	6,770,000
Red River backwater area, except Tensas Cocodrie pumping plant	800,000	1,600,000
Red River backwater area, Tensas Cocodrie pumping plant	2,930,000	4,330,000
West Kentucky tributaries, Kentucky	2,900,000	2,900,000
Teche-Vermilion basins, Louisiana	4,000,000	4,000,000
Yazoo basin, Mississippi	(10,279,000)	(16,000,000)
Sardis Lake	901,000	1,301,000
Arkabutla Lake	105,000	105,000
Enid Lake	123,000	623,000
Grenada Lake	1,002,000	1,252,000
Greenwood	11,000	11,000
Upper Yazoo projects	2,385,000	3,685,000
Main stem	282,000	282,000
Tributaries:		
Except Ascalmore-Tippo and Opossum Bayous	1,670,000	2,641,000
Ascalmore-Tippo and Opossum Bayous	300,000	1,200,000
Big Sunflower River, etc	800,000	1,900,000
Yazoo backwater	1,200,000	1,500,000
Streambank erosion control evaluation and demonstration	1,500,000	1,500,000
West Tennessee tributaries, Tennessee	2,500,000	3,500,000
Subtotal, construction and planning	140,959,000	—158,463,000
3. Major rehabilitation Old River, La. (Old River control structure)	10,700,000	10,700,000
4. Maintenance	60,052,000	64,973,000
Less reduction for savings and slippages	—10,000,000	—6,900,000
Unobligated balances applies		—7,180,000
Total	204,000,000	223,035,000

OPERATION AND MAINTENANCE

The Conferees are aware of a serious safety problem existing at the entrance to the Pine Bluff Harbor on the McClellan-Kerr navigation system resulting from the narrowness of the navigation channel and the sharpness of the required turn. This presents a critical problem to barge operators who must moor their tows on makeshift facilities while reconfiguring to enter the harbor. This particular problem has been recognized by the Corps and addressed in concept. The Conferees view safety of navigation at harbor entrances to be as integral a part of overall system safety as is channel safety or lock and dam safety. Accordingly, the Conferees expect the Corps to utilize available operation and maintenance funds to ameliorate this navigation problem.

REVOLVING FUND

Amendment No. 14: Appropriates $46,000,000 for the revolving fund as proposed by the Senate instead of $29,000,000 as proposed by the House.

The Conferees are concerned that the disposal of retired hopper dredges may inhibit the investment by private industry in new dredging fleet and equipment or the use of such new fleet and equipment for its intended purposes. The Conferees request that the Corps retain retired equipment until authorizing legislation is enacted to address this concern.

The Conferees note with deep concern the proposed implementation of regulations by the Coast Guard which could have a severe and drastic impact on essential dredging operations in the Nation. The Conferees direct the Chief of Engineers to advise the Coast Guard of the magnitude of the problem such implementation would cause and urges the Coast Guard to defer implementation of the provisions of 46 U.S.C. 395 and U.S. Coast Guard regulations 46 CFR 90–98 et al, implementing the Seagoing Barge Act until full effects of the proposed action have been determined in consultation with the Corps, and the authorizing committees of the Congress considers legislation to resolve the issue.

The impact upon the dredging industry and the dredging requirements of the Nation would be devastating if the Coast Guard regulations are implemented.

HOPPER DREDGE POLICY AND PROGRAM

In an effort both to provide the Corps of Engineers with a modern minimum hopper dredge fleet and to provide additional assurances to the private dredging industry that the hopper dredges it constructs will have opportunity to compete for dredging work, the Conferees direct the Chief of Engineers to implement the following policy and program:

1. During the next 3 fiscal years the Corps is directed to make available not less than 30 million cubic yards of hopper dredge work per year for industry to bid on, subject to industry's capability;

2. At 6 month intervals meetings shall be arranged with industry representatives to permit them to identify those projects being considered for advertisement on which they wish to bid and for which they have the capability to compete;

3. The projects to be scheduled for advertisement shall be determined by considering the expressed interests and capability of the industry and the annual yardage required for the corps' minimum fleet pursuant to Public Law 95–269, but this does not limit the amount of work the corps may offer to private industry;

4. In fiscal year 1982, the corps shall reassess this program to determine whether industry's response to it warrants an increase or a decrease in the amount of work to be made available for industry to bid on;

5. The corps shall take the necessary steps to assure that the funds required to support the program are available so there are no delays or deferrals in the advertisement program, consistent with other necessary operation and maintenance requirements of the Civil Works program;

6. The corps shall establish its recommendation for the size and composition of the Federal hopper dredge fleet and shall provide to the Committee with the submission of the fiscal year 1980 budget request, its recommendations together with the full and complete justification therefor; and

7. As a part of this program, the Committee has included an additional appropriation of $17 million to the Revolving Fund to initiate construction of the medium class hopper

dredge, but this new dredge is not to be used to reduce the percentage of hopper dredging work by private industry, subject to industry's capability;

8. It is understood that no funding for additional new government hopper dredges will be sought or provided through fiscal year 1982.

The Conferees believe that the policy and program outlined above will provide the necessary incentive for the Industry to construct additional new hopper dredges and to expand its participation in the hopper dredging field. This extension of the Industry Capability Program meets the above objective which is contained in Public Law 95–269.

ADMINISTRATIVE PROVISIONS

Amendments Nos. 15 and 16: Limit total accrued expenditures of the capital investment program of the revolving fund to $102,500,000 as proposed by the Senate instead of limiting total obligations to $1,186,861,000 as proposed by the House.

GENERAL PROVISIONS

Amendment No. 17: Provides a total of 30,300 permanent positions for the civil works program of the Corps of Engineers as proposed by the Senate instead of 30,600 as proposed by the House.

TITLE III—DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

GENERAL INVESTIGATIONS

Amendment No. 18: Appropriates $30,870,000 for general investigations as proposed by the Senate instead of $29,870,000 as proposed by the House.

The Conferees have been advised that the Bureau has recently revised its capability on the Butte Valley Division feasibility study from $100,000 to $300,000 to avoid serious disruptions and delay in the work plan during fiscal year 1979, particularly in completing a production test well. Accordingly, it is recommended that the Bureau allocate from within available funds the additional amount required to equal its capability for this work.

The appropriations are to be allocated as shown on the following table:

General investigations—State and project	Fiscal year 1979 Budget estimate	Fiscal year 1979 Conference allowance
ARIZONA		
Boulder Canyon, Hoover powerplant modification	$580,000	$580,000
Reclamation and energy sources, LMNRA wilderness designation	250,000	250,000
CALIFORNIA

Total, general investigations	22,200,000	30,870,000

CONSTRUCTION AND REHABILITATION

Amendment No. 19: Appropriates $221,572,000 for construction and rehabilitation

instead of $244,391,000 as proposed by the House and $208,572,000 as proposed by the Senate.

In the development of the repayment contract for the construction of those irrigation lands located in Block 26 of the Columbia Basin project, Washington, the Conferees direct the Secretary of the Interior to include terms and conditions as set forth in repayment contract 11 R 1444 dated October 9, 1945, as amended, between the United States of America and South Columbia Basin Irrigation District.

The Conferees agree with the Senate report language on the Garrison Diversion, North Dakota project.

Immediately following the construction of the recreation road around Scoggins Reservoir of the Tualatin project by the Bureau of Reclamation, extended abnormal drought conditions occurred during the 2-year warranty period covering the road construction work. During the first heavy rainfall following the severe drought, slide areas developed in the relocated road.

The Conferees feel that Washington County, Oreg., did not receive full value from the warranty provisions of the contract. Therefore, an additional $1,000,000 is provided over the budget request and the Bureau of Reclamation is directed to stabilize the slide areas and to provide road repair at the Tualatin project.

The appropriations are to be allocated as shown on the following table:

Construction and rehabilitation—State and project	Fiscal year 1979			
	Budget estimate		Conference allowance	
	Construction	Planning	Construction	Planning

COLORADO RIVER BASIN SALINITY CONTROL PROJECTS

Amendment No. 20: Appropriates $17,315,000 for Colorado River basin salinity control projects as proposed by the Senate instead of $27,315,000 as proposed by the House.

OPERATION AND MAINTENANCE

Amendment No. 21: Appropriates $86,373,000 for operation and maintenance as proposed by the Senate instead of $87,873,000 as proposed by the House.

LOAN PROGRAM

Amendment No. 22: Appropriates $36,366,000 for the loan program as proposed by the Senate instead of $38,745,000 as proposed by the House.

ADMINISTRATIVE PROVISIONS

Amendment No. 23: Limits appropriations for the purchase of not to exceed 30 passenger motor vehicles as proposed by the Senate instead of 19 passenger motor vehicles as proposed by the House.

OFFICE OF THE SECRETARY

WATER RESOURCES PLANNING

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to restore the matter stricken by said amendment, amended to read as follows:

"OFFICE OF THE SECRETARY

"WATER RESOURCES PLANNING

"For expenses necessary to enable the Secretary of the Interior to carry out the provisions of the Water Resources Planning Act of 1965 (42 U.S.C. 1962–1962d–3), as amended, including services as authorized by 5 U.S.C. 3109 and 42 U.S.C. 1962a–4(5), $10,913,900, to remain available until expended, of which $600,000 shall be for groundwater studies in the Delaware River Basin and Susquehanna River Basin."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate

The conference allowance is to be allocated according to the following table:

River Basin Commissions	$2,886,000
Planning Grants to States	3,000,000
Level B and Special Studies	3,767,900
Includes:	
a. Columbia River estuary study	(828,900)
b. Hudson River level B study	(135,000)
c. Connecticut River Basin	(150,000)
d. New England port and harbor study	(308,000)
Non Title II R.B.C. entities	660,000
Delaware River Basin groundwater study	300,000
Susquehanna River Basin groundwater study	300,000
	10,913,900

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

Amendment No. 25: Provides a total of 7,800 permanent positions for the Bureau of Reclamation as proposed by the Senate instead of 7,900 as proposed by the House.

TITLE IV—INDEPENDENT AGENCIES

FUNDS APPROPRIATED TO THE PRESIDENT

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

Amendment No. 26: Appropriates $368,700,000 for the Appalachian regional development programs as proposed by the Senate instead of $374,000,000 as proposed by the House.

Amendment No. 27: Earmarks $233,000,000 for the Appalachian development highway system instead of $246,000,000 as proposed by the House and $231,000,000 as proposed by the Senate.

The appropriations are to be allocated as follows:

Highways:	
Development highway system	$215,000,000
Access road program	16,000,000
Administration and special planning	2,000,000
Area development	128,000,000
Research and local development districts	7,700,000

The Conferees are agreed that the allowance includes $3,000,000 for planning and other necessary expenses for the construction of a development highway between Birmingham, Alabama, and a point near Fulton, Mississippi, and $6,000,000 for the Goodman road project in Marshall and Benton Counties, Mississippi, and Highway 6 to Natchez Trace Lake, Pontotoc County, Mississippi.

DELAWARE RIVER BASIN COMMISSION

CONTRIBUTION TO DELAWARE RIVER BASIN COMMISSION

Amendment No. 28: Appropriates $245,000 for the contribution to Delaware River Basin Commission as proposed by the Senate instead of $545,000 as proposed by the House.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

Amendment No. 29: Appropriates $322,301,000 for salaries and expenses of the Nuclear Regulatory Commission instead of $321,487,000 as proposed by the House and $328,287,000 as proposed by the Senate.

The Conferees are agreed that the allowance includes $45,210,000 for regulation, $159,000,000 for research, $13,064,000 for program technical support, $27,492,000 for program direction and administration and the amounts allocated by the Senate for gas-cooled reactor efforts. The allowance includes a total of 2,788 permanent positions.

Amendment No. 30: Deletes language proposed by the Senate that would make the appropriation contingent on the enactment of authorizing legislation.

SUSQUEHANNA RIVER BASIN COMMISSION

CONTRIBUTION TO SUSQUEHANNA RIVER BASIN COMMISSION

Amendment No. 31: Appropriates $200,000 for the contribution to Susquehanna River Basin Commission as proposed by the Senate instead of $500,000 as proposed by the House.

TENNESSEE VALLEY AUTHORITY

PAYMENT TO TENNESSEE VALLEY AUTHORITY FUND

Amendment No. 32: Appropriates $154,531,000 for payment to the Tennessee Valley Authority Fund as proposed by the House instead of $151,531,000 as proposed by the Senate.

The Conferees agree that the allowance includes $26,000,000 for the Columbia unit, $3,000,000 for capital and $4,600,000 for operating expenses for the Land Between the Lakes recreation area, a total of $5,000,000 for the atmospheric fluidized bed coal combustion technology program and a general reduction of $4,550,000 for program savings and slippages.

WATER RESOURCES COUNCIL

WATER RESOURCES PLANNING

Amendment No. 33: Deletes language proposed by the Senate appropriating $11,773,900 for the Water Resources Council.

TITLE V—GENERAL PROVISION

Amendment No. 34: Deletes language proposed by the House that would have required two percent of the appropriations to be withheld from obligation and expenditure.

Amendment No. 35: Changes part of the citation of the bill as proposed by the Senate.

Unnumbered Senate amendment: Changes a portion of the bill title to "energy and water development" as proposed by the Senate instead of "public works for water and power development and energy research" as proposed by the House.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1979 recommended by the Committee of Conference, with comparisons to the fiscal year 1978 amount, the 1979 budget estimates, and the House and Senate bills for 1979 follow:

New budget (obligational) authority, fiscal year 1978	$10,439,873,000
Budget estimates of new (obligational) authority, fiscal year 1979	[1] 11,039,449,000
House bill, fiscal year 1979	10,341,633,900
Senate bill, fiscal year 1979	10,123,344,900
Conference agreement	10,160,483,900

Conference agreement compared with:

New budget (obligational) authority, fiscal year 1978	−279,389,100
Budget estimates of new (obligational) authority, fiscal year 1979	−878,965,100
House bill, fiscal year 1979	−181,150,000
Senate bill, fiscal year 1979	+37,139,000

[1] Includes $670,550,000 of budget estimates not considered by the House, contained in Sen. Documents 95–106 and 95–109.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.J. Res. 682. Joint resolution to provide for the designation of a week as "National Lupus Week";

H.J. Res. 946. Joint resolution to designate October 7, 1978, as "National Guard Day"; and

H.J. Res. 963. Joint resolution designating July 18, 1979, as "National P.O.W.–M.I.A. Recognition Day."

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 153. An act for the relief of Dr. Timothy Kam-Hung Chung; to the committee on the Judiciary;

S. 399. An act for the relief of Dr. Manuel Javier Mariano and his wife, Lilia Zapanta Mariano; to the Committee on the Judiciary;

S. 1680. An act for the relief of Roland L. Outlaw and his wife Carolyn H. Outlaw of Lee County, S.C.; to the Committee on the Judiciary;

S. 2547. An act for the relief of Soo Yung Kim; to the Committee on the Judiciary;

S. 2977. An act for the relief of Renuka Pavla; to the Committee on the Judiciary; and

S. 3001. An act for the relief of Kirthi Chandher; to the Committee on the Judiciary.

ADJOURNMENT

Mr. CAVANAUGH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 21 minutes p.m.), under its previous order, the House adjourned until Tuesday, August 15, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4794. A letter from the Assistant Secretary of Defense (Comptroller), transmitting notice of the proposed obligation of funds available in the Marine Corps Stock Fund and the Army Stock Fund for war reserve stocks, pursuant to section 835 of Public Law 95–111; to the Committee on Appropriations.

4795. A letter from the Deputy Secretary of Defense, transmitting a report on the real and personal property of the Department of Defense as of September 30, 1977, pursuant to 10 U.S.C. 2701(b); to the Committee on Armed Services.

4796. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the selected acquisition reports and SAR summary tables for the quarter ended June 30, 1978, pursuant to section 811(a) of Public Law 94–106; to the Committee on Armed Services.

4797. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be under-

taken by the Army National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

4798. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Iran (transmittal No. 78–72), pursuant to section 813 of Public Law 84–106; to the Committee on Armed Services.

4799. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–247, "To amend the District of Columbia Business Corporation Act to permit the incorporation of certain insurance companies, and for other purposes, "pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

4800. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–248, "To order the closing of part of an east-west public alley abutting on Lot 64 in Square 140, bounded by 18th, L, 19th and M Streets, N.W. (S.O. 74–46)," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

4801. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–249, "To amend the property tax deferral mechanism, and for other purposes," pursuant to section 602 (c) of Public Law 93–198; to the Committee on the District of Columbia.

4802. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–250, "To amend Chapter V of the Life Insurance Act, approved June 19, 1934 (48 Stat. 1156; D.C. Code, sec. 35–701 et seq.) to update the standard valuation and nonforfeiture law and to adopt a standard nonforfeiture law for individual deferred annuities," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

4803. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–251, "To amend the Rental Housing Act of 1977," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

4804. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–252, "To amend the District of Columbia Relocation Regulations (Regulation 73–4) to increase the maximum allowable Replacement Housing Payment for homeowners," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

4805. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to designate the Great Bear Wilderness, Flathead National Forest, and enlarge the Bob Marshall Wilderness Flathead and Lewis and Clark National Forests, Mont., together with the supporting study report and environmental impact statement, pursuant to section 3(b)(7) of Public Law 94–557; to the Committee on Interior and Insular Affairs.

4806. A letter from the Secretary Energy, transmitting the financial and statistical summary for the Federal Columbia River Power System for fiscal year 1977, pursuant to section 2(a) of Public Law 89–448, as amended; to the Committee on Interior and Insular Affairs.

4807. A letter from the Deputy Assistant Secretary of the Interior, transmitting a proposed plan for the use and distribution of the Lake Superior and Mississippi Bands of Chippewa Indians judgment funds in two awards in dockets 18–C and 18–T before the Indian Claims Commission, pursuant to sections 2(a) and 4 of Public Law 93–134; to the Committee on Interior and Insular Affairs.

4808. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed contract with IRT Corp., San Diego, Calif., for a research project entitled, "Development of an Ion Implantation System for Surface Alloying," pursuant to section 1(d) of Public Law 89–672; to the Committee on Interior and Insular Affairs.

4809. A letter from the Administrator, Agency for International Development, Department of State, transmitting the annual report for fiscal year 1977 on military expenditures by recipients of U.S. economic assistance, pursuant to section 620(s)(2) of the Foreign Assistance Act of 1961, as amended (83 Stat. 820); to the Committee on International Relations.

4810. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

4811. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Iran (transmittal No. 78–72), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

4812. A letter from the Comptroller General of the United States, transmitting a report on the data, methodology, and conclusions in the Joint Chiefs of Staff report entitled "Report on Strategic Mobility Requirements and Programs" (PSAD–78–126, August 14, 1978); jointly, to the Committees on Government Operations, and Armed Services.

4813. A letter from the Acting Comptroller General of the United States, transmitting a report on the suitability of certain salt caverns and mines for the Strategic Petroleum Reserve (EMD–78–65, August 14, 1978); jointly, to the Committees on Government Operations, and Interstate and Foreign Commerce.

4814. A letter from the Secretary of Commerce, transmitting the annual report of the Department of Commerce for fiscal year 1977, pursuant to section 8 of the act of February 14, 1903 [15 U.S.C. 1519]; jointly, to the Committees on Interstate and Foreign Commerce, Merchant Marine and Fisheries, and Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMPSON: Committee on House Administration. House Resolution 1280. Resolution to create an additional position of assistant chief telephone operator and to abolish five telephone operator positions, and for other purposes (Rept. No. 95–1486). Referred to the House Calendar.

Mr. BROOKS: Committee on Government Operations. H.R. 13500. A bill to amend title 44 to insure the preservation of and public access to the official records of the President, and for other purposes with amendment (Rept. No. 95–1487, Pt. I). Ordered to be printed.

Mr. EILBERG: Committee on the Judiciary. House Joint Resolution 1041. Joint resolution to restore posthumously full rights of citizenship to Jefferson F. Davis (Rept. No. 95–1488). Referred to the House Calendar.

Mr. TEAGUE: Committee of conference. Conference report on H.R. 6669 (Rept. No. 95–1489). Ordered to be printed.

Mr. BEVILL: Committee of conference. Conference report on H.R. 12928 (Rept. No. 95–1490). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DANIELSON (for himself, Mr. PREYER, Mrs. SCHROEDER, and Mr. STRATTON):

H.R. 13850. A bill to require certain officers and employees of the United States, and candidates for Federal office, to file reports as to their income and financial holdings and transactions, and for other purposes; jointly, to the Committees on the Judiciary, Armed Services, Post Office and Civil Service, and the Select Committee on Ethics.

By Mr. DR NAN (for himself, Mr. BINGHAM, Mrs. COLLINS of Illinois, Mr. EDGAR, Mr. FLOOD, Mr. GARCIA, Mr. HEFTEL, Mr. HUGHES, Mr. LAFALCE, Mr. MCHUGH, Mr. NOWAK, Mr. RANGEL, Mr. REUSS, and Mr. STOKES):

H.R. 13851. A bill to provide for certain research and demonstration respecting the disposal of sludge, the reclamation of waters damaged by sludge and sewage, assistance to State and local governments for the removal of sludge and other solid waste from waters and shoreline areas, and to provide that grants for waste treatment works shall be made only if such works provide for environmentally sound sludge management; to the Committee on Public Works and Transportation.

By Mr. HARRINGTON (for himself, Mr. BEDELL, Mr. DOWNEY, Mr. EDWARDS of California, Mr. FRENZEL, Mr. GARCIA, Mr. KASTENMEIER, Mr. MARKEY, Mr. MCKINNEY, and Mr. PATTISON of New York):

By Mr. LENT (for himself, Mr. PEASE, and Mr. MOTTL):

H.R. 13853. A bill to authorize the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings to efficient, alternate uses, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOAKLEY (for himself, Mr. RYAN, Mr. BEDELL, Mr. BRODHEAD, Mr. TRAXLER, Mr. RICHMOND, Mr. NEAL, Mr. SEIBERLING, Mr. PURSELL, Ms. SCHROEDER, and Mr. MARRIOTT):

H.R. 13854. A bill to require that the Secretary of Energy notify any State of any investigation of any site in such State for the construction of any radioactive waste storage facility and allow such State to prevent the construction of such facility on such site by an action of the state legislature or a statewide referendum; jointly, to the Committees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

By Mr. TRAXLER:

H.R. 13855. A bill to amend title 38, United States Code, to treat individuals who were serving as cadets or midshipmen at one of the service academies on December 31, 1976, as veterans of the Vietnam era for purposes of entitlement to educational assistance under chapter 34 of such title; to the Committee on Veterans' Affairs.

By Mr. UDALL (by request):

H.R. 13856. A bill to amend the Land and Water Conservation Fund Act of 1965, as amended and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. FISHER (for himself, Mr. LUNDINE, and Mr. SIMON):

H.R. 13857. A bill to amend the Employment Act of 1946 to assist in keeping inflation within reasonable bounds by providing for the establishment of practical wage and price guidelines along with a coordinated

set of economic policies to offset inflationary pressures, and to provide for an effective process (including factfinding, mediation, and other steps) for assuring compliance with such guidelines; jointly, to the Committees on Banking, Finance and Urban Affairs, Education and Labor, Government Operations, and Rules.

By Mr. GILMAN (for himself, Mr. HARRINGTON, Mr. HOLLENBECK, Mr. MITCHELL of New York, and Mr. NOLAN):

H.R. 13858. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 to provide for a reserve stock of agricultural commodities for use when sufficient quantities of agricultural commodities are not otherwise available to carry out agreements under that act; jointly, to the Committees on Agriculture, and International Relations.

By Mr. ICHORD:

H.R. 13859. A bill to terminate the authorization of the Meramec Park Lake flood control project, Missouri; to the Committee on Public Works and Transportation.

H.R. 13860. A bill to terminate the authorization of the Union Lake flood control project, Missouri; to the Committee on Public Works and Transportation.

By Mr. LAFALCE:

H.R. 13861. A bill to repeal the McCarran-Ferguson Act; to the Committee on the Judiciary.

H.R. 13862. A bill to amend the McCarran-Ferguson Act to define the business of insurance; to the Committee on the Judiciary.

H.R. 13863. A bill to amend the McCarran-Ferguson Act to remove the present exemption from certain Federal laws which would otherwise relate to regulating the business of insurance; to the Committee on the Judiciary.

H.R. 13864. A bill to amend the McCarran-Ferguson Act to require effective State regulation of business of insurance to obtain exemption from certain Federal laws; to the Committee on the Judiciary.

By Mr. LUNDINE (for himself, Mr. MOORHEAD of Pennsylvania, Mr. FISHER, Ms. MIKULSKI, Mr. MAGUIRE, Mr. MIKVA, Mr. PATTISON of New York, and Mr. SIMON):

H.R. 13865. A bill to reduce the rate of inflation and keep it within reasonable bounds by providing for a comprehensive plan for coordinating Federal economic and regulatory policies to offset inflationary pressures, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Education and Labor, Government Operations, and Rules.

By Mr. CLEVELAND (for himself, Mr. D'AMOURS, Mr. ANDREWS of North Dakota, Mr. CARNEY, Mr. CARTER, Mr. HILLIS, Mr. MOORHEAD of California, Mr. PATTEN, Mr. STANGELAND, Mr. TAYLOR, Mr. SCHULZE, Mr. RAILSBACK, Mr. COUGHLIN, Mr. MCCLOSKEY, Mr. RUDD, Mr. BROOMFIELD, Mr. BRINKLEY, Mr. LOTT, Mr. BROWN of Michigan, Mr. DEL CLAWSON, Mr. DICKINSON, Mr. DORNAN, Mr. GOLDWATER, Mr. GRASSLEY, and Mr. MILLER of Ohio):

H. Con. Res. 693. Concurrent resolution expressing the sense of Congress that all remaining proceedings with respect to the Seabrook Nuclear Station project should be expedited and that all licensing and permitting procedures for the construction and operation of nuclear generating stations should be reviewed and modified to improve the efficiency of such procedures; to the Committee on Interior and Insular Affairs.

By Mr. DERWINSKI (for himself, Mr. CRANE, Mr. DORNAN, Mr. GOLDWATER, Mrs. FENWICK, and Mr. SYMMS):

H. Con. Res. 694. Concurrent resolution relating to the occupation of Czechoslovakia by Soviet troops; to the Committee on International Relations.

[*Omitted from the Record of Aug. 11, 1978*]

By Mr. EDGAR:

H. Res. 1312. Resolution expressing the sense of the House of Representatives with respect to the United Nations Conference on the Law of the Sea and urging the establishment of a Common Heritage Fund; to the Committee on International Relations.

[*Submitted Aug. 14, 1978*]

By Mr. BRECKINRIDGE (for himself, Mr. ROSE, Mr. PRESSLER, Mr. BAUCUS, Mr. WATKINS, Ms. KEYS, Mr. SIMON, and Mr. EVANS of Colorado):

H. Res. 1313. Resolution to establish a select committee to study nonmetropolitan America; to the Committee on Rules.

By Mr. DRINAN (for himself, Mr. BINGHAM, Mr. BLANCHARD, Mr. BRODHEAD, Mr. BURKE of Florida, Mr. EILBERG, Mrs. FENWICK, and Mr. GIAIMO):

H. Res. 1314. Resolution expressing the sense of the House of Representatives with respect to the selection of a site other than the Soviet Union for the 1980 summer Olympic games; to the Committee on International Relations.

MEMORIALS

Under clause 4 of rule XXII,

466. The SPEAKER presented a memorial of the Legislature of the Territory of Guam, relative to use of portions of the Paseo de Susana and the Agana Boat Basin for recreational and commercial purposes; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURKE of Florida:

By Mr. EDWARDS of Oklahoma:

H.R. 13867. A bill for the relief of Amis Construction Co.; to the Committee on the Judiciary.

By Mr. OTTINGER:

H.R. 13868. A bill for the relief of Henry Sherman Ochshorn; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11280

By Mr. GILMAN:

—Page 144, strike out line 6 and all that follows down through line 8 on page 149 and insert in lieu thereof the following:

"CIVIL SERVICE COMMISSION

"SEC. 201. (a) The Office of Personnel Management, established by section 101 of Reorganization Plan Numbered 2 of 1978, is abolished.

"(b) The United States Civil Service Commission, as constituted under chapter 11 of title 5, United States Code, prior to the transfer of its functions under such reorganization plan, is continued as an agency of the United States.

—Page 144, strike out line 6 and all that follows down through line 8 on page 149 and insert in lieu thereof the following:

SEC. 201. (a) Title 5, United States Code, is amended by adding after chapter 9 the following new chapter:

"Chapter 10—OFFICE OF PERSONNEL MANAGEMENT

"Sec.
"1001. Office of Personnel Management.
"1002. Director; Associate Directors.
"1003. Functions of the Director.

"§ 1001. Office of Personnel Management

"The Office of Personnel Management is an independent establishment in the executive branch. The Office shall have an official seal which shall be judicially noticed and shall have its principal office in the District of Columbia, but it may have field offices in other appropriate locations.

"§ 1002. Director; Associate Directors

"(a) There is at the head of the Office of Personnel Management a Director of the Office of Personnel Management appointed by the President, by and with the advice and consent of the Senate. No person shall, while serving as Director, serve in any other office or position in the Government of the United States except as otherwise provided by law or by the President.

"(b) There was be within the Office of Personnel Management not more than four Associate Directors, as determined from time to time by the Director. Each Associate Director shall be appointed by the Director. Such appointment may be made without regard to the provisions of this title governing appointments in the competitive service.

"§ 1003. Functions of the Director

"(a) The following functions are vested in the Director of the Office of Personnel Management, and shall be performed by the Director, or by such employees of the Office as the Director designates—

"(1) recommending to the President for transmittal to Congress or the Commission such legislation or other measures as will promote an efficient civil service and systematic application of merit system principles, including measures relating to the selection, promotion, transfer, performance, pay, conditions of service, tenure, and separation of employees;

"(2) appointing individuals to be employed by the Office;

"(3) directing and supervising employees of the Office distributing business among employees and organizational units of the Office, and directing the internal management of the Office;

"(4) directing the preparation of requests for appropriations and the use and expenditure of funds;

"(5) executing, administering, and enforcing—

"(A) the civil service rules and regulations of the President and the Commission the statutes governing the civil service; and

"(B) such other activities of the Office as usual in civil service administration;

"(6) investigating matters pertaining to the administration of functions of the Office or the Director; and

"(7) reviewing the operations under chapter 87 of this title.

"(b) The functions enumerated under subsection (a) of this section shall not include any function which is either reserved to the Commission or the Merit System Protection Board including, but not limited to—

"(1) the preparation of rules under section 1301 of this title;

"(2) the prescription of rules, regulations, or similar policy directives;

"(3) the hearing or providing for the hearing of appeals, including appeals with respect to examination ratings, veterans' preference, racial and religious discrimination, disciplinary action, performance ratings, and dismissals, and the taking of final action on these appeals.".

(b)(1) Section 5314 of title 5, United

States Code, is amended by inserting at the end thereof the following new paragraph:

"(67) Director of the Office of Personnel Management.".

(2) Section 5315 of such title is amended by inserting at the end thereof the following new paragraph:

"(122) Associate Directors of the Office of Personnel Management (4).".

(c)(1) Section 1104(a) of title 5, United States Code, is amended by striking out paragraph (5) and redesignating paragraph (6) as paragraph (5).

(2) Section 1302 of such title is amended—

(A) by striking out ", control, supervise, and preserve the records of," in subsection (a);

(B) by striking out "and enforce" in subsection (b); and

(C) by adding at the end thereof the following new subsection:

"(e) The Commission, subject to the rules prescribed by the President under this title, shall have authority to issue such regulations as necessary to prescribe general policy relating to the civil service laws. The Office of Personnel Management shall be guided by such policy in carrying out its functions under this title.".

(d)(1) The United States Civil Service Commission, as constituted under chapter 11 of title 5, United States Code, prior to the transfer of its functions under section 101 of Reorganization Plan Numbered 2 of 1978, is continued as an agency of the United States, except that of the first members appointed after the date of the enactment of this Act, one shall be appointed for a term of 2 years, one for a term of 4 years, and one for a term of 6 years, each such term expiring on March 1 of an odd-numbered year. Thereafter, members shall be appointed as provided under such chapter 11.

(2) If the transfer of any function under such section 101 of such reorganization plan is inconsistent with the provisions of this section, such transfer is superseded by this section.

—Page 145, line 13, strike out "Director." and insert in lieu thereof "Director, a majority of whom shall have served in the competitive service before appointment as Associate Directors.".

—Page 145, line 16, insert "(a)" before "The following".

Page 146, insert after line 16 the following:

"(b)(11) The Director shall notify each agency of any proposed rule or regulation which affects such agency or its employees at least 90 days before its effective date. Upon receipt of such rule or regulation, the agency shall, at least 60 days before such effective date—

"(A) post such proposed rule or regulation in such locations of such offices of the agency as the agency finds necessary to insure notice to the maximum number of employees affected; and

"(B) notify exclusive representatives of employees affected of such proposed rule or regulation.

"(2) Paragraph (1) of this subsection shall not apply to any proposed rule or regulation which is temporary in nature and which is necessary to be implemented expeditiously as a result of an emergency need.

—Page 145, line 18, insert ", subject to section 1104(a) of this title," after "or".

—Page 147, line 5, strike out "service." and insert in lieu thereof "service;"

—Page 147, after line 5, insert the following: "except that the Director may not delegate his ultimate responsibility for the execution, administration, and enforcement of the civil service rules and regulations of the President and the Office and the statutes governing the civil service.".

—Page 146, line 18, strike out "(a) Notwithstanding" and insert in lieu thereof "(a)(1)" Subject to subsection (b)(3) of this section and notwithstanding".

—Page 147, insert after line 14 the following: (3) Nothing in subsection (a) of this section shall be construed as affecting the responsibility of the Director to ensure compliance with the civil service laws and regulations.

—Page 147, line 1, strike out "including" and insert in lieu thereof "other than".

—Page 148, line 11, strike out "section 533." and insert in lieu thereof "section 553.".

Page 148, insert after line 11 the following:

"§ 1107. Personnel Policy Advisory Committee

"(a) There is established the Personnel Policy Advisory Committee (hereinafter in this section referred to as the Committee) which shall be composed of—

"(1) the Director of the Office of Personnel Management who shall serve as Chairman of the Committee;

"(2) the Secretary of Labor or his delegate;

"(3) 5 members appointed by the President from among individuals serving in Executive agencies and military departments in positions not less than the positions of Assistant Secretary or their equivalents;

"(4) 1 member appointed by the President from the Deputy and Associate Directors of the Office of Personnel Management; and

"(5) 7 members appointed by the President from officers of labor organizations representing employees in the Federal government. Appointments made under paragraph (5) shall reflect the relative numbers of Federal employees represented by such organizations, or affiliate thereof, except that no more than 4 members shall be from one such organization or its affiliates.

"(b) It shall be the function of the Committee to provide a forum for discussion by agency management and employee representatives of Federal personnel policy and regulations which affect more than one agency, and to make recommendations with respect to such policies and regulations.

"(c)(1) The Committee shall meet at the call of the Chairman but at least once quarterly. The Chairman shall notify each member of a proposed meeting at least 14 days before it is to be held.

"(2) The Chairman shall prepare an agenda of topics for consideration by the Committee in any meeting and shall include such agenda in the notice sent under paragraph (1).

"(3) Any member of the Committee may suggest matters for consideration by the Committee by notifying the Chairman at least 7 days prior to the meeting. The Chairman may include suggested topics in the agenda, but if he does not the matter shall be discussed if a majority of the members who are designated under—

"(A) paragraph (2), (3), and (4), or

"(B) paragraph (5)

of subsection (a) of this section as members of the Committee and who are present at the meeting vote to discuss such matter.

"(d)(1) Recommendations of the Committee may be considered by the Office of Personnel Management in the formulation of Federal personnel policies and regulations.

"(2) Copies of the transcripts of the meetings of the Committee shall be sent to the Merit Systems Protection Board and the Federal Labor Relations Authority.

"(e)(1) Except as provided in paragraph (2), members of the Committee shall receive as compensation the daily equivalent of the annual rate of basic pay in effect for grade GS–18 for each day (including traveltime) during which they are engaged in the actual performance of duties vested in the Committee.

"(2) Members of the Committee who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the Committee.

"(3) While away from their homes or regular places of business in the performance of service for the Committee, members of the Committee shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of this title.".

Page 144, in the matter following line 9, after the item relating to section 1106, insert the following:

"1107. Personnel Policy Advisory Committee.".

—Page 152, insert after line 17 the following:

"(d) The Board shall conduct, from time to time, special studies relating to the civil service and to other merit systems in the executive branch, and report to the President and to the Congress as to whether the public interest in a civil service free of prohibited personnel practices is being adequately protected.

Page 152, line 18, strike out "(d)" and insert in lieu thereof "(e)".

—Page 152, after line 20, insert the following:

"(e) The Merit Systems Protection Board shall submit its request for annual appropriations to the Office of Management and Budget and to the Congress."

—Page 170, after line 6, insert the following:

"(c) The Comptroller General of the United States shall review each performance appraisal system established under this section to determine if it meets the requirements of this subchapter and is consistent with the merit system principles established under chapter 23 of this title. The Comptroller General shall report the results of each such review to the Office of Personnel Management to assist the Office in carrying out its responsibilities under section 4304 of this title.

—Page 195, insert after line 9 the following:

(g) Section 3318(b) of title 5, United States Code, is amended by striking out ", on request, is entitled to a copy of" and inserting in lieu thereof "is entitled to receive, on or before the 15th day after the day on which he is passed over, a copy of".

Page 195, line 10, strike out "(g)" and insert in lieu thereof "(h)".

"(c) The Comptroller General of the United States shall review each performance appraisal system established under this section to determine if it meets the requirements of this subchapter and is consistent with the merit system principles established under chapter 23 of this title. The Comptroller General shall report the results of each such review to the Office of Personnel Management to assist the Office in carrying out its responsibilities under subsection (d) of this section.

—Page 237, line 23, strike out "(c)" and insert in lieu thereof "(d)".

Page 237, beginning on line 25, strike out "or regulations under this subchapter," and insert in lieu thereof ", regulations under this subchapter, or the merit system principles established under chapter 23 of this title,".

—Page 245, after line 15, insert the following:

"(d) The rate of basic pay for any career appointee may be reduced from any rate of basic pay to any lower rate of basic pay only—

"(1) for such cause as will promote the efficiency of the service; and

"(2) after 15 days' advance written notice to such appointee, containing a complete statement of all the reasons for such reduction.

Any career appointee whose rate of pay is reduced in violation of this subsection may appeal such reduction to the Merit Systems Protection Board.

EXTENSIONS OF REMARKS

GOLD MEDALLION ACT

HON. JOHN H. DENT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. DENT. Mr. Speaker, I have joined with several Members of Congress in cosponsoring H.R. 11874, the Gold Medallion Act of 1978.

This bill would provide for the production and sale by the Treasury Department of nonmonetary, 1-ounce and one-half ounce gold medallions.

This is a timely and judicious piece of legislation which would aid our balance-of-payments situation by discouraging the import of foreign gold bullion coins. It would return to the American people the right to own American gold, and it would permit the Government to reap in extra revenue from its gold sales.

Hearings have already been scheduled for this bill by the chairman of the Senate Banking Committee. A number of cosponsors of the Gold Medallion Act recently joined with me and sent a letter to Congressmen MITCHELL and FAUNTROY, chairmen of two subcommittees of the House Banking Committee, urging them to support the legislation and schedule action on it.

Mr. Speaker, I submit the letter be printed in the RECORD at this point:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 1, 1978.

Hon. PARREN J. MITCHELL,
Chairman, House Subcommittee on Domestic Monetary Policy, Cannon House Office Building, Washington, D.C.

Hon. WALTER E. FAUNTROY,
Chairman, House Subcommittee on Historic Preservation and Coinage, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Recently, we joined Congressman Symms and others in sponsoring H.R. 11874, a bill which stipulates that a portion of the gold auctioned off by the U.S. Treasury, be sold in the form of one-ounce and one-half ounce gold medallions.

We feel that this bill is economically practical and feasible. Presently, 90 percent of the gold sold by the Treasury goes abroad, primarily to foreign banks. This happens because U.S. gold is sold in 400-ounce bars. At approximately $70,000 apiece, these ingots are far beyond the means of the average American. If Americans want gold, and the large influx of foreign gold indicates that they do, they must buy it in smaller units from other countries.

Of the 1.6 million ounces of gold imported last year, 1.1 million ounces were in the form of South African Krugerrands; over $200 million flowed into South Africa last year from the sale of Krugerrands in the U.S. Many Americans are genuinely repelled by the idea of supporting South Africa's system of apartheid, and if they were given a choice, we are certain that they would prefer to buy American gold. Having the U.S. issue gold medallions would deny the South African government a major source of economic support, and at the same time greatly help our balance of trade.

Also, since the gold medallions would be sold at a premium, the U.S. government would stand to profit at least $10 million more from the sale of 1.5 million ounces of gold than it does when that same amount is sold in brick form.

Recently, the chairman of the Senate Banking Committee has pledged early hearings on this bill. We strongly urge that hearings be scheduled in the House Banking Committee as soon as a practical date can be arranged.

Sincerely,

JAMES M. COLLINS,
G. WILLIAM WHITEHURST,
BOB WILSON,
ROBERT K. DORNAN,
JOHN H. DENT.●

SUBCOMMITTEE CHAIRMAN TO LOOK INTO MUZZLING OF INFLATION CHIEF BOSWORTH

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, last week I was shocked by

Labor Secretary Ray Marshall's announcement that the Director of the Council on Wage and Price Stability, Barry Bosworth, would no longer be permitted to comment on pending wage contracts without the approval of a newly named committee to be headed by Secretary Marshall himself. Secretary Marshall made this announcement following a closed-door meeting with the executive council of the AFL–CIO in Chicago in an obvious attempt to placate AFL–CIO President George Meany and thereby hopefully quell labor's growing disaffection with President Carter.

While it is now apparent that the Bosworth muzzling ploy did not succeed in muzzling Meany, we are nevertheless still left with the most disturbing spectacle of a Council on Wage and Price Stability that cannot exercise its full and independent judgment and voice on the subject of wage stability. COWPS has effectively been reduced to COPS by this new wage inflation censorship board.

Having reread the authorizing statute creating COWPS as well as the debate which took place in this body just last year when we voted a 2-year extension of the Council, the administration's muzzling action raises serious questions in my mind about the ability of COWPS to fulfill its statutory mandate. I consequently wrote a letter to the chairman of the Economic Stabilization Subcommittee of the House Banking and Currency Committee, the gentleman from Pennsylvania (Mr. MOORHEAD), on August 9, requesting "immediate hearings" into the muzzling action "to determine whether the reported instructions under which COWPS Director Bosworth is now operating are both consistent with the statutory intent behind the creation of the Council as well as with its future effectiveness."

I am pleased to report that I have received a prompt response from chairman MOORHEAD promising, in his words, "that I will look into the matter you have noted." I want to compliment the chairman on this prompt and positive response. As I noted in my letter to the chairman, when COWPS was up for extension last year, we were assured by Secretary of the Treasury Blumenthal, OMB Director Lance, and CEA chairman Schultze, in a letter to chairman MOORHEAD dated April 29, 1977, that, and I quote:

> No other agency or agencies of government are in a position to perform the role of the Council. It is an independent agency. It is free from political and bureaucratic pressures that would face bureaus within other agencies, if they tried to perform similar tasks.

It is now apparent that that independence and freedom from political and bureaucratic pressures have been seriously undermined by the intervention of the Labor Secretary and his new censorship committee. I would hope chairman MOORHEAD's preliminary inquiry will lead to a full-scale, public hearing into the legality and propriety of the administration's attempt to inhibit the Council from fulfilling its statutory mandate in the area of wage stability.

At this point in the RECORD, Mr. Speaker, I insert the full text of my letter to chairman MOORHEAD as well as his response:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C. August 9, 1978.

Hon. WILLIAM S. MOORHEAD,
Chairman, Subcommittee on Economic Stabilization, Banking and Currency Committee, Rayburn House Office Building, Washington, D.C.

DEAR BILL: I am writing to request that your subcommittee convene immediate hearings on the report in yesterday's New York Times that the Administration has ordered Director Barry Bosworth of the Council on Wage and Price Stability not to comment on pending wage contracts, apparently to appease AFL–CIO President George Meany.

If this report is true then I think the integrity and independence of COWPS has been seriously breached and its future effectiveness and credibility seriously undermined.

Last year, when you were arguing in the House in favor of a two-year extension of COWPS you profoundly quoted from an April 29, 1977, letter from Sec. Blumenthal et. al. in which they referred to the council as "an independent agency . . . free from political and bureaucratic pressures." The report in yesterday's Times that Mr. Bosworth's future statements will have to be cleared by a new coordinating committee is in obvious contradiction to that earlier characterization of COWPS as independent. Secretary Marshall, according to the article, apparently now thinks that it is sufficient for COWPS to point out price increases and not worry about prospective wage increases which can be "deflationary." While the Secretary is certainly entitled to his opinion, COWPS too should be free to conduct its own studies and exercise its own independent judgment on such matters rather than being forced to clear its conclusions with a new political committee designed to squelch any reports that might be offensive to one special interest group or another and thus damaging to the President.

As I recall, the whole purpose of investing a Council on Wage and Price Stability with statutory authority and a certain amount of independence was to provide the President and the country with a reliable, early warning system to enable us to anticipate and combat inflation before it gets out of hand. To now turn this around and permit COWPS to become first and foremost another extension of the White House political operation, under the management of a Gerald Rafshoon, completely stands the President's whole anti-inflation program on its head. Apparently the thinking behind this goes: if we don't identify certain inflationary pressures early on, maybe nothing will happen.

In conclusion, Bill, I hope you and your subcommittee will make a serious effort to determine whether the reported instructions under which COWPS Director Bosworth is now operating are both consistent with the statutory intent behind the creation of the council as well as with its future effectiveness. I think the bipartisan support for continuing COWPS last year is ample testimony that this is not a partisan matter—that both Republicans and Democrats are committed to success of a fully and freely functioning Council. I hope you will receive my request for hearings in this same bipartisan vein.

With all best wishes, I am
Very truly yours,
JOHN B. ANDERSON,
Member of Congress.

U.S. HOUSE OF REPRESENTATIVES,
Washington, August 11, 1978.

Hon. JOHN B. ANDERSON,
Longworth House Office Building, Washington, D.C.

DEAR JOHN: Thank you for your letter of August 9, concerning the Council on Wage and Price Stability.

You can be assured that I will look into the matter you have noted.

With best regards,
Sincerely,
WILLIAM S. MOORHEAD,
Chairman.●

HUMAN RIGHTS VIOLATIONS IN NORTHERN IRELAND AS DOCUMENTED BY AMNESTY INTERNATIONAL

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BIAGGI. Mr. Speaker, over the past several weeks I and other members of the Ad Hoc Congressional Committee for Irish Affairs have been introducing the 78 cases from the Amnesty International Report on Northern Ireland into the CONGRESSIONAL RECORD.

This report is another in a continuing series of exposés on human rights deprivations which have and continue to occur in prisons in Northern Ireland. These are condemnable practices which thus far have not even merited a comment by the administration, which normally is most outspoken on questions related to human rights.

It is the intention of the ad hoc committee to insert all 78 cases into the RECORD. I now wish to insert case No. 62 from the Amnesty report, which is also the 23d case placed in the RECORD.

CASE NO. 62

Male, arrested 1977 and brought to Castlereagh Holding Centre, and detained for three days before being released without charge. Had a medical examination by a police doctor on arrival at Castlereagh and during his detention there. No information as to whether he had a medical examination by a police doctor on release, but on the day of release he was examined by his own doctor, Dr. Gl.

Maltreatment alleged: beating in face, stomach and head. Bending of wrists, bending of arm against his back, being thrown against a wall, choking to the extent that he became unconscious, hair-pulling.

Symptoms (immediate): pain in his throat and all over his body. (Later): anxiety and nervousness.

Medical report: by Dr. Gl. Examination on day of release.

Signs: haematoma involving the pinna of the left ear, traumatic perforation of the left eardrum with blood staining in the auditory canal. Several bruises: over the left sternomastoid muscle, left shoulder tip, right forehead, left eyelid surrounding area, right trapezoid muscle, right shoulder, on the back, right elbow, left elbow, tenth rib in the left side on the sternal end, ninth rib at sternal end, upper abdomen (size 10 x 5 cm.) and below left knee.

Conclusion: There is consistency between the alleged maltreatment and the signs. It would be of great value to compare the above with the police doctor's report.●

VOTING RECORD OF THOMAS FOLEY

HON. THOMAS S. FOLEY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

Mr. FOLEY. Mr. Speaker, I hereby submit a compilation of my voting record for the second half of the month of July of the 2d session of the 95th Congress.

The compilation follows:

531. HR 12157. Export-Import Bank. Long, D-Md., amendment to prohibit the Export-Import Bank from providing loans to produce any commodity unless the president certified that the commodity was not in surplus in the United States and its importation would not injure U.S. firms and employees producing the same or competing commodity. Rejected 197–199: July 27, 1978. No.

532. HR 12157. Export-Import Bank. Harkins, D-Iowa, amendment to prohibit the Export-Import Bank from participating in transactions with countries that the secretary of state has determined grossly violate internationally recognized human rights. Rejected 103–286: July 27, 1978. No.

533. HR 12157. Export-Import Bank. Brown, R-Mich., amendment to prohibit the Export-Import Bank from extending credit to purchasers of exports whom the secretary of state certifies do not endorse fair and equal employment principles. Rejected 90–288: July 27, 1978. No.

534. HR 12157. Export-Import Bank. Cavanaugh, D-Neb., amendment to require the Export-Import Bank to submit to Congress an evaluation, based on analyses by the Nuclear Regulatory Commission, of the nuclear safety standards in effect in nations with which the bank conducts a transaction for the sale of nuclear reactors. Rejected 106–266: July 27, 1978. No.

535. HR 12157. Export-Import Bank. Passage of the bill to extend the authority of the Export-Import Bank through September 1983 and increase its loan ceiling to $40 million from $25 million. Passed 314–47: July 27, 1978. Yes.

521. HR 10285. Commodity Exchange Act. Foley, D-Wash., motion that the House resolve itself into the Committee of the Whole for consideration of the bill to extend the Commodity Exchange Act and authorize appropriations as needed for the operations of the Commodity Futures Trading Commission through fiscal year 1981. Motion agreed to 362–2: July 26, 1978. Yes.

522. HR 10285. Commodity Exchange Act. Baldus, D-Wis. amendment to permit states to enact and enforce their own commodity futures trading laws that were identical to certain sections of the Commodity Exchange Act. Rejected 141–269: July 26, 1978. No.

523. HR 10285. Commodity Exchange Act. Smith. D-Iowa amendment to require reporting within 48 hours of export commodity sales and certain related information to the Commodity Futures Trading Commission, and to require the commission to publish this information. Adopted 273–125: July 26, 1878. No.

524. HR 10285. Commodity Exchange Act. Passage of the bill to extend the Commodity Exchange Act and to authorize appropriations as needed for the operations of the Commodity Futures Trading Commission through fiscal year 1981. Passed 401–6: July 26, 1978. Yes.

525. HR 3350. Ocean Mining. Breaux, D-La., substitute amendment, to the Udall, D-Ariz., amendment, to place responsibility for the Deep Seabed Mineral Resources program in the Department of Commerce. Adopted 214–184: July 26, 1978. Yes.

526. HR 3350. Ocean Mining. McCloskey, R-Calif., amendment to reword language in the bill to state more clearly that in granting mining permits the United States was not claiming jurisdiction over any areas beyond the 200 mile limit. Rejected 199–202: July 26, 1978. No.

527. HR 3350 Ocean Mining. Passage of the bill to provide for interim federal regulation and taxation of ocean mining of hard minerals by U.S. citizens until an international agreement was reached by the Law of the Sea Conference. Passed 312–80: July 26, 1978. Yes.

528. HR 7577. Economic Opportunity Amendments. Goodling, R-Pa., amendment to alter the proposed funding formula for community action agencies to require 60-percent federal contributions and 40 percent local contributions. Rejected 158–224: July 26, 1978. No.

514. HR 11823. Reservists' Retirement Eligibility. Nichols, D-Ala., motion to suspend the rules and pass the bill to liberalize eligibility for retired pay of members of reserve branches of the military. Motion agreed to 390–8: July 25, 1978. Yes.

515. HR 12349. DuNoir Basin Wilderness. Roncalio, D-Wyo., motion to suspend the rules and pass the bill to add a 34,500-acre area known as DuNoir Basin to the Washakie Wilderness in Wyoming. Motion agreed to 372–22: July 25, 1978. Yes.

516. HR 12973. Social Services Amendments. Corman, D-Calif., motion to suspend the rules and pass the bill to increase spending ceilings to $2.7 billion for fiscal 1979, $3.15 billion for 1980 and $3.45 billion for 1981 for child day care, home assistance for aged and disabled, employment training and other social services programs under Title XX of the Social Security Act. Motion agreed to 346–54: July 25, 1978. Yes.

517. HR 11889. Pension for Medal of Honor Recipients, Roberts, D-Texas, motion to suspend the rules and pass the bill to increase to $200 the adidtional monthly pension paid by the Veterans Administration to eligible persons who held the Congressional Medal of Honor. Motion agreed to 394–4: July 25, 1978. Yes.

518. HR 11890. Benefits for Survivors of Disabled Veterans. Roberts, D-Texas, motion to suspend the rules and pass the bill to liberalize eligibility for the benefits paid to survivors of permanently disabled veteratns. Motion agreed to 393–9: July 25, 1978. Yes.

519. HR 12426. New York City Aid. Adoption of the conference report on the bill to provide up to $1.65 billion in long-term federal loan guarantees to New York City. Adopted 244–157: July 25, 1978. Yes.

520. HR 11877. Peace Corps. Adoption of the conference report on the bill to authorize $112,424,000 for fiscal 1979 plus supplemental funds of $3.7 million for fiscal 1978 programs of the Peace Corps, and to amend Corps Act to emphasis assistance to the poorest countries, the need to integrate women into the economics of third world nations and to make various administrative changes. Adopted 276–120. July 25, 1978. Yes.

507. HR 12433. Housing and Community Development. Ashley, D-Ohio, motion that the House resolve itself into the Committee of the Whole for consideration of the bill to revise and extend certain federal housing and community development laws. Motion agreed to 268-6: July 21, 1978. Yes.

508. HR 12433. Housing and Community Development. Abdnor, R-S.D., amendment to prohibit the Department of Housing and Urban Development from carrying out a reorganization of its field offices. Rejected 133-160: July 21, 1978. Yes.

509. HR 12433. Housing and Community Development. Brown, R-Mich., amendment to delete a provision in the bill to limit property insurance rates under state-operated FAIR plans. Rejected 119-185: July 21, 1978. No.

510. HR 12433. Housing and Community Development. Duncan, R-Tenn., amendment to prohibit Social Security cost-of-living increases from being counted as income when calculating rents in assisted housing. Adopted 256-38: July 21, 1978. Yes.

511. HR 12433. Housing and Community Development. Passage of the bill to revise, extend and authorize $29.3 billion for various housing and community development programs. Passed 270-26: July 21, 1978. Yes.

512. HR 13468. District of Columbia Appropriations, Fiscal 1979. Passage of the bill to appropriate $1,612,185,100 for fiscal 1979. Passed 215-32: July 21, 1978. Yes.

513. H J Res 946. National Guard Day. Lehman, D-Fla., motion to suspend the rules and pass the joint resolution to designate Oct. 7, 1978, as National Guard Day to commemorate the contributions to the national defense of the national guard since 1636. Passed 264–10. July 24, 1978. Yes.

500. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Mahon, D-Texas, motion that the House resolve itself into the Committee of the Whole to consider the bill. Motion agreed to 357-3: July 20, 1978. Yes.

501. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Moss, D-Calif., amendment to delete $15 million in the bill for a Center for Disease Control influenza immunization program and add $3 million for influenza vaccine research programs of the National Institute for Allergy and Infectious Diseases. Adopted 268-127. July 20, 1978. Yes.

502. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Gore, D-Tenn., amendment to add $26 million to the $5 million in the bill "pinpoint" assistance to schools in federally declared disaster areas. Rejected 166–233; July 20, 1978. No.

503. HR 13467. Second Supplemental Appropriations, Fiscal 1978. McHugh, D-N.Y., amendment to add $9.9 million to the $5 million in the bill for "pinpoint" assistance to schools in federally declared disaster areas. Rejected 156–237; July 20, 1978. No.

504. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Crane, R-Ill., amendment to delete the $275,000 appropriation for the U.S. Metric Board. Rejected 75–302; July 20, 1978. No.

505. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Miller, R-Ohio, amendment to reduce all spending in the bill, except for payments required by law, by 2 percent, provided that no one program be cut by more than 5 percent. Adopted 256–114: July 20, 1978. Yes.

506. HR 13467. Second Supplemental Appropriations, Fiscal 1978. Passage of the bill to appropriate $6.3 billion in supplemental funds for fiscal 1978 operations of the government, including $3.2 billion for federal employee pay raises. Passed 311–60: July 20, 1978. Yes.

536. HR 9400. Civil Rights of Institutionalized Persons. Kastenmeier, D-Wis., motion to resolve into the Committee of the Whole to consider the bill to allow the attorney general to sue or intervene in suits to protect the constitutional rights of persons living in state-run nursing homes, prisons, juvenile facilities and institutions for the chronically ill. Motion agreed to 304–4: July 28, 1978. Yes.

537. HR 9400. Civil Rights of Institutionalized Persons. Passage of the bill to allow the attorney general to sue or intervene in suits to protect the constitutional rights of persons living in state-run nursing homes, prisons, juvenile facilities and institutions for the chronically ill. Passed 254–69: July 28, 1978. No.

538. HR 12432. Civil Rights Commission. Edwards, D-Calif., motion to resolve into the Committee of the Whole to consider the bill to extend the Commission on Civil Rights for

five years and to authorize funds for the commission. Motion agreed to 303-5: July 28, 1978. Yes.

539. HR 12432. Civil Rights Commission. Butler, R-Va., amendments, en bloc, to delete provisions to give the commission authority to study discrimination based on age or handicap, including $2 million allocated for such studies. Rejected 87-224: July 28, 1978. No.

540. HR 12432. Civil Rights Commission. Butler, R-Va., amendment to prohibit the commission from engaging in lobbying on legislation before Congress or state legislatures. Adopted 159-125: July 28, 1978. Yes.

541. HR 9998. Ocean Shipping Predatory Pricing. Murphy, D-N.Y., motion to suspend the rules and pass the bill to authorize the Federal Maritime Commission to prevent ocean shipping fleets controlled by certain foreign governments from setting predatory prices for transporting goods between the United States and other nations, subject to presidential disapproval for national defense. Motion agreed to 329-6: July 31, 1978. Yes.

542. HR 12514. Foreign Military Aid. Adoption of the rule providing for House floor consideration of the bill to authorize $999.3 million for foreign military assistance programs for fiscal 1979. Adopted 323-21: July 31, 1978. Yes.

543. HR 12931. Foreign Air Appropriations, Fiscal 1979. Adoption of the rule providing for House floor consideration of the bill to appropriate $7.4 billion for foreign aid programs for fiscal 1979. Adopted 265-84: July 31, 1978. Yes.

544. HR 12514. Foreign Military Aid. Zablocki, D-Wis., motion to resolve into the Committee of the Whole to consider the bill to authorize fiscal 1979 funds. Motion agreed to 317-11: July 31, 1978. Yes.●

IRVIN WESTHEIMER, FOUNDER OF ORGANIZATION OF BIG BROTHERS

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. LUKEN. Mr. Speaker, I would like to bring to the attention of my colleagues the achievements of Mr. Irvin Westheimer, founder of the Big Brothers Organization.

Mr. Westheimer began his long career as founder of Big Brothers in Cincinnati back in 1903. The organization was officially recognized as an agency in 1910. Since then it has blossomed into a national and international program, with organizations in Israel, Jamaica, and Canada. Big Brothers provides over 120,000 motherless and fatherless children with a volunteer companion on a one-to-one basis. Also receiving the benefits of this program are children referred by the juvenile courts, welfare department, and those with disabilities. Perhaps the most remarkable part of the whole program is that it is based strictly on a volunteer system.

Mr. Westheimer, who was 22 years of age when he started Big Brothers, will celebrate his 99th birthday on September 16. To this day he is still very active in the organization, requiring a full-time secretary to help him in his extensive correspondence with people all over the world. He is also a member of the Advisory Board for the Big Brothers Organization.

At this time I would like to ask you for your support in obtaining a commemorative stamp in honor of Mr. Westheimer's lifelong work in providing needed companionship for our less fortunate children. I strongly feel that it is a worthwise cause and an excellent way to thank Mr. Westheimer for all he has accomplished.●

CATTERSON PUSHES KEMP-ROTH TAX REDUCTION ACT

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. LENT. Mr. Speaker, on July 14, the U.S. Senate held hearings on the Kemp-Roth Tax Reduction Act. A most persuasive witness was James Catterson, Jr., of Suffolk County, N.Y., whose testimony eloquently points up the need on Long Island for a general across-the-board tax cut such as Kemp-Roth would provide.

For the benefit of my colleagues to whose attention Mr. Catterson's remarks might otherwise not come, I submit them herewith for the RECORD:

PORT JEFFERSON, N.Y.,
July 14, 1978.

Senator HARRY F. BYRD, Jr.,
Chairman, Subcommittee on Taxation and Debt Management of the Senate Finance Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR BYRD: Thank you for this opportunity today to submit a statement for the record on these hearings conducted by the Subcommittee to consider the Kemp-Roth tax reduction proposals.

S. 1860 and H.R. 8333, applicable to taxpayers generally, provide for permanent tax rate reductions for individuals of approximately 30 percent over the next three years, for a permanent reduction in corporate income tax rates from 48 to 45 percent over the next three years, and for a permanent increase in the corporate surtax exemption from $50,000 to $100,000.

Nowhere in America is the need for the economic transfusion afforded by Kemp-Roth more dramatically underscored than on Long Island. Consisting of the suburban counties of Nassau and Suffolk, Long Island represents a major economic sector in New York State. Created by colonial patents some of which date from 1659, the twin counties awakened to a post World War II baby boom and suburban migration explosion that saw their populations increase some 900 percent in twenty-five years.

But the insular nature of Long Island's geography also created strategic pressure points. Transportation developed around a single commuter railroad and three east-west arterials all of which terminated in the colossal sprawl of New York City. The transformation of thousands of acres of truck farm land into bedroom communities gave rise to an overnight need for community municipal services on a scale which gives planners king-sized migraines.

Real property tax rates soared and local manufacturers began an exodus to the sun belt. As the population explosion cooled and the construction boom tapered off, the long range effects of an insufficient industrial tax base, an over-taxed transportation system and an under-developed job oriented economy took its toll. The economy of Long Island became stagnant.

In a series entitled, "Long Island at the Crossroads", the prize winning daily paper Newsday explored in depth the major problems and potential solutions facing this prime cross-section of American society. Newsday pointed out that:

a. Between 1966 and 1975 the average property tax for Long Island increased 137 percent;

b. That if the present rate of increase continues, by the year 2000 Long Islanders will be spending twenty-one percent of their income for local taxes;

c. Auto insurance on Long Island is two times that of cities like Atlanta and property taxes at least two-thirds higher than the Georgia metropolis;

d. Thirty-three percent of the average Long Island family's income goes for taxes in one form or another;

e. Seventy-five percent of Long Island's high school seniors do not plan to settle on Long Island due to a lack of job opportunities and the high cost of living;

f. The out migration of manufacturing firms has cost Long Island more than twelve thousand jobs since the mid-sixties and

g. Since 1969 twenty thousand defense jobs have also been lost;

h. Last year, Nassau and Suffolk were unable to provide jobs for 290,000 persons, an increase from 271,000 in 1970.

Long Island needs an economic shot in the arm which the Kemp-Roth tax incentive bill is uniquely structured to provide. Thomas Conoscenti, native Long Islander, former director of economic research for the Long Island Association of Commerce and Industry and now a faculty member at Polytechnic Institute of New York has estimated that Kemp-Roth would generate an increase of 7.1 percent in personal income for the average Long Island wage earner by 1982. (See letter and table, attached.)

Kemp-Roth would also create 17,000 new jobs in Nassau-Suffolk with a resultant decrease in the unemployment rate from one and half to two percent.

In raw dollars, Mr. Conoscenti calculated Kemp-Roth passage would pump 220.8 million dollars into Long Island's economy by 1982. The ripple effect of this infusion is pegged at about 552 million. The highly regarded economist further estimated that the Gross Long Island Product (G.L.I.P.) would be increased at the end of 1979 by 1.2 percent; by 1980 1.5 percent and increased again by 1.9 percent for 1981 and 1982 respectively. Assuming that the current rate of inflation and wage-prices would remake relatively stable the average Long Island per capita income could be expected to increase from $12,000 in 1979 to $14,100 by 1982.

Such an increase in 1979 dollars would be directly attributable to the Kemp-Roth stimulus and would work to offset the loss in tax revenues occasioned by the slow down in production and industrial growth during the last decade. Mr. Chairman, the obvious benefits of the Kemp-Roth income tax reduction package on the Long Island economy makes it the number one priority for New York's congressional contingent. History has proved that permanent tax reductions are a sure way to get the economy moving and to settle the inflation v. unemployment dilemma. It is axiomatic that people react to rewards for their efforts.

Unfortunately in America today when a worker earns wages, or a manufacturer increases production, or a salesman makes a sale, a greater share of these transactions are being eaten up by government.

When taxes go up, when cumbersome regulations are issued, and when subsidies are offered to individuals on the condition that they refrain from work, the government increases the "wedge" that makes work less attractive than leisure.

When you tax something there is going to be less of that thing in the future. When

you subsidize something there is going to be more of it.

In this country, in this state and on Long Island, we are taxing work, investment, savings, growth and commerce in an unprecedented degree and we are subsidizing debt, welfare, nonwork and mediocrity.

America must construct a coalition for income growth that transcends the partisan and ideological divisions of the past. More and more, America needs and wants a return on its investment, a piece of the pie, a restoration of pride and incentive. The Kemp-Roth tax proposals which move towards tax reduction and income growth will do more than save Long Island. It will point the way towards an exciting, productive new era for the people of New York and for all Americans. Mr. Chairman, the people of Long Island heartily endorse and strongly support Kemp-Roth.

Respectfully submitted,

JAMES M. CATTERSON, Jr., Esq.

August 2, 1978.

ECONOMIC PROJECTS,
OF LONG ISLAND, INC.,
Nesconset, N.Y., August 2, 1978.

JAMES M. CATTERSON, Jr., Esq.,
314 Main Street,
Port Jefferson, N.Y.

DEAR MR. CATTERSON: As per your request, we have estimated the impact of the Kemp-Roth Bill on the Long Island economy.

Based on our calculations, we estimate that between 1979 and 1983 the Kemp-Roth Bill will stimulate the Long Island economy by increasing the Long Island Gross Regional Product by 1.7 per cent. This additional increase in the region's growth rate should create an additional 17,000 jobs in the region which will generate an additional 220.8 million dollars in wages and salaries. Based on the region's estimated multiplier, Income plus 1.5 (Income) we calculate that this will pump into the Long Island economy an additional $552.0 (M) (See Attached)

Should you require any additional information concerning the impact of the Kemp-Roth Bill on the Long Island economy, please feel free to contact me.

Very truly yours,

THOMAS CONOSCENTI,
President.

KEMP/ROTH IMPACT ON THE LONG ISLAND ECONOMY

	Without stimulus growth rate		With stimulus growth rate		Net stimulus impact on Long Island economy	Employment stimulus	Income generation (millions)
	GNP	GLIP[1]	GNP	GLIP[1]

THE TRIAL OF ALEKSANDR PODRABINEK

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. SIMON. Mr. Speaker, on Tuesday, Aleksandr Podrabinek, a young human rights activist charged with violations of article 190–1 of the RSFSR Criminal Code for the alleged circulation of material defaming the Soviet State, will be placed on trial in Elektrostal, a small town 35 miles east of Moscow.

This material, in reality, is an extensive documentation of cases in the U.S.S.R. involving the use of forcible psychiatric treatment as a means of political punishment. Podrabinek, who as the head of the Working Committee on the Use of Psychiatry for Political Purposes, has been collecting documents on such psychiatric cases for many years and has already been the object of KGB scrutiny and threats. His book, "Punitive Medicine," estimates that at least 1,000 Soviet citizens have been confined in special psychiatric hospitals for their political or religious beliefs.

One of these, Sergei Prutov, an engineer, was arrested in 1971 under article 70 of the Criminal Code for anti-Soviet agitation and propaganda, which involved, in his case, organizing a group to return to the principles of pure humanism. He was committed for compulsary medical treatment to a special psychiatric hospital. Having since been sent to two other hospitals. Prutov is now in the special pyschiatric hospital in Talzar a city in the Alma Alta Oblast in Kazakhstan.

The trial of Podrabinek is an unfortunate indication of Soviet disregard for their commitment under the Helsinki accords. Continued actions of repression by the Soviets will only serve to undermine the foundations of détente.●

FREEDOM OF INFORMATION ABUSES

HON. SAMUEL L. DEVINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. DEVINE. Mr. Speaker, several weeks ago, I introduced H.R. 13040, to amend the Freedom of Information Act. This legislation was also cosponsored by 13 colleagues in the forms of H.R. 13272 and H.R. 13452.

A Washington newspaper last week contained an Associated Press story by Jay Perkins about the misuse of information obtained through the act, and I am attaching the story for the information of those Members who may wish to become cosponsors.

MOBSTER TELLS OF MISUSING FREEDOM OF INFORMATION ACT REQUESTS

(By Jay Perkins)

A convicted loan shark testified yesterday that he used the Freedom of Information Act to tie up law enforcement officers and to find out what the government knew about him and where they were getting the information.

Gary Bowdach told the Senate permanent subcommittee on investigations that although he never was able to identify the informants who were supplying information in his case, he was able to identify the informant on one of his friends.

Asked what happened to that informant, he said he did not know. But he added that judging from the comment of his friends, "I don't expect him to be living anymore."

Bowdach estimated that 50 percent of the legal motions such as habeas corpus he filed for himself were frivolous. He said about 75 percent of the motions he filed for other inmates had no merit.

"Some were totally frivolous and were just to aggravate" the prosecutor who sent Bowdach to jail, he testified. I would send him [the prosecutor] his copy directly.

"We basically tried to bog down the system, to tie up law enforcement officers and prosecutors. They would have to drop the cases they were working on. It just created total turmoil for them," he said.

Bowdach also said he used the Freedom of Information Act, which is designed to open non-confidential government records to the inspection of private citizens, "to determine whether that agency had any pending investigation" that might involve him.

In the case of one request where he said an informant was identified, Bowdach said the name of the person had not been completely deleted. He said the inmates were able to identify one letter in that name. They measured the size of the deletion and "backspaced to see how many other letters were left in the name."

Bowdach also noted that even documents that completely deleted the name of an informant often could prove valuable to inmates seeking to identify the person.

"If I knew I met with you in a restaurant in Miami and I got a report that said a confidential informant who met with Bowdach at a restaurant on a certain date said something, I wouldn't need to know your name," he said.

Sen. Sam Nunn (D-Ga.), chairman of the investigations subcommittee, had said earlier that he believed criminals were using the Freedom of Information Act for such purposes.

Bowdach, who served four years in prison, was testifying for the fifth day before the panel. In earlier appearances he detailed his life in organized crime and in the Atlanta federal penitentiary. An official of the FBI said in a telephone interview Wednesday that "quite a few" requests for information on what the FBI files have on an individual come from prison inmates.

"The general procedure now is for a fellow to check into prison, get his grays [uniform], tin cup and privacy act requests forms," joked Al McCreight, the deputy assistant director

in charge of the FBI's freedom of information branch.●

HUDSON VALLEY COMMUNITY COLLEGE HOSTS LABOR-MANAGEMENT SEMINAR

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. PATTISON of New York. Mr. Speaker, I would like to share with my colleagues an interesting experience I had in my district on June 16. I sponsored a labor-management seminar on economic development. Over 90 leaders from labor and management from throughout the New York State capital district attended. The seminar was held at Hudson Valley Community College in Troy, and the speakers included Mr. James Fitzgibbons, president of the Hudson Valley Community College; Mr. Alan Cobb of the National Center for Productivity and Quality of Working Life; Mr. Howard Bennett, secretary-treasurer of Teamsters Local 294; Mr. William LaRose, president of W. T. LaRose Associates in Cohoes; Mr. Michael Noonan, Commissioner of the Albany office of the Federal Mediation and Conciliation Service; and Mr. John Flanagan of the New York State Department of Commerce. Mr. Cobb of the National Center discussed U.S. productivity trends and sources of Federal assistance for community labor-management efforts while the other speakers offered labor and management views from the local perspective.

Other speakers presented two cases of effective labor-management cooperation. First, Prof. Tove Hammer of the New York State School of Industrial and Labor Relations at Cornell, Executive Director John Ladd of the Mohawk Valley Economic Development District, and Mr. Thomas Hove of the Library Bureau in Herkimer, N.Y., described their recent successful efforts to retain a local industry when the parent company decided to sell it. Second, Consultant Patrick McGinity of the Jamestown Area Labor-Management Committee, Mr. Robert Sparks of the management of Corry Jamestown, and Mr. George Kinney of Corry Jamestown's union (IAM) discussed Jamestown's area labor-management cooperative efforts as well as how those effects have helped Corry Jamestown.

For 4 hours we listened to these speakers relate their past experiences as well as offer their assistance to the people of New York's capital district. There was considerable give and take, and I was extremely pleased by the numbers of good questions and the high level of the entire discussion. Despite the presence of two potentially adverse groups, the discussions were fruitful and will definitely provide a starting point for future activities on the part of the people in the capital district who are concerned with the decline of job opportunities in New York. Once you get them away from the bargaining table, you find that labor union leaders and business executives are probably the individuals who are most concerned about the welfare of their communities.

My concern in sponsoring this seminar was in the direction of doing something which would encourage existing industry to stay in New York, encourage it to expand, and encourage new industry to locate in New York.

We in the Northeast United States are becoming increasingly aware that having a reputation for good labor-management relations is a tremendously important asset for a community hoping to attract and retain industry. Conversely, a city known for labor-management discord faces a significant obstacle to economic progress.

I pointed out at the seminar that there will always be issues of contention between labor and management. But I do think that the time has arrived when management and labor must acknowledge that mutual survival—with sales for management and long-term security for labor—requires a serious effort at cooperation for the success of the total enterprise.

Both parties will need to understand that job security and productivity go together and that the emphasis must be on "working smarter" rather than on "working harder."

Since the mid-1960's the United States has experienced a leveling off in per capita productivity. However, wages have continued to increase, and the result has been an increase in the inflation rate. Inflation will always result when wage increases are not matched by increases in productivity. We must, therefore, concentrate our efforts on increasing productivity, so that we can continue to improve our standard of living.

There are no panaceas for New York or any other area of the country. There is no decision that can be made in Washington or anywhere else that will settle our problems. Progress will only be made when we commit ourselves to a joint effort to solve our mutual problems and meet our mutual goals. Such an effort will have to be based on respect and on trust. It will have to be built slowly over time, and it will have to be based on the recognition that when we are in the same boat, we either float together or we sink together.

I, therefore, commend to my colleagues the use of such seminars. As individual Members of the House of Representatives, we are often limited in what we can do to improve the economic welfare of the people we represent. But by using our positions as elected officials to bring our community leaders together in the spirit of cooperation, we open up endless possibilities.●

THE CASE AGAINST THE PROPOSED 27TH AMENDMENT

HON. DAN QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. QUAYLE. Mr. Speaker, as the House prepares to consider House Joint Resolution 638, to extend the deadline for ratification of the equal rights amendment, I wish to bring to the attention of my House colleagues a thought-provoking article by Evelyn Pitschke, of Indianapolis, who is an attorney and serves as chairman of the National Lawyers Committee to Oppose the ERA. The article appeared in the August issue of Res Gestae, official publication of the Indiana State Bar Association. The article follows:

THE CASE AGAINST THE PROPOSED 27TH AMENDMENT

(By Evelyn Pitschke)

The proposed 27th Amendment to the United States Constitution is commonly, and misleadingly referred to as the "Equal Rights Amendment" (ERA). Many thoughtful jurists fear ERA because its Section 1 threatens a social revolution, the scope of which is not adequately appreciated, and because its Section 2 would alter dramatically the relationship between the states and the federal government to the detriment of the former. These two points will be treated in reverse order—first the discussion of Section 2.

Most readers will recall having read at least one article and having heard debates on television in which the statement has been made:

"The Equal Rights Amendment is merely 24 words which state: 'Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex.'"

The speaker, or the article, generally follows up with the statement that, "These 24 words are necessary to bring about simple justice—that is, that women be put in the Constitution."

Promoters of the ERA shut their eyes to the fact that there are three sections to the Amendment and not just the simple 24 words contained in Section 1 of the Amendment. Last year, 35 national magazines (usually referred to as "women's magazines") carried articles urging adoption of the ERA. Only 2 out of 35 magazines even acknowledged that there is a Section 2 of the Amendment, and none of the articles mentioned the potential harmful legal effects of the Amendment. Is this because Section 2 has no additional effect? Quite the contrary! Section 2 provides the following:

"Section 2. The Congress shall have the power to enforce by appropriate legislation the provisions of this article."

For a better understanding of the great impact of Section 2, lawyers should know that until 1970 Section 2 read as follows:

"Section 2. Congress and the several states shall have power, within their respective jurisdiction, to enforce this article by appropriate legislation."

If a court in the future should consider this legislative history, it might very well conclude that the change reflected a legislative preference that all power to enforce the Amendment was vested in the federal government to the exclusion of the several states!

During the 1970 Senate Judiciary Hearings, it was pointed out that under the original language of Section 2 that even though Congress might pass women's rights legislation, the states could also do so.

Those who changed Section 2 intended to increase federal power. The Supreme Court of the United States shortly before that time had interpreted the effect and meaning of the present language of Section 2 when it was considering essentially the same wording in Section 5 of the 14th Amendment. The Court's decision was made in the 1966 case of *Katzenbach* v. *Morgan* (1966), 384 U.S. 641, 16 L.Ed. 2d 828, 86 S. Ct. 1717, where the Court said:

"that the grant to Congress to enforce by appropriate legislation is 'a positive grant of legislative power authorizing Congress to exercise its discretion in determning whether and what legislation is needed to secure the guaranties of the amendment.' "

The Court further said that the power thus granted to Congress is limited to adopting measures to enforce the guaranties of the amendment; Congress has no power to restrict, abrogate or dilute these guaranties.

This last will bring about a rude awakening to those proponents who blithely are promising the general public that Congress and the Courts will make exceptions in laws which will take into consideration the unique physical characteristics of the sexes.

There are seven constitutional amendments which have language similar to Section 2. The effect of this language in all seven of the amendments was that the federal government has complete power of enforcement in each instances. One of the amendments is the 13th Amendment prohibiting slavery. Five of the amendments have to do with voting rights, and the seventh is the 14th Amendment, which has been the authority for all federal civil rights legislation passed by Congress, interpreted by the federal courts and enforced by the federal government.

It is interesting to note that the 16th Amendment (which gave Congress the power to levy income tax) does not have a Section 2, and thereby the individual states retained their power to tax incomes. The 18th Amendment (commonly known as the "Prohibition Amendment") had no Section 2 because it was desired that the states should assist in enforcing the amendments. The dramatic difference between those constitutional amendments which have a "Section 2" and those which do not proves that the state legislatures will be voting away their own powers if they ratify the ERA. The American way of government will be radically changed to a more centralized form of government without the general public even realizing what has happened until it is too late.

Granting, then, that Section 2 of the ERA places exclusive power to legislate equality in Congress, is such a grant alarming or a matter of no real importance? Flourishing the proud banner of ERA, Congress would have the power to pass all laws pertaining to either sex or the relationship between the sexes. Arguably, this exclusive authority would include divorce laws, laws pertaining to the custody of children, criminal sex laws and perhaps even inheritance laws! This, in turn, would lead to more federal bureaus and agencies, and, of course, to more federal taxes. To those who believe that it is unlikely that Congress will *use* this authority, one only need listen to the arguments of the proponents before state legislative committtees and in the media. They base their claim that the ERA is necessary on the fact that women's rights laws passed by the individual states would not be uniform throughout the nation, and, therefore, federal laws and federal enforcement are necessary.

A common statement made by proponents of the ERA is that, "The measure and degree of one's equality should not depend on where that person lives, but it must be uniform throughout the nation." (Quoted from the law journal of another state.) Under the Amendment, Congress could move to standardize the laws in all of these areas so as to provide uniformity throughout the nation. Thus, Section 2 is a surrender to Congress and the federal courts of powers which the states now have and which are reserved to the states by the 10th Amendment to the Constitution.

Many lawyers are particularly concerned about the power granted by the ERA because the key phrase "equality of rights" is a nonspecific term—perhaps even more uncertain and more needful of interpretation than the term "equal protection of the law," which is contained in the 14th Amendment. They point out that the 14th Amendment was passed in 1868 and yet is still being given new meaning, broader application and extension by contemporary courts into areas which could not have been conceived of even in their wildest imaginings by its authors. Further, the vagueness of the phrase would tempt future Congresses to usurp more and more power by interpreting the Amendment any way they choose.* An awareness of these dangers led Senator Sam Ervin to state in The CONGRESSIONAL RECORD of March 22, 1972:

"The Federal system which contemplates an indestructible union composed of indestructible states as it is now established by all of the provisions of the Constitution will be substantially destroyed (because of Section 2 of the ERA), and all legislative power relating to the Mansfield relations of men and women would be concentrated in the Congress of the United States. The states would become, to all intents and purposes, meaningless zeros upon the nation's map.* * *"

As to the legal effect of Section 1 of the ERA, if legislative history is a guide, the application of ERA will be strict, absolute and total because Congress rejected numerous amendments** which would have preserved obvious exceptions from the broad language of ERA—these amendments were defeated precisely because it is not equal protection that the proponents of ERA desire—it is a social and moral revolution.

One of the hottest issues at this time between supporters of the ERA and opponents concerns whether the ERA will legalize homosexual marriages. It is entirely possible that the ERA will legalize homosexual marriages because the Amendment makes sex an impermissible legal classification. This means that any law based upon any sexual classification will be closely scrutinized to determine whether or not the rights of any persons are abridged or denied upon the basis of sex. In the case of marriage, a law forbidding homosexual marriage would discriminate against those who have a sexual preference for members of their own sex and deny them a right possessed by those who have a sexual preference for a member of the opposite sex. If it is true that ERA is designed to prohibit sex discrimination to the same extent that the 14th Amendment prohibited racial discrimination, then the reader is asked to reflect on this proposition: The Supreme Court, in considering anti-miscegenation statutes (prohibiting interracial marriages) under the 14th Amendment in the case of *Loving* v. *Virginia* (1967), 388 U.S. 1, 18 L.Ed.2d 1010, 87 S. Ct. (1817), held that a marriage license cannot be denied merely because the applicants are of different races. If the same reasoning is followed with respect to homosexual marriages, I would put my money on the side which contends that homosexual marriages will be legalized under the ERA.

Because the media, for the most part, has presented only the claims of the supporters of the ERA, the American people have been sold a "snow job." Most proponents argue that the seminal issue under the ERA is women's rights. Those who oppose the Amendment respond that an additional constitutional amendment is not necessary in order to give women equality with men. They point to the 5th Amendment to the Constitution, which guarantees due process of law to *all* persons where the federal government is concerned, and the 14th Amendment, which provides for due process of law and equal protection of the law to *all* citizens so far as state governments are concerned. They also cite Title VII of the Civil Rights Act of 1964, the Equal Pay Act of 1963 and the Equal Credit Opportunity Act of 1974 which eliminates discrimination against women who seek credit. The argument that women have been left out of the Constitution and that "simple justice" requires that they be put in is effectively treated when one appreciates that the words "man" or "woman" never appear in the Constitution at all! The words "person" or "citizen" are always used to designate individuals. If women had not been recognized as persons under the Constitution from the beginning, a woman (if she were not a person) could not be guilty of treason; she could not be protected from unreasonable search and seizure; and she would not be entitled to due process of law. Yet, no one ever questioned that woman had these rights. See, for example, *Minor* v. *Happersett,* 88 U.S. (21 Wall.) 162, 178 (1974).

It is interesting to note that what started out to be a struggle for supposed equality for women has now turned into a struggle for equality for all because as knowledge of the effects of the first section of the Amendment grows, it has been learned that certain protections and rights which were given to women under the law in recognition of their roles as homemakers and mothers in fact may soon be taken away from them so that in many areas, men rather than women, will be the beneficiaries of the Amendment!

Hopefully, the writer has made at least two main points. First: Section 1 of the ERA may accomplish a social revolution by making sex an impermissible classification in scores of cases when it has always been a perfectly acceptable classification before. Second: Section 2 of the ERA will endow the federal government with the exclusive authority to promulgate and enforce these laws. Those of us who are active in the battle to stop the ERA believe that our role in saving the liberty of our country is every bit as important as the role of the Minutemen during the revolutionary period. Every man and woman who values the liberty of the individual, the security of our country and the American dual form of government, which was designed to prevent tyranny, should become involved in stopping the ERA. It is not just a job for the women. It is the author's opinion that the socalled ERA has within it the power to destroy our republic. Those who oppose the ERA because of Section 2 should stand with Woodrow Wilson when he said:

---

* An example of future Congresses not following through with the intentions of the persons who proposed the Amendment is seen with relation to the 16th Amendment (Income Tax). The opponents wanted a ceiling on the amount which could be taxed on the individual citizen. The proponents assured them that it would never go over 5 percent. That was only 62 years ago. Yet, today the average citizen's tax is well over 20 percent of the fruits of his labor, and a very large segment of the population is paying much more than 20 percent. The intent of the Congress *which passed the Amendment* was that the income tax would be minimal and would not affect the average citizen unduly.

**Exempting women from compulsory military service; exempting women from service in combat units of the Armed Forces; permitting states to continue protective labor legislation for women; permitting states to continue legislation which would protect wives, mothers and widows and which would extend certain benefits to them; permitting states to continue legislation which would impose upon fathers the primary responsibility for child support; securing privacy to men or women, boys or girls—such as in prisons, public and school restrooms, dormitories, etc.; permitting states to continue legislation pertaining to criminal sex offenses; and permitting states to continue legislation which would take into consideration the physiological or functional differences between men and women. These amendments were all rejected by the sponsors of ERA.

"When we resist the concentration of governmental power, we resist the processes of death, because concentration of power always precedes the destruction of human liberty." ●

INTERVIEWS WITH CAMBODIANS

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. ANDERSON of Illinois. I place the following materials, describing conditions in Cambodia, into the RECORD:

INTERVIEW WITH CAMBODIAN REFUGEE IN BURIRAM, THAILAND, CONDUCTED BY AMERICAN EMBASSY OFFICER IN JUNE 1978

ACCOUNT OF SOURCE I

(The name of the individual refugee who provided this account has been excised to protect the identify of family members or friends still in Cambodia.)

Source I, 36, was a teacher in Battambang before April, 1975. Afterward he became a farmer "like everyone else." He fled to Thailand May 16, 1978. His account follows:

Conditions of Life in Democratic Kampuchea. "We had 300 grams of rice for three persons per day through 1975–78. Life was miserable. We had only herbal medicines. There was no school system. The children are not taught to read and write, only to work."

Executions. "In 1975 there were 1,200 people in my village. There are about 900 there now. The former military, professors, students, and richer farmers were killed by clubs regularly since 1975. Sometimes, they are simply taken away. Other times, you are warned first, then killed.

"On April 24, 1975, at Thmar Kul, all officers, about 1,000, including two of my brothers, were massed together in a warehouse. They were ordered to take off their skirts, then tied together, and then shot and killed. Their wives and children were not harmed as far as I know."

JUNE 5, 1975.

KHMER REFUGEE WALKS OUT FROM PHNOM PENH

EXTRACTS FROM A CABLED REPORT FROM THE AMERICAN EMBASSY IN BANGKOK, DATED 5 JUNE 1975

The name of the refugee who provided this account and the name of his village have been excised to protect the identity of family members or friends still in Cambodia.)

Summary. A Khmer who walked from Phnom Penh to Surin Province of Northeast Thailand has given an eyewitness account of hardships on the forced evacuation from Phnom Penh. He described Khmer Communist (KC) efforts to organize and parcel out the marchers, and gave details on the fate of soldiers, civil servants, and police. He also provided some information on personalities. The refugee spent some time in the area of his native village southwest of Kompong Cham City. He estimated that one million people have now settled in the fertile area on the west bank of the Mekong around Kompong Cham.

Mr. M—T— was caught in Phnom Penh's fall and forced to march out of the capital on April 18. He and his children finally made it to Surin Province on May 28. His description of the exodus confirms KC toughness toward the people but adds details showing that they had planned the March prior to their victory. Chief among these details are mimeographed forms which the "Exodus Reception Committee (*Kenakpak Jetuoul Neak Comleas*) of the Khmer United National Front's (FUNK) Northern (ODDAR) Region issued to all heads of family at a headquarters located on Route 6 about 12 kilometers from the Prek Kdam Ferry.

M—T— lived south of the Monk's Hospital in the western section of the capital. The KC forced him and his neighbors west toward Pochentong Airport and then north up the Avenue des Lacs which parallels Route 5. They permitted him to drive until trenches across the highway stopped his car at which point he had to abandon the vehicle. He then carried two of the five bags of rice he had brought out of Phnom Penh and gave the rest away. Most of the marchers, he noted, had enough food at first, food was sometimes available after they crossed the Tonle Sap at the Prek Kdam Ferry. The ration was rice mixed with dried ground banana and a little salt. In some places, however, KC personnel not only provided no food, but confiscated the marchers' extra clothing. The KC insisted that the marchers had "no hope" of ever returning to Phnom Penh.

M—T— saw only a few corpses on the eight-day march from Phnom Penh to the ferry point. He did come across some fresh corpses. Other marchers told him that the KC killed those people as an example because they refused to march on. Insufficient or bad water and sunstroke killed the old and the very young. Then cholera broke out.

The KC inoculated marchers with two kinds of vaccine: one was from the Pasteur Institute and labeled specific to cholera, the other, which the marchers jokingly called "BGI medicine" because it came in Brasseries et Glaceries de l'Indochine soft drink bottles, was a panacea the KC used against every illness or wound. It was not effective against cholera. By the time marchers got close to Kompong Cham City, some four or five people were dying of cholera daily. He understood that cholera hit Sector 22, south of the Mekong, especially hard.

KC efforts to sort out the trekkers started about 12 kilometers east of the Prek Kdam Ferry. They winnowed soldiers, police, and national police internal security agents into one category which M—T— understood would be taken off to dig irrigation ditches and build dams. High-ranking civil servants formed another category but had somewhat lighter tasks. The KC separated both these categories from their families.

One air force lieutenant colonel, a skilled mechanic, went off to a reeducation course. Some naval troops, whom the KC particularly hated, worked carrying dirt near Srei Veal just west of Kompong Cham City. Later at Siem Reap, M—T— learned that officers from the former army's garrison worked chopping wood in the Kulen Mountain forests while their enlisted troops prepared the fields near the foothills. Their families had to move east to Roloot.

Further west on Route 6 at Kralanh, he understood that the KC separated 80 soldiers, possibly officers, from their families and sent them away for "reeducation." Villagers said reeducation consisted of work and study. If a man does not return from a reeducation session within six months, the KC would probably have killed him.

At a headquarters 12 kilometers east of the ferry, the KC issued heads of household with an I.D. paper. The Khmer-language mimeographed half-sheet carries the legend, "Northern Region Exodus Reception Committee," the Khmer abbreviation for FUNK, and entries for name, age, wife's name and age, number in the family, and a rubber stamp of the 43rd Sector.

Eastern Kompong Cham Province, according to M—T—'s information, is divided into, from west to east, Sectors 43, 42 and 41 which extend from the Mekong as far north as the latitude of Rumlong on Route 6, and from the Tonle Sap east to Kampong Cham City. M—T— arrived at the headquarters April 26. The KC asked where he wanted to settle and he gave them the name of his native village. When he saw the simple form the KC gave him he entered a different line and said he wanted to go on to Samrong, Oddar Meanchey.

He got a second form which did not have the endorsement which he feared might have restricted him to his home district and left immediately so he would not be caught when the KC reconciled their lists during the night. M—T—noted that he began to see a red flag with the hammer and sickle in the center after he crossed the Tonle Sap. He had seen only the red banner before. He did not see the hammer and sickle after leaving Kompong Cham.

M—T— separated from his family at this point to hurry to Skoun by bicycle, and lost his children until he found them May 12 at Rumlong on Route 6. In the meantime, he visited his native village and traveled somewhat in the province.

He understood that the furthest point of the march reached north to Phum Bos Rok. M—T— estimated that the KC had relocated one million people into this rich land around Kompong Cham: some came into the area after moving from Phnom Penh through Takeo and Prey Veng. Marchers had to find their own tools to work the land. He noticed elaborate and well-made small-scale irrigation systems. Farmers near Troeung said they were planting higher yielding rice strains and claimed 2.5 to 3.2 tons of paddy per hectare.

At M—T—'s home village, people complained that although they had plenty of rice, they lacked fish because the KC had ordered all the fishermen to plant rice. He noted many cases of malnutrition, citing children with bloated bellies.

Sector 22 on the east bank of the Mekong had a surprising influence on Sectors 43, 42, and 41. M—T— said he understood Sector 22 was in a different region and regions kept aloof from each other. Sector 22 personnel worked in the other three sectors, however. M—T— speculated that although Hou Youn commanded Sector 22, his native village is on the west bank and he watched over his native district.

Monks at Wat Ni Kroat, Sork Peam Chih Kong, said they recognized Khieu Samphan and Hou Youn at a meeting in the Wat on March 8. Indirect evidence of Hu Nim's activities came from villagers who said that the KC had orders to protect Hu Nim's uncle. The uncle had raised Hu Nim and later entered the monastery. Older monks had permission to stay in their wats, according to M—T— but the young ones had to leave and grow vegetables.

After linking up with his children May 12, M—T— led the family northwest up Route 6. The road was passable he said with only a few cuts. Crews were working on the highway. He tried to detour at Siem Reap for a last look at Angkor Wat but KC authorities said no. The family then moved through Siem Reap to Kralanh on Route 6 and cut north.

They crossed into Oddar Meanchey Province and used the old Angkor Empire bridge south of Chongkal on the way to Samrong. They dared not go through Samrong but took to the forest. Villagers near Samrong pointed out three graves and said the KC had executed Lieutenant Colonel Daok and two others who fought to defend Samrong while the province governor got away.

After getting lost for several days they crossed the Thai border. KC authorities only checked papers three times during the second part of his trek. No one ever searched him and he arrived with a passport and other documents. ●

CAPITAL GAINS RELIEF IS NOT A LIBERAL VERSUS CONSERVATIVE ISSUE

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. JONES of Oklahoma. Mr. Speaker, last week's tax cut vote by the House of Representatives, including the relief we provided for capital gains taxes, should not be interpreted as a liberal versus conservative issue. The bill reported by the Ways and Means Committee was a balanced bill which met both the economic and political concerns of the vast majority of Americans.

The support for the House-passed tax bill was evidenced today by the Harris survey. This most recent Louis Harris poll showed that by a margin of 66 to 28 percent, the American people supported the Jones-Ullman-Conable bill to lower capital gains taxes to a maximum 35 percent.

The Harris poll further confirmed the wisdom of the size of the individual tax cuts provided in the ways and Means Committee bill. It was supported by a 75-to-17 percent majority of Americans.

Some liberals erpressed strong reservations about the capital gains tax relief measures in our bill. Sunday's Washington Star column by former Senator Eugene McCarthy, whose liberal credentials are unassailable, should dispel those liberal fears.

Senator McCarthy endorses capital gains tax relief as the best method to infuse new capital, new life and new jobs into the American economy. Following is Senator McCarthy's column which I commend to my colleagues:

CAPITAL GAINS AND CARTER'S ECONOMICS

(By Eugene J. McCarthy)

Harry Truman said once, or possibly more than once, that he was looking for a one-armed economist; because every economist he knew, when talking of economic matters, always said, "On the one hand . . ." and, "Then, on the other hand . . ."

If one takes President Carter's comments on proposals to reduce the rate of taxation on capital gains as economic rather than political judgments, one must conclude that the president is consulting neither one-handed nor two-handed economists. One must conclude that he has become his own economist.

The president has called the proposed reduction "a high tax windfall for millionaires" and "two bits" for the average American (the latter phrase reportedly coming from the resident White House image maker, Gerald Rafshoon). Treasury Secretary Michael Blumenthal, who should know better and probably does, joined in with the suggestion that the legislation be referred to as the "Millionaires' Relief Act of 1978." Given these comments, it may be in order to look at some economic and political realities.

One basic economic fact, on which there is general agreement among economists and businessmen, is that the American economy needs an infusion of new capital. The economic and political reality is that there are three major sources for this needed capital.

One is the government itself, which could provide capital through loans or grants to business and industry, similar to those given to the ailing Penn Central Railroad. This method is not generally favored by either businessmen or politicians, and has not proved to be a very reliable source of investment funds.

A second source is earnings retained by industry and business. The amount of capital available from this source depends on corporate tax rates, investment credit allowances, depreciation schedules and so forth. There is, however, little political support for any major concession in these areas.

The third possible source of funds, and the most desirable from a social point of view, is non-governmental and non-business. It is investment by individuals, either directly or through financial institutions which act as their agents.

Increased investment by individuals could be encouraged most immediately and effectively through a reduction in capital gains rates. That action should be sustained by changes in income tax policies which would permit or assist persons below the "millionaire" category to accumulate earnings to be used for investment.

Administration opponents of the reduction in the capital gains tax rate, as well as other opponents and critics of it, make the obvious point that its initial benefits would go to upper-income persons who have the largest investments.

This is not a compelling argument against reduction of capital gains tax rates. It is a compelling reason for looking at other aspects of the tax system. And it is a compelling reason for looking at the operation of the American economy, which makes it difficult for persons in every income bracket (unless they already have wealth) to accumulate property through savings and investment.

It is important to note that, because of the great increase in value of homes and farms and small-business properties, middle-income persons would benefit significantly from reduced capital gains taxes.

Among the benefits likely to flow, in some measure, from reduced capital gains tax collection are these:

1. The encouragement of savings and investment.

2. The unlocking of assets and the more normal transfer of them, and the discouragement of the present "until death do we part with capital assets" policy and practice.

3. A clear and immediate benefit to home owners who sell and also to those who buy.

4. A reduction of the unhealthy corporate debt-equity ratio.

5. Some aid to U.S. businesses that compete with businesses from Japan and Germany and other countries which do not impose capital gains taxes.

6. An increase in jobs.

7. An increase in the Gross National Product.

8. And, depending on other things being more or less equal, a reduction in the federal budget deficit.●

CONSTABLE TASK FORCE IN PENNSYLVANIA

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. KOSTMAYER. Mr. Speaker, I rise to inform my colleagues of the historical presence and significance of the police constable in the system of law enforcement in the United States.

From colonial days in which common laws were the only laws of our land, the constable has been a time-honored, elected, law enforcement peace officer of the people. Constables receive their income in most instances from fees paid by litigants rather than the taxpayer.

The evolution of modernized police departments bypassed the continuing and important role of the constable in the delivery of justice at the minor court level.

Today, because of the awareness and the combined efforts of the Pennsylvania State Constables Association and the Office of the Chief Court Administrator of Pennsylvania, a constables task force has redefined the role of the constable. As a result, there has been incorporated a National Police Constables Association. Their goal is to give a rebirth to the dignity and respect once proudly enjoyed by constables nationwide.

May I urge my colleagues to give their active support to the valid efforts of the constables, State to State, as they continue their nationwide program to regain their historical role in behalf of the people who elect them to serve the judicial and executive branches of our Government.●

AMTRAK SERVICE IN MONTANA

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BAUCUS. Mr. Speaker, on July 10 and 12 the Interstate Commerce Commission held hearings in Montana regarding Amtrak service in our State and the Department of Transportation's proposed route structure. Well over 100 Montanans turned out to testify at these hearings, an indication of the widespread support for continued Amtrak service in Montana.

I know that the Montana hearings were not unique, and that Americans all over the country turned out in support of Amtrak and continued rail passenger service to their areas. We in Congress will eventually have to evaluate the Department of Transportation's proposed route structure, and make some hard decisions relative to the future of Amtrak.

Therefore, so that my colleagues can better understand the transportation situation in Montana and our need for continued service along both of our current Amtrak routes, I am submitting for the RECORD a copy of the testimony I submitted to the ICC. On behalf of all Montanans, for whom transportation options are scarce, I urge my colleagues to read this testimony.

TESTIMONY OF REPRESENTATIVE MAX BAUCUS

I am pleased that we in Montana have been given this opportunity to present to the Interstate Commerce Commission our views on Amtrak service in Montana. The Department of Transportation's Study of Amtrak and their proposed route structure has caused a great deal of concern here in Montana, and we all appreciate your coming here to listen to our side of the Amtrak issue.

It often seems to us here in Montana that the Federal government does not understand the transportation needs of the less populated areas of the West. Our access to intercity transportation is already severely limited, yet Federal policies continually thwart

our efforts to obtain and keep adequate service.

Montana's federal highway system is far from complete, and when people use it, they are required by federal law to drive vast distances between Montana towns at 55 miles per hour or less.

Community bus systems, such as Missoula's, are not able to receive federal operating funds which go to urban cities, because most of Montana's cities are not large enough to qualify.

Northwest Airlines is on strike and the Civil Aeronautics Board has been unwilling to pressure both sides into active negotiations.

The Interstate Commerce Commission has just let commercial railroads increase their grain freight rates— while the railroads have been unable to provide boxcars to the state.

And the Federal Aviation Administration threatened to close some of Montana's Flight Service Stations, an action which would cause safety problems for Montana pilots.

When agencies decide to cut back, they cut back service to areas of low population density. This is also the case with Amtrak. Under the route structure proposed by the Department of Transportation, vast areas of the West are to be without rail passenger service. The decision to eliminate service along many routes was based on performance and financial data. In many cases, especially here in Montana, I question the validity of rating our routes based on past performance that has been severely hampered by Amtrak itself

It is impossible to build up ridership without a consistent schedule that both Amtrak personnel and the riding public can depend on. Common sense tells us that people will not become regular riders if one month the train runs in early evening, the next month it comes through mid-morning, and a few weeks later it is changed again— and this time the train came through in the middle of the night. This is exactly what has happened with Amtrak schedules in Montana. Amtrak estimates that since it inaugurated service in Montana some 7 years ago, time schedules have been changed more than two dozen times.

The Southern Amtrak route in Montana has been threatened with discontinuance every year since service began. Every year we have been successful in our efforts to retain service, but it is understandable that people and businesses have been reluctant to come to depend upon the North Coast Hiawatha.

Our routes have also been plagued with outdated equipment that is prone to breakdowns, especially in the winter when heating systems frequently fail to operate. Amtrak has promised new equipment on our routes, but it will arrive two years late— next winter at the earliest.

Amtrak has repeatedly told Congress that in order to make passenger rail service successful, daily service is a necessity. Yet our routes were forced to suffer last winter and did not have enough equipment to run daily trains. Thus, even after Congress voted to fund Amtrak at a level that would permit full operation of the system through the spring of 1978, our two Montana routes were still held to a schedule that Amtrak admits will deter passengers from riding the train.

Yet, despite all of these circumstances, Montana boasts a healthy freight market on Amtrak. Freight shipped on Amtrak brings $54,000 in revenue to the Corporation annually, and this amount would be much higher if our trains were run daily and on a dependable schedule.

Last fall I was active in the fight in Congress to retain full Amtrak service until an impartial, zero-base study of Amtrak could be conducted. My colleagues and I had hoped that such a study would present a fair and clear picture of rail passenger service in the United States, and offer clear suggestions for improving the system.

In many regards the Department of Transportation's study was a disappointment, and I have some reservations about their recommendations. There are routes on the proposed system that lose more money than either of our Montana routes. In addition, the Northeast Corridor is left virtually untouched.

More disturbing, serious doubt about the objectivity of the study exists because the operating cost of the proposed system corresponds exactly to the amount that President Carter announced he would seek for Amtrak. However, President Carter's budget figure was announced months before the Amtrak study was complete.

In presenting the Department's study to Congress, Secretary of Transportation Brock Adams made the following statement:

"Additionally, there is the need to consider Amtrak in the context of the nation's energy shortage. The passenger train, if it is operated well and if it carries a reasonable number of passengers, is energy efficient. The 1973–74 fuel crisis demonstrated that the American people will ride trains when automobile fuel is in short supply. We probably will reach a time when supplies will be permanently limited. In the meantime, we must work at improving the Amtrak system and its operations, so that the American people will, when the time comes, have available an energy-efficient alternative."

I fully agree with this statement, and suggest to you that once fuel does become severely limited, Montana will be hit much harder than other parts of the country. Distances here are great, and many Montanans travel hundreds of miles just to reach the nearest city. The automobile is the most common mode of transportation in our state, and if fuel shortages are to become a way of life in America one Amtrak route, serving less than half of our population, will not suffice.

Even now, Montana has suffered much more than other areas of the country as the result of current energy saving strategies. Montanans have accepted the 55 mile-per-hour speed limit—which hits us much harder than it has New York City or Chicago. We have great distances to travel simply to conduct ordinary business activities. We did this to conserve energy, and now the Department of Transportation is trying to take away one of our best energy savers—Amtrak.

It is indeed unfortunate that the proposed Amtrak system has set northern and southern Montana against each other as they attempt to preserve their respective Amtrak routes. Both are needed and a strong case can be made on behalf of both routes. The North Coast Hiawatha serves the more populated areas of southern Montana, while the Empire Builder serves Montana's Hi-Line which enjoys fewer transportation opportunities.

I urge the Department of Transportation to take into consideration the points that I have raised before they make their final recommendation in December. Give us a chance to operate with daily service, new equipment and a consistent schedule and then look at the routes. We need a fair chance to prove that Amtrak is not only needed in Montana, but that under adequate circumstances our routes can be strong.

Thank you for allowing me to appear before you this morning. I know that you are eager to get on with this hearing, and I too am anxious to hear what my fellow Montanans have to say about our Amtrak service.●

AFTER THE REVOLUTION COMES THE REALITY—THE IMPACT OF PROPOSITION 13 ON SERVICE FOR THE ELDERLY OF CALIFORNIA—PART I

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BIAGGI. Mr. Speaker, on June 6 the voters of California by a 1.9 million vote margin approved proposition 13 considered to be the most drastic tax reduction proposal ever enacted by a unit of government. It slashed property taxes, limited future increases, and barred increases in other taxes. It was clearly a response by the voters of California to unrelenting increases in their property taxes.

Now that several months have elapsed, attention is being directed at the consequences of proposition 13. With property taxes providing a good portion of the States revenues, real and potential cuts are being felt in important social and human service programs throughout the State. The $5 billion State surplus distributed to most areas has minimized the impact for this year, but for next year and beyond the situation will become quite acute.

On July 5 and 6 the Subcommittee on Human Services of the House Select Committee on Aging conducted 2 days of hearings examining the impact of proposition 13 on services to the State's large elderly population. Our special concern were the more than 200 Federal programs which required matching funds from the State and local governments, programs providing benefits and services for groups of all ages. We learned at the time of our hearing that senior centers, nutrition centers, and other programs were being curtailed in some areas of the State while other programs such as adult education fees, were being charged for the first time.

One theme ran through the testimonies of the more than 30 witnesses we heard from—the worst is yet to come. We are concerned not only about California but also the more than 20 States which are contemplating similar tax reduction proposals. It is obvious that Americans are tired of high taxes. The concern of the American people provided the basis for the House's passage last week of major tax cut legislation.

The message of proposition 13 was best summarized by one of our witnesses who said "I am tired of paying higher taxes and getting lesser returns." Too many Americans see their tax dollars being used to feed an already obese government. Efficiency and reduced spending must be the new themes of government on all levels.

We requested the commissioner on aging for California, Ms. Janet Levy to provide us with her detailed analysis of proposition 13's impact on elderly services once the new budget was filed. I am pleased to insert the first part of this report which touches on potential con-

cerns and real cuts. The ranking minority member of my subcommittee Mr. SARASIN will insert the remaining portion of this report.

JARVIS-GANN INITIATIVE IMPACT ON AGING NETWORK

CALIFORNIA DEPARTMENT OF AGING—
JULY 18, 1978

Following voter approval of Proposition 13, the Jarvis-Gann initiative, all social service programs are assessing the extent to which their programs will be affected. The California Department of Aging is especially concerned about the immediate and long-range impact on aging programs throughout the state.

To accumulate data on the effects of Proposition 13, the Department requested all Area Agencies on Aging (AAA's), Title III programs and Title VII projects to describe the projected impact for their area. From the 17 AAA's, 51 Title III programs in Direct Service Areas and 80 Title VII projects in existence, responses were received from seven AAA's, 19 Title III and 29 Title VII projects. The programs which did not answer may be waiting for a more definite picture of how their projects will be affected.

The responses are speculative in nature, as local governments are just becoming aware of how much relief they can expect from state surplus revenue, and this will affect the kind and extent of their budget cuts accordingly. However, it is possible at this early stage to note trend and similarity in the areas of project income affected, and in turn the impact this reduced income will have upon aging programs themselves.

The primary threat to program viability which respondents consistently note concerns non-federal matching funds. Preliminary indications are that match, hard or soft, cannot be maintained at prior level in most programs.

Public contributions for non-federal match frequently come from revenue sharing or city or county general funds, which are entirely controlled by the local government units. In response to reduced revenues, the aging projects anticipate a major shift in priorities for use of available funds.

Reduction in these public match sources affects aging programs in one of two ways: (1) Either directly—through loss of city, county or revenue sharing supported positions, facilities, or equipment; or (2) Indirectly—through loss of supporting positions funded through other non-match resources. If a program is entirely dependent upon public match, curtailment of these funds could mean its elimination.

Most programs are better off if they relied upon private and in-kind donations as their matching source. However, some projects might be indirectly impacted because the grantee agency which donates in-kind match could lose its public funding as well.

Another feared impact is that city and county governments might reprioritize what services should operate in their community. For example, local governments could offer to match Older Americans Act funds, but only if objectives were consistent with new local government priorities. Two counties have decided to remove grantee agencies from county auspices into a completely independent status.

Cutbacks in the sources of program revenue mean cutbacks in services offered—if no alternate source of revenue can be found. Respondents consistently report four chief areas of program operations that are threatened: (1) Staff positions; (2) Supportive services; (3) Facilities; and (4) Planned expansion.

1. STAFF LOSS

A. Anticipated personnel loss is a real concern in a number of replies; one Title III project foresees the loss of one-half of its staff. The types of defunded positions range from project directors to van drivers—and everything in between. In-kind personnel will also be eliminated; several replies mention loss of CETA and Title IX positions, while one project is being charged for auditing staff and maintenance workers that were formerly supplied by the county.

B. Threatened are not only staff positions, but persons having expertise in the field of aging. Those staff personnel who are exempt from civil service regulations can be laid off; those with civil service protection can be taken out of the aging program and put into another city- or county-funded position. One project reports that its city plans to replace all senior program directors with recreation personnel, quite possibly having little interest or experience in aging-related service functions.

C. Action is being taken at the project level to forestall widespread personnel replacement or dismissal. Some programs report a voluntary or mandatory cut in staff hours or salary and elimination of all out-of-area travel reimbursement. Most programs are experiencing a freeze on both salary and current number of employees.●

AFTER THE REVOLUTION COMES THE REALITY—PART II

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. SARASIN. Mr. Speaker, reports are beginning to surface about the effects of California's proposition 13 the "tax revolution" of 1978. Although statewide property taxes are being cut by 60 percent (or $7 billion), the State has had to use its $5 billion surplus to bail out local governments. This overall reprieve is only good for 1 year, however, and one must wonder who will bail out the localities next year.

The strain caused on programs by increased needs and decreased funds is already being felt up and down the State. This is especially true in human services and nowhere is the stress more apparent than in services to senior adults.

I insert in the RECORD the second part of a study undertaken by the California Department of Aging that describes the emerging impact of proposition 13 on senior supportive services, facilities, and planned expansion. It bears close scrutiny because it shows that proposition 13, although termed "the revolution without bullets," may already have serious casualties:

2. SUPPORTIVE SERVICES LOSS

The aging services most often listed as being in jeopardy are supportive services such as transportation and escort services, nutrition education, recreation activities, health care and information and referral.

A. By all predictions, transportation and escort services will be hardest hit by funding loss. It probably is the most serious victim since it is so essential to most aging projects. Double affected are those rural areas who can depend on no alternative means of transportation. The specific losses vary from program to program, but frequently noted are loss of paid drivers, vans, elimination of volunteer driver reimbursement, and cutbacks in funds for maintenance and gasoline costs for vehicles for both congregate dining and Meals on Wheels usage.

B. As Adult Education funds are unanimously withdrawn statewide, they seriously impact on services offered in nutrition sites and senior centers. Aging programs use Adult Education personnel to render a number of supportive services mandated by law, which now must depend on community volunteers or be paid from another source—such as drawing from meals in Title VII projects.

Besides rendering such services as nutrition education, shopping assistance and counseling, Adult Education classes provide recreation, physical therapy, senior arts and crafts and language and citizenship classes, for a variety of courses offered at one location. Preventive health care for seniors is also threatened as an anticipated loss of health screening programs and cancellation of on-site nursing services is reported.

C. Information and referral (I&R) and legal services are also in trouble. I&R, extensively staffed by CETA workers, is an adjunct to most aging programs, and thus program loss places this service in jeopardy. And assistance to seniors in the form of legal services is scheduled to be cut in a minimum of four out of 40 existing projects so far. This could mean an actual revenue loss to the state as the majority of cases handled through this medium involve underpaid or denied claims from Social Security, SSI or other federal public benefit programs to which the senior citizen is entitled to receive payment.

3. LOSS OF FACILITIES

A. Even if aging programs keep staff and service loss to a minimum, many are currently faced with losing the facilities in which these staff and services operate. Unfortunately a great number of senior centers and nutrition sites are located in buildings owned or leased by the local Parks and Recreation Department. These departments are being severely cut back, and they in turn impose restricted facility use as one cost-saving measure.

B. Complete closure of many senior centers is both anticipated and already in effect. One county is attempting to make do with closing its senior centers one day per week. Other areas are allowing the sites to remain open if the project reimburses the local government unit in some way. Sites are directed to begin payment of rent for a facility that was previously free of charge or to pay the cost of utilities, janitorial or trash-hauling services in return for continued occupancy. The alternative is relocation, and as one project indicates, the cost of relocation is quite high—especially to the elderly patrons who are used to a particular location.

4. PLANNED EXPANSION

Expansion plans of aging programs throughout California are now abandoned in favor of using dollars for existing services. Postponed are new senior centers and nutrition sites, as well as additional legal and regional information and referral services and an alternative housing program for seniors. Barring the receipt of state surplus revenue, no additional aging services are likely to be attempted in California in the near future.

The information thus far received indicates that aging programs are certain to sustain a setback in their progress to effectively serve California's elderly citizens if services providers do not initiate strategy to minimize the impact at the project level.●

REPRESENTATIVE MARK W. HANNAFORD'S COMPLETE VOTING RECORD FOR 1978

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. HANNAFORD. Mr. Speaker, I believe that it is the responsibility of every

Member of Congress to keep his constituents informed of all significant votes taken by the full House of Representatives. In light of this belief, I present below the complete roster of my votes in this 2d session of the 95th Congress. Only those votes of a purely procedural nature have been omitted.

The following format has been adopted for this presentation: the official number of the rollcall vote precedes a complete description of the vote. Mr. Speaker, after this description you will find the date of final consideration, my vote, and the fate and tally of the legislation.

No. 2. Amendment to H.R. 2329, Fish & Wildlife Administration, that strikes language allowing warrantless searches and seizures as "provided by law" and substitutes language that permits warrantless searches and seizures by enforcing officers where "there is reasonable grounds to believe that a person has committed or is attempting to commit an offense in his presence of view"; Jan. 19, 1978; yes; passed, 215–131.

No. 3. H.R. 2329, to improve the administration of fish and wildlife programs; Jan. 19; yes; passed, 292–59.

No. 5. To suspend the rules and pass: H.R. 9165, to authorize the Secretary of State to acquire a statute or bust of George C. Marshall for placement in the Department of State; Jan. 23; yes; passed, 351–22.

No. 6. To suspend the rules and pass: H.R. 8771, to amend title 5, U.S. Code, to authorize the Civil Service Commission to comply with the terms of a court decree, order, or property settlement in connection with the divorce, annulment, or separation of a Federal employee who is under the civil service retirement system (payments to former spouses); Jan. 23; yes; passed, 369–7.

No. 7. To suspend the rules and pass: H.R. 9471, to amend title 5, U.S. Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps; Jan. 23; yes; passed, 366–12.

No. 8. To suspend the rules and pass: H.R. 9169, amend, to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing fishing vessels in an amount not exceeding 87½ per centum of the actual or depreciated actual cost of each vessel; Jan. 23; yes; passed, 309–68.

No. 10. To suspend the rules and pass: H.R. 8811, amended, to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court; Jan. 24; yes; passed, 399–1.

No. 11. To suspend the rules and pass: H.R. 7662. amended, to amend the Administrative Conference Act; Jan. 24; yes; passed, 292–103.

No. 12. Conference report on S. 1585, to amend title 18, U.S. Code, to make unlawful the use of minors engaged in sexually explicit conduct for the purpose of promoting any film, photograph, negative, slide, book, magazine, or other print or visual medium, or live performance, clearing for the President; Jan. 24; yes; passed, 401–0.

No. 13. H. Res. 964, rule under which H.R. 1614, Outer Continental Shelf, is being considered; Jan. 25; yes; passed, 247–158.

No. 15. Substitute amendment to committee amendment to H.R. 1614, Outer Continental Shelf, that sought to limit use of alternative bidding systems to not more than 50 percent of the total areas offered for lease annually; eliminate dual leasing; make contracts granted by the Secretary for geological and geophysical explorations subject to annual appropriations and eliminate the Secretary's authority to permit on-structure exploratory drilling; omit the requirement that the Department of the Interior promulgate air quality standards for the OCS; and establish a revenue sharing program for coastal states funded by OCS revenues; Jan. 26; yes; failed, 187–211.

No. 16 Substitute amendment to the committee substitute to H.R. 1614, Outer Continental Shelf, that sought to eliminate the prohibition against joint bidding; eliminate dual leasing; set limits on use of alternative bidding systems to at least 10% of the time, but no more than 30%; eliminate the requirement that OCS operations comply with state standards; delete Offshore Oil Pollution Compensation Fund; create a revenue sharing program that would channel 20% of OCS revenues directly to states through the Coastal Energy Impact Program; and make the Coast Guard and the Interior Dept. responsible for safety regulations rather than OSHA; Jan. 26, no; failed, 143–229.

No. 18 H.R. 5798, to amend the Interstate Commerce Act to authorized appropriations for the Office of Rail Public Counsel for fiscal year 1978—Jan. 30, yes; passed, 318–44.

No. 19 H.R. 5646, requiring ConRail to make premium payments under certain medical and life insurance plans; Jan. 30, yes; passed, 314–50.

No. 20 To suspend the rules and pass: H.R. 9851, to amend the Federal Aviation Act of 1958 to improve the air cargo service; Jan. 31, yes; passed, 403–0.

No. 21 Amendment to H.R. 1614, Outer Continental Shelf, as amended by a substitute, that strikes language allowing the Secretary or other Federal agencies to conduct geological and geophysical explorations; strikes the words "core and test drilling;" and permits only the Secretary to authorize explorations; Jan. 31, yes; passed 328–77.

No. 22 Amendment to H.R. 1614, Outer Continental Shelf, that strikes provisions in the bill on compensation for lease cancellation, and substitutes language stating that "such cancellation shall not foreclose any claim for compensation as may be required by the Constitution"; Jan. 31, yes; passed, 208–194.

No. 23 Substitute amendment to H.R. 1614, Outer Continental Shelf, that sought to limit the mandatory use of alternative bidding systems to not more than 30% but not less than 10%; Jan. 31, no; falied, 196–207.

No. 24 Substitute amendment to H.R. 1614, Outer Continental Shelf, that limits the mandatory use of alternative bidding systems to not more than 50% but not less than 20% of the total area offered for lease; Jan. 31, no; passed, 219–188.

No. 26 Amendment to H.R. 8200, Bankruptcy Reform, that sought to retain the present court structure for dealing with bankruptcies; expand the jurisdiction of bankruptcy courts; provide for appointment of bankruptcy judges by courts of appeals; lengthens the term of judges from 6 to 15 years; and place the U.S. trustees under the supervision of the Judicial Conference rather than the Justice Department; Feb. 1, no; failed, 146–262.

No. 27 Amendment to H.R. 1614, Outer Continental Shelf, that gives the Justice Department and the FTC 30 days to review any prospective lease for possible anticompetitive consequences before the lease is issued; Feb. 1, no; passed, 241–162.

No. 28 Amendment to H.R. 1614, Outer Continental Shelf, that deletes provisions requiring random selection of tracts to be offered under new bidding systems; Feb. 1, no; passed, 225–174.

No. 30 Amendment to an amendment (described below—Roll No. 31) to H.R. 1614, Outer Continental Shelf, that sought to delete the documentation, registry, and manning requirements from the bill; Feb. 2, no; failed, 118–280.

No. 31 Amendment to H.R. 1614, Outer Continental Shelf, that sought to require that 6 months after enactment the Coast Guard must issue standards for design, construction, alteration, and repair of vessels, structures, etc., used in OCS operations; and that one year after enactment, with certain exceptions, all vessels, structures, etc., must be manned by American citizens or permanent residents and all building or rebuilding of such be performed in the U.S.; Feb. 2, no; failed, 201–208.

No. 33 Amendment to H.R. 1614, Outer Continental Shelf, that directs up to 20 percent (not more than $200 million) of OCS funds to coastal states for impact of offshore development; Feb. 2, yes; passed, 279–120.

No. 34 Amendment to H.R. 1614, Outer Continental Shelf, that sought to permit coastal states that do not have a Federally approved coastal zone mangement program to receive Coastal Energy Impact Program funds; Feb. 2, yes; failed, 159–230.

No. 35 H.R. 1614, Outer Continental Shelf Lands Act Amendments of 1977; Feb. 2, yes; passed, 291–91.

No. 36 To suspend the rules and pass: H.R. 9434, to amend the Social Security Act to increase the dollar limitations and Federal medical assistance percentages and applicable to the medicaid programs of Puerto Rico, the Virgin Islands, and Guam; Feb. 6, yes; passed, 253–106.

No. 37 H. Res. 982, providing for the consideration of H.R. 8336, Chattahooche River National Park; Feb. 6, yes; passed, 323–41.

No. 39 Amendment to substitute amendment (described below—Roll No. 40) to H.R. 6362, Timber Sales, that sought to direct the Secretary to "take such action as he may deem appropriate to obviate collusive practices" in bidding; Feb. 6, no; failed, 136–239.

No. 40 Substitute amendment to H.R. 6362, Timber Sales, that authorizes the Secretary to select the bidding method which best ensures fair competition, economic stability for communities dependent on public timber, full value to the government on timber sales, and prevention of collusive practices, and does not establish an advisory committee; Feb. 6, yes; passed, 295–76.

No. 42 To suspend the rules and pass: H.R. 7843, amended, to provide for the appointment of additional district and circuit judges; Feb. 7, yes; passed, 319–80.

No. 43 H. Res. 872, rule under which H.R. 6805, Consumer Representation, is being considered; Feb. 7, yes; passed, 271–138.

No. 44. Amendment in the nature of a substitute to H.R. 6805, Consumer Representation, that sought to establish an Office of Consumer Counsel within each of 23 major Federal departments and agencies and a Division of Consumer Protection and Advocacy in the Justice Department; Feb. 7, no; failed, 93–313.

No. 47. Amendemnt to H.R. 6805, Consumer Representation that sought to require OCR to give the President 30 days notice before seeking judicial review of an action by a regulatory agency as well as nonregulatory agencies; Feb. 8, yes; failed, 195–219.

No. 48. Amendment to H.R. 6805, Consumer Representation, that sought to strike the provision exempting certain proceedings and activities concerning labor disputes and agreements; Feb. 8, no; failed, 138–274.

No. 49. Amendment to H.R. 6805, Consumer Representation, that sought to strike the provision exempting Dept. of Agriculture proceedings concerning crop support, commodities payments and loans, and other Dept. programs; Feb. 8, absent; failed, 105–309.

No. 50. H.R. 6805, to establish an Agency for Consumer Protection in order to secure within the Federal Government effective protection and representation of the interests of consumers; Feb. 8, yes; failed, 189–227.

No. 52. Motion to recommit H.R. 3813, Redwood National Park, for amendment that would have cut expansion of the park from 48,000 to 14,000 acres and deleted the au-

thority of the Dept. to acquire an additional 30,000 acres; Feb. 9, no; failed, 116–274.

No. 53. H.R. 3813, to amend the Act of October 2, 1968, an Act to establish a Redwood National Park in the State of California; Feb. 9, yes; passed, 328–60.

No. 54. Conference report on H.R. 3454, Endangered American Wilderness Act of 1978; Feb. 9, yes; passed, 333–44.

No. 56. Motion to instruct the managers on the part of the House for H.R. 7843, Additional Federal Judgeships, to insist on House language providing for the merit selection of district judges; Feb 9, yes; passed, 321–19.

No. 57. To resolve into the Committee of the Whole for consideration of H.R. 8336, Chattahoochee River National Park; Feb. 14, yes; passed, 325–7.

No. 58. Amendment to H.R. 8336, Chattahoochee River National Park, that sought to permit initial acquisition, planning and management by the National Park Service but require partial funding and long-term management by state and local government; Feb. 14, No; failed, 119–230.

No. 59. H.R. 8336, to enhance the outdoor recreation opportunities for the people of the U.S. by expanding the National Park System and by providing access to and within areas of the National Park System (Chattahoochee River National Park); Feb. 14, yes; passed, 273–79.

No. 60 H.R. 5503, to amend titles 10 and 37, U.S. Code, relating to the appointment, promotion, separation, and retirement of members of the armed forces; Feb. 14, yes, passed, 351–7.

No. 62 Conference report on H.R. 4544, Black Lung Benefits Reform Act of 1977, clearing measure for the President; Feb. 15, yes, passed, 264–113.

No. 63 H.R. 9370, to provide for the development of aquaculture in the United States; Feb. 15, no, passed, 234–130.

No. 65 To suspend the rules and pass: H.R. 10979, amended, to provide emergency assistance for the repair of certain weather related damages to highways and urban mass transportation systems due to the winter of 1977–1978; Feb. 21, no, passed, 274–137.

No. 66 To suspend the rules and pass; H.J. Res. 649, amended, to authorize the President to call a White House Conference on the Arts; Feb. 21, yes, passed, 341–65.

No. 67 To suspend the rules and pass: H.R. 10569, amended, to amend the Alcohol and Drug Abuse Education Act to extend the authorizations and appropriations for carrying out the provisions of such Act; Feb. 21, yes, passed, 409–0.

No. 68 To suspend the rules and pass: H.R. 10606, to authorize funds for the Hubert H. Humphrey Institute of Public Affairs; Feb. 21, yes, passed, 356–53.

No. 71 Motion offered by Mr. Lloyd of California to table the motion to recede and concur in the Senate amendment No. 43 to H.R. 9375, Supplemental Appropriations (amendment rescinds funding for B–1 bomber); Feb. 22, yes, failed, 172–244.

No. 72 Previous question on motion, offered by Mr. Mahon, to concur in Senate amendment No. 43 to H.R. 9375 making supplemental appropriations for the fiscal year ending September 30, 1978 (amendment rescinds funding for B–1 bomber); Clearing measure for the President Feb. 22, no, passed, 234–182.

No. 73 H. Res. 990, the rule under which H.R. 9214, International Monetary Fund, would be considered; Feb. 22, yes, passed, 386–15.

No. 76 Conforming amendment offered by Mr. Neal to the committee amendment to H.R. 9214, International Monetary Fund (limiting the scope of the bill to the SFF); Feb. 23, absent, passed, 253–141.

No. 77 H.R. 9214, to amend the Bretton Woods Agreements Act to authorize the United States to participate in the Supplementary Financing Facility of the IMF; Feb. 23, paired for; passed, 267–125.

No. 78 Amendment offered by Mr. Crane to H.R. 9179, OPIC, that sought to prohibit OPIC loans or guaranties to the National Finance Corporation of Panama without the approval by resolution of the House of Representatives; Feb. 23, paired against; failed, 166–199.

No. 79. Amendment offered by Mr. Moore to H.R. 9179, OPIC, that prohibits OPIC involvement in any project to establish or expand production or processing of palm oil, sugar, or citrus crops; Feb. 23, paired against; passed, 191–167.

No. 80. H.R. 9179, Overseas Private Investment Corporation Amendments Act of 1977; Feb. 23, absent; passed, 191–165.

No. 83. H.R. 9757, Grazing Fee Moratorium of 1977; Feb. 24, general pair; passed, 257–47.

No. 84. Amendment in the nature of a substitute, offered by Mr. Roncalio, to H.R. 3377, Wichita Indian Claims, that deletes the waiver of res judicata and collateral estoppel; further defines affiliated banks and groups; and provides that any claim will be subject to the Act of October 8, 1976, concerning transfer of cases from the Commission to the Court of Claims; Feb. 24, absent; passed, 293–1.

No. 85. H.R. 3377, to authorize the Wichita Indian Tribe of Oklahoma, and its affiliated bands and groups of Indians, to file with the Indian Claims Commission any of their claims against the U.S. for lands taken without adequate compensation; Feb. 24, absent; passed, 226–68.

No. 87. H. Con. Res. 464, approving an amendment to the District of Columbia Charter relating to initiative and referendum; Feb. 27, yes; passed, 321–24.

No. 88. H. Con. Res. 471, approving an amendment to the District of Columbia Charter relating to recall of elected officials; Feb. 27, yes; passed, 350–4.

No. 90. To suspend the rules and pass: H.R. 9622, amended, to abolish diversity of citizenship as a basis of jurisdiction of federal district courts and to abolish the amount in controversy requirement in federal question cases; Feb. 28, yes; passed, 266–133.

No. 91. Conference report on H.R. 3816, Federal Trade Commission Amendments of 1977; Feb. 28, no; failed, 146–255.

No. 92. H.R. 5981, to amend the American Folklife Preservation Act to extend the authorizations of appropriations contained in such act; Feb. 28, yes; passed, 306–80.

No. 97. Passage of H.J. Res. 554, to amend the Constitution to provide for representation of the District of Columbia in the Congress; Mar. 2, yes; passed, 289–127.

No. 100. H. Res. 957, amended, providing funds for the Committee on Veterans' Affairs; Mar. 3, yes; passed, 336–1.

No. 101. H. Res. 953, amended, providing funds for the Committee on the District of Columbia; Mar. 3, yes; passed, 318–15.

No. 102. H. Res. 1012, amended, providing funds for the Committee on Rules; Mar. 3, yes; passed, 321–13.

No. 105. To suspend the rules and pass: H.J. Res. 715, proclaiming May 3, 1978, "Sun Day"; Mar. 6, yes; passed, 348–7.

No. 107 To suspend the rules and pass: H.R. 10551, to extend for one year the authority of the Commissioner of Education to waive provisions of title I of the Elementary and Secondary Education Act for certain local educational agencies; Mar. 7, yes; passed, 404–0.

No. 108 H. Res. 1056, rule under which H.R. 11180, Debt Limitation Increase, was considered; Mar. 7, yes; passed, 285–115.

No. 110 Amendment offered by Mr. Boiling to H.R. 11180, Debt Limitation Increase, that deleted language providing for the debt ceiling, in subsequent years, to be set in the concurrent resolutions on the budget; May 7, yes; passed, 277–132.

No. 111 H.R. 11180, to increase the public debt limit through March 1, 1979, to provide that thereafter the public debt limit shall be established pursuant to the congressional budget procedures and to improve debt management; Mar. 7, yes; failed, 165–248.

No. 112 H.J. Res. 746, making urgent power supplemental appropriations for the Department of Energy, Southwestern Power Administration for the fiscal year ending September 30. 1978: Mar. 7, yes; passed, 353–50.

No. 113 H. Res. 1003, providing funds for the Committee on Public Works and Transportation; March 7, yes; passed, 399–1.

No. 119 H.Res. 1057, the rule under which H.R. 50, Humphrey-Hawkins, was considered; March 8, yes; 349–58.

No. 125 Amendment offered by Mr. Wright, as amended, to the amendment offered by Mr. Sarasin to H.R. 50, Humphrey-Hawkins, that requires the establishment of annual price stability goals and requires the president to formulate specific policies and programs to reduce inflation; March 9, yes; passed, 277–143.

No. 126 Amendment offered by Mr. Jeffords in the nature of a substitute to the amendment offered by Mr. Sarasin, to H.R. 50, Humphrey-Hawkins, that sought to set a 5-year goal of 3 percent inflation; March 9, no; failed, 198–223.

No. 127 Amendment offered by Mr. Jeffords to H.R. 50, Humphrey-Hawkins, that requires the Economic Report to contain two unemployment goals and reporting statistics: one based on employment in the private sector and the second to include both private and public sector employment; and requires reporting of any changes which occur in the method of determining the unemployment figure; March 9, no; passed, 239–177.

No. 128 Amendment offered by Mr. Quie to H.R. 50, Humphrey-Hawkins, that sets a goal of 100% parity of income for farmers at the market-place within 5 years after enactment; March 9, no; passed, 264–150.

No. 129 H.R. 10982, to rescind certain budget authority contained in the message of the President of January 27, 1978 (H. Doc. 95–285), transmitted pursuant to the Impoundment Control Act of 1974; March 10, yes; passed, 318–0.

No. 131 To order a second to the motion to suspend the rules and pass H.R. 6635, amended, to amend the Second Liberty Bond Act to allow the interest rates paid on U.S. retirement plan and individual retirement bonds to be increased to the rate paid on U.S. series E savings bonds; March 13, yes; passed, 372–1.

No. 252 H. Con. Res. 573, denouncing the Government of Cambodia for its disregard of basic human rights; Apr. 25, yes; passed, 388–0.

No. 254 H.R. 11832, to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act; Apr. 26, yes; passed, 332–74.

No. 255 Amendment offered by Mr. Santini to H.R. 8494, Lobbying Disclosure, that sought to direct the GAO to study lobbying activities by all levels of government and organizations of state or local elected officials and to delay until January 1, 1980, the coverage under the bill for organizations of state or local elected or appointed officials; Apr. 26, yes; failed, 197–211.

No. 256 Amendment offered by Mr. Kindness to H.R. 8494, Lobbying Disclosure, that states that communications dealing only with the status, existence, or subject of an issue are exempted; Apr. 26, no; passed, 207–188.

No. 257 H.R. 8494, to regulate lobbying and related activities—Apr. 26, yes; passed 259–140.

No. 259 H.R. 11302, to authorize appropriations for environmental research, development, and demonstrations for fiscal year 1979 (EPA Research Authorization); Apr. 27, yes; passed, 367–33.

No. 260 H.J. Res. 859, making supplemental appropriations for the U.S. Railway Association for the fiscal year ending September 30, 1978; Apr. 27, no; passed, 202–196.

No. 262 To suspend the rules and pass: H.R. 11657, amended, to authorized appropriations to carry out the Central, Western, and South Pacific Fisheries Development Act until the close of fiscal year 1983; May 1, yes; passed, 326–23.

No. 263 To suspend the rules and pass: H.R. 10392, to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship; May 1, yes; failed, 219–137 (required a two-thirds vote).

No. 264 To suspend the rules and pass: H.J. Res. 816, to extend the authority of the Federal Reserve banks to buy and sell certain obligations; May 1, yes; passed, 278–77.

No. 265 H. Res. 1150, the rule under which H.R. 9400, Civil Rights of Institutionalized Persons, is being considered; May 1, yes; passed, 320–20.

No. 267 Amendment offered by Mr. Ertel to H.R. 9400, Civil Rights of Institutionalized Persons, that strikes coverage for jails, prisons, and other correctional institutions; May 1, no; passed, 227–132.

No. 269 To suspend the rules and pass: H.R. 11713, amended, to create a solar and renewable energy sources loan program within the Small Business Administration; May 2, yes; passed, 375–17.

No. 270 To suspend the rules and pass: H.R. 8099, amended, relating to the settlement between the U.S. and the Ak-Chin Indian community of certain water right claims of such community against the U.S.; May 2, yes; failed, 256–138 (required a two-thirds vote).

No. 271 To suspend the rules and pass: H. Res. 1158, to provide that the bill H.R. 3881, to amend the Securities Investor Protection Act of 1970, with the Senate amendments thereto, be taken from the Speaker's table, and that the Senate amendments be agreed to with an amendment; May 2, yes; passed, 384–10.

No. 272 H. Res. 1159, resolution of the House that the Speaker certify the report of Claude Powell's contempt of Congress to the U.S. Attorney for Criminal Contempt; May 2, yes; passed 367–16.

No. 274 Amendment offered by Mrs. Holt to H. Con. Res. 559, First Budget Resolution, that sought to reduce budget authority to $548.8 billion; outlays to $488.3 billion; revenues to $440 billion; and the deficit to $48.2 billion; May 3, no; failed, 197–203.

No. 275 Substitute amendment offered by Mr. Stratton to the amendment offered by Mr. Mitchell of Maryland to H. Con. Res. 559, First Budget Resolution, that sought to increase budget authority for national defense by $2.4 billion; May 3, no; failed, 142–262.

No. 276 Amendment offered by Mr. Mitchell of Maryland to H. Con. Res. 559, First Budget Resolution, that sought to reduce national defense by $4.8 billion in budget authority and $2.8 billion in outlays; and transfer these amounts to other employment and economic development programs; May 3, no; failed, 98–313.

No. 277 Amendment offered by Mr. Conable to H. Con. Res. 559, First Budget Resolution, that sought to increase tax cuts by $10.3 billion to a total of $38.7 billion; May 3, no; failed, 163–239.

No. 278 Amendment offered by Mr. Roberts to H. Con. Res. 559, First Budget Resolution, that increases veterans' benefits and services by $1 billion in budget authority and $844 million in outlays; May 3, yes; passed, 362–33.

No. 279 Amendment offered by Mr. Fraser to H. Con. Res. 559, First Budget Resolution, that sought to add $435 million in budget authority and $390 million in outlays to the education, training, employment, and social services function for increased funding of training and employment programs for youth and the elderly; May 3, absent; failed, 123–265.

No. 280 Amendment offered by Mr. Mattox to H. Con. Res. 559, First Budget Resolution, that sought to reduce budget authority and outlays by $255 million to allow for a federal salary increase of 5.5 percent instead of 6 percent; May 3, absent; failed, 172–210.

No. 282 H. Res. 1162, the rule waiving points of order against the conference report on H.R. 6782, Emergency Agricultural Act; May 4, absent; passed, 241–148.

No. 283 Conference report on H.R. 6782, Emergency Agricultural Act of 1978, clearing the measure for the President; May 4, absent; passed, 212–182.

No. 284 Substitute amendment offered by Mr. Luken to the amendment offered by Mr. Coughlin to H. Con. Res. 559, First Budget Resolution, that decreases federal revenues by $635 million for tuition tax credits for elementary, secondary, and postsecondary education (Coughlin amendment sought to decrease federal revenues by only $500 million for tuition tax credit for college tuition only); May 4, absent; passed, 199–173.

No. 285 Amendment offered by Mr. Coughlin, as amended by the Luken substitute, to H.Con.Res. 559, First Budget Resolution, that decreased federal revenues by $635 million for tuition tax credits for elementary, secondary, and postsecondary education; May 4, absent, passed, 227–136.

No. 287 To suspend the rules and pass: H.R. 12481, amended, to authorize appropriations for certain insular areas of the U.S.; May 8, yes; failed, 203–170 (required a two-thirds vote).

No. 288 To suspend the rules and pass: H.Con.Res. 583, relating to Americans missing in action in Southeast Asia; May 8, yes; passed, 369–0.

No. 289 H.J.Res. 873, making an urgent supplemental appropriation for the disaster loan program of the Small Business Administration for the fiscal year ending September 30, 1978; May 8, yes; passed, 346–23.

No. 291 Amendment offered by Mr. Ashbrook to H.Con.Res. 559, First Budget Resolution, that reduces budget authority and outlays for HEW programs by $3.15 billion; May 9, no; passed, 198–189.

No. 292 Amendment offered by Mr. Hansen to H.Con.Res. 559, First Budget Resolution, that seeks to insure greater accountability and congressional oversight of the Panama Canal Company by transferring canal revenues to federal budget; May 9, yes; passed, 231–170.

No. 293 Amendment offered by Mr. Fisher to H.Con.Res. 559, First Budget Resolution, that sought to reduce outlays by $7 billion and budget authority by $8 billion; May 9, no; failed, 195–203

No. 294 Amendment offered by Mr. Brown of Michigan to H.Con.Res. 559, First Budget Resolution, that sought to reduce budget authority by $178.2 billion and outlays by $195.4 million by holding certain regulatory activities to the 1978 level; May 9, no; failed, 196–196.

No. 296 Amendment offered by Mr. Caputo to H.Con.Res., First Budget Resolution, that sought to reduce budget authority and outlays by $56 million for the purpose of deleting Food for Peace funds for South Korea; May 10, absent; failed, 146–254.

No. 297 Amendment offered by Mr. Jacobs to the amendment in the nature of a substitute offered by Mr. Rousselot to H.Con.Res. 559, First Budget Resolution, that sought to set revenues at $464.5 billion, budget authority at $523.8 billion, outlays at $462.7 billion, with a zero deficit and a tax reduction of $9 billion; May 10, no; failed, 45–352.

No. 298 Amendment in the nature of a substitute offered by Mr. Rousselot that sought to set revenues at $464.6 billion, budget authority at $520.4 billion, and outlays at $464.6 billion, with a zero deficit and a tax reduction of $38.7 billion; May 10, no; failed, 170–226.

No. 299. Amendment offered by Mr. Ashbrook to H. Con. Res. 559, First Budget Resolution, that sought to reduce budget authority and outlays for HEW programs by $3.15 billion; May 10; no; failed, 192–205 (This amendment previously had been agreed to on May 9, No. 291.).

No. 300. H. Con. Res. 559, setting forth the congressional budget for the U.S. Government for the fiscal year 1979; May 10; yes; passed, 201–197.

No. 302. H. Con. Res. 617, denouncing the assassination of Aldo Moro; May 11; yes; passed, 398–0.

No. 303. Amendment offered by Mr. Lott to H.R. 12222, Foreign Aid Authorization, that sought to reduce the authorization for population planning to $205 million, international disaster assistance to $8 million, and the Economic Security Fund to $1.82 billion; May 11; no; failed, 183–212.

No. 304. Amendment offered by Mr. Hagedorn to H.R. 12222, Foreign Aid Authorization, that sought to prohibit assistance to nations that do not make reasonable progress toward eliminating domestic impediments to agriculture production; May 11; absent; failed, 141–236.

No. 305. Amendment offered by Mr. Lagomarsino to H.R. 12222, Foreign Aid Authorization, that sought to limit U.S. aid to Panama to 25 percent of the revenues Panama receives from the canal; May 11; absent; failed, 187–187.

No. 308. Amendment offered by Mr. Johnson of Colorado to H.R. 12222, Foreign Aid Authorization, that sought to make tobacco and tobacco products ineligible for use in the Food for Peace Program; May 12; absent; failed, 126–189.

No. 309. Amendment offered by Mr. Derwinski in the nature of a substitute to the amendment offered by Mr. Ashbrook to H.R. 12222, Foreign Aid Authorization, that sought to limit the prohibition only of direct aid to Vietnam, Cambodia, Uganda, or Cuba; May 12; absent; failed, 148–155.

No. 311. To suspend the rules and pass: H.R. 11209, to provide for the establishment, ownership, operation, and governmental oversight and regulation of international maritime telecommunications services; May 15; yes; passed, 350–0.

No. 312. Amendment offered by Mr. Bauman to H.R. 12222, Foregn Aid Authorization, that reduces authorized funding for programs by 5 percent, with the exception of funds for food and nutrition, and American schools and hospitals abroad; May 15; no; passed, 200–172.

No. 313. H.R. 12222, International Development and Food Assistance Act of 1978 (Foreign Aid Authorization); May 15; yes; passed, 225–148.

No. 314. H.R. 10392, to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship; May 15; yes; passed, 222–152.

No. 315 H.R. 11291, to authorize appropriations for the Federal Fire Prevention and Control Act of 1974, and to change the name of the National Fire Prevention and Control Administration to the U.S. Fire Administration; May 15, yes; passed, 360–11.

No. 317 To suspend the rules and pass: H.R. 12255, amended, to amend the Older Americans Act of 1965 to provide for improved programs for older persons; May 15, yes; passed, 361–6.

No. 318 To suspend the rules and pass: H.R. 4030, amended, to amend the Internal Revenue Code of 1954 to increase the amount of stock which certain private foundations may hold in certain public utilities without being subject to the excise tax on excess business holdings; May 15, no; failed, 218–145 (required a two-thirds vote).

No. 320 To suspend the rules and pass: H.R. 12467, amended, to amend the Rehabilitation Act of 1973 to extend certain programs established in such act, to establish a community service employment program for handicapped individuals, and to provide for independent living rehabilitation services for the severely handicapped; May 16, yes; passed, 382–12.

No. 321 Motion offered by Mr. Bauman to table the motion offered by Mr. Natcher that the House concur, with amendment, to Senate amendment No. 37 to H.R. 9005, D.C. Appropriations (Senate amendment No. 37 con-

cerned appropriations for the civic center); May 16, yes; failed, 190–199.

No. 322 Motion offered by Mr. Natcher that the House concur, with amendment, to Senate amendment No. 37 to H.R. 9005, D.C. Appropriations; May 16, yes; passed, 199–183.

No. 325. Amendment offered by Mr. Weiss to H.R. 11686, Department of Energy National Security Programs, that sought to prohibit the use of any funds for the production of enhanced radiation weapons by removing the exception contained in the bill; May 17, yes; failed, 90–306.

No. 326 H.R. 11686, to authorize appropriations for the Department of Energy for national security programs for fiscal year 1979; May 17, yes; passed, 348–46.

No. 327 Motion offered by Mr. Giaimo that the House agree to the Senate amendment to the House amendment to S. Con. Res. 80, setting forth the congressional budget for the U.S. government for the fiscal year 1979, clearing the measure; May 17, yes; passed, 201–198.

No. 328 H. Res. 1176, the rule under which H.R. 12641, Temporary Debt Limit, was considered; May 17, yes; passed, 320–77.

No. 329 H.R. 12641, to provide for a temporary increase in the public debt limit; May 17, yes; failed, 167–228.

No. 330 H. Res. 1186, the rule under which H.R. 39, Alaska Lands, is being considered; May 17, yes; passed, 354–42.

No. 334. H. Con. Res. 624, expressing the sense of the Congress that the Helsinki Final Act, as well as international law, guarantees the right of members of Public Groups To Promote Observance of the Helsinki Agreement in the U.S.S.R. to pursue their lawful activities, and urging the President to continue to express U.S. opposition to the imprisonment of members of the Soviet Helsinki Groups; May 18, yes; passed, 399–0.

No. 335. Amendments offered by Mr. Young of Alaska to the Udall substitute to the Meeds substitute to the Leggett substitute to H.R. 39, Alaska Lands, that sought to make certain boundary changes in order to reduce the total acreage within parks and wildlife refuges by approximately 5 million acres to permit selection of these lands by the state of Alaska; May 18, no; failed, 141–251.

No. 336. Amendment offered by Mr. Meeds to the Udall substitute to the Meeds substitute to the Leggett substitute to H.R. 39, Alaska Lands, that sought to reduce lands to be designated as wilderness from approximately 66 million acres to 33 million acres; May 18, no; failed, 119–240.

No. 338. Amendment offered by Mr. Santini to the Udall substitute for the Meeds substitute to H.R. 39, Alaska Lands, that continues minerals assessments provisions and requires the President to submit a proposal to Congress by October 1, 1981, for a procedure for evaluating applications by individuals wishing to carry out mineral exploration or extraction on conservation system lands; May 19, yes; passed, 157–150.

No. 339. Motion offered by Mr. Young of Alaska that H.R. 39, Alaska Lands, be recommitted with instructions to report it back containing an amendment in the nature of the Meeds substitute; May 19, no; failed, 67–242.

No. 340. H.R. 39, to designate certain lands in the state of Alaska as units of the National Park, National Wildlife Refuge, National Wild and Scenic Rivers, and National Wilderness systems; May 19, yes; passed, 277–31.

No. 342 To suspend the rules and pass: H. Res. 1072, to disapprove the action of the Commissioner of Education in consolidating certain advisory councils as proposed in the Commissioner's annual report under section 448 of the General Education Provisions Act; May 22, yes; passed, 269–109.

No. 343 To suspend the rules and pass: H.R. 11777, amended, to authorize and direct the Secretary of Agriculture to provide cooperative forestry assistance to states and others; May 22, yes; passed, 373–2.

No. 344 To suspend the rules and pass: H.R. 11778, amended, to authorize and direct the Secretary of Agriculture to carry out forest and rangeland renewable resources research, and to provide cooperative assistance for such research to states and others; May 22, passed, 373–3.

No. 345 To suspend the rules and pass: H.R. 11779, amended, to provide for an expanded and comprehensive extension program for forest and rangeland renewable resources; May 22, yes; passed, 377–7.

No. 346 To suspend the rules and pass: S. 2370, to remove the limitation on the amount authorized to be appropriated under the Volunteers in the National Forests Act of 1972, clearing measure for President; May 22, yes; passed, 378–5.

No. 347 To suspend the rules and pass: H.R. 12353, to amend title 38, U.S. Code, to extend the period of eligibility for veterans readjustment appointments in the federal government for veterans of the Vietnam era; May 22, yes; passed, 388–0.

No. 348 H. Con. Res. 555, approving the extension of nondiscriminatory treatment with respect to the products of the Hungarian People's Republic; May 22, yes; passed, 209–173.

No. 349 H. Res. 1193, the rule under which H.R. 12602, Military Construction Authorization, was considered; May 22, yes; passed, 377–1.

No. 350 H.R. 12602, to authorize certain construction at military installations for fiscal year 1979: May 22, yes; passed, 363–18.

No. 351 Amendment offered by Mr. McCloskey to committee amendment no. 6 to H.R. 10729, Maritime Authorization, that sought to strike the $3 billion increase in ship mortgage guarantee authority; May 22, no; failed, 126–241.

No. 353 To suspend the rules and pass; S.J. Res. 4, amended, establishing the Aboriginal Hawaiian Claims Settlement Study Commission; May 23, yes; failed, 210–194 (required a two-thirds vote).

No. 354 To suspend the rules and pass: H.R. 12299, amended, to establish a Federal Office on Domestic Violence, and a Federal Council on Domestic Violence, and to provide grants for the assistance of victims of domestic violence and for training programs; May 23, yes; failed, 201–205.

No. 355. To suspend the rules and pass: H.R. 3050, amended, to amend section 451 of the Internal Revenue Code of 1954 to provide for a special rule for the inclusion in income of magazine sales for display purposes; May 23, yes; passed, 359–50.

No. 356. To suspend the rules and pass: H.R. 8535, amended, to amend the Internal Revenue Code of 1954 with respect to the treatment of amounts paid to relatives for purposes of the credit for expenses for household and dependent care services necessary for gainful employment; May 23, yes; passed, 363–44.

No. 357 To suspend the rules and pass: H. Res. 238, amended, expressing the sense of the House with respect to the immediate removal of certain regulations unilaterally put in place by the European Economic Community which have the effect of damaging and interfering with historic and acceptable trade patterns in the U.S. exports of dried prunes and efforts made to restrict walnut exports to the EEC; May 23, yes; passed, 407–0.

No. 358 To suspend the rules and pass: H.R. 11370, amended, to authorize an appropriation to reimburse certain expenditures for social services provided by states prior to October 1, 1975, under titles I, IV–A, VI, X, XIV, and XVI of the Social Security Act; May 23, yes; passed, 377–25.

No. 359 Amendment offered by Mr. McCloskey to H.R. 10729, Maritime Authorization, that sought to prohibit authorized funds to be used for any item of wage costs paid to the Transportation Institute, to the Joint Maritime Congress, or the American Maritime Officers Service, or to any other organization which engages in lobbying activities; May 23, no; failed, 168–227.

No. 360. Amendment offered by Mr. McCloskey to H.R. 10729, Maritime Authorization, that sought to prohibit use of subsidies for any item of wage costs that is paid for the training expenses of new entrants into the maritime industry; May 23, no; failed, 111–289.

No. 361 Amendment offered by Mr. McCloskey to H.R. 10729, Maritime Authorization, that sought to prohibit the use of funds to subsidize the carriage of grain to Russia; May 23, no; failed 180–218.

No. 362 H.R. 10729, to authorize appropriations for the fiscal year 1979 for certain maritime programs of the Department of Commerce; May 23, yes; passed, 326–82.

No. 363 H. Res. 1188, the rule under which H.R. 10929, DOD Authorization, is being considered; May 23, yes; passed 330–71.

No. 365 amendment offered by Mrs. Schroeder to the Carr substitute to H.R. 10929, DOD Authorization, that sought to reinstate the committee substitute language for title II, Research, Development, Testing and Evaluation; May 24, no; failed, 107–297.

No 366 Amendment offered by Mr. Carr in the nature of a substitute to the committee amendment to H.R. 10929, DOD Authorization, that sought to replace the committee substitute with the administration's DOD budget request, with the exception of the $911.9 million authorization for the Trident submarine; May 24, no; failed, 115–278.

No. 367 Amendment offered by Mrs. Schroeder to H.R. 10929, DOD Authorization, that deletes the $8.1 million authorization for procurement of a Gulfstream II executive aircraft for use by the Marine Corps in its Aircraft Support Detachment; May 24, yes; passed, 266–136.

No. 368 Amendment offered by Mr. Aspin to H.R. 10929, DOD Authorization, that sought to replace the $2.1 billion authorization for a large nuclear powered carrier (CVN) with a $1.5 billion conventionally powered, medium size carrier (CVV); May 24, no; failed, 139–264.

No. 369 Amendment offered by Mr. Carr to H.R. 10929, DOD Authorization, that sought to delete the authorization for procurement of aircraft carriers; May 24, no; failed, 106–293.

No. 370 Amendment offered by Mr. Downey to H.R. 10929, DOD Authorization, that sought to add a $29.2 million authorization for development of a wide-bodied cruise missile carrier; May 24, yes; failed, 145–246.

No. 371 Amendment offered by Mr. Stratton, as amended, to H.R. 10929, DOD Authorization, that sought to prohibit the use of authorized funds to reduce Army combat troops in South Korea below 26,000, except in the case of an emergency declared by the President; May 24, no; failed, 142–247.

No. 372 H.R. 10929, Department of Defense Appropriation Authorization Act, 1979; May 24, yes; passed, 319–67.

No. 374 S.J. Res. 137, reaffirming the unity of the North Atlantic Alliance commitment, clearing measure for the President; May 25, yes; passed, 370–0.

No. 375 H. Res. 1165, the rule under which H.R. 7814, Flexible Work Schedules, was considered; May 25, yes; passed, 360–0.

No. 376 Motion that the House resolve itself into the Committee of the Whole for

further consideration of H.R. 781, Flexible Work Schedules; May 25, yes; passed, 338–2.

No. 377 H.R. 7814, to authorize federal agencies to experiment with flexible and compressed employee work schedules; May 25, absent; passed, 288–57.

No. 379 Amendment offered by Mr. Railsback to H.R. 9400, Civil Rights of Institutionalized Persons, that reinstates coverage for persons in jails, prisons, or other correctional institutions, but only permits the Attorney Geenral to initiate a civil action in these areas when the court has transmitted a complaint or petition; May 25, yes; passed, 178–109.

No. 382 To suspend the rules and pass: H. Res. 1194, amended, expressing the sense of the House that until the testimony of Kim Dong Jo is made available under oath to the Committee on Standards of Official Conduct, the transfer of anything of value to the Republic of Korea for nonmilitary purposes should be made only where the refusal to do so would imperil the national security of the U.S. or the territorial integrity of the Republic of Korea; and that the refusal of the U.S. to make such transfers would not, under present circumstances, imperil the national security of the U.S. or territorial integrity of Korea; May 31, yes; passed, 321–46.

No. 383 To suspend the rules and pass: H.R. 7041, to rename two lakes that have been completed as part of the Papillion Creek basin project as the Glenn Cunningham Lake and the Standing Bear Lake; May 31, yes; passed, 369–0.

No. 384 To suspend the rules and pass: H.R. 212, to provide that the park referred to as the East Lake Park located within the West Point Lake project on the Chattahoochee River, Ga., shall hereafter be known and designated as the R. Shaefer Heard Park; May 31, yes; passed, 359–4.

No. 385 H. Res. 1204, the rule under which H.R. 12598, Foreign Relations Authorization, was considered; May 31, yes; passed, 363–10.

No. 387 Amendment offered by Mr. Ashbrook to H.R. 12598, Foreign Relations Authorization, that strikes language authorizing the establishment of a Commission on Proposals for a Center for Conflict Resolution; May 31, yes; passed, 237–135.

No. 388 Amendment offered by Mr. Bauman to H.R. 12598, Foreign Relations Authorization, that strikes language authorizing the establishment of an Institute for International Human Rights; May 31, no; passed, 202–164.

No. 389 Amendment offered by Mr. Hansen to H.R. 12598, Foreign Relations Authorization, that prohibits use of authorized funds directly or indirectly to effect implementation of the Panama Canal treaties of 1978 without a specific Act of Congress; May 31, yes; passed, 208–163.

No. 390 H.R. 12598, Foreign Relations Authorization Act for fiscal year 1979; May 31, yes; passed, 240–124.

No. 392 H. Res. 1178, the rule under which H.R. 12050, Tuition Tax Credit, was considered; June 1, yes; passed, 294–97.

No. 393 Amendment offered by Mr. Vanik to H.R. 12050, Tuition Tax Credit, that extends the tax credit to private, nonprofit elementary or secondary school tuition, June 1, no; passed, 209–194.

No. 394 Amendment offered by Mr. Vanik to H.R. 12050, Tuition Tax Credit, that sought to increase from 25 percent to 50 percent the portion of tuition eligible for the tax credit; June 1, no; failed, 142–261.

No. 395 Amendment offered by Mr. Mikva in the nature of a substitute to H.R. 12050, Tuition Tax Credit, that sought to provide deferral of income taxes for college tuition, which the taxpayer would repay over a period of 10 years, rather than a tax credit; June 1, yes; failed, 155–239.

No. 396 H.R. 12050, to amend the Internal Revenue Code of 1954 to provide a federal income tax credit for tuition; June 1, no; passed, 237–158.

No. 397 H. Res. 1168, the rule under which H.R. 12157, Eximbank, is being considered; June 1, yes; passed, 364–4.

No. 398 H. Res. 1208, providing for the consideration of H.R. 15, ESEA; June 1, yes; passed, 339–13.

No. 399 Motion that the House resolve itself into the Committee of the Whole for further consideration of H.R. 12157, Eximbank; June 1,; passed, 314–13.

No. 401 Amendment offered by Mr. Kelly to H.R. 12157, Eximbank, that sought to permit the bank to guarantee, insure, or extend credit to South Africa as long as it also extends credit to or is authorized to extend credit to communist countries; June 1, no; failed, 157–190.

No. 403 Amendment offered by Mr. Ashbrook to H.R. 12157, Eximbank, that sought to strike the language prohibiting the bank's participation in transactions in the Republic of South Africa; June 2, absent; failed, 116–219.

No. 404 Amendment offered by Mr. Vanik to H.R. 12157, Eximbank, that strikes language exempting the People's Republic of China from the provision requiring a presidential determination before the bank may do business in a communist country; June 2, absent; passed, 179–138.

No. 405 To suspend the rules and pass: H.R. 185, to amend section 2632 of title 10, U.S. Code, to provide the secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment; June 5, general pair; passed, 336–0.

No. 406 To suspend the rules and pass: H.R. 188, amended, to amend the Intervention on the High Seas Act to implement the Protocol Relating to Intervention on the High Seas in Cases of Marine Pollution by Substances Other Than Oil, 1973; June 5, general pair; passed, 344–1.

No. 407 To suspend the rules and pass: H.R. 12140, to amend the Federal Water Pollution Control Act to provide additional authorizations for certain operating programs under the act; June 5, general pair; passed, 338–9.

No. 409 Amendment offered by Mr. Vento as a substitute for the amendment in the nature of a substitute offered by Mr. Oberstar to H.R. 12250, Boundary Areas Canoe Area, that retains most of the provisions of the original bill, but eliminates the recreation area; establishes a mining protection area; and makes certain changes in motorboat use on specified lakes; June 5, absent; passed, 213–141.

No. 410 H.R. 12250, to designate the Boundary Waters Canoe Area Wilderness and to establish the Boundary Waters Canoe Area National Recreation Area; June 5, general pair; passed. 324–29.

No. 411 H. Res. 1191, the rule under which H.R. 12481, Insular Areas Authorization, was considered; June 5, general pair; passed, 344–2.

No. 412 H.R. 12481, to authorize appropriations for certain insular areas of the United States; June 5, general pair; passed, 292–54.

No. 414 To suspend the rules and pass: H.R. 8394, amended, to provide for payments to local governments based upon the acreage of the National Wildlife Refuge System which is within their boundaries; June 6, general pair; passed, 340–28.

No. 415 To suspend the rules and pass: H.R. 12637; amended, to amend the North Pacific Fisheries Act of 1954; June 6, general pair, passed, 368–0.

No. 416 To suspend the rules and pass: H.R. 12668, amended, to establish a conservation program for the living marine resources of the Arctic and Southern oceans; June 6, general pair, passed, 2c8–103.

No. 417 H. Res. 1205, the rule under which H.R. 12240, Intelligence Authorization, was considered; June 6, general pair, passed, 322–48.

No. 418 Amendment offered by Mr. Weiss to H.R. 12240, Intelligence Authorization, that sought to strike the language requiring the attorney general to notify the House and Senate Permanent Select Committes on Intelligence of each admission of an alien which the attorney general has reason to believe is excludable under certain provisions of the Immigration and Naturalization Act; June 6, absent, failed, 60–312.

No. 419 H.R. 12240, to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System; June 6, General pair, passed, 323–43.

No. 420 H. Res. 1206, the rule providing for the consideration of H.R. 12426, NYC Financial Assistance; June 6, general pair, passed, 339–21.

No. 422 H. Con. Res. 561, authorizing the printing as a House document the folder "The United States Capitol"; June 7, yes, passed, 349–24.

No. 423 S. Con. Res. 89, authorizing the printing of additional copies of volume II of the Senate hearings entitled "Korean Influence Inquiry"; June 7, yes, passed, 329–50.

No. 424 H. Res. 1218, the rule waiving certain points of order against H.R. 12930, Treasury-Postal Service Appropriations; June 7, yes, passed, 376–1.

No. 425 Amendment offered by Mr. McClory to H.R. 12930, Treasury-Postal Service Appropriations, that sought to increase the appropriation for the Bureau of Alcohol, Tobacco and Firearms by $4.2 million; and sought to strike the prohibition on using funds to enforce the Bureau's rules concerning firearms published on 3/21/78; June 7, no, failed, 80–314.

No. 426 H.R. 12930, making appropriations for the Treasury Department, the U.S. Postal Service. the Executive Office of the President, and certain independent agencies, for the fiscal year ending Sept. 30, 1979; June 7, yes, passed, 297–98.

No. 428 Amendment offered by Mr. Symms to H.R. 12929, Labor-HEW Appropriations, that reduces the appropriation for the Occupational Safety and Health Administration to the 1978 level, a reduction of $28.4 million; June 7, no, passed, 201–179.

No. 431 Motion offered by Mr. Stanton to recommit H.R. 12426, NYC Financial Assistance, for amendment that would extend for 3 years the New York Seasonal Financial Act of 1975, with loan amounts of $2 billion the first year, $1.5 billion the second year, and $800 million the third; June 8, No; failed, 109–291.

No. 432 H.R. 12426, to authorize the Secretary of the Treasury to provide financial assistance for the city of New York; June 8, Yes; passed, 247–155.

No. 433 Amendment offered by Mr. Michel to H.R. 12929, Labor-HEW Appropriations, that reduces appropriations for HEW by $1 billion, limited to those areas in which fraud, abuse and waste have been defined and cited; June 8, Yes; passed, 290–87.

No. 434 H.J. Res. 945, making an urgent supplemental appropriation for the black lung program of the Department of Labor for the fiscal year ending September 30, 1978; June 9, Yes; passed, 237–72.

No. 437 To suspend the rules and agree to: H. Con. Res. 612, condemning violations of rights by the Government of the Republic of Uganda and urging the President to take certain actions with respect to those violations; June 12, Yes; passed, 377–0.

No. 438 To suspend the rules and pass: H.R. 12441, to amend the Toxic Substances Control Act to increase the authorization of appropriations contained in such act; June 12, Yes; failed, 190–188 (required a two-thirds vote).

No. 439 Amendment offered by Mr. Shuster to H.R. 12933, Transportation Appropriations, that prohibits the use of funds to implement or enforce any standard or regulation which requires vehicles to be equipped with occupant restraint systems, other than belt systems; June 12, Yes; passed, 237–143.

No. 440 Amendment offered by Mr. Eckhardt to H.R. 12933, Transportation Appropriations, that sought to ensure that funds could be used for research and development of occupant restraint systems and that funds could be used in connection with any court action with respect to any standard or regulation concerning such systems; June 12, Yes; failed, 180–194.

No. 441 H.R. 12933, making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1979; June 12, Yes; passed, 347–25.

No. 443 Amendment offered by Mr. Stokes to H.R. 12929, Labor-HEW Appropriations, that sought to strike the language in the bill restricting the use of funds for abortion; June 13, Yes; failed, 122–287.

No. 444 Democratic compromise amendment offered by Mr. Wright to H.R. 12929, Labor-HEW Appropriations, that sought to substitute the compromise language restricting use of funds for abortions that was agreed to by the House and Senate last year for the abortion provisions in the bill; June 13, Yes; failed, 198–212.

No. 445 Amendment offered by Mr. Walker to H.R. 12929, Labor-HEW Appropriations, that prohibits the use of funds to issue or enforce any ratio, quota, or other numerical requirement related to race, creed, color, national origin, or sex with respect to hiring, promotion, and admissions policies; June 13, yes; passed, 232–177.

No. 446 Amendment offered by Mr. Miller of Ohio to H.R. 12929, Labor-HEW Appropriations, that reduces total appropriations not required by law by 2%; June 13, no; passed, 220–181.

No. 447 Separate vote on amendment that had been offered by Mr. Symms to H.R. 12929, Labor-HEW Appropriations, that sought to reduce the appropriation for OSHA by $28.4 million (this amendment had been agreed to in the Committee of the Whole on June 7 (Roll 428)); June 13, no; failed, 184–216.

No. 448 H.R. 12929, making appropriations for the Departments of Labor and Health, Education, and Welfare, and related agencies for the fiscal year ending September 30, 1979; June 13, yes; passed, 338–61.

No. 451 Amendment offered by Mr. Beard of Tennessee to H.R. 12934, SJCJ Appropriations, that prohibits the use of Commerce Dept. funds for promoting or conducting trade relations with Cuba; June 14, no; passed, 241–158.

No. 452 Amendment offered by Mr. Rousselot to H.R. 12934, SJCJ Appropriations, that sought to reduce the appropriation to the Legal Services Corp. by $30 million; June 14, no; failed, 200–203.

No. 453 Amendment offered by Mr. Moorhead to H.R. 12934, SJCJ Appropriations, that prohibits the use of funds appropriated to the Legal Services Corp. for publicity or propaganda purposes designed to support or defeat legislation pending before Congress or any state legislature; June 14, yes; passed, 264–131.

No. 454 H.R. 12934, making appropriations for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies for the fiscal year ending September 30, 1979; June 14, yes; passed, 359–34.

No. 455 Amendment offered by Mr. Conte to H.R. 12935, Legislative Branch Appropriations, that reduces appropriations not required by law by 5%; June 14, yes; passed, 220–168.

No. 456 Amendment offered by Mr. Anderson of Illinois to H.R. 12935, Legislative Branch Appropriations, that sought to prohibit use of funds to purchase new color television cameras and related equipment for broadcasting House proceedings except by prior approval of the House; June 14, no; failed, 133–249.

No. 457 Amendment offered by Mr. Benjamin to H.R. 12935, Legislative Branch Appropriations, that prohibits use of funds to implement a system for televising House proceedings under which cameras purchased by the House are controlled by persons not employed by the House; June 14, no; passed, 235–150.

No. 458 Amendment offered by Mr. Armstrong to H.R. 12935, Legislative Branch Appropriations, that prohibits use of funds to provide House wall calendars, U.S. Historical Society calendars, USDA yearbooks, plants from the Botanic Garden, and shipping trunks, to members of the House, unless reimbursement for such items is made from members' official expense allowances; June 14, yes; passed, 214–159.

No. 459 H.R. 12935, making appropriations for the Legislative Branch for the fiscal year ending September 30, 1979; June 14, yes; passed, 279–90.

No. 461 H. Res. 1236, the rule waiving certain points of order and providing certain procedures during consideration of H.R. 12928, Public Works-Energy Research Appropriations; June 15, yes; passed, 317–82.

No. 462 Amendments offered by Mr. Jacobs to the amendments offered by Mr. Bevill to H.R. 12928, Public Works, that sought to delete funds for the following projects: Russell Dam, Georgia and South Carolina; Bonneville Unit, Utah; and O'Neill Unit, Nebraska; June 15, no; failed, 108–284.

No. 463 Amendment offered by Mr. Edgar that sought to delete funds for the following 8 water projects: Bayou Bodcau, La.; LeFarge Lake, Wis.; Lukfata Lake, Okla.; Meramec Park Lake, Mo.; Yatesville Lake, Ky.; Fruitland Mesa, Colo.; Narrows Unit, Colo.; and Savery-Pot Hook, Colo.; June 15, no; failed, 142–234.

No. 465 Amendment offered by Mr. Weiss to H.R. 12928, Public Works-Energy Research Appropriations, that sought to prohibit the use of funds for production of enhanced radiation weapons; June 16, yes; failed, 67–259.

No. 466 Motion offered by Mr. Conte that the House recomit H.R. 12928, Public Works-Energy Research Appropriation, with instructions to report it back containing amendment that would reduce total appropriations not required by law by 3%; June 16, yes; failed 93–228.

No. 467 H.R. 12928, making appropriations for public works for water and power development and energy research for the fiscal year ending September 30, 1979; June 16, yes; passed, 263–59.

No. 468 H.R. 12927, making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979; June 16, yes; passed, 278–13.

No. 471 Amendment offered by Mr. Brown of Michigan to H.R. 12936, HUD-Ind. Agencies Appropriation, that sought to decrease appropriations for EPA abatement and control activities by $114.6 million and EPA enforcement activities by $18.9 million; June 19, yes; failed, 173–211.

No. 472 Motion offered by Mr. Miller of Ohio that the House recommit H.R. 12936, HUD-Ind. Agencies Appropriations, for amendment to reduce total appropriations not required by law by 2%; June 19, no; failed, 156–222.

No. 473 H.R. 12936, making appropriations for the Department of Housing and Urban Development and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1979; June 19, yes; passed, 332–47.

No. 474 H. Res. 1230, the rule waiving certain points of order and providing certain procedures during consideration of H.R. 12932, Interior Appropriations; June 21, yes; passed, 353–27.

No. 475 Perfecting amendment offered by Mr. Yates to the amendment offered by Mr. Moffett to H.R. 12932, Interior Appropriation, that sought to provide that not more than $100,000 of funds appropriated to the Economic Regulatory Administration could be used to pay the expenses of parties intervening in proceedings before that body; June 21, yes; failed, 190–221.

No. 476 Amendment offered by Mr. Moffett to H.R. 12932, Interior Appropriation, that sought to strike language prohibiting use of funds appropriated to the Economic Regulatory Administration to pay the expenses of parties intervening in regulatory proceedings before that body; June 21, yes; failed, 126–282.

No. 477 Amendment offered by Mr. Miller of Ohio to H.R. 12932, Interior Appropriations, that sought to reduce total appropriations not required by law by 2%; June 21, yes; failed, 198–211.

No. 478 H.R. 12932, making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979; June 21, yes; passed, 356–50.

No. 479 H. Res. 1212, the rule under which H.R. 11493, Amtrak Improvement Act, is being considered; June 21, yes; passed, 375–25.

No. 482. Amendment offered by Mr. Symms to H.R. 13125, Agriculture Appropriation, that sought to reduce the appropriation for the food stamp program by $290 million; June 22, yes; failed, 194–201.

No. 483 Amendment offered by Mr. Wright to H.R. 13125, Agricultural Appropriation, that prohibits use of funds to finance assistance to Korea under the Food for Peace Program; June 22, yes; passed, 273–125.

No. 484 Amendment offered by Mr. Miller of Ohio to H.R. 13125, Agriculture Appropriations, that sought to reduce total appropriations not required by law by 2%, excluding the appropriations for the Agricultural Research Service, Corp. State Research Service, and the Extension Service; June 22, yes; failed, 189–201.

No. 485 H.R. 13125, making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1979; June 22, yes; passed, 326–59.

No. 486 H.R. 12505, to provide for a research, development, and demonstration program to determine the feasibility of collecting in space solar energy to be transmitted to Earth and to generate electricity for domestic programs; June 22, yes; passed, 267–96.

No. 488. Amendment offered by Mr. Steiger to H.R. 11493, Amtrak Improvement Act, that sought to strike language requiring Amtrak to buy American products for any purchase exceeding $100,000; June 23, yes; failed, 93–207.

No. 489. Amendment, as amended, offered by Mr. Madigan, to H.R. 11493, Amtrak Improvement Act, that sought to require a discontinuance hearing for any passenger train where the federal subsidy exceeds $100 per passenger averaged over a successive 12-month period and that service be instituted

over restructured routes after such hearing, if that route had been restructured prior to January 1, 1978; June 23, no; failed, 119–186.

No. 490. Amendment offered by Mr. Neal to H.R. 11493, Amtrak Improvement Act, that sought to have the U.S. Special Trade Representative advise the Secretary when it would not be in the public interest to require the Corporation to purchase American products; June 23, yes; failed, 121–178.

No. 491. H.R. 11493, to amend the Rail Passenger Service Act to extend the authorization of appropriations for an additional fiscal year and to provide for public consideration and implementation of a rail passenger service study; June 23, yes, passed, 204–89.

No. 493. To suspend the rules and pass: H.R. 10341, to amend title 10, U.S. Code, to authorize reserve enlisted members of the Army and the Air Force to retire with 20 years of service; June 26, yes; passed, 283–35.

No. 494. To suspend the rules and pass: H.R. 10342, to revise the rule for recalculation of military retired or retainer pay to reflect later active duty with respect to later active duty performed between October 1, 1963, and October 1, 1973; June 26, yes; passed, 292–30.

No. 495. To suspend the rules and pass: S. 666, amended, to allow federal employment preference to certain employees of the Bureau of Indian Affairs and to certain employees of the Indian Health Service who are not entitled to benefits of, or who have been adversely affected by the application of, certain federal laws allowing employment preference to Indians; June 26, no; failed, 118–204.

No. 499. Motion that the House refer to the Committee on Post Office and Civil Service the message of the President announcing his veto of H.R. 316, to amend Title 5, U.S. Code, to improve the basic workweek of firefighting personnel of executive agencies, and the accompanying bill; June 28, yes; passed, 279–109.

No. 505. To suspend the rules and pass: H.R. 11886, amended, to amend Ttile 38, U.S. Code, to increase the rates of disability compensation for disabled veterans, and to increase the rates of dependency and indemnity compensation for their survivors; June 28, yes; passed, 400–1.

No. 506. To suspend the rules and pass: H.R. 11888, to amend Title 38, U.S. Code, to change the minimum disability rating a veteran must have in order to receive additional compensation for dependents from 50 per centum to 40 per centum; June 28, yes; passed, 385–16.

No. 507. To suspend the rules and pass: H.R. 10173, to amend Title 38, U.S. Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era; June 28, yes; passed, 398–5.

No. 516. Amendment offered by Mr. Russo to H.R. 12433, Housing and Community Development, that sought to require HUD to provide pre-purchase counseling to first-time home purchasers who apply for FHA mortgage loans; June 29, no; failed, 93–285.

No. 517. H.R. 8099, relating to the settlement between the United States and the Ak-Chin Indian community of certain water right claims of such community against the United States; June 29, yes; passed, 292–80.

No. 519. To suspend the rules and pass: H.J. Res. 613, amended, to authorize and request the president to issue annually a proclamation designating the first Sunday of September after Labor Day of each year as "National Grandparents Day"; July 10, yes; passed, 362–8.

No. 520 To suspend the rules and pass: H.J. Res. 1007, amended, authorizing the president to proclaim a week, which is to include the seventh and tenth of the month, during the first ten days in May of 1979 as "Asian/Pacific American Heritage Week"; July 10, yes; passed, 360–6.

No. 521 To suspend the rules and pass: H.J. Res. 773, authorizing and requesting the president to issue a proclamation designating the seven calendar days beginning September 17, 1978, as "National Port Week"; July 10, yes; passed, 363–11.

No. 522 To suspend the rules and pass: H.R. 13087, to authorize the issuance of substitute Treasury checks without undertakings of indemnity, except as the Secretary of the Treasury may require; July 10, yes; passed, 375–0.

No. 523 To suspend the rules and pass: H.R. 12106, amended, to amend the Independent Safety Board Act of 1974 to authorize additional appropriations; July 10, yes; passed, 340–32.

No. 524 Amendments offered by Mr. Thompson to H.R. 12536, National Parks, that sought to strike language adding the middle Delaware River segment to the Wild and Scenic Rivers System, and to strike language authorizing the Secretary of the Interior to acquire all lands and interests of the Delaware Water Gap National Recreation Area; July 10, no; failed, 110–275.

No. 525 H.J. Res. 1024, making urgent supplemental appropriations for the Department of Agriculture, Agricultural Stabilization Service, for the fiscal year ending September 30, 1978; July 11, yes; passed, 340–48.

No. 526 To suspend the rules and pass: H.R. 11827, amended, to amend the Surface Mining Control and Reclamation Act of 1977 (P.L. 95–87) to raise certain authorized funding levels contained therein; July 11, yes; passed, 323–74.

No. 527 Amendment offered by Mr. Baucus to H.R. 12536, National Parks, that strikes language designating acreage in the Glacier National Park as wilderness and potential wilderness; July 11, yes; passed, 216–181.

No. 528 Amendment offered by Mr. Symms to H.R. 12536, National Parks, that sought to change the boundary of the Hells Canyon National Recreation Area to exclude the Blue Jacket mining area; July 11, no; failed, 147–249.

No. 529 Perfecting amendment offered by Mr. Oberstar to H.R. 12536, National Parks, in regard to language concerning the Upper Mississippi River segments that authorizes the development of a master plan for the administration of the Upper Mississippi and permits Congress to vote on the designation of the Upper Mississippi River segments as part of the Wild and Scenic River System; July 11, no; passed, 205–19?.

No. 530 Amendment offered by Mr. Oberstar to H.R. 12536, National Parks, that sought to strike language removing the St. Croix River from current law limitations on land acquisition by condemnation; July 11, No; failed, 175–218.

No. 532. H.R. 12536, to provide for increases in appropriations ceilings, development ceilings, land acquisition, and boundary changes in certain federal park and recreation areas; July 12, yes; passed, 341–61.

No. 533. Motion to lay on the table an appeal of the ruling of the chair wherein he sustained a point of order against a motion to commit S. Con. Res. 95, condemning the Soviet trials, to the Committee on International Relations for amendment stating that it is the sense of Congress that U.S. representatives to the SALT talks be recalled as further evidence of the commitment of the U.S. to the principles set out in the resolution; July 12, yes; passed, 277–120.

No. 534. S. Con. Res. 95, condemning the trials of Anatoly Scharansky, Viktoras Petkus, and Aleksandr Ilyich Ginzburg; July 12, yes; passed 380–10.

No. 535. H. Con. Res. 599, disapproving the proposed export of low-enriched uranium to India; July 12, no; failed, 181–227.

No. 537. Amendment offered by Mr. Quie to H.R. 15, Education Amendments, that sought to allow local educational agencies who have compensatory education programs to qualify for incentive grants, even if a state program does not exist; July 12 no; failed 150–240.

No. 538. Amendment offered by Mr. Edwards of Oklahoma to H.R. 15, Education Amendments, that sought to retain the provsion in current law that limits the count of AFDC children to two-thirds of such numbers for compensatory education formula purposes; July 12, no; failed 175–212.

No. 539. Motion offered by Mr. Wright to table H.Res. 1267, offered by Mr. McDonald, to impeach Andrew Young; July 12, yes; passed, 293–82.

No. 540. Kildee substitute to the amendment offered by Mrs. Holt to H.R. 15, Education Amendments, that prohibits community education grants for any program being conducted in a community by another public agency unless the Commissioner determines collaboration exists between the local education agency and the public agency; July 13, yes; passed, 197–195.

No. 541. Amendment offered by Mr. Ashbrook in the nature of a substitute to the committee substitute that sought to provide block grants for all federal aid to education programs, distribute funds to states based on the number of children enrolled, and permit states to spend the funds to improve education pursuant to state law; July 13, no; failed, 79–290.

No. 542. H.R. 15, to extend for five years education programs; July 13, yes; passed, 350–20.

No. 544 Amendment offered by Mr. Flowers to H.R. 12163, DOE Research and Development Authorizations, that sought to authorize the secretary to complete only the systems design and component testing on the Clinch River Breeder Reactor Project, to conduct a study on an advanced breeder reactor facility utilizing the uranium/plutonium and uranium/thorium fuel cycles, and to prepare a detailed program plan for

the Liquid Metal Fast Breeder Reactor Base Technology Program; July 14, no; failed, 142–187.

No. 545 Amendment offered by Mr. Flowers to H.R. 12163, DOE Research and Development Authorizations, that authorizes $75 million for a coal liquefaction demonstration plant; July 14; yes; passed, 165–132.

No. 547 To suspend the rules and pass: H.R. 12028, amended, to amend Title 38, U.S. Code, to improve the housing programs of the Veterans Administration; July 17; yes; passed, 373–0.

No. 548 To suspend the rules and pass: H.R. 12232, to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation; July 17; yes; passed, 300–81.

No. 549 To suspend the rules and pass: H.R. 12380, to amend the Federal-State Extended Unemployment Compensation Act of 1970 with respect to an individual's eligibility period for benefits under such act; July 17; yes; passed, 381–4.

No. 550 To suspend the rules and pass: H.R. 10848, amended, to amend Title VI of the Social Security Act to provide that an individual who applies for supplemental security income benefits on the basis of disability shall be considered presumptively disabled if he has received social security or supplemental security income benefits as a disabled individual within the preceding 5 years; July 17; yes; passed, 351–32.

No. 552. Motion offered by Mr. Fish that the House recommit to the Committee on Science and Technology H.R. 12163, DOE Research and Development Authorizations, for an amendment that would authorize the secretary to complete only the systems design and component testing on the Clinch River Breeder Reactor Project; July 17; no; failed, 157–238.

No. 553 H.R. 12163, to authorize appropriations to the Department of Energy in accordance with Section 261 of the Atomic Energy Act of 1954, Section 305 of the Energy Reorganization Act of 1974, Section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and Section 660 of the Development of Energy Reorganization Act, for energy research and development; July 17, yes; passed, 325–67.

No. 558 To suspend the rules and pass: H.R. 12443, amended, to amend the Immigration and Nationality Act, as amended, and to establish a Select Commission on Immigration and Refugee Policy; July 18, yes; passed, 396–20.

No. 559 To suspend the rules and pass: H.R. 12508, to amend the Immigration and Nationality Act to facilitate the admission into the U.S. of more than two adopted children and to provide for the expeditious naturalization of adopted children; July 18, yes; passed, 413–0.

No. 560 To suspend the rules and pass: H.R. 12252, to amend title 38 of the U.S. Code in order to require the administrator of Veterans' Affairs to pay a $150 allowance to any state or any agency or political subdivision of a state in reimbursement for expenses incurred in the burial of each veteran in any cemetery owned by such state or agency or political subdivision of a state, if the cemetery or section thereof is used solely for the interment of veterans; July 18, yes; passed, 407–9.

No. 561 To suspend the rules and pass: H.R. 12011, to amend the U.S. Code in order to provide for a continuation of the authority of the administrator of Veterans' Affairs to furnish hospital care to certain veterans living in a state, territory, commonwealth, or possession of the U.S. not contiguous to the 48 contiguous states; July 18, yes; passed, 415–0.

No. 562 To suspend the rules and pass: H.R. 11891, to amend title 38, U.S. Code, to provide for a two-step aid and attendance compensation payment system for certain severely disabled veterans; July 18, yes; passed, 418–0.

No. 563 To suspend the rules and pass: H.R. 6075, amended, to amend title VII of the Civil Rights Act of 1964 to prohibit sex discrimination on the basis of pregnancy; July 18, yes; passed, 376–43.

No. 564 To suspend the rules and pass: H.J. Res. 738, amended, American Indian Religious Freedom; July 18, yes; passed, 337–81.

No. 566 H.R. 1609, to amend the Mineral Leasing Act of 1920 (Coal Slurry Pipeline); July 19, yes; failed, 161–246.

No. 567 To order the previous question on H. Res. 1172, the rule under which H.R. 11983, Federal Election Commission Authorizations, was considered; July 19, no; passed, 231–196.

No. 568 H.R. 11983, to amend the Federal Election Campaign Act of 1971 to extend the authorization of appropriations contained in such act; July 19, yes; passed 366–37.

No. 569 H. Res. 1277, the rule under which H.R. 13385, Temporary Public Debt Limit, was considered; July 19, yes; passed, 303–98.

No. 570 Amendment offered by Mr. Vanik to H.R. 13385, Temporary Public Debt Limit, that reduces the temporary increase by $16 billion, from $414 to $398 billion; July 19. yes; passed, 363–37.

No. 571 H.R. 11385, to provide for a temporary increase in the public debt limit; July 19, yes; passed, 205–202.

No. 572 To order the previous question on the motion to recommit to the conference committee the conference report on H.R. 11504, Agricultural Credit Act; July 19, no; passed, 282–105.

No. 573 Conference report on H.R. 11504, to amend the Consolidated Farm & Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the U.S., and extend the Emergency Livestock Credit Act, clearing for Senate; July 19, yes; passed, 362–28.

No. 575 Amendment offered by Mr. Moss to H.R. 13467, Second Supplemental Appropriations, that strikes the $15 million appropriation for the Center for Disease Control for the influenza vaccination program and instead appropriates $3 million to NIH for research and clinical activities related to the influenza vaccination program; July 20, yes; passed, 268–17.

No. 576 Amendment offered by Mr. Gore to H.R. 13467, Second Supplemental Appropriations, that sought to increase impact aid appropriations by $26 million for pinpoint disaster assistance for schools; July 20, no; failed, 166–233.

No. 577 Amendment offered by Mr. McHugh to H.R. 13467, Second Supplemental Appropriations, that sought to increase appropriations for disaster assistance for schools from $5 million to $14.9 million, with the intention that the funds should not be used for pinpoint disaster applications in an amount less than $200,000; July 20, no; failed, 156–237.

No. 578 Amendment offered by Mr. Crane to H.R. 13467, Second Supplemental Appropriations, that sought to delete the $275,000 appropriation for the U.S. Metric Board; July 20, no; failed, 75–302.

No. 579 Amendment offered by Mr. Miller of Ohio that reduces total appropriations for payments not required by law by 2%; July 20, no; passed, 256–114.

No. 580 H.R. 13467, making supplemental appropriations for the fiscal year ending September 30, 1978; July 20, yes; passed, 311–60.

No. 582 Amendment offered by Mr. Abdnor to H.R. 12433, Housing and Community Development Amendments, that sought to prohibit use of funds for the reorganization or transfer of any function of any area, field, or insuring office relating to multi-family housing or community planning or development; July 21, no; failed, 133–160.

No. 583 Amendment offered by Mr. Brown of Michigan to H.R. 12433, Housing and Community Development Amendments, that sought to strike provisions requiring that FAIR insurance rates be no higher than those set by the principal state-licensed rating organization for essential property insurance on the private market; July 21, no; failed, 119–185.

No. 584 Amendment offered by Mr. Duncan to H.R. 12433, Housing and Community Development Amendments, that prohibits Social Security increases occurring after May 1978 from being considered as income for purposes of determining eligibility for, or amount of assistance available to, any recipient under public housing laws; July 21, yes; passed, 256–38.

No. 585 H.R. 12433, to amend and extend certain federal laws relating to housing, community and neighborhood development and preservation, and related programs, July 21, yes, passed, 270–26.

No. 586 H.R. 13468, making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against revenues of said district for the fiscal year ending September 30, 1979, July 21, yes; passed, 215–32.

No. 588 To suspend the rules and pass: H.J. Res. 946, to designate October 7, 1978, as "National Guard Day", July 24, yes; passed, 264–10.

No. 590 To suspend the rules and pass: H.R. 11823, to amend section 1331(c) of title 10, U.S. Code, to allow certain otherwise ineligible reservists to become eligible for retired pay, July 25, yes; passed, 390–8.

No. 591 To suspend the rules and pass: H.R. 12349, amended, to provide for the DuNoir Basin Addition to the Washakie Wilderness, July 25, yes; passed, 372–22.

No. 592 To suspend the rules and pass: H.R. 12973, amended, Social Services Amendments of 1978, July 25, yes; passed, 346–54.

No. 593 To suspend the rules and pass: H.R. 11889, to amend title 38, U.S. Code, to increase from $100 to $200 the monthly rate of special pension payable to each person who has been awarded the Medal of Honor, July 25, yes; passed, 394–4.

No. 594 To suspend the rules and pass: H.R. 11890, amended, to amend title 38 of the U.S. Code to provide that the survivors of a veteran who was rated totally and permanently service-connected disabled for a period of at least ten years would be entitled to dependency and connected disability, July 25, yes; passed, 393–9.

No. 595 Conference report on H.R. 12426, to authorize the Secretary of the Treasury to provide financial assistance to the city of New York, clearing for Senate action, July 25, yes; passed, 244–157.

No. 596 Conference report on H.R. 11877, to authorize appropriations for fiscal year 1979 for the Peace Corps and to make certain changes in the Peace Corps Act, clearing for the President, July 25, yes; passed, 276–120.

No. 598 Amendment offered by Mr. Baldus to H.R. 10285, Commodity Exchange Act Extension, that sought to permit states to pass and enforce state laws identical to those in the Commodity Exchange Act; July 26, no; failed, 141–260.

No. 599 Amendment offered by Mr. Smith to H.R. 10285, Commodity Exchange Act Extension, that requires the reporting of export sales to the commission within 48 hours and requires the commission to then make this

information public; July 26, no; passed, 273–125.

No. 600 H.R. 10285, to extend the Commodity Exchange Act, as amended, for four years; July 26, yes; passed, 401–6.

No. 601 Breaux substitute to the amendment offered by Mr. Udall to H.R. 3350, Seabed Mining, that gives the Commerce Department jurisdiction over deep seabed mining operations; July 26, no; passed, 214–184.

No. 602 Amendment offered by Mr. McCloskey to H.R. 3350, Seabed Mining, that sought to require applicants for licenses and permits to submit comprehensive work plans; July 26, yes; failed, 199–202.

No. 603 H.R. 3350, to promote the orderly development of hard mineral resources in the deep seabed, pending adoption of an international regime relating thereto; July 26, yes; passed, 312–80.

No. 604 Amendment offered by Mr. Goodling to H.R. 7577, Economic Opportunity Act Amendments, that sought to retain the ratio of federal/state assistance contributions to community service agencies at 60% of federal/40% state; July 26, no; failed, 158–224.

No. 605 H.R. 7577, to amend the Economic Opportunity Act of 1964; July 26, yes; passed, 346–38.

No. 606 S. Con. Res. 98, relating to adjournment to a date certain during the remainder of the 95th Congress, clearing measure (Aug. dist. wk. per.); July 27, yes; passed, 302–44.

No. 608 Amendment offered by Mr. Long of Maryland to H.R. 12157, Eximbank, that sought to prohibit the bank from financial transactions to establish or expand the production of commodities, unless the President certifies the commodity is not in surplus and its import would not substantially injure U.S. firms and employees producing the same or competing commodity; July 27, no; failed, 197–199.

No. 609 Amendment offered by Mr. Harkin to H.R. 12157, Eximbank, that sought to prohibit the bank from participating in transactions with countries which the secretary of state determines engage in a consistent pattern of gross violations of internationally recognized human rights; July 27, no; failed, 103–286.

No. 610 Amendment offered by Mr. Brown of Michigan to H.R. 12157, Eximbank, that sought to prohibit the bank from participating in transactions unless the purchaser of exports endorses certain fair and equal employment principles; July 27, no; failed, 90–288.

No. 611 Amendment offered by Mr. Cavanaugh to H.R. 12157, Eximbank, that sought to require the bank to submit an evaluation to Congress, based on an analysis by the Nuclear Regulatory Commission, describing safety standards and nuclear practices of any country in which the bank enters into transactions involving the sale of nuclear reactors; July 27, no; failed, 106–266.

No. 612 H.R. 12157, to amend and extend the Export-Import Bank Act of 1945; July 27, yes; passed, 314–47.

No. 613 Motion that the House resolve itself into the Committee of the Whole for further consideration of H.R. 9400, Civil Rights of Institutionalized Persons; July 28, yes; passed, 304–4.

No. 614 H.R. 9400, to authorize actions for redress in cases involving deprivations of rights of institutionalized persons secured or protected by the Constitution or laws of the U.S.; July 28, yes; passed, 254–69.

No. 616 Amendment offered by Mr. Butler to H.R. 12432, Civil Rights Commission, that sought to delete provisions giving the Commission authority to study discrimination based on age or handicap status; July 28, no; failed, 87–224.

No. 617 Amendment offered by Mr. Butler to H.R. 12432, Civil Rights Commission, that prohibits the use of funds by the Commission to influence the passage or defeat of legislation before Congress or state legislatures, except when the Commission is requested to give an opinion; July 28, no; passed, 159–125.

No. 619 To suspend the rules and pass: H.R. 9998, amended, to provide for the regulation of rates or charges by certain state-owned carriers in the foreign commerce of the U.S.; July 31, yes; passed, 329–6.

No. 620 H. Res. 1286, the rule under which H.R. 12514, International Security Assistance Act (Foreign Aid Authorization) is being considered; July 31, yes; passed, 323–21.

No. 621 H. Res. 1247, the rule waiving certain points of order and providing certain procedures during consideration of H.R. 12931, Foreign Assistance Appropriations; July 31, yes; passed, 265–84.

No. 624 To suspend the rules and pass: H.R. 12972, amended, to amend title XVI of the Social Security Act to remove certain work disincentives for the disabled under the supplemental security income benefits program; August 1, yes; passed, 399–4.

No. 625 To suspend the rules and pass: H.J. Res. 963, amended, designating July 18, 1979, as "National P.O.W.–M.I.A. Recognition Day"; August 1, yes; passed, 401–2.

No. 626 H.R. 4030, to amend the Internal Revenue Code of 1954 to increase the amount of the stock which certain private foundations may hold in certain public utilities without being subject to the excise tax on excess business holdings; August 1, yes; passed, 317–86.

No. 627 Amendment offered by Mr. Wright to the amendment offered by Mr. Fascell to H.R. 12514, Foreign Aid Authorization, that lifts the embargo on arms shipments to Turkey upon the President's certification to Congress that it is in the national interest of the U.S. and NATO to do so, and that Turkey is acting in good faith to achieve a just settlement of the Cyprus problem, the early peaceable return of refugees to their homes, continued removal of Turkish troops from Cyprus, and the early resumption of intercommunal talks; August 1, no; passed, 208–205.

No. 628 Amendment offered by Mr. Derwinski to the amendment offered by Mr. Stratton to H.R. 12514, Foreign Aid Authorization, that expresses the sense of Congress that further withdrawal of ground forces from Korea may risk upsetting the military balance in that region, and that requires the President to report to Congress on the effect of any proposed withdrawal plan on preserving deterrence in Korea; August 1, yes; passed, 212–189.

No. 629 Amendment offered by Mr. Stratton, as amended by the Derwinski substitute, to H.R. 12514, Foreign Aid Authorization; August 1, no; passed, 279–117.

No. 631 Amendment offered by Mr. Stark to H.R. 12514, Foreign Aid Authorization, that sought to prohibit delivery of defense articles or services to Chile pursuant to any sale made before the enactment of this act; August 2, yes; failed, 146–260.

No. 632 Motion offered by Mr. Zablocki to limit debate on the amendment offered by Mr. Harkin to H.R. 12514, Foreign Aid Authorization, relating to cutting off aid to Chile; August 2, yes; failed, 171–228.

No. 633 Amendment offered by Mr. Jacobs to H.R. 12514, Foreign Aid Authorization, that sought to prohibit use of funds to provide military assistance to the Republic of Korea until Kim Dong Jo had given testimony to the Committee on Standards of Official Conduct; August 2, yes; failed, 147–257.

No. 643 Findley amendment to the Zablocki amendment offered as a substitute to the Bauman amendment to H.R. 12514, Foreign Aid Authorization, that sought to prohibit the enforcement of sanctions against Rhodesia before October 1, 1979, but provided that the president could reimpose sanctions if he determined that the government of Rhodesia had refused to participate and negotiate in good faith at an all-parties conference or had failed to schedule for free elections; August 2, no failed, 176–229.

No. 635 Ichord amendment to the Zablocki amendment offered as a substitute to the Bauman amendment to H.R. 12514, Foreign Aid Authorization, that prohibits the enforcement of sanctions against Rhodesia after December 31, 1978, unless the president determines that a government has not been installed, chosen by free elections in which all political groups have been allowed to participate freely; August 2, No; passed, 229–180.

No. 636 Separate vote on the amendment offered by Mr. Harkin to H.R. 12514, Foreign Aid Authorization, that sought to prohibit delivery of defense articles or services to Chile pursuant to previous sales, until the government of Chile turns over to U.S. custody those Chileans indicted for the murders of Orlando Letelier and Ronni Moffitt; August 2, yes; failed, 166–243.

No. 637 H.R. 12514, to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize international security assistance programs for the fiscal year 1979; August 2, yes; passed, 255–156.

No. 638 Amendment offered by Mr. Young of Florida to H.R. 12931, Foreign Aid Appropriation, that sought to strike $49 million in appropriations for foreign assistance for the purchase of rupees to be used in India; August 2, no; failed 194–200.

No. 639 Amendment offered by Mr. Young of Florida to H.R. 12931, Foreign Aid Appropriation, that sought to reduce appropriations for the U.N. Development Program by $6.8 million; August 2, no; failed, 189–202.

No. 640 Amendment offered by Mr. Derwinski to H.R. 12931, Foreign Aid Appropriations, that strikes the $90 million in economic support fund appropriations earmarked for Syria; August 2; yes; passed, 280–103.

No. 642 Amendment offered by Mr. Ryan to H.R. 12931, Foreign Aid Appropriations, that sought to reduce military assistance appropriations for the Philippines by $5 million; August 3, yes; failed, 142–264.

No. 643 Amendment offered by Mr. Ashbrook to H.R. 12931, Foreign Aid Apropriations, that sought to strike the appropriation for military education and training assistance to Afghanistan; August 3, no; failed, 152–236.

No. 644 Amendment offered by Mr. Harkin to the amendment offered by Mr. Young of Florida (See text of Roll No. 645) to H.R. 12931, Foreign Aid Appropriations, that sought to prohibit also indirect aid to Chile, Argentina, Uruguay, Korea, Nicaragua, Indonesia, and the Philippines; August 3, no; failed, 41–360.

No. 645 Amendment offered by Mr. Young of Florida to H.R. 12931, Foreign Aid Appropriations, that sought to prohibit use of funds to provide indirect aid to Uganda, Cambodia, Laos, or the Socialist Republic of Vietnam; August 3, no; failed, 198–203.

No. 646 Amendment offered by Mr. Harkin to H.R. 12931, Foreign Aid Appropriations, that reduces total appropriations not required by law for Foreign Assistance Act activities by 2%, except for economic support funds for Israel, Egypt, and Jordan; August 3, yes; passed, 293–52.

No. 648 Amendment offered by Mr. Harkin, as amended by the Obey substitute, to H.R.

12931, Foreign Aid Appropriations, that reduces Foreign Military Credit Sales appropriations by $12.6 million and that provides that not more than $2.5 million of the appropriations shall be available for Lebanon and not more than $8.5 million shall be available to Jordan; August 4, yes; passed, 300–29.

No. 649 H. Res. 1291, the rule waiving certain points of order against H.R. 13635, DOD Appropriations; August 4, yes; passed, 330–7.

No. 650 Motion that the House resolve itself into the Committee of the Whole for further consideration of H.R. 13635, DOD Appropriations; August 7, yes; passed, 320–6.

No. 651 Amendment offered by Mr. Montgomery that increases the appropriations for the incentive programs of the Reserve and Guard components by $15.5 million; August 7, yes; passed, 257–121.

No. 652 Amendment offered by Mr. Volkmer that sought to reduce appropriations not required by law for military personnel by 2 percent; August 7, no; failed, 53–327.

No. 653 Amendment offered by Mr. Dickinson that increases Army operation and maintenance appropriations by $18 million; August 7, yes; passed, 252–128.

No. 654 Amendment offered by Mr. Yates that sought to strike the $2.1 billion appropriation for the CVN–71 nuclear aircraft carrier program; August 7, no; failed, 156–218.

No. 656 Amendment offered by Mr. Giaimo, as amended by the Heckler substitute, to H.R. 13635, DOD Appropriations, that sought to strike the $3 million appropriation for the development by the Army of the AVCR–1360 diesel engine for application in future Army and/or Marine Corps combat vehicles, and to increase the appropriation for the Army's food research progams by $1 million; August 8, no; failed, 107–269.

No. 657 Amendment offered by Mrs. Heckler to DOD Appropriations that sought to increase the appropriation for the Army's food research programs by $1 million; August 8, no; 103–277.

No. 658 Amendment offered by Mr. Howard to Defense Appropriations that sought to permit up to 10% of the appropriated funds for contracts to be used for payments under contracts in labor surplus areas; August 8, yes; failed, 165–213.

No. 659 Amendment offered by Mr. Brown of Michigan to the Defense Appropriations bill that sought to prohibit use of funds for procurement of tactical support, or tracked or nontracked vehicles not manufactured in the U.S. or its possessions, except for test and evaluation purposes; August 8, no; failed, 72–302.

No. 660 Amendment offered by Mr. Conte to the Defense Appropriations bill that strikes language establishing a limitation on the Competitive Rate Program for the transportation of household goods; August 8, no; passed, 269–96.

No. 661 Amendment offered by Mr. Mitchell of Maryland, as a substitute for the amendment offered by Mr. Harkin, to the Defense Appropriations bill that sought to reduce total appropriations in the bill not required by law by one percent; August 8, no; failed, 136–222.

No. 662 Amendment offered by Mr. Harkin to the Defense Appropirations bill that sought to reduce total appropriations in the bill not required by law by 2 percent; August 8, No; failed, 102–252.

No. 664. Amendment offered by Mr. Dornan, as amended, to the Defense Appropriations bill, that prohibits use of funds to pay for abortions except where the life of the mother would be in danger if the fetus were carried to term; August 9, no; passed, 226–163.

No. 665. H.R.13635, making appropriations for the Department of Defense for the fiscal year ending September 30, 1979; August 9, yes; passed, 339–60.

No. 666 Conference report on H.R. 2777, National Consumer Cooperative Bank Act, clearing the measure for the President; August 9, no; passed, 236–164.

No. 667 H. Res. 1201, to disapprove Reorganization Plan Numbered 2 transmitted by the President on May 23, 1978 (Civil Service Reorganization); August 9, no; failed, 19–381.

No. 670 Amendment, as amended, offered by Mr. Cornell, to H.R. 12452, CETA Amendments, that requires the Secretary to revoke all or part of a prime sponsor's funds if a public service employment program is being conducted in violation of the provisions in the act and requires the prime sponsor to refund to the Treasury all funds found to have been expended; August 9, yes; passed, 407–1.

No. 671 Amendment offered by Mr. Goodling to the Krebs substitute to the Erlenborn amendment to the CETA Amendments that sought to make payment of unemployment insurance benefits by prime sponsors for persons in public service jobs optional rather than mandatory; August 9, no; failed, 197–211.

No. 672 Amendment offered by Mr. Ashbrook to the amendment, as modified offered by Mr. Krebs as a substitute for the Erlenborn amendment to the CETA Amendments that sought to prohibit use of funds for retirement contributions after July 1, 1979; August 9, no; passed, 209–194.

No. 673. Amendment offered by Mr. Erlenborn to the CETA Amendments that prohibits the use of CETA funds for contributions to retirement plans after January 1, 1980; August 9, no; passed, 254–140.

No. 674 Amendments offered by Mr. Obey to the CETA Amendments that set a limit of $12,000 for any CETA job in high-wage areas and $10,000 in low-wage areas and set the average wage level at $7,000, which can be adjusted annually by a percentage not to exceed the percentage change in the Consumer Price Index; August 9, no; passed, 230–175.

No. 675 Amendment offered by Mr. Jeffords to the CETA Amendments that places a $3.2 billion ceiling on public service employment except during periods of critically high unemployment and emphasizes youth employment by shifting authorizations from public service to youth programs and programs for private sector opportunities for the economically disadvantaged; August 9, no; passed, 221–181.

No. 676 Amendment offered by Mr. Maguire to the CETA Amendments that provides standards for allowable expenditures by prime sponsors for legal or other associated services; August 9, yes; passed, 200–198.

No. 678 To order the previous question on H. Res. 1306, the rule under which H.R. 13511, the Revenue Act (tax reform bill), was considered; August 10, no; passed, 284–130.

No. 679 Committee amendments (except for section 404, Archer amendment) to H.R. 13511, the Revenue Act; August 10, yes; passed, 409–1.

No. 680 Committee amendment (section 404) offered by Mr. Archer to the Revenue Act that adds language indexing capital gains to the rate of inflation, beginning in 1980; August 10, yes; passed, 249–167.

No. 681 Amendment offered by Mr. Vanik in the nature of a substitute for H.R. 13511, Revenue Act, that sought to extend four tax provisions due to expire at the end of the year; August 10, no; failed, 57–356.

No. 683 Amendment offered by Mr. Corman to H.R. 13511, the Revenue Act that sought to increase the size of the total individual tax reductions by $2 billion and to provide for a graduated alternative minimum tax on capital gains; August 10, yes; failed, 193–225.

No. 684 Motion offered by Mr. Kemp to recommit the Revenue Act with instructions to report it back containing an amendment to provide an across-the-board cut in individual income taxes, averaging 33 percent phased in over three years; August 10, yes; failed, 177–240.

No. 685 H.R. 13511, to amend the Internal Revenue Code of 1954 to reduce income taxes; August 10, yes; passed, 362–49.●

FURTHER UNDERLYING CURRENTS OF PROPOSITION 13

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BROWN of California. Mr. Speaker, proposition 13's recent passage in California demonstrates that our citizens are angry enough to demand drastic changes in their government. There are numerous and sometimes conflicting reasons why people voted for the Jarvis-Gann initiative. One major reason is our Government's inability to solve the interconnected problems of inflation and unemployment. The various band-aid programs we politicians have set up now fail even to cover the symptoms of the problem.

Inflation is once more rapidly rising while unemployment, especially among the young and black, continues to remain abominably high. Tax rates are increasing, as with social security costs, and people are being pushed into higher income tax brackets. Inflation is particularly out of hand with property values and taxes. While proposition 13 was specifically a property tax relief measure, and many people have tried to limit its importance to that issue, the real problem goes far beyond inflated property values. It touches at the very heart of our modern economic system. I believe the initiative was in part a call for us to go beyond band-aids and solve the core structural causes of inflation and unemployment.

We all know the effects of inflation and how it hurts poor and fixed income people. Economists and other experts disagree, however, on the causes of inflation. Commonsense should give us some clues, though, as to why a dollar does not buy as much as it used to, at least in the long run perspective. It is a fact that the standard "good life" today involves much more material consumption than it once did.

The profusion of "necessary" gadgets in our society is historically amazing. We seem to need more elaborate cars, with former luxury items now standard, color televisions instead of black and whites, stereo consoles, dishwashers, garbage compactors, electronic calculators, digital wrist watches and more. The list of our new "needs" is continually expanding. The devices are increasingly complex and require a great deal more investment, skilled labor and other higher input costs.

I can almost guarantee you, Mr. Speaker, that when something new comes out it replaces something less expensive and simpler to understand. Furthermore, the demand for resources and labor to manufacture these new goods pushes up

the input costs, and thus the consumer prices, of other goods and services. This result together with greater per capita demand for consumer goods and the increased population of this Nation has produced a great multiplier effect that has put a crunch on many of our limited resources. This is specifically true where the increased demand is not offset by any increases in productivity of capital, labor or resource utilization. A major example is land, which is needed for new factories, offices, homes, roads, recreation facilities, and more.

Speculators have rushed in to maximize their personal gain. This of course even further inflates land values. The higher real estate prices enter in as higher input costs for goods and services and thus fuel another part of the overall inflation fires. It especially affects the costs of basic human needs, such as food, clothing and shelter, on which the poor spend the greatest portions of their incomes.

Our new gadgets tend to be much more energy intensive both in their manufacture and use than older products. The electric toothbrush, canopener, knife and so forth save little time, but they substitute inefficiently and expensive electric power for cheap and efficient human power. Furthermore, the electric power is usually centrally generated and controlled by regional monopolies, and distributed over large, complex and sometimes unstable networks. The generation facilities are in turn dependent for fuel either on vanishing resources (oil to crisis situations like the 1973 oil and gas) sometimes provided by unreliable suppliers over long and easily interuptable supply lines controlled by multinational corporations, or on resources frought with yet unclear health and environmental hazards (coal and nuclear). We are thus much more open to crisis situations like the 1973 oil embargo and subsequent quadrupling of oil prices. This crisis might not have occured if we had more decentralized energy production, such as solar energy offers us. Now, every OPEC price increase adds a multitude of additional inflationary costs.

The next facet of the problem is the employment situation. People are tired of politicians' promises and seeing millions of dollars spent on programs that have little effect. The fact of the matter is that we have a two-tiered employment problem. There is still a great demand for skilled workers. Our modern gadgets must be built by increasingly skilled labor forces. Their wages and salaries are high and even growing more so. They are able to demand indexing and other raises to cope with inflation even though this input cost itself becomes a part of inflation. I would like to here include part of an ad I found in a recent edition of the Washington Post. This is a perfect example of the general direction the job market is likely to take:

Engineers are in short supply. That's a troubling sign in these technological times. It's a matter of special concern to us as a high-technology company built on engineering excellence.

The demand for engineers of all kinds has been rising for the past several years, and acute shortages are beginning to develop. Some people believe the shortages may become chronic.

We're troubled about this because engineering is our basic discipline. It lies at the heart of nearly all we do. We employ thousands of engineers. They help us design, develop, manufacture, market, service, and support our products. These include jet engines, helicopters, elevators and escalators, electrical and electronic equipment, flight and space systems, industrial gas turbines, and other precision-engineered equipment.

We need engineers to help keep us in the forefront of advanced technology. We're maintaining and strengthening our leadership in managing technology through heavy investments, year after year, in company-funded research and development.

Last year, our R&D investment was $368 million. That's more than $1 million a day, every day of the year. Of the top ten U.S. corporations in R&D spending, we rank No. 1 in such expenditures as a percentage of sales. Our sales last year were over $5.5 billion.

We look on R&D as an investment in our business future. It enables us to have technology and products ready to meet the needs of our worldwide markets in the years ahead.

But it takes more than money to stay out front in technology. It also takes talent. We want to hire experienced mechanical, aeronautical, electrical, electronic, chemical and materials engineers with the skills we need to help us achieve our goals.

The demand for semi- and unskilled workers, however, is shrinking. The new industries have little use for these people. Their traditional jobs are being rapidly replaced by machines. Businesses have little incentive to train them for more useful and creative work. Employers would rather continue allowing the public school system to educate and train their workers, but these educational institutions are poorly suited to meet the needs of the chronic unemployed. Government job programs are generally too small and poorly directed to be effective. They often only provide make-shift work that provide participants with few skills.

The philosophy behind proposition 13 is that we should try to do better with what we have; without technology, government, taxes, or anything else. The lesson for me in all of this is that we need to stop looking at "progress" in the conventional terms of size and complexity, and instead in terms of the broad goals and values we want to emphasize in this country. Building a new automobile, for instance, should not be viewed only as a challenge of increasing the aesthetic qualities, automatic accessories, engine size, trunk space, or other things that unnecessarily add to the price of the automobile.

It should instead encompass the overall values we want in our transportation system; that is, maximizing resource efficiency, preserving environmental qualities and social values, maximizing public safety, providing accessibility, and freedom for individual lifestyle choices. I believe, Mr. Speaker, that once we allow "progress" to include these broader overall values then we can effectively deal with inflation and unemployment. Proposition 13 directs us to rethink our traditional programs and begin dealing with the inner problems. While this particular initiative was not the solution to these problems, it at least gave the people an opportunity to demand a new approach to solve these problems. It is up to us legislators to begin an attack on the structural economic defects I have discussed that helped bring about the passage of Jarvis-Gann.●

FEDERAL BUREAUCRACY

HON. WILLIAM H. HARSHA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. HARSHA. Mr. Speaker, dealing with the Federal bureaucracy can be a frustrating experience and, all too often, an exercise in futility.

As the size of this bureaucracy increases, so do the number of complaints from individual citizens who must do business with it. Today, a Member of Congress spends many hours trying to untangle the redtape so that Government agencies actually provide the services they have been established to provide.

However, even a Member of Congress is sometimes victimized by calculating bureaucrats. I would like to share a recent experience of mine with my colleagues.

In an attempt to secure information on plans by the National Park Service to annex 1,000 acres of land to the Mound City Group National Monument in Chillicothe, Ohio, I was advised last month by the acting associate director of the agency that a study of the project was under review and would not be available until this fall. At that time, I expressed my opposition to the Park Service plans.

Subsequently, I learned that not only had the study been completed in June, but copies of it were floating around my district.

In the following letter, I have advised the Secretary of the Interior of the incident and of my outrage at what appears to be a deliberate deception on the part of certain officials of the Park Service to deceive a Member of Congress. I offer the contents of this letter so that my colleagues may benefit from my latest experience with the Federal bureaucracy.

The text of the letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 11, 1978.

Hon. CECIL D. ANDRUS,
Secretary of Interior,
Interior Building,
Washington, D.C.

DEAR SECRETARY ANDRUS: On June 23, 1978, I wrote to Mr. Gary Everhardt, Director of the National Park Service, concerning that department's proposal to expand the Mound City Group National Monument in Chillicothe, Ohio. The area in question is the site of the Hopeton Earthworks, remains of the Hopewell Indians who lived in the Scioto Valley of Ohio from 300 B.C. to 600 A.D. About one thousand acres of this land has been entered into the National Register of Historic Places, and it is this land the Park Service proposes to annex to expand the existing park.

The Acting Associate Director, Mr. Robert Stanton, responded to my inquiry for more information in a letter dated July 25, 1978. In that letter, he stated that a study of the

project was under review, and would not be available until this fall. I am opposed to this expansion, and was interested in obtaining as much information as possible, including the study Mr. Stanton mentioned. Copies of his letter were sent to several of my constituents who had expressed their interest in the proposed expansion.

I subsequently found out that not only had the study been completed, but copies of it were floating throughout the Chillicothe area. The superintendent of the Mound City Group National Monument had seen the report; an employee of the Department of Housing and Urban Development in Columbus had a copy; a local real estate developer had read someone else's copy. This was the study I had been told would not be ready until this fall.

When the National Park Service's Congressional Liaison, Mr. Art Eck, was contacted to explain why I seemed to be the only interested party who had not seen the study, my office was again told that the report had not been completed. He was then told that several of my constituents had seen the study, and the next day, brought the report to my office. It had been published in June, a month prior to Mr. Stanton's letter.

I believe that the National Park Service deliberately misled me into thinking that the report which I had requested was not available. This apparent effort on the part of the bureaucracy to deceive a member of Congress is outrageous. At the same time I was denied a copy of the study, it was circulating freely among my own constituency. The study's existence was not denied by some lowly clerk, but by the Congressional Liaison and the Acting Associate Director of the National Park Service.

Given the fact the Park Service knew of my interest in the proposed expansion, why was I not sent a copy of the report when it was published in June? I want to know why the National Park Service deliberately misled me. Why was the information I sought kept from me?

I am protesting this shabby treatment in the strongest possible manner, and I look forward to hearing from you concerning your department's actions.

Sincerely yours,

WILLIAM H. HARSHA,
Representative to Congress.●

TELECOMMUNICATION CHANGE GOOD FOR NATION

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. STUMP. Mr. Speaker, for more than a decade we have witnessed a process of change in the telecommunication industry of this country. We have also witnessed an accompanying debate which challenges whether certain aspects of the change are in the best interests of all citizens. The debate has been pursued by the interested parties in various Federal and State regulatory forums, the courts and now resides—and I believe appropriately so—in the Congress. I commend the House Communications Subcommittee and its staff for the exhaustive undertaking to review the Communication Act of 1934 in an effort to allow Congress to establish public policy which will enhance the growth and development of the communications industry while assuring the well being of individual communication users, including the broad base of consumers of telecommunications.

In that connection, the recent Western Governors Conference devoted time and attention to matters of telecommunication and passed a resolution which sets forth their concerns and adminitions on that subject. I submit the resolution to be printed at this point in the RECORD.

II. THE COMMUNICATION ACT OF 1934

Whereas, the Western Governors' Conference has a vital interest in policies being maintained which insure the provision of telephone service to as many people as possible at affordable rates; and

Whereas, the benefit of national telephone service is in direct proportion to the percentage of household and businesses having access to the national telecommunications network whether they are urban or rurally situated; and

Whereas, the effectiveness of total telephone service is dependent upon the responsibility and accountability of those providing the service thus the necessity for policies pinpointing the responsibility for provision and maintenance of the basic exchange telephone service; and

Whereas, the attainment of the above stated goals is dependent upon pricing policies based on uniform average charges rather than charges based upon route or locality, and charges that enable intercity services to make an appropriate payment toward the joint costs of providing basic local telephone service;

Now, therefore, be it resolved, that the Western Governors' Conference commends the Congress for undertaking review of the Communications Act of 1934 particularly as it relates to the provision of telecommunications services; that Congress should reaffirm the original purpose of the Act in giving priority to the objective of providing universal telephone service on a basis which insures high quality service at affordable rates to the users of residential telephone service; and that the Congress should set forth such provisions in the law as necessary to assure the availability of intercity telephone service to all citizens at affordable rates; and

Be it further resolved, that a copy of this Resolution be presented to the National Governors' Association for consideration at its meeting in Boston, Massachusetts, on August 28–30, 1978.

I urge my colleagues in the Congress to keep in mind the views of these distinguished leaders of the Western States as we deliberate current legislation, which the House subcommittee chairman characterizes as a "starting point" and subsequent legislation which will determine future telecommunications policy to serve this Nation.●

THE CASE OF VIKTORAS PETKUS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. DORNAN. Mr. Speaker, when will it ever end? The list grows daily of those who, on "trumped-up" charges, are disciplined for exercising the rights due them as human beings. The story of one such human being, Viktoras Petkus, has somehow strangely been overlooked and hidden from public view. Why? Viktoras, a Lithuanian Catholic, was recently sentenced to 10 years imprisonment followed by 5 years of Siberian exile. If this man was just another one of the many dozens of Lithuanian Catholics jailed because of their faith it would be slightly understandable that his trial was "overlooked" by the media heavyweights. But interestingly enough, Viktoras Petkus is a member of the "Civil Rights Group" formed in the Soviet Union to monitor the Communist state's violations of the human rights provisions of the Helsinki agreement. Hardly "a regular" human rights suppression of liberty. Why the news blackout?

Mr. Speaker, in light of what I have just discussed, I insert a recent editorial on the subject from the National Catholic Register:

[From the National Catholic Register, July 30, 1978]

HISTORY AND CATHOLIC TEACHING

We've been reading on every front page, about the trials and shameful convictions of Anatoly Shcharansky and Alexander Ginzburg. Editorials abound deploring the harsh sentences by subservient Soviet judges. President Carter himself has denounced these sordid and brutal violations of civil rights. Nor is our government content with words: the future of arms reduction talks with the Soviets seems to hang in the balance.

Why, then, the utter silence about Viktoras Petkus? The trial of this Lithuanian Catholic before a Soviet court opened the very day Messrs. Shcharansky and Ginzburg went before their judges. His real offense was no more and no less than that of the Jewish and Orthodox defendants: struggling for universally recognized rights. Moreover his trial ended the very day Mr. Ginzburg's did.

Had Viktoras Petkus been just another of the many Lithuanian Catholics jailed by the Soviets for their patriotic and religious convictions, we might understand the silence of the media and of our elected government. But Viktoras Petkus is a member of the civil rights group formed in the Soviet Union to monitor that Communist state's violations of the human rights provisions of the Helsinki Agreements, of which it is a signatory.

We understand that the media might ignore the plight of such a personage, but we cannot understand how our elected government can fall into such blatant bias.●

THE TROUBLE WITH ERA

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. HYDE. Mr. Speaker, as we approach the debate on ERA extension, the merits—or demerits—of ERA cannot avoid being a topic of spirited controversy. As a contribution to the literature on this subject, I am pleased to share a recent column by the Chicago Tribune's Mike Kilian:

THE TROUBLE WITH ERA ISN'T GENDER—IT'S JUDGES

(By Michael Kilian)

The women's Equal Rights Amendment is a menace that must be defeated for reasons that have nothing to do with either side of the issue of women's rights.

The reasons have to do with another menace, perhaps the greatest menace to individ-

ual freedom and representative government in the history of our nation:

Government by judicial fiat.

As always in any discussion of the ERA, I must hurry forth with a caveat: I am a wholehearted supporter of equality for women. I wash dishes, cook meals, change diapers, go grocery shopping, and am delighted that my wife has a career. I only wish she made more money.

I do not support what Phyllis Schlafly & Co. seem to have in mind—a constitutional amendment requiring men to open doors for women and keep them in bonbon and chaise-longues all their days.

I do not fear what Phyllis fears, which is that the ERA will lead to all manner of federal court decisions requiring women to serve in foxholes, share rest rooms, or keep their men in bonbons and chaise longues.

What I fear is simply this: The ERA *will* lead to all manner of federal court decisions. It doesn't matter what they are. It matters that they will be made by judges.

It is one thing—and a good thing—for women to lobby for changes in the law or new laws to right wrongs. If women are underpaid, can be passed [and have been passed] by elected legislatures requiring that they be paid the same as men for doing the same work.

Laws tend to be neat, simple, and specific—and provide for swift and workable remedy.

But what the ERA crusaders are pushing is a constitutional amendment—not a change in the laws but a change or implied change in the basic foundation of our laws, in the instrument by which we measure all our laws.

For all its simplicity, the ERA is extremely imprecise. It doesn't deal with one small aspect of American life—say, the number of terms a President can serve or whether one can buy booze. It deals with practically every aspect of American life, and in the most vague, sweeping terms.

"Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex," it says.

Those 24 little words could call into question nearly every federal, state, and municipal statute on the books—every legally accepted business practice and social custom. Everything would have to be reexamined in relation to the new amendment.

And it would have to be done by the federal courts.

As it is—simply because of new civil rights laws—federal judges who know nothing about police or personnel have found themselves managing police personnel departments for months or years. Federal judges are roosting on state and local government the way ravens did on Edgar Allan Poe's writing desk.

In recent years, we've seen people filing such outrageous actions as asking their parents for financial damages for "malparenthood." What sort of lunacy will reign when our already overcrowded courts are choked with suits asking judicial review of every conceivable point of male-female conflict in our society?

Our unelected, unresponsive, appointed-for-life federal judges have usurped enough power from legislatures as it is. Yet the ERA people would have them decide who's to do the dishes.

In last week's hearings over whether Congress should extend the ERA's ratification time, former Sen. Sam Ervin said it had no constitutional authority to do that. ERA Ronald Rotunda [yes, Rotunda] argued that didn't matter, saying: "Constitutionality is not synonymous with wisdom nor even, necessarily, with fairness."

Then what's the point of a constitutional amendment known as ERA? These people are daft. They don't know what they're doing. We shouldn't let them do it.●

AUTOMATIC INDEXING INCOME TAX

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, for some time now I have been interested in the idea of automatic indexing of our income tax to the rate of inflation. Last December, I introduced a bill to accomplish partial indexing, and I joined as a sponsor of a slightly different bill introduced by the gentleman from Ohio, Mr. GRADISON, which was considered but rejected by the Ways and Means Committee this year.

An article by John Pierson in the Wall Street Journal of August 9 gives a good account of the various aspects of the indexing issue, including arguments against as well as those in favor. I believe it is a balanced treatment, and I call it to the attention of my colleagues in the interest of further enlightment on this important question:

IS IT TIME TO INDEX TAXES?

(By John Pierson)

WASHINGTON.—Indexing the tax system for inflation is, as the saying goes, an idea whose time has come.

In the next few days, the House will consider whether to index capital gains taxes. Later this summer the Senate will have a chance to vote on inflation adjustments for other parts of the tax code, too. Canada and several other countries already index portions of their tax systems.

Indexing all or part of the tax code means making adjustments to relieve people from having to pay taxes on the part of their income that reflects higher prices rather than increased purchasing power.

As a matter of fact, tax indexing is an idea that has gone further, even in the United States, than many people realize. Congress has cut taxes five times in the past 10 years, in part to offset the effects of inflation. Meanwhile, accelerated depreciation, last-in-first-out inventory accounting and exclusion of half of capital gains help compensate asset holders for rising prices.

So the question isn't whether to index the tax code—we do already after a fashion—but how to index: automatically on the basis of some inflation measure, or from time to time as Congress sees fit.

In general, conservatives favor automatic indexing because they think it would help reverse the recent tendency of Congress to cut taxes in ways that redistribute money from the rich to the poor. Conservatives also think that automatic adjustments would help reduce inflation and cut the size of government.

Liberals generally prefer to stick with the existing system of *ad hoc* tax cuts. Such cuts, they say, produce more tax fairness and less inflation, while providing the government with the revenue it needs to play an active role.

KIND WORDS FROM SEN. LONG BUT . . .

The House may vote as early as tomorrow to delete capital gains indexing from the tax bill. And even though the chairman of the Senate Finance Committee, Democrat Russell Long of Louisiana, has recently had some kind words for the idea, automatic indexing probably is too new an idea for Congress to swallow this year.

But automatic indexing is an idea that's sure to be with us in the years ahead, especially if inflation continues unabated.

The problem with inflation and taxes is really two problems. First, the income, estate and gift taxes are based on fixed dollar amounts that don't account for changes in the value of the dollar resulting from inflation. The personal exemption, for example, is $750. As prices rise, however, $750 becomes smaller in terms of what it can buy.

Thus, a typical family of four that made $15,000 last year paid taxes of $1,385, or 9.2 percent of its income. Even if the family receives a 7 percent pay increase to match this year's anticipated 7 percent inflation, its taxes will go up faster in 1978, to $1,613, or 10 percent of income. After 10 years of this kind of thing, the family's tax rate would climb to 17.8 percent, almost double what it was a decade earlier.

In the words of Republican Rep. Willis Gradison of Ohio, a leading proponent of indexing, that's an "unlegislated, unvoted, unsigned tax hike."

The second problem is that the tax code fails to define income in a way that takes account of inflation. Someone who sells stock pays tax on his gain, even if it represents nothing more than inflation and hasn't provided him with any increase in real income or purchasing power.

Congress has provided that some of the Government's spending programs, notably Social Security payments, are automatically indexed for inflation. But it has extended automatic indexing to only a few parts of the tax code, notably the limits on employer contributions and employe benefits under qualified pension plans.

Now, as approved by the House Ways and Means Committee, the tax bill would provide an automatic adjustment to eliminate taxes on the inflationary part of capital gains. The cost basis of certain assets—common stock, real estate and tangible personal property—would be increased to reflect monthly increases in the consumer price index under the plan proposed by Rep. Bill Archer, a Texas Republican.

In the Senate, Robert Dole proposes to go even further. In addition to the basis of capital assets, the Kansas Republican would index most of the fixed dollar amounts in the income, estate and gift taxes. His bill wouldn't provide any inflation adjustment for inventories and depreciation allowances, however.

As might be expected in an election year, much of the congressional debate over indexing revolves around the question of tax fairness. While almost everyone agrees it isn't fair to tax unreal income, agreement stops there.

Take capital gains. According to a study by Martin Feldstein and Joel Slemrod of Harvard, individuals selling corporate stock in 1973 paid nearly $500 million in excess taxes because of inflation.

To prevent this from happening in the future, conservatives like Rep. Archer would index capital gains. Liberals, if forced to choose, would prefer indexing to the other major form of tax relief for capital gains currently before Congress—a rate cut of the kind proposed by Republican Rep. William Steiger of Wisconsin. Lower rates benefit all gains, inflationary or not; indexing distinguishes.

But liberals would prefer not to have to choose. They argue that holders of capital assets are already shielded from inflation, in a rough sort of way. This is achieved by the existing exclusion for half of gains, by the 25 percent top rate on the first $50,000 of gains (other provisions can boost the maximum rate as high as 49 percent) and by the fact that tax is deferred until the asset is sold.

It would be unfair to index capital gains without indexing savings accounts, liberals say. Holders of capital assets often have the means to buy their assets on credit. Their interest payments are deductible, and inflation benefits them because they can pay off their debts with cheaper dollars.

In contrast, liberals argue, the typical person with a savings account is using his own money. Interest ceilings prevent him from getting a return equal to inflation. Unlike a share of stock, a savings account can't increase in value. What's more, the depositor is taxed annually on his interest; a stockholder, however, can postpone tax, if not on his dividends, then at least on his gain, until he sells.

Beyond the argument over the fairness of indexing capital gains alone, conservatives complain that the tax cuts Congress has passed in recent years are unfair and unwise because they have been used to redistribute money down the income scale.

It depends on which year you use as the base. If 1960 is the base year, taxpayers below $20,000 of income and above $200,000 have generally done better with the occasional cuts Congress has enacted than they would have done had the code, instead, been indexed from 1960 on. Those with incomes between $20,000 and $200,000 have done worse.

Liberals agree with the analysis and like it. "Over the past several years, most of the more significant loophole-closing measures that have been enacted took place within the context of an overall tax reduction bill," says Andrew Biemiller, the AFL–CIO's chief congressional lobbyist. "These measures have . . . generally improved the overall fairness of the tax structure—something that could not be done if there were a built-in system of automatic tax cuts through indexation."

Will Mr. Biemiller and other liberals retain their enthusiasm for congressional tax changes after this year's tax bill? One wonders, as Congress seems bent on rejecting almost all of President Carter's revenue-raising tax revision plans, while cutting taxes on capital gains and undoing other important liberal "reforms" of recent years.

STOPPING WASHINGTON'S "BONUS"

Hard upon the heels of the argument about fairness comes the argument about how best to fight inflation. Because inflation pushes people into progressively higher tax brackets, and for other reasons, the government's revenues rise about half again as fast as prices. Indexing would stop Washington's inflation "bonus." With less money coming in, most conservatives say, Washington would have to spend less, which in turn would help dampen inflation.

Canada, for example, has indexed parts of its tax code, beginning in 1974. The rate of growth of government spending in Canada has declined from 15.9 percent in 1974 to 10.2 percent in 1975, to 2.7 percent in 1976 and to 2.1 percent in 1977. But some conservatives question whether the same thing would happen in the U.S. They fear that instead of cutting spending as revenues fell, the government might just go deeper into debt.

Conservative proponents of indexing reply that Congress could, and probably would, cut spending in line with declining revenues. Not only would less federal spending restrain inflation, they argue, but it would also reduce the government's role in society.

Liberals, on the other hand, argue that indexing would blunt an important tool in the fight against inflation: automatic tax increases that reduce excess demand by taking purchasing power out of the hands of consumers and businessmen. "If all we know about the economy is that it has been experiencing inflation, economists would generally prefer to have taxes going up rather than going down," says Deputy Assistant Treasury Secretary Emil Sunley.

As for the argument that indexing would reduce government's role in society, that's another reason liberals don't like indexing. "We cannot support measures, which under the guise of protecting workers would . . . further hamstring the federal government's ability to fund programs needed to promote the national interest," says the AFL–CIO's Mr. Biemiller.

With basic differences of opinion like these, it may be a while before indexing becomes a fact whose time has come, rather than just an idea.●

AVIATION ISSUES BEFORE THE 95TH CONGRESS

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BAUCUS. Mr. Speaker, as we approach the end of the 95th Congress, there are many aviation-related issues which remain to be solved. Legislation is pending which would disapprove of the Mutual Aid Pact under which Northwest Airlines is receiving funds from other airlines during the labor dispute with their pilots, legislation to grant the airlines billions of dollars from the excise tax we pay when we fly will be considered, and Congress just completed consideration of legislation directly affecting flight service stations. We may even get a chance to vote on airline deregulation in the near future.

All of these issues are of great importance to Montanans. In addition to all of the Montanans who depend on the commercial airlines to meet their transportation needs, Montana boasts more private planes and pilots per capita than almost every other State. While in many areas of the country private ownership of aircraft is considered the ultimate in luxury, for many Montanans it is an economic necessity.

Thus, we in Montana are perhaps more aware of the safety hazards which pilots of small aircraft encounter. Not only do we have more pilots and small planes, but we also have some extremely variable weather conditions within our State as a result of our varied geography.

FLIGHT SERVICE STATIONS

Perhaps it is because of this increased sensitivity to the safety needs of pilots that a group of concerned Montanans came all the way to Washington last winter to protest plans to part-time or close some flight service stations. Such an action would have created a serious safety hazard. These stations provide vital weather and traffic information for pilots, and any reduction in this service would have been unwise.

I feel that the arguments presented by the Montanans who traveled to Washington were instrumental in the Federal Aviation Administration's announcement last spring that they had no plan to part-time or close any flight service stations. In short, they backed down from their earlier plan which would have affected many of the flight service stations in Montana.

In addition, Congress recently took action which further protects flight service stations. The final version of the Department of Transportation Appropriations bill, which was signed into law on August 4, states that the FAA cannot part-time or close any flight service station without the written permission of the Transportation Subcommittees of both the House and Senate. This insures that the FAA will have to present a very strong case for any flight service station which they might want to alter, and prove that their action will not create a safety hazard. This legislation is a relief to all of us who are concerned about flight safety.

THE MUTUAL AID PACT

Another issue of great concern to Montanans is the current labor dispute which has kept Northwest Airlines' planes grounded for the last 3 months. It is estimated that Montana alone is losing $13 million a month as the result of this strike.

One aspect of the strike which has disturbed me is the mutual aid pact through which a struck airline is paid a percentage of their usual profit from other airlines. I feel that this arrangement is extremely detrimental to meaningful collective bargaining.

As a result of this agreement, Northwest Airlines is showing a profit even though they are not flying planes. Thus, the airline knows that it is in fine shape—however long the strike may last.

At the same time, the pilots are assured that their employer is fiscally sound and that they are not running the risk of driving the airline out of business as the result of a protracted strike. They are reasonably assured that their jobs are safe.

I recently introduced legislation which would put an end to the mutual aid pact. This resolution also calls for the Civil Aeronautics Board to study the collective bargaining process within the airline industry in hopes that lengthy strikes can be avoided in the future through more responsive bargaining procedures. The text of this resolution appears below.

H.J. RES. 1090

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

STATEMENT OF PURPOSE

SECTION 1. The Airlines Mutual Aid Pact entered into by sixteen airlines under the authority of the Civil Aeronautics Board provides a formula in which the signers of the pact contribute payments to a carrier not operating because of a labor dispute. This pact is adverse to the public interest. The interest of the public will be best served if this five-year agreement which legally expired February 27, 1978, is not renewed by the Civil Aeronautics Board. The Mutual Aid Pact is anticompetitive and it takes away the incentive for an airline to have constructive collective bargaining and labor relations with the unions. In practice, the pact has proven to aid financially healthy airlines at the expense of financially weak carriers and at an unreasonable cost and disruption to the consumers and traveling public. The purpose of this joint resolution is to direct the Civil Aeronautics Board to immediately dissolve the agreement and to immediately terminate any further participation or payments by the member carriers of the Mutual Aid Pact.

DIRECTION TO BOARD

SEC. 2. The Civil Aeronautics Board shall immediately, without further proceedings, disapprove any extension of the Airlines Mutual Aid Pact and terminate any effect of such pact.

SEC. 3. The Civil Aeronautics Board is directed to study the collective-bargaining process within the airline industry and make

recommendations to Congress within six months on methods of alleviating the occurrence of protracted strikes that seriously impact the airline industry and the economy of the areas affected.

This resolution has also been introduced in the Senate by Senator JOHN MELCHER, where it has met with widespread support. Congress needs to act quickly on this legislation so that we can restore an atmosphere conducive to meaningful collective bargaining. I urge my colleagues to support this resolution.

AIRPORT AND AIRCRAFT NOISE REDUCTION ACT

Last January I testified before the Ways and Means Committee's Subcommittee on Oversight about the surplus in the airport and airways trust fund. This fund earns its revenue from an 8-percent excise tax on airline passengers, and it is used to fund safety equipment and facilities at our commercial airports.

There is a proposal here in Congress, the Airport and Aircraft Noise Reduction Act, which would take money out of the fund and give it to the commercial airlines to help them comply with Federal noise regulations.

This legislation would allow 2 percent of the current 8-percent excise tax on airline tickets to be used for financing retrofitting and replacing of engines and replacing planes not in compliance with the 1985 noise standards. This is not the way to go about solving the aircraft noise problem.

If this legislation passes, it would be the first time that the Federal Government paid an industry to comply with its regulations. The automobile industry had to comply with emission standards on its own, as has every other industry faced with compliance to Federal regulations.

I do not argue with the fact that compliance will be expensive for the airlines, or that there is a surplus in the Airport and Airway Trust Fund.

I do feel that a better solution to this problem would be to reduce the excise tax by 2 percent, and then allow the airlines to increase their fares by 2 percent if they could prove to the Civil Aeronautics Board that they need the additional revenue to meet the deadline. Thus, the Government would not be handing out money to the airlines from the trust fund, money which would go to the airlines tax free. Rather, the airlines would be responsible for themselves and the income they would receive from a possible rate increase would be subject to taxation. I feel that this is one fair alternative to using the trust fund to bail out the airlines.

There is also a chance that the House of Representatives will vote on airline deregulation before the end of the 95th Congress. Thus, there are many major aviation-related issues among the unfinished business which Congress must address in the new few weeks.

If the past 2 years are any indication of the future demand for air transportation, we can expect tremendous growth in this industry. The decisions we make today should be geared toward paving the way for sound management and safety precautions for the ever-increasing number of planes flown in our country—both commercial and private.●

DO NOT BAN SACCHARIN

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. GRASSLEY. Mr. Speaker, following congressional mandate, the FDA was forced in 1970 to ban saccharin and cyclamates from the market, because there was a chance that these artificial sweeteners might cause cancer. The study which suggested this result was performed upon laboratory rats using extremely large doses of the concentrated substances. This now-famous study, (which led to the suggestion that what this country needs is a stronger laboratory rat) was, at the time, strongly disputed.

In a recent study done in Baltimore on bladder cancer patients the conclusions of the original study were called into question. Reprinted below is a July 24 Wall Street Journal article detailing the conclusions of the new study.

What is important about the new findings is that they bring to light again the important debate between those who would ban products from the marketplace at the slightest suggestion that they could be harmful and those who would suffer real loss because of such a ban. In the case of saccharin, this debate takes on more than economic dimensions. There are those who need the artificial sweeteners for health reasons, especially diabetics and the elderly. To force them to do without saccharin or cyclamates because of the marginal conclusions of a study on rats, is tantamount to punishing them for their condition. It is a far different case than smoking or pollution control policy decisions pose.

Last year Congress voted to delay the proposed saccharin ban for 18 months, until more conclusive information was acquired. I favored this approach. It seemed sensible in the light of current debate. Now the time has come to lift the ban entirely and permanently. There is, of course, good reason to expect the Federal Government to oversee the production and distribution of foods and drugs, they alone have the resources to monitor this interstate industry, but it is inappropriate for the Federal Govern- to act on inconclusive evidence to ban a needed and time-tested food additive.

I recommend this article to my colleagues not only for what it tells us of saccharin, but what it can tell us of the proper, reasonable, and helpful role of the Federal Government in the lives of this nation's citizens and the workings of its industries.

The article follows:

MODERATE USE OF SACCHARIN, CYCLAMATES UNLIKELY TO CAUSE CANCER, STUDY FINDS

(By Joann S. Lublin)

Ordinary amounts of artificial sweeteners such as saccharin and cyclamates don't appear to cause bladder cancer in humans, scientists reported in a study released today. The study is sure to fuel the long-simmering controversy over the safety of these sweeteners.

The U.S. Food and Drug Administration banned cyclamates in 1970, after a study suggested they caused cancer in laboratory animals. Abbott Laboratories, a North Chicago, Ill., health-care products maker, has been fighting to get cyclamates back on the market since 1973. Abbott had been a major cyclamates producer. Last year, the FDA proposed a ban on saccharin after studies indicated that large amounts cause bladder tumors in rats.

Congress has postponed the ban for 18 months while further studies are made. In the meantime, saccharin-sweetened beverages, foods and other products carry a label warning of the possible health hazard.

STUDY OF 1038 PATIENTS

"Neither saccharin nor cyclamate is likely to be carcinogenic in man, at least at the moderate dietary ingestion levels reported" by patients studied, concluded the latest report, which appears in this week's issue of the Journal of the American Medical Association. The conclusion was based on a Baltimore study of 1,038 patients, evenly divided between those with bladder cancer and those hospitalized for other reasons.

The study doesn't answer the question of whether there is any risk at all of developing bladder cancer from the use of saccharin or cyclamates, conceded Dr. Irving I. Kessler, one of two authors, in an interview. Dr. Kessler is chairman of the University of Maryland School of Medicine's Department of Epidemiology and Preventive Medicine.

But regulators considering a ban on saccharin should consider "the totality of the evidence, the weight of the evidence and the biological consistency of their evidence before making their decision," he added.

Dr. Kessler also noted that if either cyclamates or saccharin did cause bladder cancer, then the bladder cancer patients should have used the sweeteners in greater amounts or for more years than the control group. "Almost always in human cancer, the risk of cancer . . . increases as the dose or length of exposure increases. We carefully analyzed that and could find no relation," he said. This was true, he added, even when such variables as age, sex, occupation, race and smoking habits were controlled.

For the study, Dr. Kessler and his colleagues extensively interviewed the patients about their use of artificial sweeteners in tablet, powder and drop form, as well as in diet beverages and foods. Patients reported how often, how much and how long they had consumed the substances.

CANADIAN FINDINGS DISAGREE

The JAMA article noted that these findings disagree with a recent Canadian investigation of hospitalized cancer patients. Researchers there concluded that bladder-cancer risks rose 60% among men who used saccharin tablets, but not among those who drank dietetic beverages or ate dietetic foods with saccharin. Women didn't seem to have similar increased risk.

Such conclusions don't make sense, the JAMA report suggested. "The divergence in relative risk between men and women observed in Canada would be extraordinary for human carcinogen . . . an equally puzzling, if not biologically inconsistent finding" was the lack of risk for men who consumed saccharin-containing drinks or foods, the report said.

The Calorie Control Council, an Atlanta-based group of diet-food manufacturers and others, praised the Baltimore study as support for its argument "that saccharin should remain available," a spokesman said. Noting that Congress has asked the National Academy of Sciences to investigate saccharin further, he added: "This (study) will be an important contribution to their assessment of saccharin's safety."

A recent FDA report also supports the council's viewpoint. Morris Cranmer, director of the FDA's National Center for Toxicological Research, said in a report released

earlier this month that health hazards posed by saccharin may be outweighed by its possible benefits.

While saccharin may, indeed, cause cancer—either directly or by 'promoting' the effect of some other substance—"the cancer risk of the carbohydrates that saccharin replaces are several times greater than the cancer risk for saccharin," Mr. Cranmer asserted in his study.●

MEMORIAM OF THE SLOVAK-AMERICAN COMMUNITY TO HIS HOLINESS POPE PAUL VI

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. ROE. Mr. Speaker, with your permission I would like to insert in our historic journal of Congress the most revered tribute of our Slovak-American community which very eloquently depicts the highest of reverence, esteem, and respect that we all feel for the lifetime of excellence and multitudinous good works, in service to God and all mankind, of His Holiness Pope Paul VI whose passing is deeply mourned by all peoples throughout the world.

This memoriam, which was edited by the first Slovak-American journalist to have received the "Pro Ecclesia et Pontifice"—for the church and the pontiff—Award of His Holiness Pope Paul VI, the Hon. John C. Sciranka, appeared in the August 9, 1978, issue of the Katolicky Sokol (Catholic Falcon), official publication of the Slovak Catholic Sokol organization with international headquarters in the city of Passaic, in my congressional district, State of New Jersey.

The Slovak-American community tribute to the Most Holy Father, His Holiness Pope Paul VI reads, as follows:

SOKOLS MOURN DEATH OF POPE PAUL VI

On Sunday, August 6th, 1978, Pope Paul VI, the frail, quiet man who led the Catholic Church through 15 years of change and conflict, died at his Summer retreat, Castel Gandolfo, Italy.

The Holy Father, 80, was stricken by a heart attack while listening to a Mass offered in his private chamber by his personal secretary, the Rev. Pasquale Macchi.

The spiritual leader of 700 million Catholics of the world died in peace as he has lived and requested the people of the world to live.

Thousands of worshippers came to pay him tribute. On Wednesday, his casket was brought to St. Peter's basilica, where it will lay in state until Saturday, August 12th, when funeral services will be held. 115 Cardinals, who will elect his successor will attend as will representatives of many governments.

The bells of churches in the Eternal City announced the death of the beloved Pontiff, the 262nd successor to St. Peter.

Pope Paul VI had great admiration for Physical Fitness organizations such as our Slovak Catholic Sokol and bestowed his blessing through the Apostolic Delegate in Washington, D.C., on our many Slets and celebrations.

He was sympathetic to the Captive Nations, including Slovakia.

When he observed the 15th anniversary of his pontificate on June 21st of this year as Vicar of Christ on earth, we recalled his close affiliation with the Slovak people. After assuming the throne of St. Peter as successor of the beloved Pope John XXIII, he received in audience more than 600 American Slovaks who came to Rome for the dedication of the Slovak Institute of SS, Cyril and Methodius.

In 1965 he named the Rev. Michael Rusnak, Slovak Byzantine Redemptorist as Bishop and Apostolic Visitator for the Slovaks of Byzantine Rite in Canada.

In 1973 he named three bishops for Slovakia, and in January 1978 he established a Metropolitan Province in Trnava, Slovakia.

Pope Paul VI. received in private audiences many Slovak prelates and especially our American Slovak leader, the Most Rev. Andrew G. Grutka, bishop of Gary, Ind.

Pope Paul was accompanied on many of his journeys to foreign countries by Bishop Paul Hnilica, S.J., a Slovak leader, residing in the Eternal City.

During the fifteen years, he elevated several of our Slovak priests as prelates and bestowed an award of "Pro Ecclesia et Pontifice" through the Slovak Catholic Federation of America on Mrs. Susan Matuscak, well known American Slovak fraternalist, and Editor John C. Sciranka. He also named Sir John A. Sabol, outstanding American Slovak fraternalist as Knight of St. Gregory the Great.

During the Second Vatican Council, Mr. Stephen B. Roman, was named as lay auditor, the only Canadian layman presented with such great honor.

Pope Paul also honored Msgr. Francis Fuga, a well known Byzantine Slovak leader in Canada and recently elevated Father Andrew Sinal, Byzantine Catholic priest of Montreal, Canada, with the dignity of monsignor.

We recall with great pride the visit of His Holiness in October 1965 to the United Nations, and a celebration of a holy mass at the Yankee Stadium before an audience of 90,000. Here the Slovaks were well represented. We recall also the thousands of Slovaks who made pilgrimage to Rome in 1975, the Holy Year and the General Assemblage of the Slovak World Congress, and in 1977, when over 30,000 Americans attended the canonization of St. John Nepomucene Neumann, the fourth Bishop of Philadelphia. On this occasion the Slovaks were honored when John J. Cardinal Krol spoke in Slovak and our Sokolka, Mrs. Valeria Pavucek Miller, was one of the candle bearers and recited the prayers of the Faithful in Slovak at the famous basilica, Sancta Maria Maggiore, where the famous Pope Hadrian II. approved and blessed the Slavonic Liturgy at the request of SS. Cyril and Methodius, over eleven centuries ago.

Pope Paul VI. was familiar with the problems of Slovaks and other Captive Nations. As a young prelate he spent several years as an assistant to Papal Nuncio in Warsaw, Poland, where he learned the Polish language, which he used on many occasions, including the Vatican Radio. With his knowledge of Polish, he became closely associated with other Slavonic nations.

The Holy Father was interested in the beatification of Sister Miriam Teresa Demjanovich and was informed about her cause through the Postulator, Father Nicola Ferrante, who visited the United States in June and was at the celebration of the first anniversary of canonization of Bishop Neumann in Philadelphia.

There were many noted events during the 15-year reign of Pope Paul, when he showed his love for our Sokol organization and the Slovak people.

We mourn his blessed death and pray that his successor will follow in his footsteps for the Glory of God and peace among the nations.

Mr. Speaker, I appreciate the opportunity to share with you and our colleagues this memoriam of the Slovak Catholic Sokol and the Slovak-American community and join with them and all peoples throughout the world in solemn observance of the passing of a great leader and good friend, the Most Holy Father, his Holiness Pope Paul VI. May he rest in peace.●

SUGAR LEGISLATION

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. LEDERER. Mr. Speaker, today the Subcommittee on Trade of the Ways and Means Committee is holding hearings on legislation to implement the international sugar agreement. As the decision of this subcommittee may very well determine what price the consumer will be paying for food next year, I would like to share my testimony before the subcommittee with my colleagues in the House:

TESTIMONY OF THE HONORABLE RAYMOND F. LEDERER

Mr. Chairman and Members of the Subcommittee:

I appreciate this opportunity to appear and present my views concerning the competing proposals for sugar legislation which are the subject of this hearing. As the focus of today's hearing will be on H.R. 13848, of which I am a co-sponsor, I wish to make known my strong support for this legislation which encompasses the same responsible approach which I have tried to include in my own bill.

The Chairman's bill, while extending additional benefits to farmers, does not do violence to the consumers. It is a bill which is balanced, moderate, and—in my opinion—sound and constructive legislation. By way of contrast, H.R. 12486 is unworkable, would be totally incompatible with the International Sugar Agreement, and is highly inflationary. A close reading of the bill reveals that rather than providing the purported 16 cents per pound, it would, in truth, result in sugar priced at over 19 cents per pound. This is because Section 207 provides that quotas on fees may not be adjusted or suspended unless the price of sugar is ". . . less then twenty percentum above the current price objective." Quite apart from the considerable demerits of the bill, I find myself deeply offended by the manner in which the de la Garza bill came into being.

In May and again in July, I expressed my uneasiness concerning this matter to my colleagues in the House in the Congressional Record. A brief recital of at least some of the salient facts producing this uneasiness appears in a release issued by the Consumer Federation of America, a copy of which I submit at this time for the record of this hearing. Quite apart from the highly questionable actions of Mr. Dwayne Andreas in conjunction with a number of former Senate staffers, I am particularly concerned and curious as to why a USDA employee, Mr. Robert Stansberry, came to draft what is now the de la Garza bill. This bill is in direct conflict with the policies of the Carter Administration and, indeed, the Department for which Mr. Stansberry works. Apparently, it was done at the behest of the Staff Director and General Counsel of the Senate Agriculture Committee, Mr. Michael McLeod. That gentleman, despite stating that he would not become a lobbyist upon leaving his Hill assignment—as he was quoted in the Washington Post of March 21st of this year, is now

a registered lobbyist for the Florida Cane Sugar League, working to secure passage of the very bill which he caused to be drafted at public expense.

Your bill, Mr. Chairman, is a measure that was arrived at after long and serious consultation with many departments of the Administration and various segments of Industry, as well as other Members of the House. Contrast this to the drafting of the de la Garza bill. At no time was any thought or consideration given to anyone outside the narrow parochial interests of the sugar growers and their allies—the beet processors and corn refiners.

The sole interest of this group is to create an artificial shortage, through restrictive quotas, to drive the price of sugar up to the desired level. This small but powerful group of special interests, representing only one percent of the nation's farmers (but a significant number of huge corporations), have seriously abused the legislative process. They have utilized the services of a Federal Department espousing a clearly opposite sugar policy, to draft sugar legislation which would exclusively serve their own selfish needs. Most tragically, the public has been asked to foot the expense of drafting legislation which would literally take millions of dollars out of their pockets each year.

I say that this is disgraceful. Both bodies of Congress have more than adequate drafting facilities. The private sector has access to a huge number of high-priced and talented Washington law firms, as well as, in the case of the Sugar lobby, numerous ex-Senate staffers. This is the kind of practice—this is the kind of situation—that causes the citizens of this nation to lose respect for their government.

Mr. Chairman, it is my sincere belief that the extreme measures of the de la Garza bill would literally rip-off millions of dollars each year from America's consumers. Its parochial and selfish interests are blatantly evident in both the drafting and substance of H.R. 12486. It is my hope that the members of the Trade Subcommittee would reject the de la Garza bill in favor of the much more responsible and consumer oriented approach taken by Chairman Vanik in H.R. 13848.

CONSUMER FEDERATION OF AMERICA,
Washington, D.C., July 12, 1978.

At a time when consumers can least afford a big boost in sugar prices, why is Congress pushing that hike on behalf of fewer than 1% of our nation's farmers?

Consumer Federation of America, the nation's largest consumer organization, today disclosed information which goes far towards explaining the success of one of the most powerful and effective lobbying efforts now on Capitol Hill.

In announcing its findings, which developed in light of CFA's own intensive lobbying in opposition to pending sugar legislation, Executive Director Kathleen F. O'Reilly stated, "We are convinced that the door between the halls of Congress and the sugar lobby revolves at a disturbingly fast pace."

According to CFA, the ranks of that lobby are filled with former Congressional aides who worked on sugar legislation. Furthermore, it is immeasurably aided by Senators and Representatives from the sugar-producing states of Louisiana, Texas, Idaho, Hawaii, Utah and Minnesota. Since every legislated price hike for sugar is followed by increased markets for corn sweeteners, additional support comes from Congressional representatives of Western and Midwestern corn-producing states. Many of these members hold key positions on Congressional committees with jurisdiction over sugar legislation.

"This powerful combination of forces is totally ignoring the overwhelming inflationary impact on consumers which passage of the Church/de la Garza bills would produce," commented O'Reilly.

"It is clear that the involvement of former Congressional aides goes well beyond the much publicized gifts of Dwayne Andreas, head of the Archer-Daniels Midland Company, a large corn sweetener manufacturer." O'Reilly was referring to the appointment of David Gartner, former administrative assistant to the late Senator Hubert Humphrey (D–MN), to the Commodity Futures Trading Commission, despite Gartner's acceptance of $72,000 in trust funds from Andreas while working for Humphrey.

CFA found that another former key Humphrey aide, Herbert Waters, has followed the revolving door into the sugar industry. Waters is currently president of Tadco Enterprises, a private lobbying firm hired by Archer Daniels to help ensure passage of the Church/de la Garza bills.

The interplay between the industry and Congressional staff members goes even further, CFA disclosed. Tadco has hired Karth-Best Associates, another lobbying firm, to aid in the sugar legislation campaign. Robert Best, partner of former Representative Joe Karth, was a legislative assistant to Senator Russell Long (D–LA) until 1977. (Long, whose Louisiana constituents include a substantial number of cane sugar growers, is chairman of the Senate Finance Committee. His Subcommittee on Tourism and Sugar, chaired by Senator Spark Matsunaga (D-HI), initiated hearings on the Church bill.)

Best has been implicated, along with Karth and Waters, in writing a letter, dated August 16, 1977, which Gartner sent to the Senate Agriculture Committee under Humphrey's signature making recommendations that could bring a multimillion-dollar bonanza to the corn sweetener industry. According to Knight-Ridder Newspapers, the letter was signed by an office signature machine in Humphrey's absence.

Among the employees at Karth-Best is Will Leonard, another former Long legislative assistant. Leondard was appointed to the International Trade Commission (ITC) in 1968, where he led fights for sugar producers. He resigned from the ITC on June 10, 1977, and immediately became involved with Karth-Best in its sugar lobbying efforts.

A close associate of Senate Agriculture Committee Chairman Herman Talmadge (D-Ga.) is also involved in the pattern. Until March 1978, Michael McLeod was general counsel and staff director of the Senate Agriculture Committee and right-hand assistant to Talmadge. He played a key role in drafting the Church bill. He now lobbies for the Florida Sugar Cane League, despite promises upon leaving the committee that he would not become a lobbyist (Washington Post, 3/21/78). Coincidentally, McLeod was retained by the League's Horace Godfrey, a USDA official until 1969. Godfrey also represents Texas sugar growers.

Still another player is Dale Sherwin, former minority staff counsel to the Senate Agriculture Committee and assistant to Senator Robert Dole (D-Kans.) until his resignation in March of this year. He is now lobbying for the Church bill on behalf of A. E. Staley, one of the country's leading corn sweetener manufacturers. Sherwin helped draft and develop the bill while on the Committee staff.

Among other corporate food giants the financial success of which is tied to sugar legislation is the Heinz Corporation. Its corn sweetener interests are represented by the consulting firm of former Nixon White House aide, William Timmons.

"In spite of these overwhelming odds," concluded O'Reilly, "CFA will continue to vigorously voice its opposition on behalf of American consumers and urge the Administration to stand firm in opposing any measure which would raise the price of sugar."●

PUNITIVE MEDICINE AND SOVIET INJUSTICE: THE TRIAL OF ALEKSANDR PODRABINEK

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. FASCELL. Mr. Speaker, next Tuesday, Aleksandr Podrabinek, a 25-year-old medical attendant and founding member of the Working Commission to Investigate the Abuse of Psychiatry for Political Purposes, an affiliate organization to the Moscow Helsinki Watch Group, will go on trial in the outskirts of Moscow. He will probably be forced to sacrifice precious years of his youth to Soviet labor camps for the humanitarian work he has done to expose the misuse of psychiatry for political purposes in the Soviet Union. Podrabinek is the author of a scathing book, Punitive Medicine, in which he describes how Soviet criminal courts dispatch perfectly sane dissidents to psychiatric institutions as a means of physically punishing them. For daring to let this awful truth be known, Podrabinek was arrested on May 15, 1978 and charged, under article 190–1 of the RSFSR criminal code, with "circulation of fabrications known to be false which defame the Soviet State and the social system."

This is not the first time that a Soviet citizen has been prosecuted for libel for printing the simple truth: A colleague of Podrabinek, Yuri Orlov, was recently given 7 years in labor camp and 5 years in internal exile for "anti-Soviet agitation and propaganda" for his Helsinki watch activities, which included the preparation of detailed reports on human rights violations in the U.S.S.R. It is no coincidence that Podrabinek was arrested on the day that Orlov's trial opened, for he had refused to testify against the physicist earlier in the year.

Podrabinek estimates that at least 1,000 people have been confined in psychiatric hospitals because of their political outspokenness against the inhumanity of the Soviet regime. These assertions were backed up last summer at the World Congress of Psychiatry, which passed a vote of condemnation of the Soviet psychiatric practice with respect to dissidents.

As evidence of the truth of Podrabinek's contention that hospitals are being used as torture chambers for dissidents, I cite the example of Zinovy Krasivsky, a teacher and poet, and ardent Ukrainian nationalist. Arrested in 1967 for his activities in the Ukrainian National Front, he was sentenced to five years in prison, 7 in camp, and 5 years of internal exile. In December of 1971, in Vladimir Prison, he was accused under article 70 of the Ukrainian criminal code for the dissemination of his poetry. A commission of medical experts of the Serbsky Institute for Forensic Psychiatry in Moscow then declared him not to be responsible for his actions. In 1972, he was placed in Smolensky Special Psychiatric Hospital and in 1976 transferred to a General Psychiatric Hospital in Lvov where he remains to this day.

Podrabinek is not being prosecuted for "fabrication known to be false," he is being persecuted for fabrications proved to be true. I urge my colleagues to join me in calling for Podrabinek's immediate release, and protest the misuse of psychiatry for political purposes in the Soviet Union.●

ANOTHER EXAMPLE OF SOVIET JUSTICE

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. BINGHAM. Mr. Speaker, once more, the Soviet authorities are about to demonstrate their type of "justice." On Tuesday, outside Moscow, the trial of an extraordinary young man on charges of defaming the state will begin. Aleksandr Podrabinek, a 25-year-old dissident who compiled a book on the Soviet use of psychiatry to quash dissent, faces a possible 3 years in labor camp. His only crime has been his efforts to expose psychiatric abuses in the Soviet Union.

In January 1977, Podrabinek and four others founded the Working Commission to Investigate the Abuse of Psychiatry for Political Purposes. The commission, working closely with the Moscow branch of the Public Group to Promote Observance of the Helsinki Agreement in the U.S.S.R., began to issue bulletins documenting instances of the misuse of psychiatry for political purposes. An example of these abuses appeared on December 15, 1977 in Bulletin No. 5 which provides information on the case of Dr. Anatoly Barabanov, the former director of a section at the Sychov Special Psychiatric Hospital. Dr. Barabanov encountered numerous difficulties with the KGB in the course of his work. Finally, in 1976, he courageously refused to follow the KGB's orders regarding treatment of political prisoners. In addition to being expelled from his position at the hospital, he was arrested for anti-Soviet activities and declared mentally ill. He is presently receiving forcible treatment at the Blagoveshchensk Special Psychiatric Hospital. Such incredible and tragic stories appear, unfortunately, all too frequently in the working commission's bulletins.

Podrabinek is not the first member of the commission to face criminal charges. Feliks Serebrov, another founding member, was sentenced in October 1977 to 1 year in strict regime labor camp for allegedly using falsified documents. The repression against Podrabinek has also extended to his family. His brother, Kirill, was arrested on December 31, 1977, and charged with illegal possession of firearms and sentenced, in March 1978, to 2½ years in labor camp. According to dissident sources, both men are innocent of the charges against them.

Now it is Aleksandr Podrabinek's turn to reeceive a measure of Soviet "justice." It does not require a mind reader to predict the outcome of this trial. Arrested on the opening day of the trial of his friend, Yuri Orlov, Podrabinek—in all likelihood—will be found guilty as charged. However, the Soviet Union must stand trial in the court of world opinion and, undoubtedly, will be convicted of blatant disrespect for international standards of human rights.●

HUMAN RIGHTS IN LITHUANIA

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. CORCORAN of Illinois. Mr. Speaker, today as always in America we enjoy an atmosphere of freedom. We can travel at a whim, communicate our views openly without persecution, and worship in a house of our own choice. But even as we enjoy these freedoms which we so easily take for granted, there are people in this world suffering from political oppression.

I am speaking about the proud people of Lithuania. On February 16, 1978, the Lithuanian Declaration of Independence was signed granting this people the freedom to live and prosper. As we all know this ambience of freedom was soon replaced by Soviet intimidation.

The once proud united nation of Lithuania has suffered much torture and hardship inflicted and resulting confusion and disillusionment. They have been subjected to incredible cruelties in a never-ceasing effort by the Soviets to destroy their national spirit. One-sixth of her population has been exiled into desolate regions of the Soviet Union, with many families broken, never to be united again.

The Soviet Union signed the Helsinki agreement guaranteeing basic human rights, but treats its meaning as useless rhetoric. Lithuania has felt no relief from the Soviets in their desperate attempts for liberty. Their reading materials are completely controlled. They are subjected to unexplained and unwarranted searches of their homes and their persons. They are sentenced for make-believe crimes with no possibility of appeal. Communists have even tried to infiltrate the Catholic seminary for the training of priests by the KGB. Human rights violations seem unending and yet this strong people continues to withstand more abuse in their attempts to rebel.

There are over a million Lithuanians in America today. Many in my congressional district have expressed concern to me personally over the plight of their people. Mr. Speaker, as Americans we must continue to resist and denounce this obstinate oppression. We must hold fast to our ideals and encourage the United Nations to use its arm of persuasion in relieving the pain and suffering brought upon the Lithuanian people by an overbearing country. Only when these inalienable human rights are restored to countries, like Lithuania, can we begin to build an environment for world peace and freedom to flourish.●

ANTI-INFLATION AMENDMENTS OF 1978

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. FISHER. Mr. Speaker, I am introducing today "The Anti-Inflation Amendments of 1978," a bill designed to reduce the rate of inflation over the next several years through a guidelines approach for wages and prices. The bill, which would amend the Employment Act of 1946, would also require more explicit coordination of Federal economic policies aimed at achieving anti-inflationary goals.

The statistics on inflation by now are all too familiar. In the past 5 years, the Consumer Price Index has gone up almost 50 percent, and during the past decade over 80 percent. Increases in the cost of food, housing, health care, and energy, together with rising interest rates and general price hikes are eating away at the income of many Americans and reducing their ability to save.

The causes of inflation are many, and simple solutions, however attractive superficially, would not do. Reducing the Federal deficit will help to ease the problem, but by itself will not solve the current inflation dilemma. Similarly, enforcement of antitrust legislation should be simplified and improved, although it will not solve all abuses of economic concentration. Overhaul of Federal regulatory policies is undoubtedly overdue, but we cannot be sure that this will result in significantly lowered prices. All of these policies and others should be pursued in the effort against inflation, but I believe that something more is needed.

Administered prices and negotiated wage settlements, rather than full competition, have come to characterize an increasing proportion of the American economy. The resulting structure of prices and wages has contributed greatly to the present inflationary surge. The inability to come to grips with this development is, I believe, a principal shortcoming in the fight against inflation. This price and wage setting process will not disappear, and it must be dealt with if inflation is ever to be licked.

The bill I have introduced focuses on the wage-price spiral that drives prices higher even in times of recession. I wish to emphasize that this bill is not intended to set the stage for the future imposition of wage and price conrols which I regard to be unnecessary and counterproductive. What this bill would do is to make the guidelines more explicit, thus reducing the current confusion over what constitutes a fair wage or price increase. The bill also provides for prenotification and fact-finding so that public pressure can be brought to bear before inflationary actions take hold. I believe that an effective voluntary guidelines approach such as that contemplated in this bill will relieve the pressures for wage and price controls.

More specifically, the bill would require the following:

First. Each year the President, as part

of his annual economic report, would issue wage and price guidelines for major industries that, if adhered to, would cut inflation back. Guidelines would be recalculated annually, and the Congress could reject the President's recommendations through a joint resolution of disapproval. The guidelines would reflect increases in the cost of living and improvements in productivity minus an anti-inflationary factor which, during times of high inflation, could range up to 25 percent of the other two factors.

Second. The guidelines would be put into operation through a process of prenotification and fact-finding intended to mobilize public opinion whenever the guidelines are about to be breached. The President would be expected to exert the leadership inherent in his office to conform wage and price decisions to the existing set of guidelines. The Council of Economic Advisers would be the President's principal agent in the development of guidelines while the Council on Wage and Price Stability would be chiefly responsible for the prenotification and fact-finding phases of the operation.

Third. In addition, each year the President would prepare anti-inflation recommendations as part of his overall economic and budget program. These would include tax and spending measures, regulatory, antitrust, investment, and other policies intended to achieve anti-inflation goals as set forth in the annual economic report. The Joint Economic Committee would review the President's recommendations and refer them, along with its own recommendations, for appropriate action to the committees in Congress having jurisdiction in the relevant fields.

I am also cosponsoring a bill introduced by Representative LUNDINE and several others that moves along similar lines to combat inflation. I hope that this bill and mine will be considered soon by the Congress.

Text of bill follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Anti-Inflation Amendments of 1978".

ESTABLISHMENT OF GUIDELINES AND COORDINATION OF ECONOMIC POLICIES

SEC. 2. (a) Section 3(a) of the Employment Act of 1946 is amended—

(1) by striking out "and" immediately before "(4)"; and

(2) by inserting before the period at the end thereof the following new clauses: "; (5) a set of guidelines to govern price increases and wage settlements, established in accordance with subsection (c); and (6) a coordinated set of fiscal (tax, expenditure, and borrowing) monetary (as recommended by the Board of Governors of the Federal Reserve System), regulatory, antitrust, investment, productivity, international (including trade, foreign investment, and balance of payments), and other economic policies designed to combat inflation and to achieve the related goals set forth in the Report, and measures to reduce price increases in highly inflationary sectors of the economy (such as energy, health care, food, and housing)".

(b) Section 3 of such Act is further amended by redesignating subsection (c) as subsection (d), and by inserting after subsection (b) the following new subsection:

"(c) The guidelines referred to in subsection (a)(5) shall be designed to reduce the rate of inflation and keep it within reasonable bounds, and shall apply only to business concerns and labor organizations of sufficient size (with annual sales of not less than $100,000,000 in the case of a business concern and a total membership of not less than 10,000 in the case of a labor organization) to have a significant effect upon inflationary factors in the economy. Such guidelines—

"(1) shall be formulated in consultation with business, labor, and private advisers as well as with the Council of Economic Advisers;

"(2) shall take into account existing and projected national economic conditions, the pattern of wage and price movements in recent years, trends in non-labor cost increases, and other relevant considerations;

"(3) shall allow for sufficient flexibility to account for major structural, productivity, and other differences among industries; and

"(4) shall reflect the increase in the cost-of-living which has occurred during the preceding year (as measured by the change in the Consumer Price Index) and shall allow for estimated productivity gains throughout the economy, but shall reduce the amount of any price increases or wage settlements otherwise permissible by a significant anti-inflation factor (in the range of 20 to 25 percent during periods of high inflation of the sum of such cost-of-living increase and such productivity gains.)".

COUNCIL OF ECONOMIC ADVISERS

SEC. 3. (a) Section 4(c)(1) of the Employment Act of 1946 is amended by inserting before the semicolon at the end thereof the following: ", including the portions of such Report establishing guidelines and economic policies as required by clauses (5) and (6) of section 3(a)".

(b) Section 4(e)(1) of such Act is amended by inserting before the semicolon at the end thereof the following: ", and shall seek the advice and assistance of the Council on Wage and Price Stability in carrying out its functions with respect to the portions of the Economic Report establishing guidelines and economic policies in accordance with clauses (5) and (6) of section 3(a)".

CONGRESSIONAL REVIEW BY JOINT ECONOMIC COMMITTEE

SEC. 4. Section 5 of the Employment Act of 1946 is amended by adding at the end thereof the following new subsection:

"(g)(1) In conjunction with its annual review of the Economic Report, the joint committee shall hold special hearings for the purpose of reviewing the President's proposed guidelines for wages and prices (as included in such Report pursuant to section 3(a)(5)) and his proposed economic policies to combat inflation (as included in such Report pursuant to sections 3(a)(6)). Within thirty days after such hearings are completed, the joint committee shall submit to the House of Representatives and the Senate its findings and recommendations with respect to such guidelines and policies and shall in addition transmit directly to the committees of the House and Senate having jurisdiction with respect to such policies its specific recommendations for appropriate action thereon by those committees.

"(2) The proposed guidelines for wages and prices which are included in the Economic Report shall become effective, as the national standard to be followed by business concerns and labor organizations in accordance with section 5 of the Anti-Inflation Amendments of 1978, on the 30th day following the day on which the joint committee submits its findings and recommendations to the House and Senate under paragraph (1), unless prior to such 30th day the Congress adopts a concurrent resolution stating in substance that it disapproves of the guidelines as included in the Report. If the Congress adopts such a concurrent resolution, such guidelines shall not become effective and the President shall within 30 days resubmit them with such modifications as he may consider necessary or appropriate. The congressional review process as provided for in this subsection shall be repeated until no resolution of disapproval is voted within the prescribed time limit of 30 days. At any time during the period of thirty days after the day on which the joint committee submits its findings and recommendations to the House and Senate under paragraph (1) or, in the case of adoption of a concurrent resolution of disapproval, within 30 days after resubmission of guidelines, but before the concurrent resolution has been ordered reported in either House, the President may make amendments or modifications to the proposed guidelines, which amendments or modifications shall thereafter be treated as a part of the proposed guidelines originally transmitted and shall not affect in any way the time limits otherwise provided for in this paragraph."

COMPLIANCE WITH GUIDELINES

SEC. 5. Each business concern to which (under section 3(c) of the Employment Act of 1946) the guidelines currently in effect under section 3(a)(5) of such Act are applicable, and which proposes to make a significant price change in any major product line, shall notify the Council on Wage and Price Stability of such change at least 30 days before it becomes effective. Each professional association representing at least 1,000 members may be required to submit to the Council an annual report on the fee structures of the persons or groups it represents including the results of surveys conducted of such persons or groups. The Council shall monitor and study the trends in wage settlements, the elements in upcoming wage proposals, and the progress in wage negotiations. In carrying out its responsibility under the preceding sentence, the Council shall communicate on a regular basis with major unions and utilize the resources of the Labor Management Services Administration of the Department of Labor.

(b) The Council on Wage and Price Stability, on its own initiative or at the request of any business concern or labor organization substantially affected by the guidelines involved (or at the request of a consumer group having a substantial and direct connection with such a concern or organization), shall make and publish a report on any price increase, wage settlement, or change in fee structures which in its judgment substantially exceeds the applicable wage or price guidelines in effect under section 3(a)(5) of the Employment Act of 1946. Each such report shall cover price trends, wage and other cost trends, agreements reached in similar situations, any mitigating or unusual factors, the profit picture in related firms and industries, and other relevant considerations. Any business concern, labor organization, or professional association whose plans, practices, or actions are the subject of such a report shall be given a reasonable opportunity to reply in writing, citing any special circumstances which may explain or justify the violation of such guidelines or demonstrating that no such violation exists.

(c) Whenever the Council makes a report on a price increase, wage settlement, or change in fee structures under subsection (b), the President, with the advice of the Council, shall—

(1) institute and carry out (in the case of a wage settlement) a process of mediation between the business concern or concerns and the labor organization or organizations which are involved, under the direction of an independent mediator, or

(2) institute and carry out (in the case of

a price increase or a change in fee structures) such process of mediation as in his judgment is suitable to the circumstances, including participation by appropriate business, labor, and consumer interests, in order to achieve compliance with the applicable guidelines.

(d) For purposes of this section, the President shall—

(1) be expected to exert his leadership and good offices and take appropriate administrative steps to achieve wage and price agreements which comply with the applicable guidelines, and

(2) prescribe regulations to carry out this Act.

(e) The Council of Economic Advisers and the Council on Wage and Price Stability shall jointly prepare a study and make recommendations regarding the use of tax incentives and penalties to induce compliance with the wage and price guidelines established under section 3(a)(5) of the Employment Act of 1946. Such study and recommendations shall be transmitted within six months after the date of enactment of this Act to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, and the Joint Economic Committee for their consideration and appropriate action.

(f) Within four years after the date upon which the proposed guidelines for wages and prices have initially become effective pursuant to section 5(g) of the Employment Act of 1946, the Joint Economic Committee shall review the effectiveness of the guidelines in curtailing inflation and transmit a report to each House of Congress containing a detailed statement of the findings and conclusions of the Joint Economic Committee, together with its recommendation of whether to continue, modify, or terminte the guidelines.●

SUPPORT OF TUITION TAX CREDITS

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. COUGHLIN. Mr. Speaker, as the Senate continues its debate on the tuition tax credit bill, I am pleased to insert into the RECORD an excellent editorial from the Thursday, August 10, 1978, issue of the Washington Star which makes a number of strong points in favor of this sensible form of educational aid.

This editorial makes an effective argument in favor of the tax credit for elementary and secondary schools, an issue which will certainly receive much attention this week on the Senate floor, by asserting that the tax credit will finally allow parents of children in public schools the option of choosing a private school instead if they are unhappy with the public school system.

I strongly urge my colleagues in the Senate to read this editorial which will surely convince them of the great need for this fair form of educational relief.

The editorial follows:

THE TAX CREDIT FIGHT

As the Packwood-Moynihan tuition tax credit bill works its way toward crucial Senate floor action, the quality of the debate steadily deteriorates. What its sponsors view as a measure to promote diversity, choice and fiscal equity in education is denounced as a budget-busting money grab by the rich, or—as *The Washington Post* pronounced the other day—a "radical and ill-considered reversal of longstanding American values . . . a fundamental assault on the public schools," and even a boon for racial segregation.

These conflicting perceptions of the bill cannot be bridged, even allowing for the usual excesses of editorial rhetoric. And indeed the bill clearly raises issues—constitutional, fiscal and educational—of a fundamental sort.

If you think that American education, especially in the lower grades, is always to be a public monopoly; or that "root, hog, or die" must be the iron rule for private religious education; or that the First Congress erected "an eternal wall of separation between church and state," the case for the tax credits is weak indeed.

Happily, those principles, however fervently urged by secular educational lobbies or editorial writers, are largely subjective. They are nowhere chiseled in stone. Still less are they to be found in the Constitution. The Constitution is silent as to how Americans shall elect to educate their children. All it says about religion, apart from banning religious tests for office, is that Congress (and now, by judicial interpretation, the states) may not promote "an establishment" nor interfere with its free exercise.

Set aside the dubious—at times even hysterical—claim that tuition tax credits constitute some sort of foul play against American principles, and what is left? A few practical questions of policy, it seems to us. Would the program injure or strengthen public education? Would it encourage or discourage the proliferation of so-called "segregation academies"? Would it accentuate or arrest racial disparity in education?

It is unthinkable, to us at least, that Congress would seriously contemplate a measure that threatened the basic place of public schools in U.S. education. That primacy is all but universally conceded, and the reasons for it well understood. Rather, the anxieties about the future of public schools, given tuition tax credits, seem to stem from a vast insecurity. The notion, we gather, is that clients of public education are a captive audience, awaiting an incentive to bolt.

Such fears, we faithfully believe, are overwrought. But even if some parents do feel "trapped" in deteriorating and undisciplined public schools (especially in the inner cities), and would welcome an escape hatch, we can attach no other meaning to the ideal of American cultural diversity than that they should have that option. That option is always open to the well-to-do, who usually have mobility to move to the suburbs or the money to pay the steep price of private education, whether or not a fraction of that price may be subtracted from income tax bills—or both.

Prof. James S. Coleman touched on this point in a recent supportive letter to Senator Moynihan. Tax credits, he suggested, "will help give low income people some of the educational opportunity for their children that high income people already have. In a sense," he continued, "it provides an aid to parents to rescue their children from school situations that they find bad; and . . . this is especially the case for black parents who are locked into a given residential situation." Professor Coleman's view has been echoed and endorsed by a number of black scholars, including Thomas Sowell and Walter Williams.

But suppose that a substantial number of public school clients did seize tax credits as an avenue of "escape." Are the public schools so fragile, so far gone in demoralization and in discipline, as to be incapable of responding? Or would keen competition spur them to reform and to compete? The latter, we firmly believe.

Of course, the nitty-gritty of the matter, politically speaking, is the ageless quarrel over public help for schools of religious affiliation, mainly Roman Catholic. It is notable that every recent Democratic presidential candidate, including Mr. Carter, has given handsome pledges to the Catholic educational community. In an October 1976 letter to the Association of Chief Administrators of Catholic Education, Mr. Carter wrote that he was "firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools."

As governor of Georgia, he said, he had supported "annual grants for students attending non-public colleges" and he was of the view that "we must develop similar supportive programs at the national level for nonpublic elementary and secondary schools if we are to maintain a healthy diversity of educational opportunity." Senator Moynihan himself could hardly have stated the promise more clearly.

But as everyone has noticed, Mr. Carter's explicit pledge has gone a-glimmering now that he is faced with an opportunity to make good on it. Why that is so, we can't imagine. But if the president finds it expedient to renege he owes the Catholic educators at least an equivalent legislative alternative.

Of all the attacks on the tuition tax credit proposal, the shabbiest is the insinuation that they are a sugar-coated scheme for promoting racial segregation in the schools. In fact, the main—and the neediest—beneficiaries would be Catholic parochial schools with an old and honorable record of racial equity. And a for the so-called "segregation academies" mushrooming up across the South at the heels of school integration, their students, insofar as racial exclusiveness is their aim, would be ineligible under the tax laws. So much is clearly provided in the latest draft of the bill.

We recognize, again, that there are those who fervently believe that the bill is not in the national interest; that this country is better off with a public monopoly of educational funds. Obviously, keen opposition to the Packwood-Moynihan bill can be squared with that outlook. It cannot, however, be squared with the profession of faith that educational and cultural diversity are what this nation is all about—or should be.●

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, August 15, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 16

9:00 a.m.
Commerce, Science, and Transportation
Science, Technolgy, and Space Subcommittee.
To hold joint hearings with the Surface Transportation Subcommittee to receive testimony from officials of the Department of Energy on the matter of nuclear waste disposal.
225 Russell Building

Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

9:30 a.m.
Environment and Public Works
To mark up S. 2900, to provide compensation for damages and cleanup costs caused by discharges of oil and hazardous substances, to be followed by consideration of the nominations of Jane Hurt Yarn, of Georgia, to be a member of the Council on Environmental Quality, and Karl S. Bowers, of South Carolina, to Administrator, Federal Highway Administration, DOT.
4200 Dirksen Building

Human Resources
Labor Subcommittee
To continue joint hearings with Finance Subcommittee on Private Pension Plans and Employee Fringe Benefits on bills relating to the Employee Retirement Income Security Act (S. 3017, 901, 2992, 3193, 1745, 1838, and 250).
4232 Dirksen Office Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Business meeting on pending calendar business.
322 Russell Building

Banking, Housing, and Urban Affairs
To continue hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building

Foreign Relations
Near Eastern and South Asian Affairs Subcommittee
To hold hearings on the situation in Lebanon, with particular reference to the Christian community.
4221 Dirksen Building

Governmental Affairs
To hold joint hearings with Judiciary Subcommittee on Citizens and Shareholders Rights and Remedies on S. 3005, to broaden the rights of citizens to sue in Federal courts for unlawful governmental action.
1202 Dirksen Building

Judiciary
Criminal Laws and Procedures Subcommittee
To hold hearings on S. 3270, proposed Justice System Improvement Act and related bills.
2228 Dirksen Building

Select Indian Affairs
To hold hearings on the recommendations of the Bureau of Indian Affairs reorganization task force.
5110 Dirksen Building

Select Intelligence
To hold a closed business meeting.
S-407, Capitol

10:30 a.m.
Appropriations
To meet, in closed session, to mark up proposed appropriations for FY 79 for the defense establishment.
S-128, Capitol

Governmental Affairs
To consider S. 3229, proposed reform of the U.S. Postal Service, and the President's Reorganization Plan No. 3, to consolidate in a new Federal Emergency Management Agency preparedness activities heretofore the responsibility of five different Government agencies.
3302 Dirksen Building

1:30 p.m.
Conferees
On S. 2391, to extend through FY 1984 the life of the Commodity Futures Trading Commission.
S-207, Capitol

2:30 p.m.
Human Resources
Health and Scientific Research Subcommittee
To resume markup of S. 3115, to establish a comprehensive disease prevention and health promotion program in the U.S.
457 Russell Building

AUGUST 17

8:00 a.m.
Energy and Natural Resources
Parks and Recreation Subcommittee
To hold hearings on S. 3242 and H.R. 12250 designating the Boundary Water Canoe Area Wilderness and establishing the Boundary Waters Canoe Area Mining Protection Area, Minnesota.
3110 Dirksen Building

9:00 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

9:30 a.m.
Human Resources
Labor Subcommittee
To continue joint hearings with Finance Subcommittee on Private Pension Plans and Employee Fringe Benefits on bills relating to the Employee Retirement Income Security Act (S. 3017, 901, 2992, 3193, 1745, 1383, and 250).
4232 Dirksen Office Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production, Marketing, and Stabilization of Prices Subcommittee
To resume hearings on S. 3029, legislation pertaining to the federal crop insurance program.
322 Russell Building

Banking, Housing, and Urban Affairs
To continue hearings on S. 3304, proposed Federal Reserve Requirements Act.
5302 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold oversight hearings on the physical and financial condition of the Erie canal
4200 Dirksen Building

Finance
To hold hearings, to receive testimony from Secretary Blumenthal, on H.R. 13511, proposed legislation to reduce income taxes.
2221 Dirksen Building

Foreign Relations
Arms Control, Oceans, and International Environment Subcommittee
To hold hearings on S. 2053, the Deep Seabed Mineral Resources Act.
4221 Dirksen Building

Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings with the Governmental Affairs Subcommittee on Federal Spending Practices and Open Government on S. 2515, dealing with occupational alcoholism programs.
1114 Dirksen Building

Judiciary
Administrative Practice and Procedure Subcommittee
To hold hearings on S. 1449, proposed Grand Jury Reform Act.
2228 Dirksen Building

10:30 a.m.
Governmental Affairs
To consider S. 2971, 2026, and 1785, bills to require public disclosure of certain lobbying activities.
3302 Dirksen Building

2:00 p.m.
Select on Ethics
To hold an open business meeting.
S-146, Capitol

AUGUST 18

9:00 a.m.
Energy and Natural Resources
To hold hearings on the nomination of Ruth C. Clusen, of Wisconsin, to be an Assistant Secretary of Energy (Environment), and Roger A. Markle, of Utah, to be Director of the Bureau of Mines.
3110 Dirksen Building

Finance
Health Subcommittee
To hold hearings on proposals to expand coverage of mental health services.
2221 Dirksen Building

9:30 a.m.
Judiciary
Penitentiaries and Corrections Subcommittee
To resume hearings on S. 3227, to establish, on a demonstration basis, group therapy programs in ten Federal penitentiaries.
5110 Dirksen Building

10:00 a.m.
Foreign Relations
East Asian and Pacific Affairs Subcommittee
To hold hearings on S. Res. 323 and 469, expressing the sense of the Senate concerning human rights in Cambodia.
4221 Dirksen Building

Finance
Public Assistance Subcommittee
To hold hearings on H.R. 12973, increasing the permanent ceiling on Federal spending for social service programs under the Social Security Act.
1114 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To resume mark up of S. 2755, to revise and reform the Federal law applicable to drugs for human use, and to establish within the Department of HEW a National Center for Clinical Pharmacology.
4232 Dirksen Building

Judiciary
To hold hearings on S. 2361 and H.R. 10965, to revise certain U.S. transportation laws.
2228 Dirksen Building

Judiciary
To hold hearings to examine the FBI's programs to prevent and investigate bank robberies.
357 Russell Building

AUGUST 21

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 2455, the Home Owner's Equity Act, and S. 70, the Home Buyers Assistance Act.
5302 Dirksen Building

Commerce, Science, and Transportation
To hold hearings on the nomination of Gloria Schaffer, of Connecticut, to be a member of the Civil Aeronautics Board.
235 Russell Building

Finance
To resume hearings on H.R. 13511, proposed legislation to reduce income taxes.
2221 Dirksen Building

11:00 a.m.
Human Resources
Labor Subcommittee
To hold hearings on S. 517, to authorize employees and agencies of the Government of the U.S. to experiment with flexible and compressed work schedules.
4232 Dirksen Building

AUGUST 22

9:00 a.m.
Human Resources
To hold hearings on S. 2645, proposed National Art Bank Act.
4232 Dirksen Building
Judiciary
Constitution Subcommittee
To resume hearings on S. 3164, proposed Citizen's Privacy Protection Amendment.
5110 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 2455, the Home Owners' Equity Act, and S. 70, the Home Buyers' Assistance Act.
5302 Dirksen Building
Commerce, Science, and Transportation
Aviation Subcommittee
To hold hearings on S. 3363, proposed International Air Transportation Competition Act.
235 Russell Building
Environment and Public Works
Regional and Community Development Subcommittee
To mark up S. 3186, to provide public works employment for the long-term unemployed.
4200 Dirksen Building
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on S. 1449, proposed Grand Jury Reform Act.
2228 Dirksen Building

AUGUST 23

9:00 a.m.
Human Resources
To continue hearing on S. 2645, proposed National Art Bank Act.
4232 Dirksen Building

9:30 a.m.
Environment and Public Works
To hold a business meeting on pending calendar business.
4200 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold joint hearings with the Committee on Governmental Affairs on S. 2750, proposed Consolidated Banking Regulation Act.
3302 Dirksen Building
Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on S. 3363, proposed International Air Transportation Competition Act.
235 Russell Building
Governmental Affairs
To resume joint hearings with Judiciary Subcommittee on Citizens and Shareholders Rights and Remedies on S. 3005, to broaden the rights of citizens to sue in Federal courts for unlawful governmental action.
2228 Dirksen Building
Judiciary
Citizens and Shareholders Rights and Remedies Subcommittee
To continue hearings on S. 3005, to broaden the rights of citizens to sue in Federal courts for unlawful governmental action.
2228 Dirksen Building

AUGUST 24

9:30 a.m.
Banking, Housing, and Urban Affairs
To continue joint hearings with the Committee on Governmental Affairs on S. 2750, proposed Consolidated Banking Regulation Act.
3302 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on S. 3363, proposed International Air Transportation Competition Act.
235 Russell Building
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on S. 1449, proposed Grand Jury Reform Act.
2228 Dirksen Building

AUGUST 25

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on S. 2843, to provide for the striking of gold medallions, and on gold sales by the Department of the Treasury.
5302 Dirksen Building
Judiciary
Criminal Laws and Procedures Subcommittee
To resume hearings on S. 3270, proposed Justice System Improvement Act, and related bills.
2228 Dirksen Building

AUGUST 28

10:00 a.m.
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on the FBI Charter as it concerns undercover operations.
2228 Dirksen Building

AUGUST 29

10:00 a.m.
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on the FBI Charter as it concerns undercover operations.
2228 Dirksen Building

SEPTEMBER 7

10:00 a.m.
Commerce, Science, and Transportation
To hold oversight hearings on the lengths of motor tractor trailers
235 Russell Building

SEPTEMBER 8

10:00 a.m.
Commerce, Science, and Transportation
To hold hearings on S. 2970, proposed Truck Safety Act..
235 Russell Building

SEPTEMBER 14

10:00 a.m.
Judiciary
Administrative Practice and Procedure Subcommittee
To resume hearings on the FBI Charter and its overall policy.
2228 Dirksen Building

SEPTEMBER 19

9:00 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1845, to prevent unwarranted invasions of privacy by prohibiting the use of polygraph type equipment for certain purposes.
6226 Dirksen Building

SEPTEMBER 21

9:00 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1845, to prevent unwarranted invasions of privacy by prohibiting the use of polygraph type equipment for certain purposes.
5110 Dirksen Building

CANCELLATIONS

AUGUST 17

9:00 a.m.

SENATE—*Tuesday, August 15, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, grant that we may this day endeavor to be that which Thou wouldst have us to be, and to do that which Thou wouldst have us to do; listening to the voice of Thy spirit within us; not leaving one sin unrepented of, one spot in our hearts uncleansed; not looking backward but forward; not looking downward but lifting our vision upward; not lamenting the things undone, but rejoicing in the things done; not leaning for strength upon mortal man, but upon Thee, the Rock of Ages, who endures forever; through Jesus Christ our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 15, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the standing order, the distinguished majority leader is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. tomorrow.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have no requirement for my time.

The ACTING PRESIDENT pro tempore. Under the standing order, the distinguished minority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair, I have no need for my time this morning. In the absence of any such requirement, I yield back my time.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized for not to exceed 15 minutes.

DISTRICT OF COLUMBIA REPRESENTATION—HOUSE JOINT RESOLUTION 554

AMENDMENT NO. 3475

(Ordered to be printed and to lie on the table.)

Mr. HARRY F. BYRD, JR. submitted an amendment relating to commuter taxes, intended to be proposed by him to House Joint Resolution 554, proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

COMMUTER TAX AMENDMENT

Mr. HARRY F. BYRD, JR. Mr. President, I am today submitting an amendment to House Joint Resolution 554, a House-passed resolution now on the calendar proposing full voting representation for the District of Columbia in both Houses of the Congress.

My amendment would have the effect of placing a permanent ban on the imposition of any commuter tax by the District of Columbia.

Every year the District politicians come back to the Congress asking for a commuter tax. It is time to lay this unsound and unfair proposal to rest.

The District is prohibited, under the terms of its Home Rule Charter, from taxing the incomes of Virginia and Maryland residents who work in Washington. But each year, D.C. officials ask removal of this ban.

My proposal is to incorporate a prohibition on any commuter tax into the constitutional amendment giving the District full voting representation in Congress.

If D.C. voting representation is to become part of the Constitution, then I want to include a provision that will end once and for all the threat of a raid by the District on the citizens of Virginia and Maryland.

This year a subcommittee of the House actually approved a commuter tax. I believe it will be defeated, but I also believe that the D.C. government will be back again and again with the same request.

Virginians and Marylanders pay taxes in the District whenever they make purchases there. And like all other Federal taxpayers, they contribute to the Washington city government through Federal taxes.

There is no justification for a third level of taxation.

The District has one of the highest per capita incomes in the country, and its city government spends more per capita than any other city of comparable size in the United States.

Revelations of waste and inefficiency in the District government are frequent events.

What the District really wants is to finance its own extravagance with the hard-earned tax dollars of its neighbors.

This is totally unfair, and it must not be permitted.

I ask unanimous consent that the text of my amendment be printed at this point in the RECORD, and that the amendment be printed and lie at the desk.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3475

On page 2, line 16, strike out the quotation marks and the last period.

At the end of the bill, add the following new section:

" 'Sec. 5. The government of the District of Columbia shall have no jurisdiction or authority to enact any law imposing any tax on the whole or any portion of the personal income, either directly or at the source thereof, of any individual not a resident of the District of Columbia.' ".

COMMITTEE MEETING

Mr. NELSON. Mr. President, I ask unanimous consent that the Senate Select Committee on Small Business be authorized to hold hearings on inflation as it relates to certain segments of the economy and small business on Friday afternoon, August 18, 1978.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TUITION TAX RELIEF ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of H.R. 12050, which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(The following proceedings occurred during consideration of H.R. 12050:)

TIME-LIMITATION AGREEMENT—S. 2539, COLLEGE OPPORTUNITY ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Calendar Order No. 585, S. 2539, the higher education bill, is called up and made the pending business before the Senate, there be a time agreement as follows thereon: 4 hours on the bill, to be equally divided between Mr. PELL and Mr. JAVITS; 1 hour on any amendment; 20 minutes on any debatable motion, appeal, or point of order, if such be submitted to the Senate; and 1 hour on the bill under the control of Mr. MUSKIE; and that the agreement be in the usual form.

The PRESIDING OFFICER. Is there objection?

Mr. HODGES. Mr. President, reserving the right to object.

Mr. ROBERT C. BYRD. Mr. President, I withdraw the request momentarily.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. ROBERT C. BYRD. Mr. President, I now renew the request, which Mr. HODGES had a reservation on earlier and which has been cleared all around.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. It has to do with the time agreement on the higher education bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—S. 3073, FEDERAL-AID HIGHWAY ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of S. 3073, Calendar No. 764, the Federal-Aid Highway Act of 1978, an amendment adding a title on highway safety be inserted by unanimous consent, without

debate, and be considered as original text for the purpose of further amendment.

Provided, that there be 30 minutes on any amendment, with the following exceptions:

One hour on an amendment by each of the following Senators: Mr. GRAVEL, dealing with hydrofoil; Mr. GRAVEL, dealing with planning; Mr. GRAVEL, dealing with Alaska railroad; Mr. KENNEDY, dealing with truck lengths; Mr. ROTH, dealing with bridges; Mr. ROTH, dealing with beach erosion.

Provided further, that there be 1½ hours on each of the following amendments:

An amendment by Mr. GRAVEL, dealing with New York streets; by Mr. HUDDLESTON, dealing with coal haul roads; by Mr. ZORINSKY and Mr. ANDERSON, dealing with rail crossings; by Mr. KENNEDY and Mr. WEICKER, dealing with the trust fund.

Provided further, that there be 2 hours each on the following amendments:

An amendment by Mr. KENNEDY, dealing with planning; by Mr. CULVER, a bridge amendment.

Provided further, that there be 20 minutes on any debatable motion, appeal, or point of order, if such is submitted to the Senate or on which the Chair entertains debate, to be equally divided between and controlled by the mover of such amendment and the manager of that title of the bill; that the time in opposition thereto be controlled by the minority leader or his designee.

Provided further, that on the question of final passage of the said bill, debate shall be limited to 2 hours on title I, which is the highway bill, to be equally divided between and controlled by Mr. BENTSEN and Mr. CHAFEE; 1 hour on title II, which is the highway safety portion, to be equally divided between and controlled by Mr. CANNON and Mr. SCHMITT.

Provided further, that no amendments to title II shall be in order until the Chair has ascertained that there are no further amendments to title I to be offered, and that once title I of the bill has been amended and the Chair has ascertained that no more amendments to that title will be offered, further amendments to that title will not be in order.

Provided further, that after the amending process on titles I and II has been completed, the bill be laid aside until again called up by the majority leader for the purpose only of adding the text of S. 2441 as title III and germane amendments thereto; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank all Senators for this very complex agreement which has been worked out.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, with statements limited therein to 5 minutes each, and that the period not extend beyond 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. Is there morning business?

TOBACCO RESEARCH

Mr. HUDDLESTON. Mr. President, on Thursday of last week the Associated Press and newspapers throughout the country carried stories concerning research conducted by Dr. Gio Batta Gori, deputy director of cancer prevention at the National Cancer Institute, on efforts to remove harmful ingredients from cigarette tobacco.

In those stories Dr. Gori stated that the new low tar and nicotine cigarettes are "less hazardous" and that when smoked moderately can significantly reduce any danger to the smoker.

"We don't want to call them safe," Dr. Gori said on behalf of himself and his colleague Dr. Cornelius J. Lynch. "We don't think there is such a thing. But some are so low (in tar and other toxic substances) as to cause no observable hazard." This quote comes from an Associated Press story of August 10.

In an interview with the Washington Post, Dr. Gori stated that some cigarettes can be called "less hazardous" and can be smoked in "tolerable" numbers without "appreciable" ill effects on the average smoker.

Mr. President, I ask unanimous consent that both the AP and the Washington Post story be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

SOME NEW CIGARETTES CUT RISK GREATLY, SCIENTIST SAYS

(By Michael Putzel)

WASHINGTON.—A top government scientist says an average smoker can consume roughly a pack a day of some new cigarettes on the market "without apparent risk."

"We don't want to call them safe. We don't think there is such a thing. But some are so low (in tar and other toxic substances) as to cause no observable hazard," says Gio Batta Gori, head of the smoking and health program at the National Institutes of Health.

The tobacco industry has developed these new cigarettes with the help of millions of dollars in government research funds.

Gori and Cornelius J. Lynch of Enviro Control Inc., the government's prime contractor on what has become known—despite their objections—as "safe-cigarette research," have identified the "tolerable levels" of smoking for 27 brands with relatively low tar.

Gori said details of their findings are to be published soon in the Journal of the American Medical Association.

(Gori spoke about his study in an interview with The Courier-Journal several months ago, before the results were available. Gori noted then that his figures for tolerable levels were based on averages. Because individuals differ, he said, his figures did not mean that anyone under the tolerable level would be safe.

(Gori's comments appeared in a series of articles on tobacco and health.)

Gori and Lynch define tolerable levels in terms of cigarettes before 1960, when tar and nicotine contents were much higher than today and studies first identified the long-term risks of cigarette smoking.

Gori said studies have shown that people who smoked no more than two pre-1960 cigarettes a day had no higher death rate than nonsmokers.

Therefore, he explained, if the toxic substances in cigarettes could be reduced below the pre-1960 levels, a smoker persumably could smoke more cigarettes without increasing the risk of dying from lung cancer, heart disease or the various other ailments associated with smoking.

A person could smoke 23 cigarettes a day of Carlton Menthol—more than a pack—before reaching the tolerable level, Gori and Lynch said. Tolerable levels of the other brands range from 18 cigarettes a day for Now Menthol to three a day for King Sano, King Sano Menthol, Merit, Merit Menthol, Real and Tempo 3.

Gori said that the government research project has tested more than 150 cigarettes modifications in efforts to reduce the danger and that some of those modifications are showing up on the market.

By changing the porousness of the paper, the soil in which the tobacco is grown, the texture of the cut leaf, the curing process, the filter, the burning temperature and the method of manufacture, scientists have substantially lowered the smoke's toxicity, he added.

The results have been turned over to the tobacco industry, and "some of these new cigarettes are a direct result of this work," Gori said, although the industry has never admitted that cigarette smoking is hazardous.

Tar, the total particulate matter found in cigarette smoke, is generally believed to be the chief cancer-causing agent, while nicotine is known to have short-term adverse effects and is suspected of causing addiction, peptic ulcers and other damage.

Gori and Lynch also compared the amounts of four other hazardous substances in cigarette smoke: carbon monoxide, hydrogen cyanide, nitrogen oxides and acrolein.

While some brands showed higher tolerance levels in some substances, the tolerance level was determined by the hazardous substance reduced least from pre-1960 levels. That means the brands ranked least hazardous aren't necessarily the ones with the lowest tar and nicotine content.

Gori conceded that, because it takes many years for most smoking-related diseases to show up, it will be some time before there is specific scientific evidence to prove or disprove his assumptions.

And some recent studies question the value of low-tar and -nicotine cigarettes, either because people tend to hold the smoke in their lungs longer or because new additives in the tobacco and paper may prove hazardous.

"But we feel confident," Gori said, "that these cigarettes will be useful to the point you will have people smoking a pack a day without apparent risk."

The newest report on smoking by the Department of Health, Education and Welfare, released last month, said studies do show a relationship between the amount of tar and nicotine in cigarettes, the amount a person smokes and the degree of risk.

The HEW report didn't assess the dangers of the newer low-tar brands. But it cited one study that found smokers of cigarettes with less than 17.6 milligrams of tar and 1.2 mg. of nicotine reduce the risk of dying about 15 percent when compared to smokers of high-tar and -nicotine cigarettes. However smokers of low-tar cigarettes still have mortality rates that are 50 percent higher than those of nonsmokers.

None of the 27 brands tested by Gori and Lynch exceeded 10.3 mg. tar or 1.01 mg. nicotine.

Gori's program has spent more than $21 million in federal funds since 1975, nearly half of it in search of less-hazardous cigarettes. But he said his budget is being trimmed as the government puts more emphasis on trying to persuade people not to smoke.

Here is a list of the 27 "low-tar" brands tested and the number of cigarettes of each brand that a person may smoke in a day without exceeding "tolerable levels," according to government researchers:

Carlton Menthol	23
Now Menthol	18
Now	17
Stride	17
Carlton	16
L&M Flavor Lights (King)	8
Lucky 100	8
True	8
True Menthol	8

Tempo	3

[From the Washington Post, Aug. 10, 1978]

SMOKING—SOME CIGARETTES NOW "TOLERABLE," DOCTOR SAYS

(By Victor Cohn)

Some cigarettes now have so little tar, nicotine and other harmful elements that they can be called "less hazardous" and can even be smoked in "tolerable" numbers without "appreciable" ill effects on the average smoker, a leading federal cancer scientist said yesterday.

Cigarettes in recent years have been found guilty beyond reasonable doubt of causing lung cancer, heart disease and several other illnesses.

But Dr. Gio Batta Gori, deputy director of cancer prevention at the National Cancer Institute, and Dr. Cornelius J. Lynch said yesterday there has been huge progress "in the last year and year and a half" in removing toxins—or poisons—from some

* * * * *

They expect this will reduce deaths from all diseases linked with smoking. They expect to report this soon in the Journal of the American Medical Association.

"I am not calling any cigarette 'safe,'" Gori emphasized. "The only cigarette that is safe is the cigarette that is not lit.

"I am not talking about what might happen to any individual. I am talking about averages. There may be a risk that still may be there even though we might not see it in overall, large population studies."

Still, he said, there has been so much progress in removing toxins that "we can now begin to talk about 'tolerable' levels of smoking from an overall, public health standpoint. I think we will begin to see some beneficial effects in this country"—that is, some abatement in this nation's lung cancer epidemic and in other diseases—"in five or six years."

Gori said one brand—Carlton Menthols—is so low in the toxins that most persons could smoke 23 a day, more than a pack, with no measurable risk beyond a nonsmoker's.

He said the average smoker might similarly consume 18 Now Menthols, 17 Nows or Strides or 16 Carltons without any problems beyond a nonsmoker's, so far as large-scale statistical studies could detect.

A cancer institute spokesman yesterday said Gori "probably represents the best expertise we have on smoking and health. "Until two weeks ago he headed the institute's program in that field, including the effort to learn to make less hazardous cigarettes.

Dr. Arthur Upton, cancer institute director, nonetheless issued a more cautious statement yesterday saying "our present knowledge does not permit us to establish" any levels "below which smoking might be safe."

"It is the firm position of the National Cancer Institute, the National Heart, Lung and Blood Institute and the Public Health Service that no cigarette now on the market can be considered wholly without risk to health," he said.

He said Gori's figures cannot indicate whether the risk to any single individual is large or small, only that it is "not demonstrable" in epidemiologic or population studies. Upton said "you might double your own risk of cancer," for example, "with no appreciable effect on large-scale population studies."

Gori also said there are many "high risk" individuals who should "never" smoke. These include present or former workers exposed to asbestos or the families of such workers, women using oral contraceptives, pregnant women, and persons with any of the heart, lung or breathing disorders linked to cigarettes.

Some scientists would also caution anyone exposed to any potentially cancer-causing chemical, since many harmful chemicals add to each others' effects in ways that are still little understood.

"What I am saying," Gori explained, is that the average effect of smoking "tolerable" levels of certain "less hazardous" cigarettes today would be as small as the ill effect on persons who smoked only two cigarettes a day before 1960. Virtually all cigarettes then were loaded with poisons like tar and nicotine far beyond present levels.

Gori disclosed his estimates first in an interview with Associated Press reporter Michael Putzel. The Washington Post then obtained a copy of the Gori-Lynch report.

Lynch is manager of the smoking and health program at Enviro Control Inc. of Rockville, the cancer institute's main contractor in the effort.

The five leading brands of less hazardous cigarettes on the Gori-Lynch list—Carlton Menthols, Now Menthols, Nows, Strides and Carltons—represented just under 2 percent of all cigarettes sold last year, Lynch estimated. But 22 more brands—with 17 to 18 percent of the market—are low enough in toxins so the average smoker might use between three and eight a day without appreciable added risk, Lynch said.

The cancer institute program to remove or minimize the effect of the main toxins found in cigarettes or cigarette smoke—tar or "total particulate matter," nicotine, carbon monoxide, nitrogen oxides and acrolein—began in 1970. At the most it has cost $4 million a year, a drop in the bucket compared to cost of smoking's huge toll in death and disease.

Still, it is a program that has often been flayed by some critics of smoking who have argued that efforts should be concentrated on halting smoking altogether.

"I think ours has been a worthwhile program," Gori replied. "We are not trying to endorse cigarettes or smoking in any way. We are only trying to put the facts before the public.

"If we could go from 100,000 cases of lung cancer a year to, say, 2,000 or 3,000 by the development of less hazardous cigarettes, I would still regret the 2,000 or 3,000 deaths but I would think we would have made a tremendous public health gain."

DOCTORS LIST OF CIGARETTES AND THEIR "TOLERABLE" LEVELS

Following is the number of cigarettes the average smoker could consume daily without exceeding a "tolerable" level of risk of cancer or other disease, according to Dr. Gio Batta Gori:

Carlton Menthol	23
Now Menthol	18
Now	17
Stride	17
Carlton	16
L&M Flavor Lights (King)	8
Lucky 100	8
True	8
True Menthol	8
Decade	7
Pall Mall Extra Mild	7
Decade Menthol	6
Iceberg 100s	6
Kent Golden Lights Menthol	6
L&M Long Lights (100s)	6
Lark II	6
Tareyton Lights	6
Kent Golden Lights	5
Real Menthol	5
Benson & Hedges Lights	4
Newport Lights Menthol	4
King Sano	3
King Sano Menthol	3
Merit	3
Merit Menthol	3
Real	3
Tempo	3

Cigarettes not named were not listed by by Dr. Gori.

Mr. HUDDLESTON. Mr. President, these stories were naturally greeted with great approval in the tobacco-producing—not, as some contend, because we view it as absolving tobacco and cigarettes from any health hazards, but because it indicates that our efforts to produce a safer cigarette and reduce potential hazards are showing some beneficial results.

My own State of Kentucky, for instance, commits $4 million annually to research aimed at identifying and removing any harmful components of tobacco. I continue to believe that in this case an ounce of prevention is indeed worth a pound of cure—and research to reduce or eliminate the hazards holds much more promise than efforts to make persons quit smoking.

However, Mr. President, I have been dismayed by the reaction to these published interviews with Dr. Gori. That reaction can only be described as a campaign of vilification and slander aimed at discrediting Dr. Gori and his findings.

I ask unanimous consent that articles in the Washington Post on August 11 and the Washington Star on August 12 be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 11, 1978]

HEALTH OFFICIALS CHALLENGE REPORT ON CIGARETTE USE

(By Victor Cohn)

Administration health officials and the American Cancer Society yesterday disputed vehemently a federal cancer official's contention that smoking limited numbers of certain "less hazardous" cigarettes is "tolerable" from a health standpoint.

But the official, Dr. Gio Batta Gori, deputy director for cancer cause and prevention at the National Cancer Institute, stood firmly by his conclusion. He said in an interview that his superiors are under pressure from Health, Education and Welfare Secretary Joseph A. Califano Jr. to fire him.

Cancer Institute officials denied that there has been any pressure to get rid of Gori, but they joined with Califano and other leaders in the health field in decrying Gori's conclusions.

They said there is no proof yet for his belief that not every smoker, except the "average" one who smokes no more than three to 23 cigarettes daily of some brands now on the market, should suffer no more extra risk of death from any cause than those who smoked only two cigarettes a day before 1960, when all cigarettes were far more dangerous.

Gori said so much tar, nicotine and other chemicals have been eliminated from cigarette smoke that from three to 23 cigarettes of certain brands contain no greater amounts of these chemicals than just two pre-1960 cigarettes. Gori called these smoking levels not safe but "tolerable," meaning the incidence of disease and death would be greatly reduced, though not eliminated.

The health officials said his use of the word "tolerable" in a general population or public health sense would mislead Americans into thinking cigarettes are safe for them as individuals.

"There is no such thing as a safe cigarette" or anything like it and leading government scientists are "all very disturbed" over the fear that millions of people might think so, said Califano, who last January started his own drive to halt cigarette smoking.

Surgeon General and Assistant HEW Secretary Julius Richmond and the heads of HEW's two biggest research units—the Cancer Institute and the National Heart, Lung and Blood Institute—all attacked Gori's "assumptions" that anyone can smoke any number of cigarettes whatsoever at low risk.

Dr. Arthur Upton, Cancer Institute head, said Gori's use of the word "tolerable" was "unfortunate." Gori's statements have "set back our cause, and even if we can correct the misinterpretation, we will have lost valuable momentum," he said.

In further response to the unusual attacks on his conclusions—scheduled to be published in the Journal of the American Medical Association—an upset Gori said in an interview:

"Califano is very hot on his own campaign, so he is putting pressure on the National Cancer Institute to have me disciplined or dismissed or something."

Upton, asked by The Washington Post if he intended to keep Gori in his present job, said, "I have been talking to Dr. Gori" about a change "for perhaps three months," because Gori, a deputy director since 1975, and his new superior, Dr. Gregory O'Conor, "simply haven't found a comfortable working relationship."

But Upton said "there is absolutely no substance" to any contention of pressure from Califano. He said, "I've spoken to the secretary several times today" about this matter, and "at no point has he indicated or asked that Gori was to be disciplined or demoted."

Upton said he had told Gori "that the secretary is upset" and "that the report tends to counteract the secretary's initiative on smoking." But any change in Gori's job, Upton said, will have "nothing to do with his report," since "I knew nothing at all about it until yesterday."

Dr. Sidney Wolfe, head of the Ralph Nader Health Research Group, said Gori should be fired for "the most damaging statement that has been made about smoking in the last 10 years." He called Gori's words "reckless," and said "we have no idea yet what chemicals in cigarette smoke are the dangerous ones," or "what the manufacturers' increases of all sorts of chemical additives for flavor" will do, or whether lower doses of some chemicals will just take longer to cause disease.

Still, Dr. Arthur Holleb, American Cancer Society medical director—while saying "there is no such thing as a proven safe cigarette"—agreed that low tar and nicotine cigarettes impose less serious risks of disease.

Dr. Lawrence Garfinkel, Cancer Society vice president and statistician, said that in two five-year periods—1960–65 and 1966–72—there was a 16 percent drop in mortality from all diseases, a 14 percent drop in heart disease mortality and a 26-percent drop in lung cancer mortality in a half-million male smokers followed by the society.

It was statistics like these that made Gori conclude that further improvements in cigarettes would reduce deaths not only from cancer—his own field—but from heart disease, pulmonary emphysema and other smoking-linked ills.

Garfinkel said these drops were "far from conclusive," but did indicate "some effect" of less dangerous cigarettes Dr. Ernest Wynder, president of the American Health Foundation and well-known cancer scientist, agreed that "it is reasonable to expect some reduction in risks" as cigarettes are made less dangerous.

Gori said the health leaders were themselves misinterpreting his statements. These made it clear that only one brand, Carlton Menthols, is now so low in toxins that by his calculation most persons could smoke 23 cigarettes daily with no measurable risk beyond a non-smoker's. He said the average smoker might similarly consume 18 Now Menthols, 17 Nows or Strides or 16 Carltons without added problems so far as large-scale statistical studies would detect.

But his co-worker, Dr. Cornelius Lynch, said these brands currently represent less than 2 percent of all cigarettes sold—and other "less hazardous" but not nearly as clean cigarettes represent only another 18 percent.

[From the Washington Star, Aug. 12, 1978]

SMOKE BUT NO FIRE AT HEW

Gio Batta Gori, the scientist who touched off a furor this week by suggesting people could smoke some cigarettes without apparent risk, apparently will lose his job in a government reorganization.

"Officials of the National Cancer Institute and the National Institutes of Health have been talking with Dr. Gori for some time about a change in assignment," said a terse announcement yesterday from the institutes' parent agency, the Department of Health, Education and Welfare.

"These conversations go back at least as far as the spring of 1977. The discussions are continuing, and no decision has been made," the statement added.

Gori confirmed that the discussions about his reassignment are the result of an ongoing reorganization, adding that they have been "friendly, above board, and I have no complaints."

Dr. Gregory O'Conor, Gori's division director at the National Cancer Institute, said the Italian-born scientist had been wearing three hats as head of the institute's smoking and health program, nutrition program and deputy director of the division of cancer cause and prevention.

As part of the institutional reorganization, O'Conor said, the smoking and nutrition programs have been removed from Gori's control in recent weeks, and Gori has been told that O'Conor wants someone else as his deputy.

Gori, a $47,500-a-year civil servant, is entitled to be transferred to another post of equal rank, but no agreement has been reached on what job he might take, O'Conor said.

The Division Chief said his relationship with the controversial scientist was "excellent" and that Gori's reassignment had nothing to do with his views on smoking.

But O'Conor also said the emphasis of the smoking and health program probably will shift to behavioral and educational research in line with HEW Secretary Joseph A. Califano Jr.'s campaign against cigarette smoking.

Gori, 48, has been involved in the government research for a less hazardous cigarette almost since the inception of such studies in 1968. The program always has been the subject of some controversy among those who contended the government should concentrate all its energies on stopping the smoking of cigarettes and leave cigarette research to the tobacco industry.

But Gori, a microbiologist by training, has long argued for what he called a more pragmatic approach.

"Since smoking occupies such a prominent position in the mythology of our daily life, it is unrealistic to expect that a society of nonsmokers could be created after a mere 20 years of public education," he wrote in an article published by Science magazine in 1976. "Historic perspective suggests that many decades may be needed to achieve this goal.

"Until then, it is important to protect those who continue to smoke despite all warnings. Leaving them to their fate is neither humane nor economic."

This week it was reported that Gori and a coworker had identified "tolerable levels" of smoke for 27 cigarette brands with relatively low tar.

While Gori was careful to point out that he did not consider the brands "safe," he did say: "Some are so low (in tar and other toxic substances) as to cause no observable hazard" at the levels he cited.

Those levels ranged from three cigarettes a day for several bands to as many as 23 a day for Carlton Menthols.

Publication of Gori's remarks brought an outcry from the U.S. surgeon general and other longtime anti-smoking forces who feared Gori's findings would be interpreted by many as scientific evidence that some smoking is safe.

In a statement issued late yesterday, Gori criticized "the recent misunderstanding" concerning his report.

"This report, and my work of ten years to reduce the toll of death and disability caused by smoking, are on record and testify to my conviction that no cigarette is safe," he said.

"I have consistently maintained that no one should smoke and advocated intensive public education against smoking.

"However, it is apparent that many smokers will not quit smoking despite all inducements to do so. For these smokers, less hazardous smoking materials and ways of smoking are available. These need to be identified, but with a clear warning that a degree of risk will always remain for those who persist in

smoking. My latest report is consistent with this position."

Mr. HUDDLESTON. These articles, Mr. President, indicate that efforts to produce a safer cigarette—or even honest research efforts—are not to be tolerated by some within our Government.

Dr. Gori has been attacked by HEW Secretary Joseph Califano, who Dr. Gori says has tried to get him fired, others within the bureaucracy, and the professional antitobacco lobby.

These actions cause me great concern in two respects: Apparently an effort is being made to fire, discipline or otherwise punish Dr. Gori for candidly reporting the results of scientific research; and this episode causes me to wonder whether research to produce a safer cigarette is being abandoned by the Government.

Mr. President, I have today written President Carter to express those concerns, and I ask unanimous consent that my letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., August 14, 1978.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Earlier this year when Mr. Califano began his anti-smoking and anti-tobacco campaign, I requested and was accorded a meeting with you to express two basic concerns of mine: (1) that the campaign of Mr. Califano not in any way harm the tobacco support program which affects 300,000 family farms, and (2) that the government should give more emphasis to research aimed at producing a safer cigarette.

You gave me strong assurances on both counts, and you have since reiterated your position—most recently on your trip to Wilson, N.C. For that, those of us from tobacco-producing states are grateful.

However, actions in recent days following publication of a report by Dr. Gio Batta Gori, a high-ranking scientist with the National Cancer Institute, have given me cause to wonder if others in this administration share your commitment to research for a safer cigarette.

Last week Dr. Gori and his associate, Dr. Cornelius Lynch, summarized the findings of their research aimed at reducing potential hazards of smoking. They stated that some of the newer low tar and nicotine cigarettes, when used moderately, would "cause no observable hazard."

What has happened since that time can only be described as a campaign of villification and slander designed to discredit Dr. Gori and his findings. This effort to discredit Dr. Gori, even before his research is properly reviewed, has apparently included Mr. Califano, U.S. surgeon general, the head of the National Cancer Institute and Ralph Nader.

This kind of mindless rejection of a serious research project is in direct conflict with your stated objective of continued federal research into the health hazards of tobacco aimed at producing a safer cigarette. It is more reflective of Mr. Califano's opposition to such research on grounds that "there is no such thing" as a safer cigarette.

According to press reports, Dr. Gori is now being moved to another position. He stated in one interview that the move was in the works prior to his recent statements and the resulting outcry. However, in another report Dr. Gori said Mr. Califano is putting pressure on the National Cancer Institute to have him disciplined or dismissed.

I hope you will make certain Dr. Gori is not reprimanded, disciplined, or in any way made to suffer for reporting the facts as he, a scientist, discovered them.

Furthermore, those of us from tobacco states now have serious doubts whether anyone holding the view that a safer cigarette is possible can survive—or even be employed—by an agency under the control of Mr. Califano.

My concern is that we not let this become the death-knell of government efforts to produce a safer cigarette. To do so would constitute a modern-day rejection of science and technology more properly associated with the Luddites.

I have never been one to dismiss scientific research just because its conclusions were uncomfortable. Indeed, when the recent A.M.A. study came out outlining tobacco hazards, I stated publicly that those of us from tobacco states should not reject it out of hand.

By the same token, anti-tobacco forces—especially those within the government itself—should not reject out of hand serious research which tends to show that progress can and is being made in the effort to produce a safer cigarette.

To take that position is actually in contravention to good health. We do not close all factories because air pollution is unhealthy; rather, we find ways of removing or reducing the pollutants before they enter the air we breathe. The same should apply to tobacco.

We should make an even greater effort to identify and remove potentially harmful ingredients in tobacco, and the reactions to Dr. Gori's findings can only make me think the government is becoming an obstacle rather than a catayst toward that objective.

I hope that you can give the tobacco state congressmen and senators, as well as Mr. Califano, renewed indication of your intent to support research to produce a safer cigarette.

Sincerely,

WALTER D. HUDDLESTON.

Mr. HUDDLESTON. As I told the President, the rejection of Dr. Gori's research before it has been seriously reviewed is an attitude more appropriate to the Luddites. To foreswear any hope that science and technology can solve any potential health hazards of tobacco is both shortsighted and counterproductive.

Those of us from tobacco-producing States have always recognized that we will have to provide some answers to the health-and-smoking issue. That is why Kentucky provides $4 million annually in State tax money to search for those answers. That is why I stated publicly that we cannot reject out of hand the research recently released by the American Medical Association stating there is a link between smoking and cancer. And that is why I am not opposed to reasonable and fair efforts to inform citizens of potential hazards in tobacco.

But the other side on this issue must also remained openminded enough to admit the possibility of progress in efforts to produce a safer cigarette. Indeed, Dr. Gori's research indicates that has already happened.

Rather than condemn his findings out of hand, Mr. Califano and like-minded persons should be pleased that progress is being made and provide incentives and encouragement to continue those efforts.

Mr. President, this whole episode leaves me with a bad feeling. It appears that Mr. Califano is trying to develop an orthodoxy on the smoking and health issue which will not be breached by anyone under his control. It appears that Mr. Califano has totally rejected the notion that progress is possible. In short, he has a prohibitionist approach to the whole matter and apparently is totally unwilling to consider any other approach, no matter how well founded in adequate scientific research.

President Carter has on several occasions given his strong endorsement to the tobacco price support program as well as research to produce a safer cigarette. I appeal to him to deliver that message to Mr. Califano before he brings to a halt the only Government research that can provide solutions to the health problem.

Mr. President, I ask unanimous consent that an article about President Carter's trip to North Carolina and an editorial in the Washington Star be placed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

CARTER SAYS ANTISMOKING DRIVE, TOBACCO SUBSIDIES BOTH NEEDED

(By Brooks Jackson)

WILSON, N.C.—President Carter said Saturday in the heart of North Carolina tobacco country that he sees no inconsistency in a $30 million federal anti-smoking campaign while the government helps tobacco farmers financially.

At a political rally here, Carter emphasized the need for continued federal research into the health hazards of smoking. Later, at a mock auction at a huge tobacco barn, he said the federal price support for tobacco cost the taxpayer very little, and "as long as I'm in the White House . . . we'll have a good tobacco loan program."

The president began the day in Norfolk, Va., where he dedicated the Navy's newest nuclear-powered cruiser, and flew back to Washington after an afternoon in Wilson, where his remarks and demeanor at times resembled those of a presidential campaigner.

Carter, a non-smoker, brought a lighter touch to the sensitive issue by poking fun at Joseph A. Califano, Jr., secretary of the Health, Education and Welfare Department, who is directing the anti-smoking campaign.

"I had planned to bring Joe Califano with me," the president said. He added that "he decided not to come" after discovering that Wilson's industry produces bricks as well as tobacco.

The president said Califano jested, about two weeks after presidential drug abuse adviser Peter Bourne resigned, "it was time for the White House staff to start smoking something regular."

Carter came here in part to try to advance the political fortunes of a Democratic candidate for the Senate who is trying to unseat conservative Republican Sen. Jesse Helms, who has called for the resignation of the secretary of Health, Education and Welfare.

The Democratic nominee, John Ingram, said: "We Tar Heels thank you, Mr. President, for protecting the tobacco loan program, which this season has given our farmers and a good crop and good prices."

During Carter's speech, a small group of people chanted "Free the Wilmington 10," a reference to the jailing of 10 persons convicted in North Carolina of firebombing. Five of the 10 are still in jail.

Carter acknowledged their presence, saying that regarding human rights, "one of those rights is to speak, even to shout, when other people are trying to speak."

With that, the president drew the loudest applause during his speech.

[From the Washington Star, August 13, 1978]

DR. GORI'S ORDEAL

Dr. Gio Gori's recent musings with an Associated Press reporter about cigarette smoking and the epidemiology of lung cancer have flushed the Savonarolas of the anti-nicotine crusade from their lairs.

The secretary of Health, Education and Welfare, a reformed smoker, seemed to be leading the charge of the hot-gospelers against Dr. Gori with one of Mr. Ralph Nader's health researchers, Dr. Sidney Wolfe, not far to the rear.

Mr. Califano, who has been spreading the gospel of abstinence, is deeply perturbed. Dr. Wolfe proposed what once was called the short way with sinners. Dr. Gori, he said, should be fired for making "the most damaging statement about smoking in the last 10 years." There are even rumors that Dr. Gori, who as deputy director of cancer prevention at NIH is within Mr. Califano's administrative reach, might be relocated. To Siberia, perhaps?

What did Dr. Gori do to incite this wrath? The best approach may be to ask what he did not say. He did not echo President Carter's recent statement in the tobaccoland citadel of Wilson, N.C., that the U.S. needs research "to make the smoking of tobacco even more safe than it is today"—a curious location from which the literal-minded might gather that future tobacco research would build from a solid foundation of safety. (One might as logically speak of a program to make bullets "even more safe" for human intake.)

Nor did Mr. Gori urge people to smoke more, or say that cigarettes are safe. "The only cigarette that is safe," said he, "is the cigarette that isn't lit." We would not be surprised if Dr. Gori personally feels, as we do, that if people had been intended to suck smoke into their lungs they would be born with a portable tobacco patch.

What Dr. Gori was saying, it appears, is (a) that certain cigarette brands recently produced after costly research, some of which he named, are far lower in toxic tars and nicotine than others—so much lower that it would take from 3 to 23 of them to equal the toxic kick of only two of the older, deadlier vintages; and (b) that, as a matter of statistical probability, the new brands might be smoked in limited numbers with "tolerable" improbability of self-injury. "I am not talking about what might happen to any individual," he said, "I am talking about averages."

Dr. Gori and his research associate, Dr. Cornelius Lynch, are excited by the prospect that cigarette-induced illness may be on the way down as a public health hazard. "If we could go from 100,000 cases of lung cancer a year to, say, 2,000 or 3,000 * * * I would think we would have made a tremendous public health gain." And so we would have.

There are two evident lessons in the Gori flap, one slightly comic and the other rather ominous.

The comic part is that vested economic and psychological interests swirling about the smoking-and-health issue are such that a reputable researcher muses about epidemic probabilities at the risk of being slyly exploited by those who think smoking is good for you, or at least would like to have you think so.

As for those who have decided that smoking is bad for themselves, and throb to dragoon everyone else into their company, the situation is roughly parallel; but more ominous. In their eyes, apparently, there are no innocent facts or opinions about cigarettes and cancer, however "scientific" or detached from ulterior motive. Not even Dr. Gori's careful disclaimers excuse him for running the risk of misinterpretation. By such standards, most scientists would have to take a vow of silence.

To measure the danger of that reaction, and how threatening it is to detached comment on a vital issue of public health, merely imagine that Dr. Gori had spoken of encouraging findings about some other hazard—carcinogenous food additives, say, or alcohol—and ask yourself whether the reaction would be as furious.

The fact is that people will eat rich foods, will imbibe spirits, and will even smoke cigarettes despite the evidence that it is no service to good health to do so. Since that is so, more power to researchers who merely put smokers on notice that while any smoking may be unsafe some cigarettes are statistically less deadly than others. And shame on those who treat them as if they were beating the drums for cigarettes and, indeed, for lung cancer.

Mr. HUDDLESTON. The editorial points out that despite the hysterical outcries to the contrary, Dr. Gori did not advocate smoking; he did not say cigarettes are safe; he simply stated that advances have been made in reducing harmful components to the extent that some cigarettes can be smoked in moderate numbers with significantly less hazard.

Dr. Gori should be applauded rather than condemned as some kind of villain. His heresy is that he told the truth in an orthodox environment that does not allow for deviation from the party line.

Finally, Mr. President, I ask unanimous consent that a letter I wrote today to Mr. Califano be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., August 14, 1978.

Hon. JOSEPH CALIFANO,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: I have been dismayed at the reaction that has occurred since Dr. Gori summarized last week the results of his research on efforts to reduce and remove harmful ingredients in tobacco.

Of particular concern is Dr. Gori's statement that you are exerting pressure on his superiors to either discipline or dismiss him.

If true, such action on your part is both reprehensible and counterproductive to efforts to enhance the health of our citizens.

To take the attitude, which you apparently have, that no progress is possible is a modern-day rejection of science and technology more properly associated with the Luddites.

More disturbing, however, is that the actions of you and Dr. Gori's superiors are in direct conflict with the pledge you made to tobacco state congressmen and senators that you would be fair and open-minded on the issue.

We asked for and received your assurances that you would consider the evidence on both sides of the issue; however, it now appears that an orthodoxy has been established that will allow no deviation from the party line.

To say that I am disappointed in your actions is an understatement. It is a serious detriment to conscientious efforts to produce a better and safer tobacco, and it is a sad day when government seeks to discredit its own scientist for candidly reporting the results of his research.

Sincerely,

WALTER D. HUDDLESTON.

Mr. HUDDLESTON. As I pointed out to the Secretary, his attitude in the Dr. Gori episode is directly contrary to assurances he gave tobacco-State Congressmen and Senators, when he launched his antitobacco campaign to the effect that he would be fair and consider both sides during his efforts.

It appears to me that Mr. Califano has a totally closed mind, with a prohibitionist attitude, on this matter. He is clearly an obstacle rather than a catalyst for progress toward a safer cigarette.

I might say further, Mr. President, that the statements made by Dr. Arthur Upton, head of the Cancer Institute, to me were simply incredible, for a person who is supposed to be interested in the truth, in research and experimentation to determine the truth, to categorically castigate a statement by Dr. Gori, which was based on research and scientific experimentation, to the effect that Dr. Gori was somehow out of line in revealing what his findings were. If we are going to have scientific research paid for by the Federal Government, we ought to be willing to accept the conclusions of that research or the fundings of that research with an open mind. That obviously is not the case with Dr. Upton, it is not the case with Joseph Califano. I think it is time we took a very hard look at what the objectives of these two gentlemen might be as far as their position relating to the effort to produce safer cigarettes versus the effort to simply eliminate the tobacco industry totally in the United States.

I thank the Chair.

The ACTING PRESIDENT pro tempore. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, on this same score, I commend our colleague from Kentucky for bringing into focus the Gori findings on the part of the National Institutes of Health in this particular study. I commend to our colleagues this morning's article by Daniel S. Greenberg, "That 'Smoking Is Safe' Report." I ask unanimous consent that the article in its entirety be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THAT "SMOKING IS SAFER" REPORT

(By Daniel S. Greenberg)

The dominant flavor in tobacco politics is what amounts to a tacit non-aggression deal between Washington and the cigarette industry. Grasp that and you're on the way to understanding why a sensible suggestion from a politically naive government scientist sent Washington's high command of health into a fit of petulant pronouncements last week.

The scientist is Gio B. Gori, an administrator at the National Cancer Institute, who for the past five years has supervised a program in which $18 million was spent for the development of "less hazardous" cigarettes. In a paper soon to be published in the Journal of the American Medical Association, Gori and a colleague correctly state that in terms of what are now known to be the most

dangerous components of cigarettes, some present-day brands—while not safe—are safer than most of those sold in 1960. And they urged, "While programs to discourage smoking should continue, these educational efforts should be coupled with others directed toward reducing the risks to persistent smokers," of whom there are many among this nation's 50 million cigarette smokers.

Less noxious smoke, they continued, could lead to a reduction in cigarette-induced illness and death. And then, lapsing into a bit of easily misunderstood technical jargon, they speculated that the reduction might be so great that the toll from cigarettes might be "considered socially tolerable"—meaning that it wouldn't stand out, as it now does, in mortality statistics. In lay terms, their message was: Don't smoke, but if you do, opt for the less poisonous varieties, which they listed in their article.

Press reports of the Gori thesis brought prompt denunciation from the director of the Cancer Institute, from several other top-level government health officials and from the Department of Health, Education and Welfare, whose chief, Joseph Califano, is leading a loudly proclaimed but, as it turns out, very thrifty campaign against smoking. Gori, they charged, is luring the public into thinking smoking is safe.

What's notable about all this is that to the extent that there are anything resembling durable policies in the mercurial U.S. government, they explicitly include the goal—established in 1968—of developing safer cigarettes. Gori, who is relatively low in the government's health-research hierarchy, didn't con anyone into establishing that goal or providing the $18 million. Rather, both goal and money are part of the so-called war on cancer, and have consistently survived periodic reviews that start with committees of scientists, wind through extensive agency and departmental examinations and finally conclude with approval by the House and Senate appropriations committees. Why, then, the eruption when Gori, writing in a respected, professionally screened medical journal, is merely reporting on work that the U.S. government paid him to perform?

The answer is that Gori's governmental denouncers, fervent anti-smokers all, have the misfortune of being in command of a mock war against tobacco. Though none of them raised any valid criticism of the scientific substance of the article, they recognize that a government-linked nod to the relative advantages of "less hazardous" smoking could diminish even the slightest support they now command for anti-tobacco efforts. For if smoking can be depicted as safe, or even safer, why should the government provide any support to encourage cessation?

The present anti-smoking effort, slight as it is, is politically precarious, what with our beleaguered president having recently journeyed to the heart of tobacco land to laud the economic value of the weed, which, produced mostly on small-scale holdings, earned some $2.3 billion last year for 600,000 farm families. To sell that stuff, the cigarette industry spends over $300 million a year to advertise the top 20 brands; against that sum, HEW has upped its anti-smoking educational drive to $6 million, an amount so piddling as to wipe out any claim that the government is determined to help its people kick the habit.

Safer cigarettes? Like it or not, they exist, though it must be emphasized that they are only safer, not safe, and their main benefit may be only that they delay the arrival of cigarette-induced ailments. But given the fact that millions smoke, and that the biggest market growth is among teen-agers, it's preposterous to reject what may be an opportunity for some hazard reduction.

If the health high command were given ample resources to help ween the public from cigarettes, then the rejection of halfway measures would be justified. But since that's not going to happen, why not recognize that Gori's advice, though politically dangerous to the anti-smoking movement, is, unfortunately, medically sound?

Mr. HOLLINGS. Mr. President, the whole point is that we do have a drive on within the Government to produce a safer cigarette, as well as in private industry. As we produce that safer cigarette, presumably, according to the Califano declaration of war, there is not going to be any such thing as a safe cigarette, there are just going to be none. That is his position. In order to carry that out, he excoriates our friend, Dr. Gori, in a totally unreasonable fashion. I think it is interesting that this was caught by Mr. Greenberg in his morning article, when he said:

What's notable about all this is that to the extent that there are anything resembling durable policies in the mercurial U.S. government, they explicitly include the goal—

That is the goal for a safer cigarette: established in 1968—of developing safer cigarettes. Gori, who is relatively low in the government's health-research hierarchy, didn't con anyone into establishing that goal or providing the $18 million.

So it was not that he was off wandering around on some thought-up assignment that was totally amiss and afar from the goals and policies of the Department of HEW, but down in the hierarchy somewhat, he was carrying out orders in his research endeavor. Then Greenberg points out further that he did not provide the $18 million for it:

Rather, both goals and money are part of the so-called war on cancer, and have consistently survived periodic reviews that start with committees of scientists, wind through extensive agency and departmental examinations and finally conclude with approval by the House and Senate appropriations committees.

That is a somewhat similar situation to what we have in the last several days of debate, where we, as Congress, find it necessary and desirable that we have equal educational opportunity, that there be advantage to the disadvantaged, that we have bilingual education for those who cannot speak the English language, that we have provisions made for the handicapped, that the public schools be open to the decipline problems and the unprepared and all the rest. Those are congressional findings, bolstered by court decisions.

Then, when we do that, when they come loaded down almost in the corner ready for the contest, the private schools come out and say, "Well, let us compete, and what we need in order to compete, rather than lifting the load or evening the burden," they instead say, "give us additional money and more than you have given those that you have loaded down."

Now comes the doctor, after making his findings and everything else, and after he has been through what the HEW Department asked him to do, what Secretary Califano asked him to do. Then, when he makes a scientific and medically sound finding he is held up to ridicule and rebuff.

Mr. Greenberg concludes:

If the health high command were given ample resources to help ween the public from cigarettes, then the rejection of halfway measures would be justified. But since that's not going to happen, why not recognize that Gori's advice, though politically dangerous to the anti-smoking movement, is, unfortunately, medically sound?

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

TUITION TAX RELIEF ACT OF 1978

The ACTING PRESIDENT pro tempore. The Senate will now resume consideration of the pending bill (H.R. 12050), which the clerk will state.

The assistant legislative clerk read as follows:

A bill (H.R. 12050) to amend the Internal Revenue Code of 1954 to provide Federal income tax credit for tuition.

The Senate resumed consideration of the bill.

AMENDMENT NO. 3474

The ACTING PRESIDENT pro tempore. The pending question is the amendment of the Senator from Oregon.

The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, is the amendment number 3474?

The ACTING PRESIDENT pro tempore. That is correct.

Mr. PACKWOOD. Mr. President, I do not see in the Chamber the two principal opponents who spoke last night and indicated they wanted to speak on this amendment.

I shall take only a few moments making my case in chief.

There has been objection stated to the preamble of the bill by several Senators claiming the proponents of the bill are trying to do an end run around the Supreme Court by proclaiming the bill is constitutional.

Mr. President, the argument could be made that any act Congress passes is presumed to be constitutional. The court has found that to be true many times.

Nevertheless, in an endeavor to compromise with those who take offense at the Senate itself making a judicial conclusion, the amendment that I have offered simply is:

"The Congress further finds that the constitutionality of Federal tuition tax credit for the educational expenses of students attending nonpublic schools can only be established by the enactment of a law providing such tax credits, which will in turn provide the Supreme Court of the United States with an opportunity to rule in a decisive and determinative manner.".

Mr. President, note carefully that amendment does not say this bill is con-

stitutional. Senator MOYNIHAN and I, Senator ROTH, Senator RIBICOFF, the other proponents who have argued this for 3 days now, have never maintained that without a shadow of doubt the bill is constitutional.

There is a complete split in the authorities. There is a split in the courts. For every constitutional expert the opponents of this bill can cite saying it is unconstitutional, we can cite one that says it is constitutional.

We had testimony on both sides in the committees. We have letters from both sides, constitutional experts disagreeing with each other as to whether or not the bill is constitutional.

It is obvious there is only one way we are going to find out as to this bill, which is a Federal tax credit. I call the attention of the Senate to the fact there has never been one before. The court has never passed on this issue. The court has never passed on an issue where the breadth of the beneficiaries of a tax credit bill are as broad as in this bill, even at the primary and secondary level. When we add the fact all higher education is added to this, the overwhelming preponderance of the beneficiaries are people who go to public schools.

That was not true in Nyquist. That was not true in Lemon. That was not true in Wolman or any other case. In each of those cases, the Supreme Court found the overwhelming preponderance of the beneficiaries were children attending Roman Catholic schools.

So, one, they never had one with a tax credit; or two, the number of beneficiaries in this case.

Even if we limit it to primary and secondary education, the court never had a bill where we had the breadth of the beneficiaries we now find in primary and secondary private school because the trend in the last 10 years has been a continuing decline in Catholic enrollment and an increase in the enrollment of Protestant and Jewish primary and secondary schools.

Mr. President, I hope it is clear from the debate we have had over the last 3 days that our Founding Fathers would have found no offense at the kind of legislation here proposed. Whatever might have been their intent in drafting the first amendment, it is very clear from their practice that they saw nothing wrong with using public funds to support church-run primary and secondary schools.

Every member of the Constitutional Convention came from a State that, prior to adoption of the Constitution and after, levied taxes—not tax credits, not tax deductions, levied taxes—collected those taxes, and gave the taxes to churches to run primary and secondary schools for the education of those children who chose to go to school.

It was not until 1820 we had a public school system, just the start of it. That was in Delaware. It was the start of the public school system as we know it today. That process was not completed until 1850 in some States. We had a situation of States levying taxes, or local governments levying taxes, giving the money to churches to run schools.

So, regardless of what our constitutional founders may have been thinking about when they drafted and finally ratified the establishment clause, regardless of whether they were thinking of an established religion in the sense of the Church of England, regardless of whether they were thinking of an established religion in the way many of the States had established religion at the time of the founding of the Constitution, regardless of the fact that what they were probably thinking about—and it is very difficult to tell because the debate on this particular amendment was very limited—it would seem that what they were thinking about was an established religion in the normal sense it was understood in the later 1700s, which was a State religion adopting a particular church.

There was not a word in the debate as to whether or not our constitutional fathers intended to prohibit the use of tax money to be given churches to run schools.

All I can say is that in practice, every one of them probably belonged to State legislatures or to city councils or township councils that, indeed, levied those taxes and gave them to church schools.

That is the history. Somehow, some way, by tortuous reasoning, the Supreme Court in past decisions has in some cases, in State cases, found that deductions for tuition under certain circumstances were constitutional. But they had to derive that from a later interpretation of the Constitution than was intended by our founders.

Mr. President, today we have child care credits. We may take up to $400 off our income tax for child care expenses. We may take that off the income tax even though for child care we have sent our child to a church-run care center, run in the basement of the church, run by nuns, run by rabbis, run by whatever other religious order may be in charge of the day care center, apparently on the presumption that from the time a child is at least age 0 to 6 they will be uninfluenced by the religion of the day care center.

The GI bill provides benefits to those attending public or private, primary, secondary, higher education, vocational, and a variety of other schools mentioned. I mentioned primary or secondary and the Veterans' Administration has paid benefits to primary and secondary sectarian schools under that bill, again apparently on the presumption that once we have been in the military we are safe to be entrusted back to a primary or secondary sectarian school without being washed by religion.

So, if there is anything at all, it is only in the age of, roughly, 6 to 17, or 6 to 18.

Now, it is the feeling of the sponsors that the bill as we have drafted it is constitutional. We think it is. We have not intentionally drafted an unconstitutional bill. But because it is arguably unconstitutional, we have provided a 2-year delay in the effect of the primary and secondary tax credits.

We have provided a provision for an expedited court test, so that this issue will go to the Supreme Court and they will decide for the first time whether or not a Federal tax credit for primary and secondary education is constitutional or unconstitutional.

That is all my amendment says. There is no other way that the Supreme Court can pass on that particular issue unless we pass a Federal tax credit bill. They do not give advisory opinions. They have to have some justiciable controversy before them.

Let me close by emphasizing once more that this amendment I have offered changes the preamble, so that the preamble does not find the bill constitutional. The preamble now will say that the only way the court can pass on the issue of constitutionality is for Congress to pass a bill creating the Federal tax credits and sending the issue to the court for determination.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, at this point, while we await the debate between the Senator from Missouri (Mr. EAGLETON) and the Senator from Oregon (Mr. PACKWOOD) relative to constitutionality, I think it would be well to include some items in the RECORD, in the interest of time.

I ask unanimous consent that an excerpt from the report of the Committee on Appropriations in connection with this bill be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ELEMENTARY-SECONDARY EDUCATION

There are unique features relating to elementary and secondary tuition tax credits legislation which raise serious questions that have not been adequately addressed in the Senate:

First, enactment of tax credits for elementary and secondary education would result in a dramatic shift in Federal education policy in favor of private-school students. Only those private school students most in need, such as handicapped, non-English-speaking, or disadvantaged now receive Federal assistance. In other words, public-school students with no special needs receive no direct Federal assistance. Tax credits would subsidize all students in private schools. Private schools that serve economically disadvantaged children, or other children with special needs, currently receive aid through title I of the Elementary and Secondary Education Act. Under this bill, however, all private schools would receive aid, whether or not they chose to serve students with special education needs whom the Federal Government has required the public schools to serve. By extending blanket assistance to all children in private schools, this amendment would turn on its head the timetested Federal policy of targeting aid to those who need it most.

Presently, the Federal Government supports private-school students at approximately $50 per student. Per capita support for public-school students is approximately $120 per student. Assuming full benefit of the tax credit proposal, the Federal Government would then be in the position of providing more than four times the support for each private school student than it currently does for each public school student.

Second, the ultimate cost of this legislation will be much higher than is generally recognized. Cost estimates do not consider the potential billions of dollars required to fund those students in new private academies established to make advantage of this legislation. Nor does it take into consideration possible moves by public schools to charge tuition.

Third, H.R. 3946 as reported by the Finance Committee raises serious legal questions under the Establishment Clause of the first amendment to the Constitution. The Supreme Court decision in the 1973 *Nyquist* case, prohibited tuition tax credits under a State statute, stating:

"Special tax benefits, however, cannot be squared with the principle of neutrality established by the decisions of this Court. To the contrary, insofar as such benefits render assistance to parents who send their children to sectarian schools, their purpose and inevitable effect are to aid and advance those religious institutions."

Given this relatively recent Supreme Court decision, the Committee believes this proposal holds out a false promise of tax relief.

Fourth, tuition tax credit would make it easier for a student to attend a segregated or minimally integrated school if the parents wished to avoid an integrated public school. Tuition tax credits would be an encouragement and reward to those who flee the public schools to attend private academies created largely in response to desegregation in public schools.

Even though H.R. 3946 limits the tax credit to expenses for tuition for attendance at tax-exempt institutions in order to prevent the credit from benefiting schools with racially discriminatory admission policies, there would be problems of monitoring tax forms and proving discrimination. The Internal Revenue Service should not be forced to assume an expanded role in handling discrimination investigations. Further, it makes no sense to give IRS the responsibility of enforcing civil rights when the Congress has previously delegated that responsibility to other agencies.

Although the foregoing sets forth the highlights of a number of problems and objections raised by H.R. 3946, it is not all inclusive or reflective of the individual views of all members of the Committee. Accordingly, the Committee does believe this measure creates more problems than it would solve and has reported the bill to the Senate with the recommendation that it not be adopted.

Mr. HOLLINGS. Mr. President, this report goes right to the matter of appropriating money for postsecondary education. It is very interesting that the members of the Appropriations Committee, like the Members of the U.S. Senate, have no difficulty in finding out what the law of the land is on this particular score.

The contention of the Senator from Oregon is this: How can they ever learn, unless we introduce a bill? That is a great favor for the Supreme Court of the United States. As if the Court never really has had the opportunity to rule on financial assistance to the elementary and secondary schools, or to the private schools, or to the parochial schools. As if the Court never has ruled on Federal action as well as State action. As if the Court never has ruled on the tuition tax credit approach.

We have only to look at the report of the members of the Appropriations Committee, charged with the financial responsibility of appropriating funds. They cite the 1973 Nyquist case:

Special tax benefits, however, cannot be squared with the principle of neutrality established by the decisions of this court. To the contrary, insofar as such benefits render assistance to parents who send their children to sectarian schools, their purpose—an inevitable effect—was to aid and advance those religious institutions.

My friend intimated in the debate yesterday that you have to be anti-Catholic to have that particular opinion. But this happens to be a legal opinion, not a personal opinion. You do not have to be anti-religious, as my friend said yesterday, to have that opinion. It just happens that under the Constitution, the establishment clause of the first amendment, you cannot aid or inhibit a religion. You should leave it alone. When they come in with a plan to spend the taxpayers' money to aid private schools, which are 85 to 90 percent parochial, they are aiding a religion.

There is no fine borderline case here about providing maps or other technicalities. Instead there are hard decisions on behalf of the Court.

Going further, Mr. President, I was asked on yesterday to put in the RECORD additional letters and resolutions with respect to the position of various organizations. I ask unanimous consent to have printed in the RECORD a letter from the distinguished president of Bob Jones University, in Greenville, S.C.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BOB JONES UNIVERSITY,
Greenville, S.C., June 23, 1978.

Hon. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HOLLINGS: The Packwood-Moynihan Elementary, Secondary, and College Tuition Tax Credit bill is soon coming up for a vote in the Senate. I am writing to request that you vote against the bill.

There is considerable difference of opinion among Christian school educators as to whether the bill is good or bad for private Christian education. I believe it is bad.

Everything that the government and the courts have done with regard to private education in the last eight or ten years has been to hinder private schools and to force them out of existence, if possible. Our basic distrust of the government's attitude toward private Christian education leaves us no reason to think that the government has mellowed its position or intends any good for the private schools with this Packwood-Moynihan bill.

I speak for Bob Jones University when I say that we do not want any government help of any kind. We just want the government to keep its hands off, and any tuition tax credit given to parents for sending their children here will eventually be interpreted by the agencies which administer the program to be federal aid to the college, even as the courts have now interpreted aid to the student to be aid to the college. No decent, Christian school wants aid in any form from the federal government. I'm afraid that the Packwood-Moynihan bill will be the undoing of separation of church and state as it affects Christian education.

I urge you to cast a negative vote when this bill goes to the Senate floor.

Thank you.

Sincerely yours,

BOB JONES III,
President.

Mr. HOLLINGS. Mr. President, I read from the letter:

I speak for Bob Jones University when I say that we do not want any government help of any kind. We just want the government to keep its hands off, and any tuition tax credit given to parents for sending their children here will eventually be interpreted by the agencies which administer the program to be federal aid to the college, even as the courts have now interpreted aid to the student to be aid to the college.

There you are. The Senator from Oregon cannot see it. Those who are in the business of administering these universities come in and say that they are not for any tuition tax credit.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from Howard M. Squadron, president of the American Jewish Congress, dated August 11.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN JEWISH CONGRESS,
August 11, 1978.

Hon. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HOLLINGS: Please be assured of the support of the American Jewish Congress for your amendment to the Tuition Tax Relief Act which is now pending in the United States Senate. We trust the amendment will receive favorable action when it reaches the Senate floor for a vote next week.

The American Jewish Congress has, since its inception 60 years ago, been in the forefront of the struggle to protect the public school system and we do not believe that the federal government should be in a position to weaken that system by underwriting non-public education with the use of public funds.

Furthermore, federal aid to private schools, as embodied in pending tuition tax credit proposals, raises the danger of creating a breach in the wall of separation between church and state. Such aid is in violation of the constitution and in contradiction to the principles upon which our non-sectarian public schools rest.

We are grateful for your efforts to protect one of the most valued institutions in American life, the public school system.

Sincerely yours,

HOWARD M. SQUADRON,
President.

Mr. PACKWOOD. Mr. President, will the Senator yield for a question?

Mr. HOLLINGS. I yield.

Mr. PACKWOOD. Is Bob Jones University the one that lost its 501(c)(3) exemption because of discrimination?

Mr. HOLLINGS. I am not sure whether it did or not. I am sure they had a case, and I see the gentleman nodding there.

Mr. PACKWOOD. I believe the record will show that this university did discriminate on the basis of race. It use to have a 501(c)(3) exemption, and it lost that. It has had its nose out of joint ever since about this issue. I think they are now afraid that if we have this tuition tax credit bill, which students going

to their school will not be entitled to, it will put them at a disadvantage with other schools.

Mr. HOLLINGS. I would not say the university has its nose out of joint. I would say that Bob Jones is typical of many schools and many school administrators in our particular section of the country. It is accredited to be an outstanding college.

The Senator finds many that are outstanding, with great diversity in pluralism. I do not know what that pluralism is. Every time we come to that, I never really know whether we are going to coronate the Senator from Connecticut, on the one hand, or start the Democratic Convention, on the other. Then when we really get into the meat of the coconut and start debating this thing, we run off on tangents of diversity and pluralism.

Bob Jones University happens to have art classes that are internationally known; music courses that are internationally recognized. It has that pluralism. It has that pluralism and it has that diversity.

And if it has a position with respect to discrimination I am not totally familiar with that. I am not hedging. I understand that there was a case brought. I never did really realize what the final outcome was. But I made no bones about the many, many, many protest schools.

The Senator from Rhode Island brought out that it is not the case that the public schools are shoving out the private schools. On the contrary the diminution in enrollment in the parochial private schools, on the one hand, and the public schools, on the other hand, took place during 1965 to the period 1975.

During the 5-year period between 1970 and 1975, the State of Kansas public elementary and secondary schools lost 13 percent of its enrollment; the State of North Dakota between 1970 and 1975 in elementary and secondary schools lost 10 percent of its enrollment.

It is not our contention, necessarily, that the private schools shoved them out of public schools. We are just giving realistic facts, as the Senator from Rhode Island was doing on yesterday afternoon. And they all diminished—private, parochial, and public elementary and secondary schools, over that 10-year period.

Now the decline of private school enrollments has bottomed-out, particularly the Catholic schools, as accounted for by the Catholic Conference. There has been a slight enrollment increase in the last year. What has really occurred is that there has been a blossoming in the past 10 years of protest schools, private schools, that have sprung up over the entire southland, and in other parts of the country.

Referring again to the American Jewish Congress letter from Howard M. Squadron:

> We are grateful for your efforts to protect one of the most valued institutions in American life, the public school system.

Now, the American Jewish Congress is not anti-Catholic; it is not anti-religious. It has fought for 60 years for an established principle of the separation of church and state, and they do not want that wall of church-state separation breached, and that is exactly what they say.

"Such aid is in violation of the Constitution."

They have no difficulty.

Organizations and educators galore, everyone in the land, seems to know the law of the land, but the authors of this bill come up with a unique proposition: We want to help the Supreme Court. How can they decide? We must help them decide.

So in order to get them to decide this unique question that has been decided over and over and over and over and as recent as last summer a year ago, "Now we are going to propose a bill."

Is that not a reasonable request? Do you not want to help the Court to decide what has already been decided?

Mr. President, other organizations, for example, the Southern Baptist Convention met this summer and they passed a resolution, No. 16, on tuition tax credits.

Mr. President, I ask unanimous consent that the resolution in its entirety be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION NO. 18—ON TUITION TAX CREDITS

Whereas the Congress of the United States is considering legislation to give taxpayers a tax credit (that is, a direct subtraction from one's tax bill) for tuition payments.

Whereas the effect of such legislation would be of most benefit to those who can afford to finance their children's attendance at private schools, including elite schools,

Whereas most private elementary and secondary schools are related to churches and exist to serve the religious mission of sponsoring churches,

Whereas tuition tax credit legislation carries the potential of financing private education at the expense of public education,

Whereas the attorney general of the United States has issued an advisory opinion that such legislation is of doubtful constitutionality under the First Amendment, especially with regard to tuition paid to elementary and secondary schools,

Whereas the Baptist Joint Committee on Public Affairs has opposed such legislation because of its threat to the principle of separation of church and state,

Be it therefore Resolved, that we call upon President Jimmy Carter to veto any tax credit legislation now under consideration by Congress, and

Be it further Resolved, that we, messengers to the Southern Baptist Convention, meeting in Atlanta, Georgia, on June 15, 1978, register our opposition to all tuition tax credit legislation pending in Congress; urge the Baptist Joint Committee on Public Affairs to continue to oppose such legislation; and express our concern over such legislation's threat to the First Amendment guarantees of non-establishment of religion and the free exercise of religion.

Mr. HOLLINGS. "Whereas the Baptist Joint Committee on Public Affairs has opposed such legislation because of its threat to the principle of separation of church and state."

They see the inroads. They see the unconstitutionality.

Mr. President, the State of North Carolina is an outstanding State with respect to education. There is no question about it. I tried, in a sense, to emulate its technical training school system. I know its board for higher education and its approach to higher, elementary and secondary education has been considered a leader in our southland.

I never forget they passed a sales tax in North Carolina in 1936 for public education, and it was not until 15 years later, in 1951, that we followed the leadership of North Carolina in trying to build up our public schools.

Incidentally, no one argued at that particular time that because they paid a sales tax and had no children—and since all the sales tax money went for education then "the government should reimburse them because it is unjust and inequitable." What we want is fairness and justice and nondiscrimination.

That is the plea being made today that they should be reimbursed, because their children—who would be allowed into the public schools—chose rather to attend the private school, while the parents paid their property tax.

They passed a sales tax in North Carolina in 1936 and in 1951 in South Carolina, and no one has ever brought a suit or complaint or even extended the idea that since I do not have any children, I do not have to pay a tax.

All the tax, incidentally, every red cent of the 4 percent sales tax in the State of South Carolina, goes to elementary and secondary education.

Now comes the point we were talking about yesterday, on certification and entanglement, and the Senator from Oregon and myself seemed unable to understand each other.

The Senator from Oregon could not understand the almost accepted fact of the Senator from South Carolina that any time you do this you have entanglement. The Senator from South Carolina could not understand the position of the Senator from Oregon that no entanglement whatever was involved.

Let us look at the Columbia Christian Academy and the other Christian academies that are located in North Carolina. Under the State law the State department of public instruction was required, under this new law passed last year, to insure that the nonreligious curriculum of private schools meets certain standards.

We do not have that in South Carolina. But North Carolina, perhaps again leading the way, has attempted under article 32, chapter 1–15, to require just that—that the nonreligious curriculum of the private schools meet certain standards.

Sixty-one schools refused to fill out the necessary forms, and their refusal is premised on the basis of the separation between church and state.

So the State sues the 61 schools for refusing to fill out the State forms, and

that is on its way to the U.S. Supreme Court.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. ALLEN). Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair. Madam President, early last evening—at about 7 o'clock—a not altogether agreeable exchange took place upon this floor. A number of persons who do not support the legislation which Senator RIBICOFF, Senator PACKWOOD, Senator ROTH, and I have introduced expressed great displeasure, even to the point of making personal references, at the fact that we, the bill's supporters, had hoped to get an audience to attend to some of the arguments we were making. We simply hoped to have the opportunity to persuade other Senators of the cogency of our position.

It seemed to trouble people, that we should ask for votes and further discourse. We had one vote. But this came after 2 days during which we spoke to an essentially empty Chamber. Some Senators were away, no doubt, on business. Others no doubt have stayed away by choice, not wanting to hear what we had to say; we resorted to very elemental strategems in the hope of seeking a vote at 7 o'clock, so that these Senators might find it convenient to be present.

Even then, not many chose to stay on the floor.

At that point, given the high level of displeasure with our efforts to gather an audience for our debate, we concluded at an early hour. Now we are back, Madam President. We have been here for an hour, and not one of those concerned with the lateness of the hour last night has yet appeared at this not inordinately early hour. We are once again alone and surrounded by virtual silence. We have stood for 2 days. And I believe we have had fruitful exchanges with the Senator from South Carolina and the Senator from Arkansas, who are also now on the floor. But where are those who were so annoyed at 7 o'clock last night that we were keeping the Senate late and who argued that this debate could best be conducted in the bright and shining hours of the morning? Where are they now?

Madam President, I suggest the absence of a quorum.

Mr. PACKWOOD. Madam President, will the Senator withhold that?

Mr. MOYNIHAN. Yes.

Mr. PACKWOOD. Madam President, I ask unanimous consent that Mimi Weyforth, of my staff, may have the privileges of the floor during the debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. EAGLETON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Madam President, is the pending order of business the Packwood amendment that has been under discussion?

The PRESIDING OFFICER. The Senator is correct.

Mr. EAGLETON. Madam President, I will address my remarks, in essence, to the Hollings amendment, but since the Packwood amendment treats of the question of the constitutionality of tuition tax credits, I think the remarks will be equally germane at this point as well.

I favor, Madam President, the Hollings amendment, which would strike from the Packwood-Moynihan bill those provisions which pertain to tuition tax credits for private elementary and secondary education. I do take this position with simple or benign comfort, for my own personal elementary and secondary education was through private schools. Pluralistic education, as afforded by a mix of public and private schools, is one of the great strengths of our Nation. The private education component of that mix is caught in the creeping squeeze between declining enrollment and rising costs. No doubt the private schools need help. No doubt the private schools have been helped. No doubt the enactment of Packwood-Moynihan, if constitutional, would help private schools. The threshold question for me, Mr. President, is not one of need, but one of constitutionality.

It is clear to me that the mechanism selected by Senators PACKWOOD and MOYNIHAN—the tuition tax credit—is unconstitutional under the Supreme Court's decisions in the Nyquist and Sloan cases—(*Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973); *Sloan* v. *Lemon*, 413 U.S. 825 (1973)).

THE CONSTITUTIONAL ISSUE

The first amendment to the U.S. Constitution reads as follows:

> Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

Since the preponderance of private schools in this country are church related, it is the establishment clause which has caused the Supreme Court to monitor closely whether a particular legislative mechanism is or is not violative of the "wall of separation between church and state" as the Supreme Court has expounded first amendment law.

To be sure, the Supreme Court has not at all times spoken with a clarion voice on separation of church and state issues. Prof. Antonin Scalia of the University of Chicago School of Law, a vocal proponent of the Packwood-Moynihan bill, testified with considerable vigor and some persuasiveness on the "confusing" and "bewildering" nature of Supreme Court decisions beginning with the Everson case in 1947 right up through the Wolman case in 1977 with lots of cases—and, admittedly, lots of zigs and zags—in between.

But, Madam President, although there are many unresolved constitutional thickets in first amendment law, there is one area where the Court has spoken precisely and definitively: tuition tax credits for elementary and secondary private education are unconstitutional. That is what the Supreme Court said in both the Nyquist and Sloan cases when it declared unconstitutional statutes in New York and Pennsylvania which sought to provide same.

It is because of the Nyquist and Sloan cases that the Attorney General of the United States has stated that Packwood-Moynihan is unconstitutional. It is because of the Nyquist and Sloan cases that Professors Paul Freund, Harvard Law School; Laurence Tribe, Harvard Law School; Andrew Kaufman, Harvard Law School; Gerald Gunther, Stanford Law School; William Van Alstyne, Duke Law School; Kent Greenwalt, Columbia Law School, amongst others, state that Packwood-Moynihan is unconstitutional.

It is Nyquist and Sloan that the proponents of tuition tax credit cannot escape, although escape they try. Senator MOYNIHAN escapes them by not even mentioning them in his two major public utterances on the constitutional issues involved in his bill. I refer to his article in the April 1978 issue of Harper's magazine and his address to the College of St. Rose, Albany, N.Y., in May 1978. The good Senator flails away at bigotry of the Jacksonian Democrats, the anti-Catholicism of President Ulysses S. Grant, the anti-Papist plank in the 1876 Republican platform, and unintended, but apparent anti-Catholic bias of Justice William O. Douglas, in his speech, I think it is, "I do not think Douglas was anti-Catholic. It is just that ***" Good wordsman that the Senator is, I wonder why he did not have even one word for the two Supreme Court cases which outlaw the premise of his bill? He simply writes them out of existence by failure even to mention them.

Let me quote from the Supreme Court in the Nyquist case:

> Special tax benefits, however, cannot be squared with the principle of neutrality established by the decisions of this Court. To the contrary, insofar as such benefits render assistance to parents who send their children to sectarian schools, their purpose and inevitable effect are to aid and advance those religious institutions.

There is no doubt that the private schools are confronted with increasingly grave fiscal problems, that resolving these problems by increasing tuition charges forces parents to turn to the public schools, and that this in turn—as the present legislation recognizes—(meaning the New York statute that was before the court) exacerbates the problems of public education at the same time that it weakens support for the parochial schools. . . . They are substantial reasons. Yet they must be weighed against the relevant provisions and purposes of the First Amendment, which safeguard the separation of Church from State and which have been regarded from the beginning as among the most cherished features of our constitutional system.

It is true, of course, that this Court has long recognized and maintained the right to choose nonpublic over public education. It is also true that a state law interfering with a parent's right to have his child educated in a sectarian school would run afoul of the Free Exercise Clause. But this Court repeatedly has recognized that tension inevitably exists between the Free Exercise and the Establishment Clauses, and that it may often not be possible to promote the former without offending the latter. . . . However great our sympathy for the burdens experienced by those who must pay public school taxes at the same time that they support other schools . . . neither may justify an eroding of the limitations of the Establishment Clause now firmly emplanted.

The Supreme Court, by the way, misspelled the word "implanted."

Madam President, the Packwood-Moynihan bill is purely and simply a repackaging of the New York and Pennsylvania statutes struck down by the Supreme Court in Nyquist and Sloan. It is specious to argue that putting a pretty new congressional ribbon around an already declared unconstitutional package somehow purifies the contents.

Finally, Madam President, let me address the question as to whether we as Senators should at all concern ourselves about the issue of constitutionality. Some of my colleagues argue: "What the heck, our job is to pass laws. It's the Supreme Court's job to pass on their constitutionality. We should do 'our thing.' Let the Supreme Court do 'its thing.' " Professor Scalia, mentioned earlier as a proponent of Packwood-Moynihan, puts it a bit more professorially: "I urge you, then"—meaning the Members of the Senate—"to approach this issue as a question of what the constitutional law 'should be,' rather than vainly seeking to determine what it 'is' under the decisions of the Court."

I submit that it is our role to enact bills which will make both good public policy and sound constitutional law. Our role is not to grasp at an ephemeral, flimsy pretext of somehow granting the Supreme Court a second-chance learning experience. Our job is not to pass the constitutional buck to the Supreme Court simply to get it off our backs. Time and again in other legislation we make constitutional evaluations pretaining, for example, to the search and seizure clause, the due process clause, the equal protection clause, the interstate commerce clause, and so forth. How can we and why should we shirk our responsibility with respect to the first amendment issue?

Madam President, I am well aware of the political appeal of granting partial relief to parents who support the public schools they do not use. While simple equity might demand that we find a way to relieve these citizens of the heavy financial burden of educating their children, I do not think the tuition tax credit as provided by this bill, insofar as it provides relief at the elementary and secondary school level, comports with the constitutional requirement of separation of church and state, and therefore, at the appropriate time, when we get around to voting on it, I shall support the Hollings amendment to strike it from the bill.

Madam President, I ask unanimous consent that the following items be printed at this point in the RECORD: First, the Library of Congress topical listing. Second the legal opinion of the Attorney General of the United States; and, third the letter opinion of Professors Freund, Tribe, Kaufman, and Gunther.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL PROGRAMS IN WHICH NONPUBLIC ELEMENTARY AND SECONDARY SCHOOL STUDENTS ARE ELIGIBLE TO PARTICIPATE

Asterisks (*) mark programs which have statutory provisions expressly *requiring* the participation of eligible nonpublic school students. Numbers preceding program citations are those assigned to program in the Catalog of Federal Domestic Assistance. Programs for initial preparation of teachers are not included.

I. Programs Administered by the U.S. Office of Education:

Alcohol and Drug Abuse Education Act;

13.420—alcohol and drug abuse prevention.

Education Amendments of 1974—Title IV:

*13.562—education for gifted and talented children and youth (sec. 404; included in consolidation in Title IV, Part C, of the Elementary and Secondary Education Act.

Education Amendments of 1974—Title VII—National Reading Improvement Program:

*13.533—Right to Read—elimination of illiteracy.

Education of the Handicapped Act:

*13.449—formula grants to States (Part B).

13.444—early childhood education (Part C).

13.445—deaf-blind centers (Part C).

13.450—regional education programs (Part C).

13.447—physical education and recreation research (Part E).

13.520—specific learning disabilities (Part G).

Elementary and Secondary Education Act—Title I:

*13.428—formula grants to local education agencies for education of low-income children.

13.427—handicapped children.[1]

*13.429—migratory children.

13.431—neglected or delinquent children.[1]

*13.512—special incentive grants (Part B).

Elementary and Secondary Education Act—Title II:

*13.480—library resources, textbooks and other instructional materials; included in consolidation in Title IV, Part B, of the Elementary and Secondary Education Act.

Elementary and Secondary Education Act—Title III:

*13.519—supplementary education centers and services; guidance, counseling, and testing (sec. 301); included in consolidation in Title IV, Parts B and C of the Elementary and Secondary Education Act.

Elementary and Secondary Education Act—Title VII:

*13.403—bilingual education.

Elementary and Secondary Education Act—Title VIII:

*13.410—dropout prevention (sec. 807); included in consolidation in Title IV, Part C, of the Elementary and Secondary Education Act.

*13.523—school health and nutrition services for children from low-income families (sec. 808); included in consolidation in Title IV, Part C, of the Elementary and Secondary Education Act.

*13.525—Indian education—special programs and projects (sec. 810).

Emergency School Aid Act:[2]

*13.525—basic grants to LEA's.

*13.526—pilot programs.

*13.528—bilingual education projects.

*13.529—special programs and projects.

*13.530—educational television.

*13.532—special programs.

Environmental Education Act:

13.522—environmental education.

Headstart—Follow Through Act (Community Services Act, Title V):

*13.433—Follow Through

Higher Education Act—Title IV:

13.488—Talent Search.

13.492—Upward Bound.

13.543—Educational Opportunity Centers.

Higher Education Act—Title V:

13.489—Teacher Corps.

National Defense Education Act—Title III:

*13.483—strengthening instruction through equipment and minor remodeling; included in consolidation in Title IV, Part B, of the Elementary and Secondary Education Act.

Vocational Education Act:

*13.499—special needs (sec. 102(b); Part B, sec. 122(a)(4)).

13.493—basic grants to States (Part B).

*13.502—innovation (Part D).

13.494—consumer and homemaking education (Part F).

*13.495—cooperative education (Part G).

13.501—work-study (Part H).

13.558—bilingual (Part J).

II. Programs Administered by Other Federal Agencies:

DEPARTMENT OF AGRICULTURE

Food and nutrition service

Child Nutrition Act:

*10.533—school breakfast program.

10.544—nonfood assistance for school food programs.

National School Lunch Act:

*10.555—school lunch program.

*10.556—school milk program.

[1] Program aids children whose education State agency rather than LEA is directly responsible for; States in some cases arrange with private organizations, for instance by contract, to provide educational services to these children.

[2] Participation of eligible nonpublic school children must be provided for by applicant local education agencies; when applicant is other than LEA, statute does not expressly require participation of eligible nonpublic children (although regulations do in some cases).

National agricultural library

5 U.S.C. 5946; 7 U.S.C. 450b, 450i, 2201, 2202, 2204, 2206, 2244, 2264, 2265.

10.700—National Agricultural Library service.

DEPARTMENT OF COMMERCE

Domestic and international business administration

Tariff Schedules of the United States:

11.105—importation of duty-free educational and scientific materials.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institute of Education

General Education Provisions Act:

13.575—educational research and development (sec. 405).

Office of the Secretary

Federal Property and Administrative Services Act:

13.606—surplus property utilization.

Vocational Rehabilitation Act:

13.603—Office for Handicapped Individuals.

Public Health Service

Executive Order 11562 (September 25, 1970):

13.289—President's Council on Physical Fitness and Sports.

DEPARTMENT OF THE INTERIOR

National Park Service

15.902—national environmental study areas and national environmental education development programs.

Energy Research and Development Administration

Atomic Energy Act; Energy Reorganization Act:

24.002—motion picture film libraries.

24.023—information services.

LIBRARY OF CONGRESS

Act to Provide Books for the Adult Blind (2 U.S.C. 135a, a–1, b):

42.001—books for the blind and physically handicapped.

National Aeronautics and Space Administration

National Aeronautics and Space Act:

43.001—space science education project.

National Foundation on the Arts and Humanities

National Foundation on the Arts and Humanities Act:

45.001—promotion of the arts—architectural and environmental arts.

45.003—promotion of the arts—education.

45.004—promotion of the arts—literature.

45.005—promotion of the arts—music.

45.111—promotion of the humanities—education projects.

National Gallery of Art

20 U.S.C. 71–75:

68.001—extension service.

Smithsonian Institution

Act of Congress approved August 10, 1846:

60.001—programs in basic research and public education.

60.005—educational services for elementary and secondary education.

60.013—traveling exhibition service.

Veterans Administration

38 U.S.C. 1661 (GI Bill)

64.111—veterans educational assistance.

HARVARD LAW SCHOOL,

Cambridge, Mass., March 27, 1978.

Hon. EDMUND MUSKIE,

Chairman, Budget Committee,

U.S. Senate,

Washington, D.C.

DEAR SENATOR MUSKIE: This letter concerns S. 2142, the Packwood-Moynihan bill, which provides for federal income tax credits for tuition and fees paid for the education of students in colleges and in elementary and secondary schools. Under the terms of the bill, credit applies only to expenses "required for enrollment or attendance" of students; thus the benefit to elementary and secondary school children is essentially confined to those enrolled in nopublic schools, of whom an overwhelming majority—approximately 85%—are parochial school students. This effect is evidently welcomed by the authors of the bill, at least one of whom has explicitly observed that public subsidization of parochial schools is a purpose of the proposed legislation and is likely to pose constitutional problems. See Sept. 26, 1977, Statement by Senator Daniel Patrick Moynihan on Tuition Tax Credit Act of 1977. The character and extent of such constitutional problems is the subject of this letter, which is written in the belief that an appraisal of the likelihood of successful constitutional attack on S. 2142 might be helpful to the Budget Committee in rationalizing federal educational expenditures.

The conclusion seems inescapable that the provisions of S. 2142 regarding elementary and secondary school expenses would be held inconsistent with the Establishment Clause of the First Amendment and thus violative of the Fourteenth Amendment to the United States Constitution. As recently as 1973, the Supreme Court struck down a similar tax relief program enacted by New York State. The Court in *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973), noted that parochial school children comprised over 80% of the benefitted class and reasoned that, although cast as a direct grant or tax benefit to the families of school children rather than to parochial schools as such, "[t]he effect of the aid [was] unmistakably to provide support for nonpublic sectarian education." 413 U.S. at 783. The state grant of this benefit accruing only to nonpublic school children was accordingly held unconstitutional, as was a nearly identical Pennsylvania program. See *Sloan* v. *Lemon*, 413 U.S. 825 (1973). The *Nyquist* Court expressly distinguished *Everson* v. *Board of Education*, 330 U.S. 1 (1947) (permitting publicly funded transportation of parocial school children) and *Board of Education* v. *Allen*, 392 U.S. 236 (1963) (permitting publicly funded text book loans to parochial school children), on the ground that in "both [*Everson* and *Allen*] the class of beneficiaries included *all* school children, those in public as well as those in private schools." 413 U.S. at 782 n. 38 (emphasis in original).

The provisions of S. 2142 regarding elementary and secondary education closely parallel those struck down in *Nyquist* and *Sloan*. The plans invalidated in those two cases included systems of graduated reimbursements and credits constitutionally indistinguishable from the tax credits of S. 2142. The invalidated state plans, though neutral in their terms, benefitted only families of nonpublic school children, the vast majority of whom were enrolled in sectarian schools. Exactly the same is true of S. 2142.

Given the reasoning of the *Nyquist* Court, however, the proposed federal program seems even more constitutionally offensive than the New York and Pennsylvania programs invalidated in 1973. Beyond condemning the impermissibly non-secular effects of the state programs before it, the Court in *Nyquist* and *Sloan* criticized those programs for creating undue risks of impermissible entanglement between church and state: "assistance of the sort here involved carries grave potential for entanglement in the broader sense of continuing political strife over aid to religion." 413 U.S. at 794. Whereas the New York and Pennsylvania programs provided aid of up to $50 and $75 per elementary school student, respectively, and double that level per high school student, the proposed federal program provides a tax credit with a far higher limit—$500. Whatever political strife along religious lines would accompany the small state programs struck down in *Nyquist* and *Sloan* would be greatly magnified by the more expensive and expansive federal program proposed in S. 2142.

Finally, it is inconceivable that the federal tax relief program would be any more favorably received than New York's or Pennsylvania's simply because the federal government would also simultaneously enact a similar tax credit for college (and post-secondary vocational) students. That these are two separate programs is clear from the bill itself, which would enact the elementary and secondary school provisions separately from the provision relating to the college credit, would begin them in different years, and would provide for severability and expedited judicial review—the latter to resolve more swiftly the "validity of any provision." See Senate Finance Committee Report, p. 7.

Moreover, the Supreme Court's Establishment Clause analyses have long been sensitive to the distinction between college education, on the one hand, and elementary and secondary education, on the other, searching aid to the latter far more strictly in order to discern non-secular purposes or effects and risks of administrative or political church-state entanglement. Contrast, e.g., *Roemer* v. *Board of Public Works of Maryland*, 426 U.S. 736 (1976) (permitting noncategorical grants to qualifying colleges and universities, including sectarian institutions, providing that the beneficiaries prepare reports detailing secular uses), with *Wolman* v. *Walter*, 433 U.S. 229 (1977) (applying stricter test for provisions aiding elementary and secondary schools). Clearly, these cases must be read as indicative of the Supreme Court's special concern with insulating early education from any suggestion of government support of religion as such—a concern consistent with isolating, and invalidating, the tax credit for elementary and secondary school tuition in S. 2142.

The converse proposition also seems correct: The Supreme Court would be likely to uphold the validity of the proposed tax credit for college tuition and fees. As indicated above, the Court has been far more tolerant of public support to sectarian colleges. Moreover, since free public education is far from universally offered at the college level, the college tuition tax credit would have the obvious secular effect of subsidizing higher education for a broad class of citizens rather than for a class most of whose members attend religious schools. For a fuller discussion, see L. Tribe, *American Constitutional Law* §§ 14–9, 14–12 (1978).

We hope these views will be of some help to you.

Yours truly,

DEPARTMENT OF JUSTICE,
Washington, D.C., March 16, 1978.

MEMORANDUM FOR THE ATTORNEY GENERAL

Re: Constitutionality of Packwood-Moynihan Bill

You have asked for our views concerning the constitutionality under the establishment clause of the first amendment of providing either tax credits or grants for tuition payments to nonpublic elementary and secondary schools. You referred to two specific proposals providing such grants or credits: S. 2142, the Packwood-Moynihan bill, which would give limited income tax relief in the form of a credit for tuition payments to nonpublic schools; and the extension of the Basic Educational Opportunity Grant program to include nonpublic elementary and secondary school education.

Under existing Supreme Court decisions both proposals would appear to violate the first amendment guarantee against establishment of religion. The controlling decisions on tuition grants and credits for nonpublic elementary and secondary education are *Committee for Public Education* v. *Nyquist*, 413 U.S. 756 (1973), and *Sloan* v. *Lemon*, 413 U.S. 825 (1973), a companion case.

In *Nyquist*, the Court invalidated a New York tuition reimbursement and tax relief plan. The plan provided limited tuition reimbursements to low income families with children attending nonpublic elementary and secondary schools. Families failing to qualify for tuition reimbursement were allowed tuition tax credits in varying amounts depending upon adjusted gross income. The Court found both facets of the program unconstitutional under the three-part establishment clause test enunciated in *Lemon* v. *Kurtzman*, 403 U.S. 602, 612 (1971):

"First, the statute must have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion . . .; finally, the statute must not foster 'an excessive entanglement with religion.'"

The Court acknowledged that the purposes of the State in enacting the measures—to preserve a healthy, safe educational environment for all schoolchildren, to promote pluralism and diversity in education, and to prevent further overburdening of the public school system—were secular and not inappropriate legislative considerations. It held, however, that the tuition grants and credits failed the second prong of the test because a primary effect of the plan was aid to religious education. The Court noted additionally that the plan created the prospect of politically divisive Church-State entanglement. Adoption of programs assisting sectarian education would generate ongoing controversy along religious lines over continuing or enlarging available relief.

In *Sloan*, the Court held that a Pennsylvania tuition reimbursement program was constitutionally indistinguishable from the New York program invalidated in *Nyquist*. Since the Pennsylvania program had the effect of advancing religion, it too infringed upon the establishment clause guarantee.

The Packwood-Moynihan bill provides an income tax credit for tuition payments to elementary and secondary schools as well as vocational schools, colleges, and universities.[1] The amount of the credit is 50% of tuition up to a total of $500 per student. If the credit to which the taxpayer is entitled exceeds his tax liability, the difference is refunded to him. It is our opinion that the tax relief provided in the bill for tuition payments to nonpublic elementary and secondary schools falls within the scope of *Nyquist*.

Although we have considered carefully possible arguments distinguishing the Packwood-Moynihan tax credit from the New York tax relief program struck by the Supreme Court, we do not believe the differences are of constitutional dimension. It might be argued that the facially neutral, broad based tax relief provided in the bill prevents it from having a "primary effect" of advancing religion. According to that argument, aid accruing to nonpublic elementary and secondary schools would be only "incidental" to an otherwise neutral plan, and therefore would be constitutionally permissible under *Nyquist*. 413 U.S. at 771, 782 n. 38; *Walz* v. *Tax Commission*, 397 U.S. 664 (1970). A realistic appraisal of the tax credits proposal, however, indicates that it is not so neutral or broad based as it might first appear. In analyzing the effect of the tuition tax credit under the establishment clause, it is necessary to separate the elementary and secondary school and higher education components of the package.[2] Recent Supreme Court decisions have consistently distinguished aid to college level institutions from aid to lower level schools, pointing out that religiously affiliated institutions at the college level are less often so "pervasively sectarian" as are schools educating younger students and that older students are generally less impressionable. *See, e.g., Roemer* v. *Board of Public Works of Maryland*, 426 U.S. 736 (1976); *Hunt* v. *McNair*, 413 U.S. 734 (1973); *Committee for Public Education* v. *Nyquist*, 413 U.S. at 777 n. 32; *Tilton* v. *Richardson*, 403 U.S. 672, 685 (1971).

Once the focus is on elementary and secondary school tuition credits alone, it is evident that the effect on sectarian education is not merely incidental. Not only would the credits benefit institutions whose role is to emphasize religious training and beliefs, but they would also benefit sectarian schools in significantly larger numbers than nonsectarian schools. The high percentage of sectarian elementary and secondary schools in New York State—approximately 85 percent of all nonpublic schools—was one factor influencing the Court's decision in *Nyquist*.

Current statistics on nonpublic schools nationally show that nearly 17 percent of the nation's elementary and secondary schools are nonpublic. Of that percentage, 85 percent are religiously affiliated. U.S. Department of Health, Education, and Welfare, National Center for Education Statistics, Nonpublic School Statistics, 1976–77. According to the most recent statistics available, 87.5 percent of nonpublic schools at the elementary level and 70.2 percent of nonpublic schools at the secondary level are sectarian.[3] U.S. Department of Health, Education, and Welfare, National Center for Education Statistics, Statistics of nonpublic elementary and secondary schools, 1970–71. Although sectarian secondary schools do not dominate nonpublic education to the same extent as sectarian elementary schools, we believe that their numbers are sufficiently substantial that no meaningful distinction between credits for elementary and secondary schools could be drawn.

It might be argued that the availability of credits for public elementary and secondary school tuition under the provisions of the bill would significantly affect those statistics. The Court has repeatedly made the point, however, that the actual impact or "effect" of the program is the controlling determinant, not its theoretical or hypothetical consequences. The simple fact is that most public schools are supported by state funds, not tuition payments, and there is no evidence of which we are aware that the structure of state funding is likely to change radically as a result of this legislation. Thus, it appears that the tax credits here, like the tax reductions in *Nyquist*, have a primary effect of benefiting parents of children attending sectarian, nonpublic schools.[4]

The neutrality argument, as the most plausible basis for distinguishing the bill from the statute at issue in *Nyquist* and *Sloan*, deserves elaboration. The argument rests primarily on language in Mr. Justice Powell's opinion for the Court in *Nyquist*, in which he distinguished *Walz* v. *Tax Commissioner*, 397 U.S. 664 (1970). In *Walz* the Court upheld the constitutionality of property tax exemptions for churches. The *Nyquist* Court distinguished the earlier case on several grounds, one of which was the broad based and neutral class of property exempted:

"The exemption challenged in *Walz* was not restricted to a class composed exclusively or even predominantly of religious institutions. Instead the exemption covered all property devoted to religious, educational, or charitable purposes. As the parties here must concede, tax reductions authorized by this law flow primarily to the parents of children attending sectarian, nonpublic schools. Without intimating whether this factor alone might have controlling significance in another context in some future case, it should be apparent that in terms of the potential divisiveness of any legislative measure the narrowness of the benefited class would be an important factor."

413 U.S. at 794. At the end of the above discussion the Court added a footnote referring back to a similar point made earlier, which stated:

"[W]e need not decide whether the significantly religious character of the statute's beneficiaries might differentiate the present case from a case involving some form of public assistance (e.g., scholarships) made available generally without regard to the sectarian-nonsectarian or public-nonpublic nature of the institution benefited."

413 U.S. at 783 n. 38.

The contention might be made on the basis of those remarks that the present bill is valid; because it would benefit a large, diverse class and would not in its operation draw distinctions based upon the religious character of institutions. This argument may be maintained, however, only if no line is drawn between elementary and secondary school and higher education tuition credits. We think the bill cannot be viewed in this manner for several reasons. First, as we noted above, the Supreme Court has repeatedly drawn a distinction between grants to sectarian colleges and universities and similar grants at the precollege level. Second, the history of education in this country has evolved along lines distinguishing between universal free and mandatory public education at the elementary and secondary level and the more restrictive, nonmandatory, and rarely free educational offerings by the States at the higher education level. Because of these differences, the effect of the bill's tax credit provisions will be decidedly different for parents of public schoolchildren than for those whose offspring are enrolled in colleges and universities. Third, comments and testimony submitted on the bill leave little doubt that Congress has been made aware of the differences between tuition tax credits for the families of college students and

Footnotes at end of article.

credits for those families of elementary and secondary schoolchildren who desire a private school alternative.[5] *See, e.g.*, letter dated December 21, 1977 to Senators Packwood and Moynihan from Professor Freund of Harvard Law School.

Finally, we do not think that broadening the class of beneficiaries to mesh elementary and secondary students with college and university students obscures the fact that one of the "primary effects" of the bill is to aid sectarian education. The Court has stated clearly that to constitute a "primary effect" a law need not result exclusively or even predominantly in religious benefits. Rather, a primary effect can exist even where there are any number of other appropriate and praiseworthy consequences of the legislation. Given these considerations, we do not think it reasonable to contend that the provisions of the bill pertaining to tuition for elementary and secondary schools would survive on "neutrality" grounds.[6]

An alternative argument in support of the bill is that federal tax relief is fundamentally different from similar state measures. If the states promote the education of elementary and secondary schoolchildren through the provision of free public schools, the primary effect of any state tax relief for elementary and secondary school tuition is to assist the sectarian schools which make up the bulk of educational institutions charging tuition. It is argued that the federal government, on the other hand, does not provide elementary and secondary schooling, and can attempt effectively to promote the education of schoolchildren only through generally applicable tax relief measures. This argument ignores the focus of *Nyquist*. Although the purpose underlying a tax benefit plan may be both secular and laudable, the effect of the plan may be impermissibly to advance or inhibit religion. As we have said, it is our opinion that the effect upon nonpublic elementary and secondary schools of the Packwood-Moynihan tax credit would be constitutionally indistinguishable from the effect of the *Nyquist* tax reduction legislation.[7]

Our comments with respect to the proposed extension of the Basic Education Opportunity Grant (BEOG) program[8] to include nonpublic elementary and secondary education follow the same vein. Under the present program grants are awarded to students enrolled at institutions of higher learning on the basis of need. The amount of the grant is determined by a number of factors including family size, income, and tuition costs. The proposed extension would make those grants available to pupils in nonpublic elementary and secondary schools as well. Both *Nyquist* and *Sloan* hold that tuition grants for nonpublic elementary and secondary education infringe upon the establishment clause guarantee if a primary effect of the grant or reimbursement plan is to aid sectarian schools. Given the predominantly sectarian affiliation of nonpublic elementary and secondary schools nationally, any broadening of the BEOG program into elementary and secondary education would appear to have a primary effect nearly identical to the tuition reimbursement plans invalidated in *Nyquist* and *Sloan*.

Finally, we note that the problem of entanglement in the form of politically divisive activity described by the Court in *Nyquist* would exist under both tuition relief proposals. Insofar as the programs have a primary effect upon sectarian elementary and secondary schools controversy is predictable. As the Court stated:

[W]e know from long experience with both Federal and State Governments that aid programs of any kind tend to become entrenched, to escalate in cost, and to generate their own aggressive constituencies. * * * In this situation, where the underlying issue is the deeply emotional one for Church-State relationship, the potential for seriously divisive political consequences needs no elaboration.

413 U.S. at 797.

In conclusion, it is our opinion that both the proposed extension of the BEOG and the provisions of the Packwood-Moynihan Bill which would provide relief for tuition payments to nonpublic elementary and secondary schools are unconstitutional under the decisions of the Supreme Court in *Nyquist* and *Sloan*.

JOHN M. HARMON,
Assistant Attorney General,
Office of Legal Counsel.

FOOTNOTES

[1] We understand that the bill as reported out of the Senate Finance Committee was amended in a number of ways but that the basic tax credit provisions remain unchanged.

[2] We understand that a severability clause was added to the bill as recently reported out of the Senate Committee.

[3] Statistics showing the breakdown of schools at the elementary and secondary school levels for the 1976–77 academic year have not yet been completed. Preliminary statistics on student enrollment during 1976–77 are available. however, which, although compiled using a somewhat different format than earlier statistics, suggest that the percentages of nonpublic schools have not changed radically over the last six years.

[4] It is important to avoid placing too great a reliance on the statistical breakdown between sectarian and nonsectarian schools. The Court in *Nyquist* made clear that a law could offend the establishment clause even if aid to religion was not *the* primary effect but was only one of several consequences of that law. An additional New York State program considered by the Court in *Nyquist* provided "maintenance and repair grants" to nonpublic schools limiting those grants to 50 percent of the maintenance and repair costs of public schools. Even though it was clear that most of the funds would be used for nonsectarian purposes, the Court held the grants unconstitutional. The flaw in the program was that it provided no means of excluding State funds from having some substantial effect benefiting religion. 413 U.S. at 778–80. Possibly a clearer example may be found in the Federal higher education construction grants involved in *Tilton* v. *Richardson, supra*. In that case, even though it was clear that the constructed facilities would be used predominantly for secular purposes, the fact that those facilities could be used for sectarian purposes 20 years after their construction was enough to render that portion of the law unconstitutional in the unanimous view of the Court. Indeed, the Court struck that provision down on the ground that the 20 year limitation "will *in part* have the effect of advancing religion," 403 U.S. at 683 (emphasis added), not because that effect was predominant. No one could have claimed there that the law's central effects were secular. Only when the sectarian effects may be characterized fairly as merely "incidental" can a funding program which benefits religion be upheld.

[5] We note that the report of the Senate Finance Committee on the bill as amended separately discusses elementary and secondary school tuition credits and college tuition credits. S. Rep. No. 95–642, 95th Cong., 2d Sess. 2–3 (1978).

[6] Supporters of the bill who seek to distinguish *Nyquist* make one other generalized claim. The assertion is made that the Court's precedents in the establishment clause area of first amendment law have been so changeable and unpredictable that little significance may be attached to recent holdings. In our view that reading of the cases is unfair. Certainly, as the Court has freely acknowledged, the lines are not easy ones to draw. The Court has, however, developed—and adhered to—the three-part test outlined at length eight years ago in *Lemon* v. *Kurtzman, supra*. That test has commanded the votes of every Justice of the Court with the exception of Justices White and Rehnquist. More importantly though, we know of no reason to argue that *Nyquist* and *Sloan*, the precedents directly pertinent here, are of doubtful vitality.

[7] We believe, however, that the Packwood-Moynihan tax credit would be constitutional with respect to college and university tuition. It appears that the benefits of a higher education tuition tax credit would flow to a broad class of individuals, and not, as with elementary and secondary school credits, primarily to individuals affiliated with sectarian institutions. As the Court noted in *Nyquist*, nothing in its decision compels the conclusion that a generally available form of education assistance, such as the "G.I. Bill", 38 U.S.C. § 1651, impermissibly advances religion. 413 U.S. at 783 n. 38. Our views on the constitutionality of the college tuition tax credit are buttressed by the Court's recent summary affirmance of a case involving an establishment clause challenge to a Tennessee program providing grants to students in public and private colleges. *Americans United for the Separation of Church and State* v. *Blanton*, ——— U.S. ———, 98 S. Ct. 39 (1977), *aff'g* 433 F. Supp. 97 (M. D. Tenn. 1977). The District Court, relying in part on the *Nyquist* footnote mentioned above, concluded that the broad Tennessee college scholarship program, with its emphasis on the student rather than the institution, did not have the effect of favoring private or sectarian institutions over public institutions and therefore did not compromise establishment clause values. We believe that the same rationale is applicable to federal tax credits for college and university tuition.

[8] That program is set out at 20 U.S.C. § 107a (Supp. V 1975), *as amended by* 20 U.S.C.A. 1070a (Supp. 1977).

Mr. EAGLETON. Madam President, I yield the floor.

Mr. PACKWOOD. Madam President, would the Senator from Missouri respond to two or three questions?

Mr. EAGLETON. Yes, indeed.

Mr. PACKWOOD. Last October 10, we had on this floor a bill relating to child pornography, specifically amendment 1398, which would have made it a Federal crime to knowingly transport, ship, or mail in interstate or foreign commerce for sale or distribution any film, photograph, and so on, depicting a minor engaged in sexually explicit conduct. In the testimony before the Judiciary Committee on that bill, the Attorney General offered an opinion that that was unconstitutional. Every expert that testified said it was unconstitutional. Yet I note the Senator from Missouri voted for the amendment in the face of this constitutional advice. Why would that be?

Mr. EAGLETON. I do not pretend to be an expert on the free press-pornography issue. I never had to grapple with

it when I was a prosecuting attorney or attorney general of Missouri. Those were "quieter days" insofar as pornography was concerned.

I did have to grapple, I might say, with the establishment clause of the Constitution.

When I was attorney general of Missouri, we had before our office several proposals insofar as assistance to the private and parochial schools of Missouri were concerned. We had our own "separation clause" in the Missouri State constitution. It was a very, very difficult thing to juxtapose the proposed remedial legislation before the Missouri legislature and the stricture on separation of church and state in the Missouri constitution. It was from that origin that I developed an awareness of and an interest in the separation issue.

I have continued that interest and have tried to keep current on the law. I went over to hear the Nyquist case argued before the Supreme Court—I think I was the only Member of the Senate present for that argument—because I thought it would have a profound constitutional impact regardless of how it was decided. Had the New York statute in Nyquist been upheld, obviously, there would be no purpose in even having this debate here today. It would be clear beyond peradventure of doubt that a tuition tax credit mechanism was constitutional. Conversely, once the Supreme Court ruled against the constitutionality of the New York and Pennsylvania statutes, then that ruling serves as the impediment to what Senators PACKWOOD and MOYNIHAN propose here today.

Mr. PACKWOOD. To paraphrase the Senator's answer, what he is saying is that he is not an expert on the first amendment clause; therefore, when every constitutional expert and the Attorney General said it was unconstitutional, he voted for it anyway because he did not know anything about it.

Mr. EAGLETON. What I am saying is that if I have any constitutional expertise on the first amendment, it is under the establishment clause. I do not hold myself out as an expert on pornography.

Mr. PACKWOOD. Then it is not the fact that all these experts that he has cited and the Attorney General say that the Packwood-Moynihan bill is unconstitutional, it is the Eagleton opinion that it is unconstitutional that is the prevailing factor in the Senator's mind.

Mr. EAGLETON. I think it is the opinion of anyone who has taken the time to carefully read the Nyquist and Sloan cases that tuition tax credits are unconstitutional under those two cases. As I said in my opening remarks, the simple fact that it is repackaged in some Federal form, in my opinion, does not elevate or enhance its constitutionality. I think that the Packwood-Moynihan bill is just as unconstitutional within the Federal framework as were the statutes in the State of New York and State of Pennsylvania in Nyquist and Sloan.

Mr. PACKWOOD. Is there any possibility that the Senator could be wrong on this subject?

Mr. EAGLETON. There is always a possibility that any Senator might be wrong, including the Senator from Oregon.

Mr. PACKWOOD. Is there a possibility that this is constitutional?

Mr. EAGLETON. I suspect there is a possibility, although the Nyquist and Sloan doctrines are very, very clear to me and, apparently, were very, very clear to the Attorney General of the United States and the aforementioned professors of constitutional law to which both of us have made reference.

Mr. PACKWOOD. What about Professors Casper, Bork, Katz, Kurland, Rosenblum, Scalia, and Winter, who say this is sufficiently constitutional or could be argued as constitutional so that the Court shall pass on it and——

Mr. EAGLETON. They are entitled to their opinion. I do not happen to agree with them. I do not think it is our role, I say, to pass the constitutional buck to the Supreme Court. I think each Senator has the obligation, to make his own constitutional evaluation of this subject matter, bearing in mind that the Nyquist and Sloan cases are on the books. If those two cases were not on the books, as I said earlier, there would be no purpose in having this debate today. The issue would be an open one from the constitutional point of view. The Packwood-Moynihan would then be resolved purely on the question of whether it is prudent public policy or not.

Mr. PACKWOOD. Madam President, the constitutional issue obviously is open. The Senator from Missouri cited five or six experts and put them in the RECORD. I have cited five or six and they have been put in the RECORD the past 2 or 3 days. The experts divide on this subject. If the Senator from Missouri is so cocksure that his position is right, he should have no fear to let this go to the Court and they will throw it out immediately.

Time and time again, the Senator from New York and I have asked just for an opportunity to get this to the Court. We have never been so positive as to say that, beyond any shadow of a doubt, this is constitutional. All we have said is give us a chance. We have cited authorities that say our position is constitutional.

What I sense in many cases is that, with a few exceptions, some people who use the argument of constitutionality and not get to the main issue. For 2½ days, the Senator from New York and I and Senator ROTH and Senator RIBICOFF have tried and tried to get to what we think is the substance of these issues. We have had to come back to constitutionality. We are arguing it and are prepared to argue it, but we are perfectly prepared to let the Supreme Court decide it and willingly live with the Supreme Court decision. All we ask is a chance to get to the Supreme Court.

I might say, would the Senator from Missouri think it would make any difference if public school tuitions were added in this as well as private school tuitions—primary and secondary we are talking about, not high education?

Mr. EAGLETON. I do not think the doctrine can be cleansed in any way. I think the law is very clear that tuition tax credits when made broadly available for parochial schools are unconstitutional.

Mr. PACKWOOD. Would it make any difference if it were a tax deduction rather than a tax credit?

Mr. EAGLETON. Interestingly enough, a three-judge court in Minnesota this year did draw the distinction between a tuition tax "deduction" and a tuition tax "credit." I have the case somewhere in my files here. That three-judge court said in essence, "Well, we read Nyquist and Sloan as specifically declaring unconstitutional a tuition tax credit and if the Minnesota statute were a tuition tax credit, we would be obliged to declare the Minnesota statute unconstitutional. However, the Minnesota statute is a tuition tax deduction; therefore, it falls without the scope of the Nyquist and Sloan cases."

It was a very curious opinion, I might add.

It also went on to say that because the Minnesota statute was passed in 1955 and the Nyquist and Sloan statutes were of more recent origin, somehow, the Minnesota statute had, because of longevity, garnered some kind of presumptive constitutionality that the Nyquist and Sloan statutes had not. The case is now on appeal.

Also, there was a New Jersey case decided this year by the Federal district court. It discussed the difference between a "deduction" and a "credit" and that judge ruled that, by whatever label, the New Jersey statute was unconstitutional under Nyquist and Sloan.

Mr. PACKWOOD. I take it, from the tenor of the Senator's remarks, that he thinks the Minnesota case will probably be held unconstitutional also.

Mr. EAGLETON. I would guess that, if the Supreme Court takes the Minnesota case, it will probably declare the Minnesota statute unconstitutional with a one-line opinion citing Nyquist and Sloan.

Mr. PACKWOOD. Why did the founders of this country, who wrote this establishment clause, continue in practice to levy taxes, collect the taxes, and give the money to churches for the running of schools if they indeed thought this was unconstitutional?

Mr. EAGLETON. The linchpin of my argument is the Nyquist and Sloan cases. They are there on the law books; they say what they say; they hold what they hold; and they are the hurdle over which Packwood and Moynihan cannot leap.

Mr. PACKWOOD. Does the Senator think those cases are at odds then with the practice of the founders of this Constitution in what they evidenced by levying them to churches to run primary and secondary schools?

Mr. EAGLETON. Well, I do not know about tax levies in States where they

actually levy a parochial school tax and say, "We collected it for you, we help distribute it to parochial schools."

I am not aware of any such statutes.

I do know, as I said in my remarks, there have been many zigs and zags in constitutional law with respect to the first amendment, the establishment clause. We have everything from the Everson case in 1947 through the Wolman case in 1977.

But on one issue it is clear. It is abundantly clear, and a very recent case at that, that tuition tax credits are unconstitutional.

If the Nyquist case had been decided back at the time of Plessy v. Ferguson, back, for example, in the late part of the 19th century or early part of the 20th century, one could say, "Oh well, lots of water has gone under the bridge and, thus, maybe the Supreme Court should take a second look.

But in Nyquist, we are talking about a 1973 case in which the issue was squarely before the court and on which the court squarely ruled. Nyquist is about as fresh as a Supreme Court case can be.

Mr. PACKWOOD. The Senator is aware there were no public schools in this country until about 1820 and that all schools were run by the churches and in part supported by public funds?

Mr. EAGLETON. Well, there was a mixed history and, I take it, fairly accurately reflects some of the discussion previously had on this issue.

Mr. PACKWOOD. The only point I make, I will read into the RECORD the response of the Library of Congress almost a year ago when I asked them the question about history in early State aid to churches, the church-related schools. They responded as follows:

Reference is made to your inquiry of August 10, 1977, requesting information on the above matter, specifically, you ask (1) whether State aid to private church-related schools was a fairly common practice in the United States at least during the first half of the 19th century, and (2) whether such aid violated relevant Federal constitutional safeguards.

The answer to these questions is yes and no, respectively.

It was common. It was not unconstitutional:

I wrote again on January 30, 1978, and they responded, the Library of Congress responded, again as follows on that same subject:

In response to your request of January 30, 1978, for a memo regarding the status of schools in America from 1770 to 1820, the following generalization can be made: All, or almost all, the schools during this period were private, were religious, and were publicly supported, that is, denominational schools received public school funds.

As one educational historian wrote describing the period from 1775 to 1820, "public provision for religion and public support for private and church schools, in some form or other, direct or indirect, explicit or implicit, were either embodied in constitutions, or granted by laws, or carried out in customs or practice.

Then the memo from the Library of Congress went on to go down State by State, both before and after adoption of the Constitution, the different kinds of taxes the States levied, collected the money, gave it to the church, for the purpose of running the school.

Now, I will not quarrel with what the Senator says Nyquist, Wolman, and the others concluded.

All I say is that what the founders of this country intended, at least as evidenced by their practice, was never to preclude the use of public funds to be given to churches to run schools for primary and secondary children.

Somehow along the way the court, interpreting this amendment, has not interpreted what the founders were thinking about or practicing. They have reached the conclusion based upon some other theory that was never in the minds of the people who wrote that amendment.

Mr. EAGLETON. Well, I think that is a very intriguing historical recitation. It is similar, if not identical, to what was presented the court in the Nyquist case. As I say, I was there for the argument. The attorneys appearing on behalf of the State of New York and the State of Pennsylvania went through a long recitation of how parochial schools have somehow or other been assisted.

There were nine justices sitting on the court and they listened to that argument, similar to the argument Senator PACKWOOD is making today. But unfortunately, from the viewpoint of Senator PACKWOOD, they rejected that argument because when they wrote their opinion in 1973 they very bluntly and very directly said that these tuition tax credits are unconstitutional.

What Senator PACKWOOD and Senator MOYNIHAN want is that there be a different doctrine of constitutional law. They do not like the Nyquist and Sloan cases.

We are all entitled to have our likes and dislikes so far as Supreme Court opinions are concerned. I did not much like the Supreme Court opinion on abortion, for example. The Senator from Oregon did like the Supreme Court's opinion on abortion. But once the Supreme Court ruled, that becomes the law of the land, and the law of the land on tuition tax credits is that they are unconstitutional.

Mr. PACKWOOD. Let me ask this, conceding for purposes of argument, but for no other, that the Supreme Court in the past has stated tuition tax credits are unconstitutional, but has never passed on a Federal tuition tax credit, how can we get that issue before the court to see if they would reverse their opinion?

Mr. EAGLETON. The only way to get before the court would be if there were a tuition tax credit on the books.

Mr. PACKWOOD. How will we get one on the books to test that unless we pass one?

Mr. EAGLETON. I do not think we should enact a tuition tax credit because of constitutional barriers and, in the opinion of others like Senator HOLLINGS, public policy reasons as well. I do not think, 5 years after the Supreme Court ruled in Nyquist and Sloan, we should pass a statute saying that we pretend those two cases are not in existence. I do not think we can ignore them or wish them away and say, we cannot say, "Supreme Court, we think you ought to have another learning experience on this. We think the Court has been blind on this issue. We do not think you knew what you were talking about when you wrote the Nyquist and Sloan opinions."

The Supreme Court very much knew what it was talking about and took into account the very same arguments that have been raised in this debate by Senator PACKWOOD and Senator MOYNIHAN.

Mr. PACKWOOD. Madam President, I think we are down to the Senator's last answer. When he is not a constitutional expert, he has no hesitancy to fly in the face of constitutional experts and vote in whatever manner he feels, as he did on the child pornography issue. When he is a constitutional expert in his own mind, when it is constitutional according to EAGLETON, as he sees it, then he will follow that.

But in his last answer here, when I posed the question as to whether or not we wanted to try and give the Supreme Court another chance to see if they wanted to reverse their opinion, he said, "I am opposed to that for constitutional and other policy reasons."

It is those policy reasons we have tried to argue, and argued in vain, because we kept getting back to the constitutional argument.

If the Senator is, indeed, opposed on policy positions, I would love to argue that topic, because I found time and again people hiding behind the constitutional argument because they did not want to talk about the policy issues implicit in this legislation.

I will yield the floor.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Madam President, it is the Supreme Court that declared constitutional policy in Nyquist and Sloan. As much as the two proponents of this bill wish it were the other way, the Supreme Court has ruled on this issue and it has ruled on it very directly.

I know both of them wish Nyquist and Sloan were not on the books.

Senator MOYNIHAN wished so much that they were not on the books that in his two principal presentations on this issue, the two that he gave me for study, he does not mention the Nyquist and Sloan cases. He mentions all the "bigotry" that has pervaded this country, including the 1876 Republican platform, as if that had anything to do with today's debate.

He raises the unintentioned bigotry of Justice William O. Douglas and others. But this "bigotry smokescreen" cannot get around the fact, Madam President, that the Supreme Court of the United States in Nyquist and in Sloan, has declared to be unconstitutional that which Senators PACKWOOD and MOYNIHAN seek to do in their bill.

Mr. HODGES. Mr. President, will the Senator yield for a question?

Mr. EAGLETON. I yield.

Mr. HODGES. The Senator from Missouri at one time was a prosecutor. Is that correct?

Mr. EAGLETON. Yes; for 4 years.

Mr. HODGES. The Senator from Arkansas also has served as a prosecutor.

Does the Senator recall the old adage of defense lawyers, "When you have the facts, you argue the facts; when you have the law, you argue the law; and when you have neither, you try the police officer"?

Mr. EAGLETON. Yes. That is sort of a rule of "unconventional wisdom."

Mr. HODGES. Would the Senator say in that sense, then, that the proponents of this measure exemplify in the highest tradition that approach to the law and the facts? They are, in effect, trying the Supreme Court.

Mr. EAGLETON. The proponents of this issue seem to pin everything on the innate bigotry that is "out there" in the United States and also, apparently and unwittingly, in the hearts and minds of some of the members of the Supreme Court. The one issue they really do not want to face up to is the Nyquist and Sloan opinions. Those opinions truly bother them. They know that those opinions prevent what they are seeking to do. Somehow or other, they wish a modern constitutional miracle were to occur and that the Nyquist and Sloan cases would evaporate into the mist.

Mr. HODGES. Madam President, will the Senator yield for a second question?

Mr. EAGLETON. I yield.

Mr. HODGES. They have put in their bill a provision for expedited review by the U.S. Supreme Court, while at the same time maintaining a great conviction of constitutionality.

Mr. EAGLETON. Yes. One of the witnesses—I do not have it in my file—but one of the witnesses who testified before the House on this issue, a professor who supported Packwood-Moynihan, spent about half his remarks saying:

> Under no circumstances put an expedited appeal clause in here, because if you do that, the people will then know that you are on very shaky constitutional grounds. So let's just go ahead and say that we are on solid ground, and make no indirect admission that we are on thin ice, by putting in an expedited review procedure.

But I have to compliment Senators PACKWOOD and MOYNIHAN in this regard. They know their grounds are so infirm, and that they are over their heads insofar as constitutionality is concerned, that, out of a semblance of good conscience, they felt they had to put in an expedited review procedure.

Mr. HODGES. Is the Senator familiar with the 28th chapter of Proverbs, the 1st verse, which says, as I recall:

> The wicked flee when no man pursueth; but the righteous are bold as a lion.

Mr. EAGLETON. I know that Senator HODGES went from the business of prosecuting to preaching. I went from prosecuting straight on to politics, and I bypassed preaching in between, but I will take his reference to the Scriptures as being accurate.

Mr. HODGES. I thank the Senator.

Mr. MOYNIHAN. Madam President, may I first observe that the advocates of this measure seem to me to have shown extraordinary restraint in having failed to note that our most formidable adversary is, in fact, a Methodist preacher. This emerged perhaps inadvertently in the cross-examination which I believe he, himself, initiated with the Senator from Missouri. Let it be clear that it never would have come from us. I see the Senator smiling, and I know he takes it in the intended spirit.

Madam President, these have been noble days for me. Others may not have noticed—and understandably so—but twice in 2 days the senior Senator from Missouri has drawn to the attention of the Senate certain personal qualities which he feels I display.

Last evening, he made a not altogether friendly suggestion as to what might have been my purpose in having asked for a vote on an amendment Senators PACKWOOD, RIBICOFF, ROTH, and I offered. This morning, he discussed at some length my treatment of some of the issues before us in commencement addresses and articles. He did so in a tone of voice which seems to suggest that I have been evasive of fact and casual with standards of argument.

I take quite seriously the suggestions of someone whose standards of argument I respect, and I should like to address myself to them here.

The Senator said:

> It is Nyquist and Sloan that the proponents of the tuition tax credits cannot escape, although escape they try. Senator Moynihan escapes them by not even mentioning them in his two major public utterances on the constitutional issues involved in this bill.

The Senator from Missouri then refers to an article I wrote for this April's Harper's magazine, and to a commencement address I delivered in May at the College of St. Rose in Albany, N.Y. These are the two of the more recent public statements I have made on this subject. Although the Senator may wish to characterize them as my two major statements, they are certainly not the only ones.

I have been writing about this subject for——

Mr. EAGLETON. Mr. President, will the Senator yield for a brief comment?

Mr. MOYNIHAN. I yield.

Mr. EAGLETON. The Senator was kind enough to come by my office to discuss the constitutionality of this issue.

Mr. MOYNIHAN. That is right.

Mr. EAGLETON. He left with me two documents that he felt summarized his views on the point.

Mr. MOYNIHAN. That is right.

Mr. EAGLETON. The two he left were the two I mentioned.

Mr. MOYNIHAN. But does the Senator think it fair to suggest that the two readings I gave him were my major pronouncements, and to suggest that since I did not deal with Nyquist in them, I have escaped the Nyquist question?

Mr. EAGLETON. I will say that the Senator is an exhausting writer.

Mr. MOYNIHAN. It is exactly that tone that troubles me.

I wonder whether the Senator from Arkansas would also have the kindness to attend to my remarks on this subject.

I first discussed this matter in the Senate in the spring of 1977; I have also done so in three commencement addresses and in one periodical article.

The first commencement address was at LeMoyne College in Syracuse, N.Y., on Saturday, May 14, 1977. I devoted most of that address to the Nyquist decision.

That is where I first spoke on this subject, and where anyone who wishes to know my feelings about the Court's position should begin. Far from evading this issue, I began my remarks with a discussion of it. I shall now take the liberty of reading what I had to say.

I pointed out that the Court's modern ruling on this subject, that is, the general first amendment subject—

> came in the case of *Everson* v. *Board of Education* in 1947. Since then there has been a series of decisions of which the kindest thing to say is that they are unpersuasive. The unkind thing to say is that the Court has been given the thankless task of providing Constitutional legitimacy for the religious bigotry of the 19th Century, and that the quality of its decisions suggests the misgivings with which the deed has been done.
>
> Before I go further let me state my genuine respect for the standards of evidence and scholarship which the Supreme Court in our time has brought to its process of decision.

May I interject at this point the fact that this address was delivered before a college audience and thus I feel that the remark which follows is not an inappropriate one:

> A work of mine was once cited in a footnote of a Supreme Court decision and I can imagine no greater distinction. It is precisely because these qualities seem so absent from the series of decisions on the First Amendment and private school aid that I am so troubled. I hold with Mr. Justice White, who with Mr. Justice Rehnquist, and Chief Justice Burger, has vigorously dissented from a number of these decisions: "I am quite unreconciled . . ."
>
> Justice White so declared in his dissent on *Committee for Public Education and Religious Liberty* v. *Nyquist*, decided in 1973, which is the leading case in this area, and which, by a curious symmetry, concerned a New York State law providing tax reductions to parents of parochial school children. The decision was based, as the majority opinion put it, on the "now well-defined three-part test" to determine constitutionality under the Establishment Clause. "Taken together," Justice Powell wrote for the Court, the Court's decisions "dictate that to pass muster under the Establishment Clause the law in question, first, must reflect a clearly secular legislative purpose . . . , second, must have a primary effect that neither advances nor inhibits religion . . . , and, third, must avoid excessive government entanglement with religion."
>
> Of these three tests only the second provides any serious difficulty, and I will suggest that this difficulty is quite surmountable.
>
> The "secular purpose" test has been applied to state legislation, and the Court has accepted that aid to parochial schools is founded in the desire to aid the students and their parents, rather than the religion in which they believe.
>
> The "excessive entanglement" test emerges, in part, from the Court's worry about the "potentially divisive political effect" of annual appropriations battles in state legislatures. This is a prudential judgment, and it is not for me to suggest that the Court is overly concerned, but in any event an intelligently conceived program *will* avoid "excessive entanglement".

I have earlier remarked that one would think "entanglement" would be enough. Does the Court really suggest that "en-

tanglement" is all right but that "excessive entanglement" is not?

I continue:

It is scarcely beyond the limits of political science or legislative wisdom.

The nub of the Court's concern has been the "primary effect" test, and it is here that the quality of the reasoning simply does not, in my view, bear scrutiny. Thus in *Meek v. Pittenger*, decided in 1975, Justice Stewart announced that "we agree with appellants that the direct loan of instructional material and equipment has the unconstitutional primary effect of advancing religion because of the predominantly religious character of the schools benefiting from the Act" which was being challenged, a Pennsylvania statute.

Observe. The Court asks itself an *empirical* question. What is "the primary effect" of this Act? It then gives an *a priori* answer! The primary effect is to advance religion "because of the predominantly religious character of the schools benefiting from the Act."

That is not a proof. It is an assertion. Where are the facts that support the assertion?

Madam President, I ask unanimous consent that my address at LeMoyne College be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

COMMENCEMENT ADDRESS: SENATOR DANIEL PATRICK MOYNIHAN

It is just sixteen years now since I left Syracuse to join the Administration of President Kennedy. It was a path taken, and one not taken, and it has indeed "made all the difference."

And yet some things persist. Returning today I would like also to return to a subject with which I was quite preoccupied in the months before I left. This is the subject of public assistance to private education, which I hasten to state signifies, in the main, Catholic education, it being the case that three quarters of private elementary and secondary school students attend Roman Catholic schools.

In 1961, I had just completed my collaboration with Nathan Glazer in a study of the persistence of ethnicity in America, which we were to publish as Beyond the Melting Pot.

In the main my contribution to the effort consisted of organizing into somewhat coherent theses things I already knew by virtue of having been raised on the streets of Manhattan and having subsequently been engaged in Democratic politics. The one exception had to do with my researches into the history of the parochial school system in New York. (As I did much of this work here in the Le Moyne College Library, I hope you will forgive this perhaps overgenerous term for what mostly consisted of reading public documents of the first half of the 19th Century.) My finds were wholly accessible, but nonetheless surprising—to me at all events.

Education was largely a church function in the early days of New York, as elsewhere in the nation. In 1805, however, a Free School Society was formed "for the education of such poor children as do not belong to any religious society." The Society's address to the public proclaimed that "It will be a primary object, without observing the peculiar forms of any religious society, to inculcate the sublime truths of religion and morality contained in the Holy Scriptures." That year the legislature established a fund for the support of common schools throughout the State which in New York City was distributed to the trustees of the Free School Society "and of such incorporated religious societies in said city as supported or should establish charity schools who might apply for the same." Under this system Catholic schools, along with Baptist, Methodist, Episcopal, Dutch Reformed, German Lutheran, and Scotch Presbyterian, to mention only some, received state aid.

Assorted serpents entered this denominational Eden, principally the too familiar one of fiscal irregularity. I put it to you: payrolls were padded, teachers kicked back portions of their salaries. Then came the familiar remedy of centralization. The Free School Society, renamed the Public School Society, would get all the money. Protestants did not protest, for the Society was pronouncedly of that persuasion. Catholics did, and by the 1830s the pattern of a dual school system that persists to this day commenced to take form.

In his message to the legislature of 1840, Governor Seward, an upstate Episcopalian if it must be known, averred that this arrangement was patently unfair. He proposed that the Catholic schools should get state aid as well.

"I do not hestitate . . . to recommend the establishment of schools in which they [the children of immigrants] may be instructed by teachers speaking the same language with themselves and professing the same faith."

The next year, Seward's Secretary of State, John C. Spencer, issued a report on the controversy. Spencer, ex-officio Superintendent of Schools, was an authority on the laws of New York State (as well as de Tocqueville's American editor). He began by assuming the essential justice of the Catholic position. "It can scarcely be necessary to say that the founders of these schools, and those who wish to establish others, have absolute rights to the benefits of a common burthen; and that any system which deprives them of their just share in the application of a common and public fund must be justified, if at all, by a necessity which demands the sacrifice of individual rights, for the accomplishment of a social benefit of paramount importance. It is presumed no such necessity can be urged in the present instance."

To those who feared the use of public funds for sectarian purposes, Spencer replied that all instruction must in some way be sectarian: "No books can be found, no reading lessons can be selected, which do not contain more or less of some principles of religious faith, either directly avowed, or indirectly assumed." As for avoiding sectarianism by abolishing religious instruction altogether, "On the contrary, it would be in itself sectarian; because it would be consonant to the views of a peculiar class, and opposed to the opinions of other classes."

Spencer hoped for a system of local option. It was not to be. Faced with that or wholly secular schools. Protestant opinion chose the latter, and now finally our present arrangements were fixed.

The next real challenge to these arrangements came more than a century later, to wit in the Spring of 1961 after a Catholic had been elected President on a platform which called, inter alia, for federal aid to elementary and secondary education. The Catholic Bishops of the nation responded that they could support such legislation only if private schools were included, and so the stage was set for the first legislative stalemate of President Kennedy's term.

May I say that this could be foreseen. Just as I left for Washington I published in *The Reporter* magazine (May 25, 1961) an article entitled "How Catholics Feel About Federal School Aid," in which I recounted the New York background of the existing arrangements and asked that this whole history be understood by those who would make the decisions.

For it seemed to me that Americans at that time, and to this day, know only the history of this issue as it developed in the *second* half of the 19th Century.

This is a history of religious bigotry. Beginning at mid century with the Know Nothing Party anti-Catholicism became what can only be described as a political movement. In 1875, thinking of running for a third term and looking for an issue, President Grant raised the specter of Catholic schools getting public monies and proposed a constitutional amendment to forbid it. His party's platform for 1876 states:

"The public school system of the several states is the bulwark of the American republic; and, with a view to its security and permanence, we recommend an *amendment to the constitution of the United States*, forbidding the application of any public funds or property for the benefit of any school or institution under sectarian control." (emphasis added)

Would not a fair-minded person conclude from this statement that even those against Catholic school aid in 1876 were disposed to believe that it *was* constitutional?

Would it not be reasonable to judge that precisely because such persons felt that it was, and saw the growth of the political influence of those who might support it, that they proposed a constitutional amendment to forbid it? In my Reporter article I noted that at the time of the drafting of the Constitution, and the First Amendment, nine of the thirteen states had esablished churches. Was it not evident, I asked, that the prohibition on Congress' establishing a religion was intended to protect the religions already established in the various states? Was it not the case, I concluded, that "it is only because most Americans no longer have the foggiest idea what an established religion is that they can be persuaded that the words of the First Amendment mean more than they say."

Years have passed and I have become, perhaps professionally, forgiving of the public. But with the greatest respect, it is difficult to be so generous with the Supreme Court.

The Court's first modern ruling on this subject came in the case of *Everson* v. *Board of Education* in 1947. Since then there has been a series of decisions of which the kindest thing to say is that they are unpersuasive. The unkind thing to say is that the Court has been given the thankless task of providing Constitutional legitimacy for the religious bigotry of the 19th Century, and that the quality of its decisions suggest the misgivings with which the deed has been done.

Before I go further let me state my genuine respect for the standards of evidence and scholarship which the Supreme Court in our time has brought to its process of decision. A work of mine was once cited in a footnote of a Supreme Court decision and I can imagine no greater distinction. It is precisely because these qualities seem so absent from the series of decisions on the First Amendment and private school aid that I am so troubled. I hold with Mr. Justice White, who with Mr. Justice Rehnquist, and Chief Justice Burger, has vigorously dissented from a number of these decisions: "I am quite unreconciled. . . ."

Justice White so declared in his dissent on *Committee for Public Education and Religious Liberty* v. *Nyquist*, decided in 1973, which is the leading case in this area, and which, by a curious symmetry, concerned a New York State law providing tax reductions to parents of parochial school children. The decision was based, as the majority opinion put it, on the "now well-defined three-part test" to determine constitutionality under the Establishment Clause.

"Taken together," Justice Powell wrote for the Court, the Court's decisions "dictate that to pass muster under the Establishment Clause the law in question, first, must reflect a clearly secular legislative purpose . . ., second, must have a primary effect that neither advances nor inhibits religion . . ., and, third, must avoid excessive government entanglement with religion."

Of these three tests only the second pro-

vides any serious difficulty, and I will suggest that this difficulty is quite surmountable.

The "secular purpose" test has been applied to state legislation, and the Court has accepted that aid to parochial schools is founded in the desire to aid the students and their parents, rather than the religion in which they believe.

The "excessive entanglement" test emerges, in part, from the Court's worry about the "potentially divisive political effect" of annual appropriations battles in state legislatures. This is a prudential judgment, and it is not for me to suggest that the Court is overly concerned, but in any event an intelligently conceived program will avoid "excessive entanglement". It is scarcely beyond the limits of political science or legislative wisdom.

The nub of the Court's concern has been the "primary effect" test, and it is here that the quality of the reasoning simply does not, in my view, bear scrutiny. Thus in *Meek* v. *Pittenger*, decided in 1975, Justice Stewart announced that "we agree with appellants that the direct loan of instructional material and equipment has the unconstitutional primary effect of advancing religion because of the predominantly religious character of the schools benefiting from the Act" which was being challenged, a Pennsylvania statute.

Observe. The Court asks itself an *empirical* question. What is "the primary effect" of this Act? It then gives an *a priori* answer! The primary effect is to advance religion "because of the predominantly religious character of the schools benefiting from the Act."

That is not a proof. It is an assertion. Where are the facts that support the assertion?

Does not this point come with special force in view of the widely noted use of social science findings by the Court in "education" cases concerning school desegregation and school funding, and generally in the greater use of data by the Court in answering empirical questions?

If the test of "advancing religion" is in fact an appropriate test—and must we concede that it is?—it just happens that for more than a decade we have had, thanks in the first instance to the pioneering work of Andrew M. Greeley and Peter Rossi, an increasing store of social science findings on the effect of Catholic schools on the advancement of Catholicism. I have assumed that these findings have given but little comfort to the Bishops. Would it be presumptuous to express some wonder then that they have not attracted the favorable notice of the Justices?

Briefly, and in the round, the present state of the evidence is that Catholic schooling as such has at most a weak relation to adult religious practice and belief. Save for the fact that Greeley and Rossi were the first to establish this in a large scale study, there is nothing notable in their findings. The same weak-to-nonexistent relationship has since turned up with respect to the effect of all manner of schooling on all manner of performance of all manner of students.

In this academic setting, let me be precise. The *Beta* of Catholic education with subsequent regular attendance at mass is .05. The *Beta* of Catholic education with subsequent desire for a son to become a priest is .12. Translated, these correlation coefficients mean that the number of years of Catholic schooling explain one fourth of one percent of the variance in attendance at mass among Catholics, and one point four percent of preference for having a son enter the priesthood.

At the risk of excessive entanglement, one may say "Amen" to the passage in Chief Justice Burger's dissent in the *Nyquist* case in which he said that: "I fear that the Court has in reality followed the unsupportable approach of measuring the 'effect' of a law by the percentage of the recipients who choose to use the money for religious, rather than secular, education."

If, as I believe, the Chief Justice is correct, the question is: Where does this leave us? Some may differ, but I would respectfully suggest that it leaves us considerably more advanced in this matter than we were sixteen years ago when, after examining the views of those who were for and those who were against Federal aid to nonpublic schools, I concluded my *Reporter* article by stating:

"Before any discussion of compromise can take place . . . it is necessary to dispose of the constitutional 'issue'."

To the contrary, I would argue today that we should continue to discuss compromise and see which one will finally be in accord with what I fully expect will one day be a revised judgment of the Court. For we are under no obligation to agree with the Court, only to obey it. We have the perfect right to press our views. We have more than once seen minorities on the Court become majorities.

In this regard, the position of the national parties is not without relevance. After all, the view to which the Court now adheres first appeared in a party platform.

In the interests of what lawyers term full disclosure, let me acknowledge that I have been involved here. In 1964 I drafted an education "plank" in the Democratic Platform which stated:

"The demands on the already inadequate sources of state and local revenues place a serious limitation on education. New methods of financial aid must be explored, including the channeling of federally collected revenues to all levels of education, and, to the extent permitted by the Constitution, to *all* schools." (emphasis added)

It will be recalled that President Kennedy's proposal for Federal school aid had failed owing to opposition from those who felt nonpublic schools should be included. In effect it was up to the Administration to change its mind. The National Catholic Welfare Conference* said that if the Platform were to include the term "all schools", such opposition as they had mounted to a school aid bill would be withdrawn. They were as good as their word, and the result was the Elementary and Secondary Education Act of 1965.

This legislation was not without consequence. The U.S. Office of Education now, for example, has within it a subdivision of "Nonpublic Educational Services". This office reports that there are eleven ongoing education aid programs of the Federal government which provide some funds to nonpublic schools. Perhaps 4.5 percent of the expenditure under Title I of the Elementary and Secondary Act goes for such purposes.

Still, it is not really possible to state that the agreement of 1964 has been kept. At most we might say it has not been disowned. I was again involved with the Democratic Platform in 1976, and again drafted a plank on this issue:

"The Party reaffirms its support of public school education. The Party also renews its commitment to the support of a constitutionally acceptable method of providing tax aid for the education of all pupils in nonsegregated schools in order to insure parental freedom in choosing the best education for their children. Specifically, the Party will continue to advocate constitutionally permissible federal education legislation which provides for the equitable participation in federal programs of all low and moderate income pupils attending all the nation's schools."

In 1976 the Republican Party Platform spoke to the same issue.

"We favor consideration of tax credits for parents making elementary and secondary school tuition payments."

And so the case can be made that a measure of political consensus has emerged in this area. The task, as I see it, is to use that consensus to give the Supreme Court a chance to reconsider, and hopefully to change its recent position. To that end there is no more direct object than for the Congress to enact and the President to sign legislation that provides what we believe to be Constitutionally acceptable forms of aid. In an ecumenical spirit, let us describe one such form as "tax credits for parents making elementary and secondary school tuition payments."

I shall accordingly, in the coming week, introduce legislation in the United States Senate that will provide a tax credit equal to half the tuition paid, per child, to a nonpublic elementary or secondary school. The maximum allowable credit would be $250 per child. A qualifying school would have to be fully in compliance with our Civil Rights statutes and similar regulations. The median income of families having children in private schools was under $15,000 in 1974, which suggests a standard income distribution, but in the spirit of these things, I believe any tax credit should begin to phase out after family income passes $18,000. The credit will be refundable, meaning that if the parents are entitled to a credit greater than the amount of their tax liability, the difference will be refunded to them in cash.

This cannot be an inexpensive proposal. It may cost a billion dollars a year in what we now call tax expenditures. On the other hand, it may be said that this is less than one twentieth the annual growth of uncommitted Federal revenues. It is by no means a massive sum. More to the point, it is a small sum if we think of it in the light of the long history of denial, and in the view of some at least, of injustice which such a measure would commence to make up for. I might cite the words of the Chief Justice in his dissent in *Nyquist*:

"It is beyond dispute that the parents of public school children . . . presently receive the 'benefit' of having their children educated totally at state expense; the statutes . . . at issue here merely attempt to equalize that 'benefit' by giving to parents of private school children, in the form of dollars or tax deductions, what the parents of public school children receive in kind. It is no more than simple equity to grant partial relief to parents who support the public schools they do not use."

Why, we may ask, does it matter?

I would suggest a dual answer—first narrow, then broad—that follows naturally from the dual beneficiaries of such a plan. *Cui bono?* First, the youngsters who attend private and parochial schools, and the parents whose tax burdens would be somewhat lightened. Second, children who attend public schools, and their parents, which is to say, the rest of the society.

For I take pluralism to be a valuable characteristic of education, as of much else in our society. In "Beyond the Melting Pot," Glazer and I wrote of the persistence of pluralism in American life, and of its values. We are many peoples and our social arrangements reflect this disinclination to submerge our inherited distinctiveness in a homogeneous whole.

At the college and university level, we take for granted that diversity is a good thing, that estimable educational institutions such as Le Moyne College and Syracuse should coexist with the massive public universities as a valuable source of education with qualities that no public institution can supply. New York is in the vanguard of states that have begun to recognize this value—and the dull and costly fate that would befall us if we failed to assist such institutions to survive—

*National Catholic Welfare Conference is now the U.S. Catholic Conference.

and has developed an imaginative and creative set of measures to provide public resources to private colleges and their students. Federal policy is beginning to recognize—again at the level of higher education—the distinctive needs and contributions of private colleges and universities, and to tailor its programs to them as well as to their public sector counterparts. I look forward to playing a part in future such efforts.

Precisely the same values inhere in our private elementary and secondary schools, although public policy has been less ready to embrace them. They provide diversity to the society, choices to students and their parents, and a rich array of distinctive educational offerings that even the finest of public institutions find difficult to supply, not least because they are *public*, and must embody generalized values. Having noted the uncertainty which attends any effort by educational institutions to inculcate values and beliefs, advocates of plural education systems ought to take care lest they seem to suggest that such a system produces students wedded to pluralism. But still there is the plain plural *fact* which a diverse school system constitutes, and this may be said to be a good thing by such as deem such things to be good.

I might add that many of our parochial schools have demonstrated a laudable efficiency in their use of resources. That is not without its costs, is at least possible but it is notable that parents who choose to send their children to private schools can expect that educational value for money. This is perhaps the more important to them as they simultaneously pay their full share of the support of the public schools their children do not attend.

Diversity. Pluralism. Variety. These are values, too, and perhaps nowhere more valuable than in the experiences that our children have in their early years, when their values and attitudes are formed, their minds awakened, and their friendships formed. I cherish these values, and I do not believe it excessive to ask that they be embodied in our national policies for the betterment of American education.

Nor yet do I believe it impossible that this cause of diversity, and this aspect of that cause, will come in time to be seen as the liberal cause in American life. A generation ago Schumpeter warned us that the end of liberal society would not come about through some Marxian convulsion but rather by what he described as the slow but steady "conquest of the private sector by the public sector." There is not an aspect of American life in which this steady encroachment is not to be seen. For a period in the 1960's, with the decline of parochial school enrollment, it looked as if the private sector in education might collapse as well. But this decline has been arrested. A strong and vital nonpublic sector continues in education, and perhaps especially in New York. It is a thing of great value, and should be preserved.

Mr. MOYNIHAN. I thank the Chair. I have had my address printed in the RECORD in order not to hold the Senator from Missouri any longer.

But it seemed to me hardly generous to suggest that I have avoided comments on Nyquist when the very first of my commentaries concentrated on Nyquist.

Madam President, the Senator from Missouri has also suggested that we have somehow been talking about the innate bigotry of the Supreme Court justices. I have said nothing of the kind. And I know of no one on this side of this issue who has said—or implied—anything of the kind.

The Senator speaks of my having suggested the "unintended but apparent anti-Catholic bias of Justice William O. Douglas." I said nothing of the sort. I wrote nothing of the sort. What I wrote had very little to do with Justice Douglas personally.

In another commencement address, I discussed the intellectual difficulties encountered in advancing and defending these causes. I gave this address as a scholar in a community of scholars. I pointed to the casual manner in which seemingly unassailable assertions are often made in this field—assertions that would hardly escape scrutiny and, indeed, rebuke if they were made by any other group.

I observed that at a critical point in the Lemon against Kurtzman decision, Justice Douglas stated his opposition to these forms of aid by saying:

> We do not deal with evil teachers but with zealous ones who may use any opportunity to indoctrinate a class.

The evidence marshalled in these cases seems quite remarkable to me. In this case, Justice Douglas cited a work by Mr. Loraine Boettner entitled "Roman Catholicism" published in Philadelphia in 1962.

I pause to observe that there are three Senators in the Chamber as I make this point. The Senator from South Carolina is returning, so I may have an audience of four. But I wish the RECORD to indicate, Madam President, that we have stood in good faith making serious constitutional arguments for 3 days now, and we have done so to an empty Chamber.

(Mrs. HUMPHREY assumed the chair.)

Mr. MOYNIHAN. This is the passage which Justice Douglas quoted:

> In the parochial schools Roman Catholic indoctrination is included in every subject. History, literature, geography, civics, and science are given a Roman Catholic slant. The whole education of the child is filled with propaganda. That, of course, is the very purpose of such schools, the very reason for going to all of the work and expense of maintaining a dual school system.

There are now five Senators on the floor. If my four colleagues could just listen to this one sentence:

> Their purpose is not so much to educate but to indoctrinate and train, not to teach Scripture truths and Americanism but to make loyal Roman Catholics.

Did everybody hear that line—"Their purpose is not to teach Scripture truths"?

Mr. Boettner objects to the Roman Catholic schools because they are not Presbyterian, and contends on that basis that aid to them is unconstitutional.

I cannot imagine that there are five Presbyterians in the country who agree with him.

Mr. Boettner's book argues that there is only one true church, that the Roman Catholic church is an antichurch, and that the job of the schools is to promulgate the teachings of the true church. He wants the "true scriptures" taught in our schools. He even suggests at one point that Roman Catholics should not be allowed to teach in the public schools because they will not teach the true scriptures, and, after all, teaching the true scriptures is the purpose of the schools.

Madam President, as a member of the community of Catholic scholars, I must say that it was most extraordinary that this incredible proposition went unremarked. Nobody took issue with it. No brother judge said, "Surely, Justice Douglas, you did not mean to cite that book."

Mr. HOLLINGS. Madam President, will the Senator yield?

Mr. MOYNIHAN. I will yield for a question.

Mr. HOLLINGS. Not only did no one remark about it, but no one in the Senate today feels that way or is contending what this language says.

Mr. MOYNIHAN. I do not suggest for a moment that anyone does.

Mr. HOLLINGS. That is what I mean.

Mr. MOYNIHAN. But, I say to the Senator, it was remarkable that no brother Justice saw fit to comment on it. It was a quaint and altogether absurd citation. Here is a pertinent analogy, which I feel, reinforces my basic point. Suppose the Supreme Court were asked to rule on a statute permitting orthodox Jewish shopkeepers to do business on Sunday, and, citing the protocols of the Elders of Zion declared that this was not in the national interest. Might we not expect to hear a word or two from constitutional scholars?

Or, let us suppose that the Supreme Court were asked to rule on a matter of school integration, and, citing a communication from a kleagle of the Ku Klux Klan, held that racial integration was un-American. Might we not expect to hear from constitutional scholars?

I was simply making the point that a matter which would normally have been called into question, and, at the very least, gently decided, went wholly uncriticized in this case.

Mr. HOLLINGS. But you must admit that the Court itself experiences similar intellectual inquisition as the distinguished Senator from New York experiences. The fact is when they were asked about segregation or integration in the public schools of America they consulted none other than a psychologist from Sweden. I mean, they go all around. They used as a formative——

Mr. MOYNIHAN. No.

Mr. HOLLINGS. Book and doctrine the thoughts of Gunnar Myrdal.

Mr. MOYNIHAN. No; they did not.

Mr. HOLLINGS. You do not think—in Brown against the Board of Education, and I will show to you certain indications——

Mr. MOYNIHAN. The citation was not of one psychologist but of the work of two psychologists—the Clarks. You could probably maintain that one of them was from Panama, because Kent Clark was born in Panama.

Mr. HOLLINGS. You are talking to one of the lawyers who argued in December 1952. Gunnar Myrdal was quoted there, and was later quoted in the citation.

Mr. MOYNIHAN. The Senator refers to the psychologists.

Mr. HOLLINGS. That is right. I am not stating any particular fault.

Mr. MOYNIHAN. He is an economist. The psychologists were the Clarks.

Mr. HOLLINGS. But they went to Gunnar Myrdal, and they went to all of these other studies. They took every particular one they——

Mr. MOYNIHAN. That was precisely the point I made in my Albany address—that the empirical standards are simply not supportable. I said that one of the remarkable developments of our age is the often unsupportable way in which the Court has been using social science, and perhaps, using selective evidence.

Yesterday, I spoke at some length of Tilton against Richardson, a case which deals with a Federal statute, and which most closely encompasses the issue before us.

Mr. HOLLINGS. Right.

Mr. MOYNIHAN. Although the Senator from Missouri was not able to be present, I said yesterday that in the decision in Tilton against Richardson, the constitutional distinction which mandates that it is permissible to provide Federal aid to a college freshman but not to a high school senior turned on the question of degree of religious impressionability.

Mr. HOLLINGS. The impressionability, of course, is very easily——

Mr. MOYNIHAN. Here is the citation from the 1970 case of Tilton against Richardson:

> There are general significant differences between the religious aspects of church-related institutions of higher learning and parochial elementary and secondary schools. There is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination. Common observation would seem to support that view.

I said yesterday, and I repeat today, that there is no substance, there is no evidence, to adequately support any conclusion on this question.

I wrote to the president of the American Psychological Association and asked him, "Have you got any evidence on this case?" This is precisely what the courts do. They say, "When we make an empirical statement we back it up."

I read you the answer from Dr. Smith. I simply ask for some evidence regarding the high school versus college comparison in which the Senator is interested, and his emphatic answers was that no such evidence exists.

I reiterate that decisions of this nature are not of the quality we have come to expect of the Supreme Court. It is on those grounds that many scholars have testified before us, written to us, stated to us, that there is no way to predict what the Court will do. Indeed, the Court should pay heed, and might well consider setting those of its positions that are now in disarray in some kind of rational order, or consolidated form.

I say to the Senator from Missouri, that it seems to me that there is almost a judicial pietism in his suggestion that we should not challenge the Court with any of these questions. Surely, the Senator would have agreed that we should have challenged Plessy against Ferguson. Surely even he would have said, "The Court has ruled this way, but the Court is wrong. It should rule differently."

Yesterday I cited the same animus on the part of Abraham Lincoln with respect to the Dred Scott decision.

The Senator from Missouri will recall that last year he introduced an amendment to the HEW appropriation bill to restrict the amount of busing that may be done at Federal expense. The clear consequence of that measure—its obvious intention, perhaps—would have been to limit the amount of racial integration in public schools.

I thought that measure to be a violation of the Constitution, and I think many people here agreed that it would be unconstitutional, and that it might be so held by the Court. We passed the bill anyway, and it may be held one way or the other. It may be challenged at any time in the Court.

Congress has a responsibility to do what it thinks to be constitutional, for there is no way the system can work until the Court is presented with a tangible act. Senator RIBICOFF has said that the Supreme Court does not issue advisory opinion. If we want to resolve our questions about this legislation, then, we must pass it and put it before the Court.

I would maintain that if the impressionability distinction between high school seniors and college freshmen is the basis for the decision the Court will render, then that distinction will not survive an insistence upon empirical evidence.

I have delineated the procedure of the Supreme Court in making empirical statements and in rendering a priori judgments. By this process, the Court has said tuition tax credits for colleges—whether denominational or nondenominational—private or public—are constitutional but that they are not constitutional for high schools.

Though I am not extraordinary competent in the law, I have read Tilton against Richardson—the one case which deals with impressionability—and I have concluded there is no evidence to support the distinction; it simply will not sustain a thoughtful inquiry.

Madam President, I do hope the Senator from Missouri now understands that, far from trying to avoid the Nyquist decision, I actually began the series of comments I have made in this field by dealing squarely with the Nyquist decision.

Could I ask the Senator from Missouri if he takes my point? He is not required to know the details of every commencement address I have ever made, but does the Senator take my point?

Mr. EAGLETON. Mr. President, will the Senator yield so that I may respond?

Mr. MOYNIHAN. I yield, yes.

Mr. EAGLETON. The two speeches, the two documents to which I referred were the two the Senator left with me when he came to see me at my office a week or so ago. These are the two that he thought best reflected his judgment on this constitutional issue, because that is what we discussed in my office, the constitutional issue.

He left his Harper's article; he left his speech to the St. Rose College in Albany, N.Y.; and he left the testimony of Professor Scalia, and those are the ones I read, because the Senator thought they were very relevant and useful.

And in the Harper's article and the St. Rose speech the Senator dealt at some length with the constitutional issue. In neither of these did he make any reference to the Nyquist case, which I take to be the controlling case. That is the point I was making.

Mr. MOYNIHAN. It was an understandable misimpression which the Senator received.

Mr. EAGLETON. I received no misimpression after reading the two speeches. If the Senator thought his more memorable address was the one he gave the year before, I assume he would have left that with me also, but he did not give a copy of that one to me.

Mr. MOYNIHAN. Before the Senator embarks upon an intellectually questionable practice, I wish to point out that had he had only have instructed one of his assistants to call me up and ask, "Do these two works comprise the sum of your corpus—or your oeuvre, as the French say—on this matter, or is there more?" There is much more.

As I have said repeatedly, far from avoiding Nyquist, the first commentary I made on this matter was devoted primarily to Nyquist. We have been trying to maintain decent standards of evidence and argument on our side—as I know everyone else is endeavoring to do—and consequently I do very much regret that the Senator has understood much of our argument to somehow refer to the innate bigotry of the Justices of the Court. I do not know of anyone on our side who has stated anything of the kind.

The problem here, I will state once again is simply that the standard of these decisions does not match the high standard the Court maintains in other areas. That is the judgment of scholars and commentators for whom I have the highest regard, and it is a judgment which I share. And it seems to me that in the face of firmly held opinions, pro and con, those who would not let this matter be tested before the Supreme Court demonstrate a less than complete confidence in their position and a less than complete confidence as to what the outcome of a Supreme Court test would be.

I thank the Chair.

Mr. HODGES. Madam President, I would like to take this opportunity to address an issue which I think is most relevant and most important in this bill, and which has not yet been addressed. I think the constitutionality is very relevant, and I think it is of paramount importance to many of us. But I would also suggest that the policy considerations are important.

One of the effects of this bill in terms of Arkansas and in terms of our Nation is going to be its effect on blacks. The editorials in the Washington Star, and

in others, have indicated that this should not be an issue; and I do not blame people with a weak case for trying to take out those parts which are most advantageous to the opponents; therefore they say, "Let us ignore constitutionality," and I suppose they would like also to ignore race.

But I call upon all who would look at this bill, and I particularly call upon the Senator from New York, who likes to talk about the traditions of the Democratic Party, and I further call upon the Republican Party, which is making a renewed effort to win minorities, to look closely at this bill in the light of race; and I think we might view those Republican two-thirds who will vote for it, and wonder, perhaps, about them also.

In the Washington Post of Tuesday, August 8, 1978, there was published an article entitled "Tuition Credit's Impact Feared." I ask unanimous consent that the article written by Saundra Saperstein, be printed in full at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD.

[From the Washington Post, Aug. 8, 1978]

TUITION CREDIT'S IMPACT FEARED

(By Saundra Saperstein)

White enrollment in private and parochial schools in the 1960s was closely tied to the racial makeup of the nation's largest cities, and these enrollments often increased in cities with heavily black populations, a Johns Hopkins University study has shown.

Washington topped the list of the cities in the study whose white enrollment in nonpublic schools increased. About 37 percent of Washington's white students were enrolled in these schools in 1960; the figure was 47 percent 10 years later.

The study indicates that tuition tax credits designed to aid parents of private and parochial school students "may result in greater social-class and racial segregation of American children than now exists," according to study director Henry Becker.

Becker said the tax credits might intensify the relationship between race and private school enrollment found in the study. The tax credits, he said, might be "more widely used by white families in cities with large or growing black populations, and could inhibit progress on school desegregation in these cities."

A controversial proposal to establish federal income tax credits for private college, secondary or elementary tuition is scheduled to come up in the Senate this week.

Spokesmen for public schools, including Health, Education, and Welfare Secretary Joseph A. Califano Jr., have warned that providing a tax subsidy for private school tuition would increase the exodus from public schools and seriously hurt many systems.

Becker noted in his study that the large cities where white enrollment in private and parochial schools increased in the '60s were either southern cities or northern ones with large black populations. These cities included Washington, Atlanta, Miami, Charlotte, Dallas, Fort Worth, Philadelphia, Detroit, Newark and New York.

The rise in white enrollment in nonpublic schools in Washington between 1960 and 1970 seems "more startling when you realize that in most large northern cities the figure was going down," Becker said.

He pointed, for instance, to Milwaukee, a city with a low minority population. In 1960 about 36 percent of the white students were enrolled in non-public schools; by the end of the decade the percentage was down to 26, he said.

Washington's experience of increasing white enrollment in parochial and private schools appears to be continuing in the 1970s, according to figures provided by the Division of Research and Evaluation. In October 1977, about 55 percent in the city's "nonblack" students were attending non-public schools, the figures showed.

The Hopkins study was based on data from the 1960 and 1970 censuses. According to Becker, it was the first statistical look at private school enrollment according to race.

Becker emphasized that the figures do not necessarily reflect what has happened in the 1970s.

Still, the Council for American Private Education found the study "alarming and misleading," according to council executive director Robert Lamborn.

"The facts since 1970 are substantially different than the facts prior to 1970," said Lamborn, whose organization is an umbrella group for about 90 percent of the nation's private and parochial schools.

"I'm not criticizing the scholarship of this study, but I am worried when a study done by anyone attributes movement to factors that are basically racial," he said.

"A great deal of movement from public to private schools has had nothing to do with race. Most of the changes have been attitudinal, reflecting desires of parents to find the best schools possible for their children."

Mr. HODGES. That article indicated there was a considerable correlation between the growth of private schools and racial desegregation, or racial segregation. I would suggest, and I will show statistics in a moment from Arkansas that make it absolutely clear, that this is the case, and that the very bill which we have before us will cause resegregation, and give aid and comfort to those who are trying to avoid integrated schools in this Nation.

The truth of the matter is that this country has been undergoing a social revolution which began with Brown against Board of Education in 1954. One of the most dramatic and first impacts of this occurred in the State of Arkansas, at Central High School in Little Rock, where there was a confrontation between the Federal Government and the Federal courts and the State government. I daresay that if you checked around the world today and asked people what is the most difficult situation that has been faced in the integration of schools in the United States, Central High School would still be mentioned, although there have been, since that time, far more bitter and far more difficult adjustments made.

We have had only a short period of time in this Nation's history to live with full and complete integration, and yet there would not be a single Senator who would stand on his feet in this body now and argue that that is not a good thing. Senators might feel differently in their hearts; they might act differently in terms of where they send their children and what they espouse in their own lifestyles, but no one now has the courage to openly court the segregation vote.

I would say that if you took the pronouncements of some in this body today——

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. HODGES. Yes.

Mr. MOYNIHAN. A brief question. On June 28, 1977, the Eagleton amendment was offered here on the Senate floor, after nonacceptance by the committee.

Senator BROOKE offered an amendment to delete this language, which was rejected 51 to 42 although I voted for it.

Then Senator BROOKE offered an amendment with substitute language which I cosponsored. We lost. What does the Senator think was going on in the Senate that day?

Mr. HODGES. I have not the foggiest notion.

Mr. MOYNIHAN. It was an amendment to restrict the use of funds for busing. What does the Senator think was going on here?

Mr. HODGES. I have not the foggiest notion. I hope the Senator, in his question, will make this relevant to what I am saying.

Mr. MOYNIHAN. Nobody said it was courting the segregation vote.

Mr. HODGES. Openly, I said. Do you have a Senator who is openly courting the segregation vote?

Mr. MOYNIHAN. I missed the word "open."

Mr. HODGES. I indicated also in my remarks there are those who vote hoping to get the segregation vote but no one will openly seek that vote.

Mr. MOYNIHAN. I am glad to be corrected.

Mr. HODGES. I thank the Senator.

I will also say to the Senator from New York that those who believe in their heart in racial equality, but vote for this bill, are going to cause severe problems of racial equality in the South, and most certainly in Arkansas.

Let me go back to the point I was making. We have only had effective integration in the schools in this country since 1965.

Mr. MOYNIHAN. Will the Senator yield for a question? He refers to the South.

Mr. HODGES. I am sorry?

Mr. MOYNIHAN. The Senator referred to the public schools of the old South.

Mr. HODGES. I would say effective integration has not yet come to many Northern cities. I would say there is no integration in Washington, D.C., for we have schools which are 95 percent black. I am talking about a racial balance.

Mr. MOYNIHAN. A "racial balance" is the term used by the Senator?

Mr. HODGES. Yes.

I would say to the Senator again that time has shown that there are significant racial problems in the Northern cities as there are in the South. I am talking about the public school system.

I say that the great experiment which is underway today, and that is whether we can have a viable, integrated society in terms of the public schools, has only been going on some 13 or 14 years. There is no question but that there have been problems with it. Apparently there are those who are willing to abandon the problem. I count as effective abandonment those who are advocating this bill, not because they want to abandon it, but because that is going to be the result.

Let us look for a moment at the national distribution of children in public and nonpublic schools by race. There are in the public schools 17.2 percent nonwhites and 82.8 percent whites. That is the public schools.

In the private schools, there are 92 percent whites and 8 percent nonwhites, which is less than half of minority enrollment in public schools.

That ought to call your attention to something. That ought to tell you something, Madam President.

What is it in terms of my State of Arkansas? Let us look at some school districts which have established academies, private academies, private schools, in the last few years. In Chicot County, Ark., the percentage of blacks in the school-age population is 21.8 percent. The percentage in the public school after the academy was established is 88 percent. Are you listening?

In Saint Francis County they established an academy. The percentage of blacks eligible of school age is 20 percent, and in the public schools it is 57 percent and growing yearly.

Mr. HOLLINGS. Will the Senator yield?

Mr. HODGES. I would like to finish. In Crittenden County, where an academy was established, the eligibility of black school-age children is approximately 20 percent and it is 50 percent in black students in public schools and growing. In Phillips County, where an academy was established, the eligibility of young people, blacks for the public school, is 22 percent and the actual enrollment is 72 percent.

Does that prove a point? That was the result of academies being established, and the same pattern is true of other States.

I do not know, and I am sure the question is going to come, are these academies approved by IRS?

Mr. HOLLINGS. Will the Senator yield?

Mr. HODGES. Yes.

Mr. HOLLINGS. What they really want us to do at the Federal level is to start financing those academies. There is a great need here, for pluralism and diversity. To get pluralism and diversity, we are told, we ought to go ahead and start financing these academies from Washington, and call it a liberal trend, or liberal movement.

Mr. HODGES. Yes. What they are asking us to do is to put our stamp of approval as the Federal Government on this flight.

I would like to make one thing clear. Those people who have put their children in those academies have a legitimate right to do so. I think they are morally wrong. I think people who abandon tough public problems are gutless. My children are in the public schools of Washington, D.C.

Let us talk for a moment, then, about who is diverse, who is concerned about democracy, which party is concerned.

Senator MOYNIHAN, you are not going to drag my party down through this bill. My party has fought consistently for equality. Those of us in the South who have fought for the public schools are not going to retreat from tough problems and have not.

The reason I am involved in this bill lies in these statistics, and in the fact that we have less public school students in Arkansas now than 1972 and more private school students, and also in knowing that there will be more and more private students because this bill is encouraging such.

The very fact that on the floor of the Senate such a bill would be proposed causes me great perplexity. But to put on it the stamp of approval of the Democratic Party and thereby try to bring into disrepute men who have always stood for racial equality is startling.

Mr. MOYNIHAN. Will the Senator yield?

Mr. HODGES. I would like to reiterate one thing. I am not saying that is their motive or the reason why they have done it. I am saying that is the true effect of the bill. The side effects of some things done in Washington often are far worse than what they started out to be. It is like some drugs where the side effects are devastating and the cure ends up being worse than the disease.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HODGES. Will the Senator let me finish? Then I will be happy to yield.

Where then, does this leave us? Where it leaves us is that if this bill passes, we will shore up these white flight academies and encourage others to open in other school districts. My town in which I live has a fine public school, fully integrated—not without its problems, Mr. President, but we have solved problems and we are going to live with this school. Those of us who are committed to public education and to democracy are going to continue to fight for our school. My county has the same percent of eligible black young people as other counties in Arkansas. But we do not have an academy. If we get an academy I will tell you what we are going to have: We will see that national tilt begin to occur, and we will see the handicapped and others left in the public schools because the private schools cannot afford them, or because such schools are selective, or because they do not want the problem children.

We cannot exist as a democracy if we create islands.

I did not want to make this debate a party thing. Perhaps it ought not to be. But the sponsors have tried to make it a party issue as if somehow the Republicans are highly esteemed and are for the American people, and are for diversity and pluralism and motherhood and the flag, solely because they are for this bill. Just the opposite is true. This is an island-building bill. It is just the opposite of the Statue of Liberty. This says, "Take away from me the poor. Take away from me the oppressed. Put them into the public schools."

It is a strange thing about problems: they do not go away.

The problems in Washington, D.C., such as the tremendous unemployment among black youth, will not go away. The problems in the Washington, D.C., system with assaults and fear will not go away. If we create, in Arkansas, islands of black public schools and white academies, those problems will not go away but will grow.

At first blush, such schools seem good for the whites: Get your own school system, make it exclusive, and argue that it is better for your children. I suggest that it is true. My children would be better off academically in a private school right now. But I do not want for them the lessons they would learn there about democracy. I do not want such lessons inculcated in them in terms of living in a real world. I say they are far better off staying with the people with whom they are going to have to live in real life.

Life is not one long series of upper income suburbia. Life is not one long series of private academies, either.

I say to the Senate that the future effect of this bill in Arkansas is obvious, because you can see now what has already happened. But for those of you who do not know anything about Arkansas or who wonder whether these figures are right or wrong, walk out and look in Washington, D.C.

Do you know that about 37 percent of Washington's white students were enrolled in private schools in 1960—and this is quoting from the study that I mentioned earlier in the Washington Post article of August 8, 1978. The figure was 47 percent only 10 years later. Do you know what the figure is now? It must be 95 percent, because Washington is only 5 percent white in its public schools.

One of the most courageous men who has ever served in politics in this era with relation to race relations was Congressman Brooks Hays of Arkansas. He now lives, I believe, in the State of the distinguished Senator from North Carolina, who is on the floor. Brooks Hays is quite a man. He was a Congressman from Little Rock at the time of the Central High crisis. It was a tremendous crisis to those of us living in Arkansas at the time, particularly for the minority of people who felt strongly that what was being done was right in terms of integrating schools.

Brooks Hays stood up for what was right, and he was counted, but he unfortunately was counted out. He lost on a write-in vote to the bigotry and emotions of the times. He certainly is no less a man, and, from what I have seen of him, probably a better man. But let me tell the Senate what Brooks Hays has said, a man who has paid all to the bigot:

> We must have a firm commitment to the democratic traditions as expressed in our procedures and institutions. Our public school system must be preserved. Without it, the freedom that flowers from an educated citizenry would perish. James Madison put it succinctly: Without popular education, popular government will be a farce or a tragedy, perhaps both."

I say to the Senate that the effect of this bill will have strong racial overtones. The point could not have been made better than by one of the star witnesses of the proponents, Mr. Coleman. Mr. Coleman said that those blacks who could not afford to vote with their feet would not get any benefit from private schools, and that therefore this bill would give them

an option which they deserved. I think that, to some extent, he is correct, because the flight is not just white flight. The flight from the public schools is middle-income and upper-income flight, whether such people be black or white or red or yellow. So what Mr. Coleman is suggesting is that the good, stabilizing, middle-income blacks want to get out, too. They have had enough, and then we will sure enough have good public schools, will we not? Let us take all the stabilizing influence out.

I suggest that Mr. Coleman ought to recommit himself, as everybody in this Senate ought to, to make work the experiment in social adjustment which we are going through. When did all this crisis begin to occur in private education? It really and truly occurred when the blacks began coming into the public school system, because it is from that period of time that we begin to see the most statistics quoted. If you want a parallel, look for parallels in that area.

I am not saying that segregation is the only bad effect of this bill, but I am saying that, in certain parts of the country, this will be one of its most devastating effects.

(Mr. HOLLINGS assumed the chair.)

Mr. MOYNIHAN. Will the Senator yield for a question at this point?

Mr. HODGES. I am happy to yield.

Mr. MOYNIHAN. Does the Senator understand that when we talk of a crisis in our school system, or of the difficulty with the private school system, we talk about the decline in their enrollment? The Senator just said, "When did the crisis begin? It began when blacks," I quote, "started coming into the public schools."

That may be what happened in Arkansas. It did not happen in Benjamin Franklin High School in East Harlem, where I went to school.

But leaving that aside, is the Senator saying that enrollment in the private schools began to decline at that moment when the public schools began to integrate?

Mr. HODGES. No.

Mr. MOYNIHAN. That is what the Senator said. He must explain this: If this is a racial phenomenon, how is it that at the point where racial integration begins to appear, enrollment in the private schools begins to drop?

Mr. HODGES. To save time for the Senate——

Mr. MOYINHAN. The Senate has plenty of time for that subject.

Mr. HODGES. There really is such little consequence to that point that I shall back up and drop it.

Mr. MOYNIHAN. Fair enough. Because it is certainly clear that we need not engage in making spurious arguments, and we know there are difficulties in this particular one.

Mr. HODGES. Would the Senator respond, though? Since the Senator is interested in getting in, let us have the Senator respond to the effect of this bill in the South, in a State like Arkansas, based on what has happened already and based further on what obviously will be the future trend?

Does the Senator just write off Arkansas?

Mr. MOYNIHAN. Not at all. I understand that there is a real set of difficulties down there that are not unique to the Senator's State but instead are characteristic of a region. I am perfectly willing to acknowledge them. But it seems to me to be less than charitable that the Senator will not acknowledge ours.

The Senator knows what we are talking about. He knows what the Democratic Party was talking about when it made the commitments that I have repeatedly referred to. Senator GEORGE MCGOVERN made them, Senator Hubert Humphrey made them. They made them with respect to the church-related schools of the North and of the West, schools that have never been the domain of the elite. To the contrary, they have been the schools of the working people of the industrial cities of America, and they have never been segregated, and they have never had any of the characteristics of the academies the Senator talks about.

I am altogether willing to acknowledge the reality of the Senator's problem, but let us have a little charity about ours, just a little from the Old South, for once.

Mr. HODGES. The Senator just made the statement that these academies have never been segregated.

Mr. MOYNIHAN. Our schools in the North? No, never.

Mr. HODGES. Private schools?

Mr. MOYNIHAN. The church-related schools I am talking about? No, never. N-o, n-e-v-e-r; no, never.

Mr. HODGES. Certainly, the Senator is clear in his opinion, but I would suggest to the Senator that if he were to check he would find that many of those have, in fact, been segregated.

Mr. MOYNIHAN. Are not the school systems I was talking about——

Mr. HODGES. In the Senator's mind, but let us talk about reality. I do not know what the Senator is talking about.

How about Andover or Exeter? Does the Senator think there have been blacks over the years in those schools?

I will tell the Senator that I know because I attended Princeton as an undergraduate.

Mr. MOYNIHAN. I am not talking about Andover or Exeter. The Senator knows very well that I am not.

Mr. HODGES. Let us get the point of what the Senator has in mind, not as to what the Senator has not made clear.

Let us get to the facts. That is part of what is honest, candid debate.

Tell me what it is in the Senator's mind and to what school he refers, and then I can respond.

Mr. MOYNIHAN. I am talking about parochial schools.

Mr. HODGES. Is the Senator talking about the Roman Catholic parochial schools?

Mr. MOYNIHAN. Yes.

Mr. HODGES. All right. That is fine.

Mr. MOYNIHAN. Now, with regard to Andover and Exeter there is an Exeter man in this room.

Mr. HODGES. The Senator from New York has, I think, 22 people on the floor. The chances are he has someone from almost any school I can think of amongst the 22. However, I have only one. We are just poor Arkansas boys.

But I will say this, regardless of whether he has an Andover or Exeter man, and I cannot even remember all the names—I remember Lawrenceville was a good one in New Jersey—we never saw any blacks in those schools in the 1940's and 1950's. Let us be honest about it. We never saw them anywhere.

So we cannot talk about they might have had one or two, or something.

But the point still remains: what is the effect of this bill going to be? That is the issue. That is really the issue.

One of the things I think needs to be said unequivocally is that this bill is going to cause resegregation, it is going to erode the public school system in Arkansas, and I daresay there are other Southern States it will have an equal effect upon.

I would like to go on to one last point. That is, who really benefits by this bill?

Let me mention one last thing about blacks in private schools. I do not know how we get around the fact that only 8 percent of the private school students are black and that almost 18 percent, and the percentage is growing, are black students in the public schools. The fact is that whites are going more and more to the private schools and leaving the blacks in the public school.

But let me talk for a moment about who is going to benefit by this bill.

I say, first of all, the bill will primarily benefit those who are affluent. But I would also say to those using the private sector, those who have children in private elementary and secondary schools, and those who are interested in receiving these tuition grants, that they ought to think twice before they get them. Because one thing the Supreme Court mentions in Nyquist and in decision after decision on the first amendment is the insatiable desire of the Federal Government, once it gets an entree, to grow and to increase its control, and to spread its bureaucracy and its rules and regulations.

If we think it is going to be a simple matter, or procedure, to give these grants, or tuition tax credits, or however it is ultimately done, and not have follow a considerable amount of redtape, investigation, looking and seeing where it goes, and whether or not it is being used properly——

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HODGES [continuing]. And so on, I say that we are absolutely out of our minds.

It has never happened yet, and it is going to happen, I guarantee, in this case.

I will yield for a question.

Mr. MOYNIHAN. The Senator seems to have reversed his field somewhat. Is he now suggesting that most dreaded of Southern conflicts—if this bill passes there are going to be Federal Government people down in the Old South, looking into the schools to see whether or not they are integrated?

Mr. HODGES. I say to the Senator from New York, he does far better when he does not attempt a Southern accent, as I do not think he does it well.

If I take his intent to disparage either my accent or the region I am from, I will not take umbrage, but I would suggest that we keep the debate on a plane which I think the Senate rules require.

Mr. MOYNIHAN. I will restate my question.

Is the Senator suggesting that the danger of this bill is that there will be Federal agents inquiring into the conduct of the private schools in the South?

Mr. HODGES. I say that that already exists, in theory.

Mr. MOYNIHAN. In theory?

Mr. HODGES. Yes.

Mr. MOYNIHAN. But is the Senator suggesting that the process now exists in the South?

Mr. HODGES. What I am suggesting to the Senator is that the larger a Federal program becomes, the more we see of rules and regulations, the more we see increased interest of the Government in where the grants are going, the more we see bureaucrats looking and evaluating. Then we will have someone come into the Senate with a report that there are gross abuses of tuition tax credits, and that there are more credits being taken than there are people eligible for elementary and secondary schools in the Nation. We will appoint 14 inspectors. They will bring a report back. We will have a division of control in the tuition tax credit section of the Internal Revenue Service.

That is all I am suggesting. If we look at the history since 1960 when we began social engineering in Washington, D.C., then I would suggest that is what we will find.

Mr. MOYNIHAN. Would not the Senator agree that the social engineering that is involved has been in the direction of enforcement of civil rights statutes?

Mr. HODGES. I am not talking about——

Mr. MOYNIHAN. And that, indeed, this legislation mandating some degree of Federal involvement in the whole range of private schools—including those which might have been established for the purpose of avoiding the civil rights statutes—might facilitate the upholding of those classrooms?

Mr. HODGES. I think if the Senator will check, he will discover they are already subject to such scrutiny, and if he will further check the 1975 and 1976 Civil Rights Commission Report he will find that the IRS approved seven private schools in Mississippi that clearly practice segregation, and that they were given a clearance for charitable deductions.

I am simply saying, and I am not making it a regional statement only, dealing with the effect on my region, that in the Northern cities we see incredible hypocrisy. Here in Washington, D.C., we do. We are surrounded by some of the finest public schools in the country, but they exist, oftentimes, at the expense of the blacks. And in this city, too.

If I might go on and complete my remarks about who is going to benefit, then I will be happy to yield the floor, not for questions, but even questions in the form of statements.

Mr. MOYNIHAN. Even statements in the form of questions.

Mr. HODGES. Either one, whichever way the Senator wishes to do it, because the floor would be his.

Let us talk for a moment about the income levels of those people who are going to benefit from this bill, because that is a relevant public policy issue.

The fact is that families of four—a father, a mother, and two children—must earn $7,250 to get a nickel's worth of credit; and even then, for the first $100, they get only $4 worth of credit. They are simply not eligible under this bill.

So when we hear these arguments that are being made about how this bill is going to help the poor and how this bill is going to give everyone a chance, that is just hogwash. The sponsors took out the refundability part. They took out that part of it. So now the bill applies only to people who make more than $7,250 a year.

However, the statistics about the percentage of people in private schools and what they make is very interesting, because when you get down to the lowest income levels, we are talking about $1,000 to $7,000 of income. At the lowest level, $1,000 to $1,999, 97 percent of students are in public schools, and 3 percent in private schools.

When you get to $50,000 and over, 75 percent are in the public schools, and 25 percent are in the private schools. But all those at $50,000 and over are going to get the $250—or, with two children, $500.

We are changing, for the first time, significant policy. We are not going to base Government help on need. The millionaire is going to get exactly the same amount as someone earning—well, you do not get $250 until you earn about $10,000.

So, really, who is going to get the assistance? The average parent of a child in a private school earns 25 percent more than the average parent of a child in the public school. That is the way it is now.

Equally important—and the thing that puzzled me—was when you got to $50,000 and over, I thought perhaps the percentage would be greater of those having their children in the private schools. But do you know why it is not? Some of the finest schools in this country, including even the finest private schools, are public schools in the wealthy suburbs. I daresay that within 15 to 20 minutes of this very hall in which we stand there are 5 or 10 of the finest, wealthiest, well-financed public schools in the Nation, and they train their young people as well as anywhere else. So they do not need it. So even these figures are distorted.

The Republican Party, perhaps two-thirds of them, should vote for this. I grew up what was called a "yellow-dog Democrat" in the country. Everybody blamed the Republicans for everything. I found out, however, that the Democrats have done their share, too, I must say.

So this is not a bill to aid the average man or the common man. This is a bill that does not even have in it any controls for a cutoff place. They required even more money for it than it does now. When they had the full $500 credit, it took about $12,000 in income to receive it.

Mr. President, I will conclude my remarks by quoting from a case which is really the critical case for us to look at, in terms of both the constitutional issues and some very practical issues inside the bill before us. It is the case of Committee for Public Education and Religious Liberty, et al. against Nyquist. At page 42 of its decision, the court said the following:

> But we know from long experience with both Federal and State Governments that aid programs of any kind tend to become entrenched, to escalate in cost, and to generate their own aggressive constituencies. And the larger the class of recipients, the greater the pressure for accelerated increases.

That is one thing the court pointed out. The second was this, on page 36: They indicated that one of the critical tests was whether such aid would result in entanglement of the State with religion in the sense of a comprehensive, discriminating, and continuing State surveillance. They say:

> But the importance of the competing societal interests implicated in this case prompts us to make the further observation that, apart from any specific entanglement of the State in particular religious programs, assistance of the sort here involved carries grave potential for entanglement in the broader sense of continuing political strife over aid to religion.

What were they talking about? What sort of program was it that they said carried such grave potential for entanglement? They were talking about the matter of issuing tax credits to elementary and secondary private schools in the State of New York.

I thank the Chair and yield the floor

Mr. MOYNIHAN. Mr. President, two things.

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I hope the Senator from Arkansas will accept that having been born in Oklahoma I came by my Southern accent fairly. In response to his statement, I shall make two remarks and then a general statement. I hope the Senators will hear me in this room.

It does not make much sense to say that it is interesting that the crisis in the nonpublic schools came about at a time when Federal integration efforts were commencing. It makes little sense, when in fact the crisis consists of a decline in the enrollment of the nonpublic schools. That contention does not bear logical examination.

Second, raising the issue of civil rights, and simultaneously raising the issue of Federal interference in private institutions also does not bear much logical scrutiny.

But, Mr. President, it is now time for some of us to get just a little more serious about our feelings.

Let me read a brief passage from a lengthy editorial on this debate, which appeared in the Washington Star of Thursday, August 10, 1978:

> Of all the attacks on the tuition tax credit proposal, the shabbiest is the insinuation that they are a sugar-coated scheme for promoting racial segregation in the schools.

We have never hesitated to say, openly, in 3 days of the debate in this empty Chamber, that—

In fact, the neediest beneficiaries would be Catholic parochial schools with an old and honorable record of racial equity. And as for the so-called "segregation academies" mushrooming up across the South at the heels of school integration, their students, insofar as their racial exclusiveness is their aim, would be ineligible under the tax laws. So much is clearly provided in the latest draft of the bill.

The Senator from Arkansas invoked the name of James S. Coleman, with whom I have been associated as a colleague for many years. I was coauthor, with Frederick Mosteller, of the largest analysis of Coleman's 1975 report. I have chaired a 2-year seminar at the American Academy of Arts and Sciences on Coleman's findings.

And the same Star editorial says:

Prof. James S. Coleman touched on this point in a recent supportive letter to Senator Moynihan. Tax credits, he suggested, "will help give low income people some of the educational opportunity for their children that high income people already have. In a sense," he continued, "it provides an aid to parents to rescue their children from school situations that they find bad; and . . . this is especially the case for black parents who are locked into a given residential situation." Professor Coleman's view has been echoed and endorsed by a number of black scholars, including Thomas Sowell and Walter Williams.

Mr. President, we have tried in 3 days of debate in this empty Chamber to suggest that there are complexities here, to acknowledge our own uncertainties, and to say that we do not know what the Court will finally rule. Yet we simply ask for a ruling. We have put this measure forward as a petition of right with the conviction that an injustice has been done us. We have asked for the Court to rule, and we openly aver that we will absolutely accept the ruling of the Court.

We accept there are, and will be, difficulties; surely there will be some difficulties in a place such as Arkansas. The thought that somehow we might be inviting those difficulties is, however, most unseemly. We have tried to accept the complexity of this matter and even to admit that it may at some point involve a conflict of rights, but to suggest that we seek anything but social justice and equal opportunity is to debase the debate. I am sorry it has been done.

I thank the Chair.

Mr. PACKWOOD and Mr. HODGES addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HODGES. Mr. President, will the Senator yield for a quick response to the last statement? I will not make it a long response.

Mr. PACKWOOD. No, I think not. We are drawing close to a time to vote.

Mr. HODGES. I am sorry. The Senator has his amendment up. I will respond, though, to what the Senator from New York said which I think was highly inaccurate.

Mr. PACKWOOD. I am delighted that the Senator from Arkansas got off the issue of constitutionality and I do not intend to come back and touch it again.

We are going to vote on that about 1 o'clock, and that is fine. See what happens then.

But the Senator first mentioned three times, and I was curious about the almost rhyming of his litany of those of us who are committed to the public schools and democracy, public schools and democracy, public schools and democracy.

The two do not necessarily have to be solely intertwined. There are those people who go to private schools who share some of the beliefs in democracy that those who go to public schools share.

This whole country grew out of private schools. When time and time and time again we are cited as the founding beacon of democracy in this country it was out of a private school system that it grew, not a public school system.

So, let us not demean those who go to private schools by tying together those words as only those who somehow have their education paid for by public taxes can have the proper view about the way the Government should be run.

Second, he talked about the complexity and once we pass this we are ipso facto going to have Federal agents and the Federal heavy hand, and what not.

For the better part of the last 100 years, at least while we have had the income tax, we have had charitable deductions which somehow have managed to go along without at least an overwhelming entanglement of the Federal bureaucracy. From time to time I admit the IRS has had to pass on whether or not there was a legitimate charitable purpose and therefore you could have a deduction for a contribution.

Mr. HODGES. Mr. President, will the Senator yield?

Mr. PACKWOOD. No, I will not.

But by and large it has worked out very well, and we have gotten more money for our dollar out of private charitable institutions in this country than anything else that the Federal Government has ever devised to spend money on, and it has worked amazingly well.

We allow a person to give money to his church and again from time to time as a new church comes along there is a period when you question about is this a religion, but it has worked reasonably well.

We have allowed a person to give money to his church, take it off his income tax without the heavy hand of the Government saying, "Oh, you can't do that."

We even allow a person to give money to a church school and take it off his income tax, and somehow the heavy hand of the Government has not intervened.

We allow people to make all kinds of deductions and take credits through the income tax system, and by and large it has proved in my mind to be a much more preferable system than the system of appropriation and expenditures by the Federal Government.

Allowing tax credits for the cost of tuition is not that substantially different from a charitable contribution to a school. It makes utterly no sense to say that I can send my child to a private school, give the school $500 and take part of that off the income tax, but I cannot pay them $500 tuition and take part of that off my income tax because of the heavy hand of the Government that will follow the latter but not the former. It simply does not follow.

As far as the handicapped persons are concerned, the Handicapped Persons Association, the principal association of handicapped schools in this country, support this legislation.

It was never the public schools that wanted to take handicapped students. They got shunted aside. If, unfortunately, you were a parent of a handicapped or retarded student, you paid, if you could afford to, to send them to a private school. There was no help from the public schools. It was the private sector that did the best they could under overwhelming and burdening expenses to try to take care of handicapped students in this country.

No wonder the Association of Handicapped Schools is for this legislation. Let us not say it was the private schools that threw out the handicapped and that the public schools welcomed them.

The public schools have been fighting for the last 3 years the obligations that were imposed upon them by the Federal Government to put ramps and put in things to handle handicapped students. Hopefully we will have upset that situation and we will have laid that at last to rest. The public schools never will be supportive or will want the handicapped student.

Now, as to income: The Roper poll has been cited frequently as evidence that the public does not want the tuition tax credit. I think there have been put in the RECORD, I might say to the Senator from New York and the Senator from Arkansas, other polls that have been taken in the last 2 years, every one of which supports tuition tax credit, including a number of polls where they were asked specifically, "Do you prefer the credit or do you prefer the grant approach?" including the Roper poll of 1 year ago. If we are just going to weigh where the public is based upon polls, they are overwhelmingly on the side of the tax credits.

In the last Roper poll, one of the questions he asked was, "What do you consider middle income?" Interestingly enough, the answer was $20,000 to $40,000. That was considered by those whom Roper polled, $20,000 to $40,000 a year.

In this bill as it is now written, without refundability, 77 percent of the benefits will go to people who make $30,000 or less, and that is the Joint Committee on Taxation source.

If you want to add refundability to it, 78 percent of the benefits will go to those under $30,000 a year.

I am frank to say I do not know many people who are making $35,000 and $40,000 a year, trying to send their children to college or even to a public university, who are overwhelmingly wealthy. They are having the same problems that everybody else is having in trying to educate their children, be it in a public or private college or a public or private primary and secondary school. But that issue has been raised.

You know, if I thought there were enough people in this Senate who really accepted the philosophy that the Senator from New York and I are driving

at about diversity and pluralism, I would be willing to compromise and compromise and compromise so long as we could maintain two principles: One, the concept of a tax credit or a tax deduction. I could even be convinced of that, although a tax deduction has more favoritism toward the rich than a tax credit, and, two that primary and secondary private schools, including religious schools, be included. Those are the only two basic issues.

If constitutionality is the issue, I think the expedited test would satisfy anybody with a fair mind because there is an honest difference of opinion on constitutionality.

If the issue is the endowment of St. Paul's, Exeter, or Choate, if that was the issue, if the idea is that 22 percent of the people who make over $30,000 might get some benefit, and I thought that was the real issue, I would vote for that cap.

If refundability was the issue, and by refundability I mean when you simply are entitled to more money back from the Government than you owe them in taxes, if under this bill you would get a $250 tax credit for sending your child to a Catholic, parochial, primary school, and you happened to be under that $7,200 income level for a family of four, and you pay no taxes, and the Government would give you back $250 because you are too poor to afford it, if I thought that was the issue that would turn the Senate around because it was too expensive, I would vote for it, and we would get to it in another year, much as I would hate to leave it out now.

If the issue was really cost, total cost, I would be willing to cut these benefits down to $50 for primary and secondary schools, and $100 for college for the sake of starting a principle that is important.

But you know what the problem is. Constitutionality is not the issue. The Senator from Missouri admitted in his last statement when he finally said it is not just constitutionality, it is policy. Then he walked off the floor and we never talked about the policy.

It is not the issue of millionaires being able to take $250 off their income tax. Ladies and gentlemen, be serious. For anyone who can send his children to Deerfield, Groton, Exeter at tuitions of $4,000 or $5,000 a year, do you think it makes any difference to him if he can take $250 off his income tax?

The sure way to make positive that nobody but the rich has the opportunity for private education in this country is to defeat this bill. Do not worry about the Deerfields and the Grotons, they will continue. There will be people who make $50,000, $80,000, and $100,000 and who will send their children to those schools, with or without this bill.

The real problem is seldom addressed by the opponents. The real objection to this bill is control. It was stated by the senior Senator from Vermont in his statement that if this bill passes it is going to disperse control of the educational system, decentralize it, even divide it among different committees of the Congress. Heaven forbid that more than one committee should have jurisdiction over educational policy.

The Senator from Rhode Island (Mr. PELL) said it in response to a question from Senator MOYNIHAN when the Senator from Rhode Island was saying he thought it was unfair that so much more money was going to be spent on private students than public students. I hope we have set that to rest.

If this bill passes, the Federal Government—not all public expenditures, just the Federal Government if this bill passes—will still spend substantially less money on private education, private primary and secondary education, than they do on public education. The Federal Government, let alone all of the money that States and local governments spend on public education, is what I am talking about.

But, in response to the question of the Senator from New York when he asked would the Senator from Rhode Island, if the matter of the preponderance of money that is spent in public students as opposed to private students, if that is his principal concern, if we were to cut down the bill and make the amount spent on private students smaller, would that allay his objections? No, he said. His real objection was the tax credit, because control by the Federal Government was lost.

(Mr. HASKELL assumed the chair.)

Mr. HODGES. Mr. President, will the Senator yield?

Mr. PACKWOOD. No, I will not yield.

The Department of Health, Education, and Welfare, when they testified on this bill—and interestingly enough after they were able to send the Secretary of Health, Education, and Welfare to how many, four or five, hearings on the bill in the House and Senate, when the time came for testimony on this bill, 3 days of testimony set 3 months ahead of time, 8 hours a day, managed to send an Assistant Secretary for Legislative Affairs. Not the Secretary, not the Assistant Secretary for Education, not the Commissioner for Education, but an Assistant Secretary for Legislative Affairs, who used to be a lobbyist for the United Automobile Workers, and now he is an Assistant Secretary for Legislative Affairs. If you translate that, he is now a lobbyist for the Department of Health, Education, and Welfare, paid at public expense to come up here and lobby for the things they want. He has not changed jobs; he has just changed hats.

He is a nice fellow. He is a fellow who came up and testified against this bill, testified very emphatically, of course, against the primary and secondary parts because it was unconstitutional, because of a whole variety of reasons, and then he got to the higher education part.

Now, understand how this works. You send your child off to Oregon State University or Ohio State University and you pay $800 a year tuition for your child. Under this bill, when it is in full effect, you can take $400 off your income tax, and there is a line for an income tax credit for child care, a credit for political contributions, and we would then add another line that says "tuition tax credit," and, assuming you can divide by two and subtract, that is how the bill works.

If you add up all of the deductions, you figure out your tax. If it turns out that you owe $1,400 in taxes and you are entitled to a $400 credit for tuition you pay the Government $1,000. Now, ladies and gentlemen, that is not too complicated, too difficult to figure out, is it?

But what did the Secretary testify to? They were——

Mr. MOYNIHAN. The Secretary's representative.

Mr. PACKWOOD. Pardon me——

Mr. MOYNIHAN. The Secretary did not appear.

Mr. PACKWOOD. The Secretary's assistant. The Secretary's assistant's assistant.

What did he say? That they were opposed to our bill because it was too complex.

Too complex. You know, the problem here, they say, if you have too many children in college—and only an HEW bureaucrat could testify this way—is not that you have too many children too close together, they are all going to college at once, and you could not afford them all. The problem is that you are a victim of sibling overlap.

Who would use that kind of language except somebody from the Department of HEW? The problem is not that you cannot afford to send your children to college. If you could spread it over an entire working life, you could afford it. You are just a victim of a temporary liquidity crisis.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. PACKWOOD. I yield.

Mr MOYNIHAN. Would he explain to us the nature of this disease afflicting so many American households? Sibling overlap?

Mr. PACKWOOD. A terrible disease. I do not know how many people are killed every year because of it.

Mr. MOYNIHAN. What is sibling overlap?

Mr. PACKWOOD. Sibling overlap means you have too many children too close together.

Mr. MOYNIHAN. I see.

Mr. PACKWOOD. Or, to put it in simple terms, you had too many kids too quick.

Now, what is the answer, at the higher education level, to these tuition tax credits? That they already have basic education opportunity grants programs that cost $2.6 billion a year, they are going to add, if they are successful, another $1.2 billion on legislation we will have before us Tuesday, for a total of $3.8 billion; and if you add work study programs and other programs, they have about $5 billion a year.

HEW lost last year, according to the GAO, $7 billion on account of fraud, abuse, and waste. In the student loan program alone, they have lost $356 million. Out of $4.5 billion of loans outstanding, over $1 billion are in default. Twenty-two percent, and they have the audacity to come in here and say that what we are suggesting is too complex.

Let us take a look at what they are of-

fering. Here is a form for applying for basic educational opportunity grants for 1978–79. Twelve pages, counting instructions. It looks like a very complicated income tax form. I defy any Member of the Senate to fill this form out correctly the first time.

Assuming that you are not a lawyer or a CPA, and you have tried to figure this out, you are just a little old second-year college student, maybe you have lived in this country 2 or 3 years, and are not too comfortable with the language, and you get down to the last line, and what does it say?

Any person who knowingly makes a false statement or misrepresentation on this form shall be subject to a fine, or to imprisonment, or to both, under provisions of the United States Criminal Code.

That is simplicity; if you make a mistake you go to jail.

Let us take an example of simplicity. Parents. Can you write a definition of a parent? Most students, I think, could grasp the idea of what a parent is. But listen to this:

If you are able to answer no—

The "no" is in big black letters—

to every—

"Every" in italics—

If you are able to answer no to every question for every year with regard to your mother and father, their financial information will not have to be provided. However, if some person other than a parent (or spouse) provided or will provide more than half of your support during 1978, you would complete section C with that person being considered your "parent." If you can still answer no to every question for every year, you would go on to section E. If you answer yes to any question for any year with regard to your "parent," you would complete section D using their financial information.

If you have understood it thus far, the last sentence is:

In no case would a spouse be considered to be the applicant's "parent."

Well, if it has gotten that bad, that we have to have a paragraph of instructions to state that your spouse cannot be your parent, I do not see how HEW could come in and argue that our provisions are too complex.

If I were a lawyer, I might devise some arguments against it, but what I would not have the audacity to do is use the argument that HEW used on control: "We do not want to give up these programs because we are going to lose control."

I had a debate with the president of the National Education Association, John Ryor, a televised debate, and two other people on this subject, with the argument on constitutionality, being raised by Mr. Ryor, who has his principal interest in primary and secondary education; there is no greater benefactor of primary and secondary education in the United States now than the National Education Association.

I said to Mr. Ryor, as he was arguing the constitutionality of primary and secondary education benefits, "All right, let us exclude the religious schools. Would you be in favor of benefits for the nonreligious schools?

His answer is no; he is opposed to any expenditure that is not controlled by public agencies.

Control by public agencies. Ladies and gentlemen, there it is. That is the nut of the issue we are talking about. When it comes to the education of our children or the education of ourselves, if we are putting ourselves through college, are we going to allow the parents or the students to choose their school, or to go to the primary or secondary school of their choice, pay their tuition, and take something off their income tax in a relatively simple, uncomplicated transaction, or are we going to continue to funnel the money through an agency that lost $7 billion through fraud, waste, and abuse last year, or 22 percent of whose loans are in default, administered by people who work for the Federal Government, making an average salary of $12,000 and who work for the Department of HEW, whose job it is to enforce these laws?

Are we going to follow that "simple procedure" or adopt the "complex procedure" Senator MOYNIHAN and I and others are contending for? Ladies and gentlemen, I leave it to you. I do not know how a more clear-cut issue can be presented to Congress than the issue of control over our lives by the Government, or control by parents or the students themselves by the passage of a bill that gives you the opportunity to decide where you will spend your educational money, when you want to spend it, and on what institution you want to spend it.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, we are scheduled to vote in just 2 minutes, I believe, on this matter, and I take this opportunity to observe that there are now 10 Senators on this floor, and of course the distinguished Senator from Colorado (Mr. HASKELL) is in the Chair.

I believe this is the largest number I can recall during this debate. Those Senators who have just arrived are welcomed to it. They might like to know that this is now the middle of the third day of a debate, during which, in the main, we have addressed an empty Chamber. To whatever degree we have succeeded in addressing what we feel to be important constitutional issues, what we have encountered here is an extraordinary degree of indifference. It is not our purpose to alarm, but hopefully it is to persuade, and it may be that in the remainder of the debate—which is by no means concluded—we will see more Senators participating, if only to the extent of listening passively.

We have tried to make our case as calmly as possible. We have tried to be factual. We have tried to state honestly the probabilities where there was no certainty. I do not know why there has been so little attendance.

It may be that the measure of detachment we have exhibited is not conducive to the engagement of an audience; but at all events, Mr. President, as the hour of 1 o'clock approaches, may I ask if the yeas and nays have been ordered on the amendment by Senator PACKWOOD?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. MOYNIHAN. I then ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I thank the Chair, and yield the floor.

The PRESIDING OFFICER. The hour of 1 o'clock having arrived, the question is on agreeing to the amendment of the Senator from Oregon (Mr. PACKWOOD). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND) and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 56, nays 42, as follows:

[Rollcall Vote No. 316 Leg.]

YEAS—56

Allen	Hansen	Packwood
Anderson	Hatch	Pearson
Baker	Hathaway	Proxmire
Bartlett	Hayakawa	Ribicoff
Bayh	Heinz	Roth
Bellmon	Helms	Sarbanes
Bentsen	Jackson	Sasser
Biden	Laxalt	Schmitt
Brooke	Long	Schweiker
Church	Lugar	Sparkman
Clark	Magnuson	Stevens
Curtis	Matsunaga	Stone
Danforth	McClure	Tower
Dole	McIntyre	Wallop
Domenici	Melcher	Weicker
Garn	Morgan	Williams
Goldwater	Moynihan	Young
Gravel	Nelson	Zorinsky
Griffin	Nunn	

NAYS—42

Abourezk	Ford	Leahy
Bumpers	Glenn	Mathias
Burdick	Hart	McGovern
Byrd, Harry F., Jr.	Haskell	Metzenbaum
Byrd, Robert C.	Hatfield, Mark O.	Muskie
Cannon	Hatfield, Paul G.	Pell
Case	Hodges	Percy
Chafee	Hollings	Randolph

Cranston	Humphrey	Scott
Culver	Inouye	Stafford
DeConcini	Javits	Stennis
Durkin	Kennedy	Stevenson
Eagleton		Talmadge
		Thurmond

NOT VOTING—2

Eastland Johnston

So the amendment (No. 3474) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1654

(Purpose: To limit the credit to post-secondary expenses)

Mr. HODGES. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. RIEGLE). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. HODGES) for himself Mr. HOLLINGS, Mr. ABOUREZK, Mr. BELLMON, Mr. DOMENICI, Mr. MARK O. HATFIELD, Mr. EAGLETON and Mr. BENTSEN, proposes an unprinted amendment numbered 1654.

Mr. HODGES. I ask unanimous consent that further reading of the amendment may be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the committee substitute amendment add the following new section:

SEC. . Elimination of policy references, constitutional references and credits and deductions for elementary and secondary school expenses.

Notwithstanding any of the aforesaid provisions of this committee amendment, any provision for a tax credit or deduction, be it property or income, for elementary and secondary education is hereby inoperative.

UP AMENDMENT NO. 1655

(Purpose: To limit the credit to post-secondary expenses)

Mr. HOLLINGS. Mr. President, I send a perfecting amendment to the Hodges amendment to the desk and ask that it be considered.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) for himself, Mr. ABOUREZK, Mr. BELLMON, Mr. EAGLETON, Mr. DOMENICI, Mr. MARK O. HATFIELD, Mr. BENTSEN, and Mr. HODGES, proposes an unprinted amendment numbered 1655 to unprinted amendment No. 1654:

Strike out all after "notwithstanding" and insert in lieu thereof the following: "any of the aforesaid provisions of this committee substitute amendment, all references to elementary and secondary school policy and elementary and secondary constitutionality are inoperative, and any provision for a tax credit or deduction, be it property or income, for elementary and secondary education is inoperative."

Mr. HOLLINGS. Mr. President, I am glad to yield to the distinguished majority leader to see if we can get a time limitation agreement.

UNANIMOUS-CONSENT REQUEST

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time, and I thank the distinguished Senator from South Carolina for yielding, to ascertain the possibilities or the likelihood of our getting a time agreement of some kind on the pending amendment and on other amendments and on the bill.

Mr. PACKWOOD. Will the Senator yield?

Mr. ROBERT C. BYRD. If the distinguished Senator will continue to yield.

Mr. PACKWOOD. I just want to ask for a moment, as to it being read, this is a perfecting amendment, no amendments are now in order to that amendment, is that right?

The PRESIDING OFFICER. The Chair would advise that the amendment before us is in the second degree and, therefore, is not amendable.

Mr. PACKWOOD. Mr. President, I will object to any time limit. We have played very fair and square on this. We told of all amendments we were going to bring up. This is a total surprise. It is a low blow.

Mr. ROBERT C. BYRD. Mr. President, for the time being, I take it we cannot get one.

I thank the Senator for yielding.

Mr. HOLLINGS. Mr. President, I would like to claim my right to the floor.

I yield to the Senator from Wisconsin.

Mr. NELSON. Mr. President, I ask unanimous consent that Peter Connolly of my staff be granted privilege of the floor during debate and roll calls on the pending legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, let me make just a few comments with respect to the amendment.

The PRESIDING OFFICER. Will the Senator suspend to get order in the Chamber?

Can we have order, please, in the Senate Chamber.

The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, for several weeks now, the matter of elementary and secondary tuition tax credit, or aid to elementary and secondary parochial and private schools, has been debated.

I have had one particular singular thrust. It is evident in the RECORD on Friday, in the RECORD numerous times yesterday, and in the RECORD now made by my perfecting amendment in the second degree.

I did not want to engage in the higher education debate. I did not want this misunderstood or confused by technicality. I thought fundamentally—not just constitutionally, but fundamentally—it was unsound to begin general assistance coming from the Federal Government in education, and going to the private and parochial schools, while it was simultaneously prohibited from going to the public schools.

My intent was clear. They talk about playing fair, and maneuvering around. Mr. President, it is they who have been maneuvering, they who have been amending their own amendment, they who have been in and out of the Finance Committee twice, they who said, "No, take the refundable credit out, but, by the way, we'll put it back in later for you. Or we will agree on the constitutionality, but, no, we now have language with respect to the preambular section on the constitutionality."

I just could not keep up with the maneuvering, if we are going to talk about who is playing fair.

So I consulted parliamentary procedure brilliance and I said, "How in the world do I do this?" I figured out that this was the only way fairly to do it, to get a perfecting amendment to a perfecting amendment, namely, one in the second degree. There would not be any substitute, there would not be any perfecting amendments to it. So, my colleagues, in fairness—and I emphasize that word—my colleagues then in fairness would understand. They would not have to race to the floor and say, "Wait a minute, what is this, what is this change," and so on. They all understand this now after 3 days of debate. They understand our amendment by the distinguished Senator from Arkansas and the distinguished Senator from Texas, the distinguished Senator from South Dakota, the distinguished Senator from Oklahoma, the distinguished senior Senator from Oregon, the distinguished Senator from Missouri, and the distinguished Senator from New Mexico.

We have always debated credits for higher education. We have passed it six times in the U.S. Senate in the past 10 to 12 years. But this is the first real attempt and novel attempt, if you please, to put general assistance into the private and parochial schools. And yet they come and say now, "We are going to keep you from hogging it all." Let us find out who hogs it all.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HOLLINGS. No, not now. I have been listening for 3 or 4 days, I know where I am right now and I want to say where the benefits go and who hogs it all.

Because there are approximately 74 million families in America, but there are 56.1 million families in the Nation that have children in the elementary and secondary schools, or at least eligible for it.

We estimate that of the 44 million students in elementary and secondary schools in this Nation, roughly 5 million are enrolled in the private sector. If we assume each of these 5 million students belongs to a separate family, we would say $5/56.1$ million or 9 percent of all families in the Nation had children in private and elementary schools.

However, Mr. President, the average number of children per family for all families in the Nation with children ages 5 to 17 is 1.9. Catholic families average 2.6 children per family. More than 67 percent of the children in private and elementary and secondary schools are in Catholic schools, a figure has been pointed to of 75 percent, but the ones I rely on for this discussion are figures furnished by the Department of HEW.

So if we formulate that out we come to slightly over 3 percent of the families in the Nation have children in private elementary and secondary schools, if all families with children in private schools send all their children to these schools.

Now, who is going to hog it all?

I refer, if you please, for Senators who were not on the floor yesterday to the Senator from Oregon's expression when he said, and I quote from the RECORD of yesterday, page 25813:

Just as a century earlier the church "ins" did not want to share any of their money and wanted to hog it all, now the public education lobby, especially led by the NEA, wants to hog it all and not share it with anybody.

Now, let us see who is hogging it all, for we come down to a little over 3 percent of the families in this country are eligible and are going to enjoy this great democratic initiative.

But the Senator from New York is talking about the Democratic Party, if you please. We will not go into that. Let us get to the facts here.

Now, family income, let us see what it says. It says here the family income, the percent of the total benefits for this particular bill from zero to $15,000 in 1980, only 12 percent of the families in that income group are going to enjoy any benefit out of this particular bill.

The remainder of the recipients the 88 percent, are above $15,000.

I can break it down for 1980 to 1983. I can do it from the $15,000 to the $25,000 bracket, $25,000 to $30,000, $30,000 to $40,000, and over $40,000.

Eighty-nine percent of the families in the great State of South Carolina make $15,000 or less. So look at this. Eighty-eight percent of the benefits, I say to the Senator, go to about 10 percent of the people of South Carolina.

They say, "Senator, why are you so excited about this?" And then they get off on constitutionality.

We start reading about Irish mythology and the habits and practices within the church here, there, and yonder. We are not trying to get into a church argument. We are trying to get into an education argument—an argument on the matter of education and education alone.

We can see exactly what is occurring. The Senator from Rhode Island on yesterday was trying to point out that the public schools are not shoving them out. We can go to all the States. I do not want to dwell too long on too many points when I get a few Senators who will listen, but between 1970 and 1975, we can see the facts.

In the State of Kansas, there was a 12.9 percent decline in enrollment in the elementary and secondary public schools. I am looking at the declining enrollments, table 1 of the State school systems.

We look at North Dakota: 10.2 percent decline in enrollment in public elementary and secondary schools; Oklahoma, 5.7 percent; Iowa, 6.6 percent.

What we really have is a decline between 5 percent and 13 percent in enrollment in public school education because of the birthrate, the declining birthrate in America. That occurred also in the private schools.

The Senator from New York said earlier this morning that is when the crisis started. The crisis started, he said, when we got declining enrollment in the private schools. So he will do something for the private schools when the crisis starts there.

But here is our charge, as Senators. The duty of the Government, for the public, is to public schools. The duty of the Government for the private schools is to leave them alone. That is what we are trying to do.

We give targeted, categorical aid for disadvantaged in the private schools. We do not demean private education. People have that choice and that right to decide where to send their children to school.

A lot of my friends—I cannot say a majority of my friends, one way or the other—but many have had children in both private and public schools right here in Washington, D.C. I have had children in both public and private schools iri Washington.

The fact is that we have tried our level best to stay out of the administration of the public schools at the State and local level, and that is why we have resisted effort after effort and only come in with categorical grants for disadvantaged, bilingual, handicapped, and the various titles. We never went to general aid for public education, because we knew that was one of the finest strengths of America—the public education.

As Madison said, "Popular government without popular education is a farce and a tragedy."

We have relied on public education over the many years, and we have relied on its diversity and its pluralism.

Every time we run proponents of this measure up a tree and show them court decisions that they cannot ignore, and every time we get them in a corner somewhere, they burst out with "pluralism" and "diversity." Where is there more pluralism and diversity than in the 107,000 public schools in America, administered by 16,000 elected school boards? Are you going to get that pluralism in the church school?

Let us be honest. If I wanted to compare, say, my public school in Charleston, S.C., with a public school in Washington, D.C., I probably would find there was great diversity between the two. If I wanted to find a similarity, I could take a parochial school in my hometown and a parochial school here, and find that similarity.

I know where you would find the sameness: At Andover, Phillips Exeter, Lawrenceville, and St. Paul, with endowments of $50, $60, $57 and $45 million.

Hog it all? Who is hogging it all? We cannot get the benefits. They give them all to the rich. They give them all to the private schools. Public schools are open to everyone, but, in the name of equity and justice, they want you to put in tax money that goes to a church school or a private school—and they have admission policies. They have selectivity.

I have one person on my staff who graduated from a Catholic elementary and a Catholic high school, and if I have to produce the witness, I will give the empirical evidence the Senator from New York wants. Not one black was in that parochial school during her elementary or secondary school years. That is historically the way it has been. Let us be honest with each other.

Who gets into the schools? I told yesterday of my experience in trying to get my boy into St. Albans. They said, "Your son is all right, but we are looking for some young lads with voices. We have a famous choir." That is their right; that is fine. My boy sounded like his daddy. He sounded lousy. He did not have any voice, so we did not get him into St. Albans.

We went to another school. They said, "We have enough children of Congressmen and Senators." They must have known something about us Senators long before the Roper poll and the Louis Harris poll, about the public disregard for Congressmen and Senators. They told me this 12 years ago. This is a very perceptive school in the city of Washington. They have admissions policies.

The bill has the public giving public money where there is no control whatsoever.

On top of this, they talk of competition. When they get through with diversity and pluaralism, then they jump to competition. Let us talk about the fairness of this kind of competition.

In 1965, when we passed the Equal Educational Opportunity Act, the States and localities said, "Look, we don't have the money." So we said, "All right. We passed the Elementary and Secondary Education Act. We gave them Title I for the disadvantaged, and title IV."

Then we came under section 504 of the Vocational and Rehabilitation Act, and the distinguished senior Senator from West Virginia is familiar with this one. The senior Senator from West Virginia was a leader, and has been a leader for many years, with respect to the vocational and rehabilitation program.

We gave assistance to the handicapped. Then the bilingual. We said, "Congress mandates bilingual capabilities in the public education system of America." This was because, for example, many Spanish-speaking kids came in and did not have the understanding or comprehension to obtain an education, to receive the curriculum. So we did this on bilingual education.

Imagine the public schools, over here in the corner. We are getting ready for the contest to compete. The public schools are weighted down by the requirements of Congress and the Supreme Court of the United States—the Law decision on bilingual, the Swann decision on equal education opportunity, and so on. Having been weighted down in the corner with all these requirements, we have to take the difficult problem; we have to take the unprepared; we have to take the handicapped; we take them all, going right down the line.

Then, having been burdened by all these, Congress is now supposed to say, "we need a little diversity, a little pluralism, and a little competition, so we are going to give a little money to the private schools that do not have any of that."

What kind of competition are they talking about? You have your hands tied behind your back while you try your admirable best on the local level.

The people of California, after voting for proposition 13, were polled. They were asked, "What are you going to cut out?" They said, "Cut down on some of that bureaucracy at city hall. Cut down even on the police protection and the fire protection. But, last of all, do not interfere with public education."

People are supporting the public schools. One Senator said on yesterday they were in terrible shape; we have discipline problems and all the rest.

When I was in school and when the Senator from West Virginia (Mr. RANDOLPH) was there, they could cane you and toss you out. The private school does not toss you out. The private school does not let you in in the first place. They are selective. It has done pretty good. You do not even get in. You get suspended quick in private education. But now under public education the policy is, under the national Congress, do not suspend the child, keep the door open, and let us work with the child.

I think that is commendable.

Let us try our best. But as we try, let us not cut and run. When they do have

that problem child, it is not a deterioration.

The contrary is true. We are paying public school teachers better. The programs are now getting back to the basics. We are having public support for public education. And I refer only, if I may, to the letter of the coalition to see those who understand public education and what the issues are. You cannot often get people in this fragmented society to get together on anything. You just really cannot.

The farmers come up and they bring billygoats in your office, sit down and demand, "you vote for this Senator or I strike. One hundred percent parity, or nothing."

Everyone comes in. They want to strike. I was here earlier this year with a hearing before my Subcommittee on State, Justice, and Commerce, and the FBI was out there striking. The doctors downtown in Washington were striking. Everyone strikes.

Is it not interesting that we now have an issue upon which the public generally can come together as a coalition? There are the American Association of Colleges for Teacher Education.

American Association for Health, Physical Education, and Recreation.

American Association of School Administrators.

American Civil Liberties Union.

American Ethical Union.

American Federation of State, County, and Municipal Employees.

American Federation of Teachers, AFL–CIO.

American Humanist Association.

American Jewish Congress.

Americans for Democratic Action.

American United for Separation of Church and State.

A. Philip Randolph Institute.

Association for International Childhood Education.

Baptist Joint Committee on Public Affairs.

Coalition of Labor Union Women.

Council for Educational Development and Research.

Council for Exceptional Children.

Council of Chief State School Officers.

Council of Great City Schools.

Again I quote my friend in his debate. He says when you pose this, and I quote the Senator from Oregon on yesterday:

> It is an anti-Catholic bigotry that has existed in this country for the better part of a century and a quarter, at least in the school system, and continues to exist in the minds of many people today.
>
> The irony today is that it is no longer just anti-Catholic. It is anti-religious. . . .

Mr. President, it is not that at all. The groups I have just named destroy that argument.

What we point to is what Justice Douglas and others said about public education. Earlier in the history of this country, when he was talking and writing in his famous document, and this is one of the real liberals and minds of our time, Justice Douglas said:

> Horace Mann, the educator, once said that this law laid the foundation of the present system of free schools. The idea of an educational system that was at once both universal, free, and available to all the people, rich and poor alike, was revolutionary. This is the great thing about America. No other nation ever had such an institution. Three centuries later it is a stranger to the bulk of the people of the world. The free public school system which puritans conceived has been in large measure the secret of America's success. In these classrooms children of all races, nationalities, and tongues learned a common language and became imbued with one central idea, the American conception that all men are created equal, that opportunities are open to all, that every minority, whether respected or despised, has the same guaranteed rights as the majority. Parents who landed here often brought with them the antagonisms, the rivalries, the suspicions of other continents, but their children became one and united in pursuit of a democratic ideal.

If there is any meaning to the United States of America there it is in that little paragraph by Justice Douglas. It tells us what we are really concerned about. The Senator from Arkansas and I, both with experience in our own States, have tried to maintain our way of life, we have tried to maintain the integrity of the law of the land, the constitutional decrees of Brown against Board of Education, and all the other decisions, that there be a unitary school system, that we have the different programs in order to bring about equality within education. And the public schools have been through a traumatic state in the last 20 to 25 years, but they are stabilizing, they are rebuilding. We are bringing back discipline. We are getting parental interest, and we are working hard because we share the thoughts Justice Douglas described so eloquently.

Instead, in the name of diversity, pluralism, justice and equity, the other side wants to start rewarding the protest schools, and we know exactly what that means.

We have some pretty good ones. The parents have every right in the world to send their children there. That is their privilege. It is not our position here to deter that kind of freedom of choice. They can choose any private school they want, and they have my respect. That is their business with their children, and I am never going to try to get in between a parent and his child. But do not come to the Senator from South Carolina and say, "Senator, we want you to take public tax moneys and finance this," because we went from some 30 private schools 20 years ago in my State to 207. They broke out like measles. They have had now about a 10-year trial period, and they are not working out too well. There is just not that much money. They never talk about the budgetary implications there. But there is not that much money to finance a dual school system.

The little schools and the academies did not have moneys for gymnasiums. They did not have moneys then for a library. They did not have moneys for a physics or science lab and as a result they are not giving as well-rounded an education. They are not giving all that diversity they are talking about.

Senator MUSKIE talked about the Trojan horse yesterday. It looked like a nice gift, shiny in broad daylight and so appealing, but then when dark came, the horse opens up and there is a foot in the door, and you have on your doorsteps a budget buster. Every fact and figure that we have from the Budget Committee shows it is a budget buster.

I ask unanimous consent to have printed in the RECORD a letter, dated August 10, with an enclosure and stated amounts from the Congressional Budget Office.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., August 10, 1978.

Hon. ERNEST F. HOLLINGS,
Committee on the Budget,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HOLLINGS: In response to our meeting yesterday, we have estimated the costs of the proposed tax credit (H.R. 12050) if it were fully operational in fiscal year 1978. The total costs due to the inclusion of elementary and secondary education would have been $1.15 billion or $217 per student enrolled in private schools.

In fiscal year 1978, federal education grant programs provided $115 and $61 per student in public and private elementary and secondary schools, respectively (see attached Table 1). If the tuition tax credit had been fully operational in that year, total federal support would have been $115 and $278 per student in public and private schools, respectively.

Support for education also results from the tax expenditures associated with the tax deductibility of state and local tax payments and charitable contributions to schools. Esti-

mates of the levels of these tax expenditures are, however, highly uncertain. If this support is added to support from current grants and the proposed tax credit, the federal support per student would be $229 and $325 in public and private schools, respectively (see attached Table 2).

We enjoyed meeting with you yesterday. Should you need further assistance, do not hesitate to call.

Sincerely,

DAVID S. MUNDEL,
Deputy Assistant Director for Human Resources and Community Development.

TABLE 1.—*Direct Federal support for elementary-secondary education by type of school (dollars per student in fiscal year 1978)*

	Public	Private
Direct Federal outlays[1]	115	61
Proposed tax credit (H.R. 12050)[2]	0	217
Total direct support	115	278

[1] Includes all programs within budget subfunction 501 (Elementary-Secondary Education) except Human Development Services Programs (Head Start, etc.) and the postsecondary portion of vocational education support. Library programs and special projects funds are also included.

[2] Assumes that H.R. 12050 would be fully operational in FY 1978. If enacted as currently drafted, H.R. 12050 would have no elementary and secondary costs in FY 1978.

TABLE 2.—*Total Federal support for elementary-secondary education by type of school (dollars per student in fiscal year 1978)*

	Public	Private
Direct Federal outlays[1]	115	61
Proposed tax credit (H.R. 12050)[2]	0	217
Total direct support (excluding existing tax expenditures)	115	278
Current tax expenditures (estimate)	114	47
Total support	229	325

[1] Includes all programs within budget subfunction 501 (Elementary-Secondary Education) except Human Development Services Programs (Head Start, etc.) and the postsecondary portion of vocational education support. Library programs and special projects funds are also included.

[2] Assumes that H.R. 12050 would be fully operational in fiscal year 1978. If enacted as currently drafted, H.R. 12050 would have no elementary and secondary costs in fiscal year 1978.

(Mr. PAUL G. HATFIELD assumed the chair.)

Mr. RANDOLPH. Mr. President, will my knowledgeable friend from South Carolina yield?

Mr. HOLLINGS. Yes.

Mr. RANDOLPH. I do not gather from your remarks that you are against collegiate and university education that is private or church-related?

Mr. HOLLINGS. The Senator's impression is correct. I am not talking to higher education. The fact is, the RECORD will show, that the Senator from South Carolina has supported and voted for tuition tax credit for higher education at least four times.

Mr. RANDOLPH. I think over and over again this point must be made——

Mr. HOLLINGS. Yes.

Mr. RANDOLPH [continued]. By you, because here there are two strata of help, is that correct, that are involved?

Mr. HOLLINGS. That is exactly correct, two strata of help involved, differentiated in fact and in law. The lower strata is no impact on religion. Look at the facts in the universities, look at the Lutheran colleges, look even at the Catholic universities, look at the various church schools, Trinity University, Duke, look at Furman, the Baptist school.

We found yesterday, for example, that the student body complement at Furman University is somewhere less than 40 percent made up of Baptists, so they are not of the one religion. The faculty is not in habit or garment, there is no nun or priest within the order. On the contrary, the majority of the faculty could be of any religion.

The emphasis, unlike elementary and secondary schools, is not on the catechism or the principles and precepts or faith of the Catholic or other church faith. On the contrary, you can go all the way through these particular church colleges that you talk about and never take a particular church or religion subject. You can get a degree.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. HOLLINGS. Wait a minute, I am not finished. I am not going to yield now.

So you get that particular difference in higher education not because just of impressionability. The Supreme Court found that particular age, children did not have the impressionability that people of the age in elementary and secondary schools have.

You know, it is tough for you and for me—you had a son in college and I have had three children in college already—and it is hard to keep up and pay the bills, without wondering about what is going on in their minds. You are just like a tenth-round boxer. So impressionability is not there.

You can take little children and come up to me and I will teach them Bible school lessons in a parochial school. You cannot take that college student, unless he learns otherwise, and teach him the same way. So you do not have the impressionability.

Then, finally going to the makeup of the entire student body, 80 percent of those in higher education are in the publicly supported, in State, local, universities, and colleges of one kind or another. Less than 20 percent are in the so-called church colleges; whereas 85 to 95 percent in private elementary and secondary education are in the parochial schools. So the money given is obviously money that impacts upon a religion at the elementary and secondary level. The money given at the higher level obviously does not impact upon a religion, and that is the finding in the GI bill of rights.

Mr. RANDOLPH. Well, the Senator make a very important point in connection with the primary and secondary education, and his percentages as contrasted with the collegiate levels of education. This is very important.

Mrs. Randolph and I have not had one son but two sons in college, and we understand the problems that parents have. I do say we are glad to report here—and, perhaps, it is not a part of the record, it is too personal—that our two sons were working their way through college, sir, as perhaps was your son and other sons.

Mr. HOLLINGS. Yes.

Mr. RANDOLPH. In connection with the college with which I have had a particularly close affiliation, it was principally founded by my grandfather, who had only five winters of schooling. That is all he had, did Jesse Randolph. Yet he rode horseback through the valleys and over the hills to bring into being a college.

We must remember that in the State of West Virginia in earlier days we did not have our university system, we did not have our State college system, we did not have our community system of schools with 2 years of training, but we did have those persons who are, let us say, members of certain religious organizations who were realizing that it was very, very important not to work upon the creed of a particular denomination but there was, sir, the responsibility of church people to bring an independent college into being.

So that happened in West Virginia. It happened in South Carolina. Today, of course, the figures of the enrollments are with the State-supported institutions. But even though it is apart from what the Senator is saying or others may say here today, I am a strong believer in higher education, in the independent or the church-related institutions of learning. I believe that is very important in our country.

I think we lose something if we simply rely upon public-supported universities and colleges and the junior colleges. I think these independents, so-called church-related, colleges as they began but are more independent now in nature, that there is a very important place they have to fill.

Today many families, parents and students alike, are searching for alternatives to the assembly-line teaching of many thousands of young people who are ill-equipped to go on to higher education or to enter the work force. They are searching for schools where the ratio between faculty and student is small, where there is a personal contact between student and scholar. They search for institutions where there is an emphasis on scholarship, on character and integrity, and where there will be equal opportunities for all.

If diversity in our society is a virtue, and most assuredly it is, then it is surely a continuing necessity that we work together to see that it survives.

I join with my colleague (Mr. HOLLINGS) in supporting this amendment which would eliminate the provision for tuition tax credit as it would apply for elementary and secondary schools. I believe that we must find ways to

strengthen and maintain our system of private education at the elementary and secondary level, but I do not feel that this proposed legislation is a realistic way of approaching the problem at this time. To promote a true diversity in our education system and maintain the standards of excellence which we desire will require the collective efforts of the Members of Congress. All segments of our society must work to achieve an equitable and effecitve solution. Does the Senator agree?

Mr. HOLLINGS. I definitely agree. There is not any question about it. I appreciate the place they do fill. I just do not think it is our responsibility, I think we would be remiss in our responsibility, if we started to interpose the Federal Government.

Our President ran on a program of getting away from bureaucracy, Washington control, Washington involvement, and Washington regulations. On that particular score that is one reason why the Council of Churches feels as it does, and the same applies to the various organizations, whether they be Presbyterian, Methodist, or Baptist, all down the line. When the Roper Survey came out the week before last it showed two-thirds of all Americans opposed the private elementary and secondary tax credit. And it found that of the Catholic citizenry of this land, only 43 percent favored tuition tax credits for elementary and secondary parochial schools, while 48 percent opposed tuition tax credit for the elementary and secondary parochial schools.

So when we talk about the people, the people know and appreciate this. They do not want government interfering with their parochial school and their private school system. They enjoy it and they appreciate it. But there are a few who have become overzealous about the Democratic Party platform, and a few other things, who keep running up here trying to have a misreading of history—they call it a fair reading of history. It is a misreading of history.

I am trying to yield—I thank the Senator very much.

Mr. RANDOLPH. I have not finished.

Mr. HOLLINGS. No, I appreciate the contribution the Senator is making to the dialog.

Mr. RANDOLPH. I shall be very brief.

Mr. HOLLINGS. Yes.

Mr. RANDOLPH. The two sons I have mentioned that Mrs. Randolph and I have had in the college and university level of education, both of those young men as they went through the primary and secondary, that is the grade and the high schools, were in the public sector. The Senator understands that?

Mr. HOLLINGS. That is right.

Mr. RANDOLPH. We believed in that.

Mr. HOLLINGS. That is right.

Mr. RANDOLPH. Then we believed when they came, if they so desired and we so desired, in the collegiate and university level of education that that was a decision that would be made as to whether it would be a public university supported by public funds or whether it would be an institution of whatever type, whether it is Salem College or Yale University or what-not, and that is the way it should be; is that correct?

Mr. HOLLINGS. That is correct. I agree with the Senator.

Mr. RANDOLPH. One further question.

Mr. HOLLINGS. I welcome it.

Mr. RANDOLPH. The Senator talked about everybody striking. That was an expression the Senator used.

Mr. HOLLINGS. That is right, I feel it and I see it.

Mr. RANDOLPH. And only because the Senator expressed alarm, depart from the primary educational problem. Would the Senator tell us, does he believe that public employees have the right to strike?

Mr. HOLLINGS. No, sir; I do not.

Mr. RANDOLPH. I thank the Senator. I believe as he believes.

Mr. HOLLINGS. I thank the distinguished senior Senator from West Virginia (Mr. RANDOLPH). He has been in the Halls of Congress since 1933.

Mr. RANDOLPH. It has been a challenging time.

Mr. HOLLINGS. JENNINGS RANDOLPH was a college professor when he was first elected to Congress. He was a dean of a university and served as a college trustee for over 50 years. He has served in private industry with distinction.

He came to the Senate in 1958, is on the Education Subcommittee. Our colleague has been an active sponsor of legislation for educational and training opportunities. He has been effective in the formulation and passage of such landmark legislation as the Elementary and Secondary Education Act, the Higher Education Facilities Act, the Library Services and Construction Act, the Education for the Handicapped Act, and others.

Probably no Member of Congress is better equipped by experience and expertise for the tasks he has undertaken. His comment on this particular subject is exceedingly helpful to both sides of this issue.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. HOLLINGS. Yes; I yield the floor to the Senator from Virginia.

Mr. SCOTT. I appreciate very much the Senator's yielding.

Certainly, Mr. President, I support the amendment of the distinguished Senator from Arkansas as amended by the amendment of the distinguished Senator from South Carolina. However, I do rise in opposition to the bill before us without these amendments.

I have in the past cosponsored tax credits to assist parents with college expenses, and I heard the distinguished Senator from West Virginia speak of his own children. Such a measure would not benefit me personally; I am rather proud of my own three children having a total of 55 years in school between them, all of them graduates of a State-supported school, the College of William and Mary, but then going to different schools for graduate study, the older daughter going to Cornell University and the two boys to the law schools, one at William and Mary and one at the University of Virginia.

So I know, as other Senators know, that whether they go to a private school or to a public school, there are expenses in connection with sending your youngsters through college. But I have a little reservation, even, about this bill, that portion, now, because it looks as though some would use it as a vehicle to obtain tax credits for elementary and secondary tuition.

The bill presently before us, providing assistance for parents who send their children to private or parochial elementary or secondary schools, in my opinion would be expanded over the years to increase the amount of aid, in the event it should be found valid by the Supreme Court.

All parents have the right, in my judgment, to determine whether their children should attend the public school system or attend either a private or a parochial school. I am in agreement with their right to make that determination. However, the public school system, supported by tax funds, is available to all children, regardless of their political persuasion, regardless of their race or their ethnic background. To me, it would be unreasonable for taxpayers who support a public system of education also to be required to contribute to the cost of the education of children whose parents prefer to send them to a private or a parochial school.

There is no doubt that the cost of maintaining three different systems of education—and I believe we do have to think of this as three different systems, the private school system, the parochial school system, and the public school system—at public expense would be greater than the cost of maintaining one unified system for all of the children whose parents choose to send them to the public school.

In the Nyquist case, involving tax credits, the Supreme Court, at page 797, referred to the initial cost, and indicated that the programs start at modest levels, but that long experience with those Federal and State governments indicated that aid programs of any kind tend to become entrenched, to escalate in cost, and to generate their own aggressive constituencies; and that the greater the class of recipients of aid, the greater the pressure for accelerated increases.

Moreover, the State itself, concededly anxious to avoid assuming the burden of educating children now in private and parochial schools—may we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order.

The Senator from Virginia may proceed.

Mr. SCOTT. Moreover, the State itself, concededly anxious to avoid assuming the burden of educating students now in private and parochial schools, has a strong motivation for increasing this aid as public school costs rise and population increases.

In this situation, where the underlying issue is the deeply emotional one of church-state relations, the potential for seriously divisive political consequences needs no elaboration.

It is interesting to note that pages 23 and 24 of the bill provide for an expedited review of the constitutionality of the educational expense credit, including an appeal to the Supreme Court, while at the same time the first section of the bill, section 1(b), entitled "Declaration of Policy," indicates that the Congress further finds that the provision of such assistance in this manner fully complies with all the provisions of the Constitution of the United States, that it does not constitute excessive Government entanglement with religion, that it is wholly secular in purpose, and that such assistance will neither advance nor hinder religion.

It also appears unusual that the findings of the Congress fly in the face of the opinion of Attorney General Bell that the measure is unconstitutional.

If it is wholly secular in nature, it seems unusual for Catholic priests, from the pulpit, to be urging their congregations to contact their Senators, to obtain favorable votes on this legislation.

Mr. President, I am well aware of the Packwood amendment being adopted last night, that would eliminate portions of the objectionable feature, and the fact that the amendment before us by the Senator from South Carolina would in itself tend to eliminate part of this. But I had not known. The distinguished Senator from Oregon mentioned that he has always dealt fairly, and that he has never taken anybody by surprise. I had already prepared my remarks with no knowledge, no indication that there would be a change in this bill. I do thank the distinguished Senator, however, for eliminating a congressional finding of constitutionality, because in my judgment the courts, regardless of the findings of Congress, will make their own determination as to whether a measure enacted by Congress is a violation of the Constitution or not.

Of course, there are faults in our public schools, as is true in the case of every public and private institution, and I would hope that we would work to improve the quality of education. Yet the American public school system is a cornerstone of our Republic. It has contributed mightly to national stability, to equality, to greatness. For roughly 150 years our public schools have demonstrated a method of achieving an enlightened and unified citizenry, in assisting the children of those coming to our shores from different lands, from various cultures and religious backgrounds, speaking different languages, and of different intellectual qualities, to become united into one nation. This is part of the traditional American melting pot.

Therefore, it would seem reasonable to me that its preservation should be of vital concern to all Americans.

The sense of community closeness, or equality, is bound to be developed when children attend school together for a period of 12 years, beginning in early childhood. To me this is part of the strength of America; and providing subsidies to encourage parents to remove their children from the public schools will tend to diminish this unity and this strength. We might well ask whether new immigrants coming to our shores will bridge the language difficulties and the cultural differences between their old and their new countries as readily if we weaken the public schools of the country. I am quite aware, Mr. President, that many Members of Congress are disillusioned with teachers sometimes going on strike, with their interests sometimes appearing to weigh more heavily on their own economic welfare than the welfare of the children they teach, of the demands made by the leaders of their unions, by whatever name they may be called; but if we disagree with some of these policies, it would appear that we should attempt to change them rather than to do what may result in irreparable damage to the public school system.

While the public school system has been the melting pot, the place where children from all backgrounds can come together and develop characteristics of good citizens which we feel are laudable, parochial and private schools may emphasize ethnic differences. I would hate to see a classification of Chinese children, or Jewish children, of Italian children, of Spanish children rather than children—American children. Children from throughout the world coming to our shores attending our public schools can develop much more unity than if they are divided along ethnic or religious grounds.

We see an example of this in our neighbor to the north where the French-speaking Province of Quebec is threatening to break away from the rest of Canada. In other words, Mr. President, I disagree with the declaration of policy in the bill that would have Congress declare it to be the policy of the United States to foster diversity and pluralism at taxpayers' expense. Those words are still in the policy statement of the bill. In a different vein, some of the religious leaders who support this bill might consider whether they want to continue the right to govern their parochial schools, to provide textbooks of their own choosing, and to use their own methods of teaching of children rather than to have more policies dictated to them by State and Federal Governments. While the declaration of policy refers to tax credit that will be made available to those schools which fully comply with all the applicable Federal and State laws and requirements, including civil rights provisions, the language is more detailed at page 26 under section 3 entitled "Report on Civil Rights Enforcement by Internal Revenue Service." Does the parent who voluntarily sends his child to a private or parochial school want our Federal Government to exercise the same type of control over those schools as they now exercise over the public schools? Many of the private schools were constructed in order that children could escape some of the regulations affecting the public schools. But if tuition grants or tax credits are commenced and expanded, is there any doubt in the mind of any thinking person that the private and parochial school leaders will not be as free to make decisions governing their schools as they are today?

In the opinion of the Attorney General, S. 2142, the Packwood-Moynihan bill, now included to a large extent in H.R. 12050, is unconstitutional. The Attorney General finds that the establishment clause of the first amendment prevents the Federal Government from making tuition grants or tax credit for nonpublic elementary and secondary education. To support his opinion he relies to a large extent on the cases of *Committee For Free Education* against *Nyguist*, 413 U.S. 756 (1973), and *Sloan* against *Lemon*, 413 U.S. 825 (193), a companion case. The court found the State law examined in these cases to be unconstitutional under the three-part establishment clause tests enunciated in *Lemon* against *Kurtzman*, 403 U.S. 602 (1971).

To be valid the statute must first have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion; finally, the statute must not foster an "excessive entanglement with religion." Section 1b of the measure as reported by the committee provides attempts to meet these objectives by merely stating that the Congress finds that such conditions exist under this bill. If Congress had the power to determine the constitutionality of a bill it enacts, there would be no need later on in the bill to have an expedited review of its constitutionality. In fact, the courts would be relieved of part of their judicial duties by action within the legislative branch. But under the division of powers, while an act of Congress is presumed to be constitutional, the ultimate decision is made by the courts.

On the surface, Mr. President, it would appear that the authors of the bill intend to make an unconstitutional measure more palatable by stating that Congress finds that it is constitutional. I had intended to offer my amendment No. 3461 at a later time to strike section 1B, the declaration of policy provision, and to permit the Court to determine whether or not the bill, in all of its ramifications, is valid or invalid. I believe the Court will do this in any event but why should we attempt to hamstring the Supreme Court of the United States in the performance of a judicial function? There may still be objectable features in 1(b) even with the Packwood amendment.

I believe the amendment by the distinguished Senator from South Carolina, if adopted, will eliminate this and it will not be necessary for me to offer my own amendment. But should that be defeated, then I do propose to offer the amendment.

During the past decade, I believe every legislative effort, both State and Federal, to give aid to parochial schools beyond the furnishing of text books and transportation has been held invalid. The question of tax credits or tuition grants to parochial schools by the State of New York was decided to be invalid by the Supreme Court in the Nyquist case and on page 785 of its opinion, the Court refers to the various ingenious plans for channeling State aid to sectarian schools that periodically reach this Court.

On page 790 of the same opinion, the court indicates that "constitutional an-

alysis is not a legalistic minuet in which precise rules and forms must govern, instead we must examine the form and the relationship for the light it casts on the substance."

At page 792, the Nyquist case states:

Indeed it seems clear that tax benefits for parents whose children attend parochial schools are a recent innovation, occasioned by the growing financial plight of such nonpublic institutions and designed, albeit unsuccessfully, to tailor state aid in a manner not incompatible with the recent decisions of this court.

It seems obvious that the bill before us, and especially section 1b, the declaration of policy provision, is tailored to meet decisions of the Supreme Court that direct or indirect aid to parochial schools in the form of tuition grants or tax credits at the elementary or secondary school level is contrary to the establishment clause of the Constitution. Again, it appears unworthy of what we like to believe is the greatest deliberative body in the world to attempt to foist an unconstitutional law upon the courts and the American people by labeling it constitutional.

Before discussing recent cases to a greater extent, it might be well to reflect a bit on the first amendment. We often times hear about first amendment rights as they pertain to freedom of the press, but the amendment begins:

Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

A Virginian, James Madison, played a major part in the drafting of this amendment, although, he is understood to have been influenced by Jefferson, who believed that the bill provided a wall of separation between church and state.

Mr. President, that should read "bill" because I am talking about the Virginia Statute of Religious Freedom. I am perhaps more partial to that, it being something that is a part of the law in my own State and something that was put together by two prominent Americans, Madison and Jefferson, both of whom happened to be Virginians.

A portion of the Virginia Act of Religious Freedom after the enacting clause reads as follows:

That no man shall be compelled to frequent or support any religious worship, place of ministry whatsoever, nor shall be enforced, restrained, molested, or burthened, in his body or goods, nor shall otherwise suffer on account of his religious opinion or belief; but all men shall be free to profess, and by argument, to maintain their opinions in matters of religion, and that the same shall in no wise diminish, enlarge, or affect their civil capacities.

The act, of course, has not been changed or repealed and indeed has been reaffirmed time after time, the most recent affirmation, I note, being in 1919. However, a similar provision is embodied in the State constitution.

Over the years, the portion of the first amendment of the Federal Constitution relating to separation of church and state, and especially the establishment clause, has been subject to judicial interpretation, and been subject to some changes as the membership of the Court changed. Perhaps it would be well to review this before returning to the latest cases.

The explication of the religion clauses by the scholars has followed a restrained sense of their meaning. Story thought that—

The right of a society or government to interfere in matters of religion will hardly be contested by any persons, who believe that piety, religion, and morality are intimately connected with the well being of the state, and indispensable to the administration of civil justice.

Story, in his "Commentaries on the Constitution of the United States" looked upon the prohibition simply as an exclusion from the Federal Government of all power to act upon the subject. He said:

[Footnotes not included.]

The situation . . . of the different states equally proclaimed the policy, as well as the necessity of such an exclusion. In some of the states, episcopalians constituted the predominant sect; in others, Presbyterians; in others, Congregationists; in others, Quakers; and in others again, there was a close numerical rivalry among contending sects. It was impossible, that there should not arise perpetual strife and perpetual jealousy on the subject ecclesiastical ascendancy, if the national government were left free to create a religious establishment. The only security was in extirpating the power. But this alone would have been an imperfect security, if it had not been followed up by a declaration of the right of the free exercise of religion, and a prohibition (as we have seen) of all religions tests. Thus, the whole power over the subject of religion is left exclusively to the state governments, to be acted upon according to their own sense of justice, and the state constitutions; and the Catholic and the Protestant, the Calvinist and the Armenian, the Jew and the Infidel, may sit down at the common table of the national councils, without any inquisition into their faith, or mode of worship.

"Probably," Story also wrote, "at the time of the adoption of the constitution and of the amendment to it, now under consideration, the general, if not the universal, sentiment in America was, that Christianity ought to receive encouragement from the state, so far as was not incompatible with the private rights of conscience, and the freedom of religious worship. An attempt to level all religions, and to make it a matter of state policy to hold all in utter indifference, would have created universal disapprobation, if not universal indignation." The object, then, of the religion clauses was not to prevent general governmental encouragement of religion, of Christianity, but to prevent religious persecution and to prevent a national establishment.

Before considering the development of the two religion clauses by the Supreme Court, one should notice briefly the tests developed by which religion cases are adjudicated by the Court.

While later cases rely on a series of rather well-defined, if difficult-to-apply, tests, the language of earlier cases "may have been too sweeping utterances on aspects of these clauses that seemed clear in relation to the particular cases but have limited meaning as general principles."[10] It is well to recall that "the purpose [of the religion clauses] was to state an objective, not to write a statute."

In 1802, President Jefferson wrote a letter to a group of Baptists in Danbury, Connecticut, in which he declared that it was the purpose of the First Amendment to build "a wall of separation between Church and State."[12] In *Reynolds* v. *United States*,[13] Chief Justice Waite for the Court characterized the phrase as "almost an authoritative declaration of the scope and effect of the amendment." In its first encounters with challenges to state programs on religious grounds, the Court looked to Jefferson's metaphor for substantial guidance.[14] But a metaphor may obscure as well as illuminate and the Court soon began to emphasize neutrality and voluntarism as the standard of restraint on governmental action.[15] The concept of neutrality, though, is a coat of many colors,[16] and three standards which could be stated in objective fashion emerged. The first two standards were part of the same formulation. "The test may be stated as follows: what are the purpose and the primary effect of the enactment? If either is the advancement or inhibition of religion then the enactment exceeds the scope of legislative power as circumscribed by the Constiution. That is to say that to withstand the strictures of the Establishment Clause there must be a secular legislative purpose and a primary effect that neither advances nor inhibits religion."[17] The third test is whether the governmental program results in "an excessive government entanglement with religion. The test is inescapably one of degree . . . [T]he questions are whether the involvement is excessive, and whether it is a continuing one calling for official and continuing surveillance leading to an impermissible degree of entanglement."[18] The Justices disagree among themselves on the results of the applications of these tests and the fact that the tests have evolved over time means that the cases do not follow a consistent line of development. Nonetheless, evaluation of the results of each case and of its continuing vitality in the light of later decisions is somewhat easier with the tests in mind. Finally, the Court has established one distinct difference between establishment cases and free exercise cases; in the latter but not in the former, a challenger must demonstrate the coercive effect of a policy or enactment in order to prevail.[19]

We are speaking of a portion of the first amendment: Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof. I continue:

One value which both clauses of the religion section serve is to enforce governmental neutrality in deciding controversies arising out of religious disputes. It will often be the case that schism will develop within churches or between a local church and the general church, which will result in secession or expulsion of one faction or of the local church. A dispute over which body is to have control of the property of the church will then often be taken into the courts. It is now established that both religion clauses prevent governmental inquiry into religious doctrine in settling such disputes and contrarily require courts to look simply to the decision-making body or process in the church and to give effect to whatever decision is officially and properly made.

The first such case was *Watson* v. *Jones* which was decided on common-law grounds in a diversity action without explicit reliance on the First Amendment. A constitutionalization of the rule was made in *Kelroff* v. *St. Nicholas Cathedral*, in which the Court held unconstitutional a state statute that recognized the autonomy and authority of these North American branches of the Russian Orthodox Church which had declared their independence from the general church. Recognizing that *Watson* v. *Jones* had been decided on nonconstitutional grounds, the Court nonetheless thought that the "opinion radiates . . . a spirit of freedom for religious organizations, and independence from secular control or manipulations—in short, power to decide for themselves, free from state interference, matters of church government as well as those of faith and doctrine." Then, in a 1969 case, the

Court severely circumscribed the power of state courts to resolve church property disputes. "First amendment values are plainly jeopardized when church property litigation is made to turn on the resolution by civil courts of controversies over religious doctrine and practice. If civil courts undertake to resolve such controversies in order to adjudicate the property dispute, the hazards are ever present of inhibiting the free development of religious doctrine and of implicating secular interests in matters of purely ecclesiastical concern . . . The Amendment therefore commands civil courts to decide church property disputes without resolving underlying controversies over religious doctrines." What a court must do is to look at the church rules; if the church is a hierarchical one which reposes determination of ecclesiastical issues in a certain body, the resolution by that body is determinative, while if the church is a congregational one prescribing action by majority vote that determination will prevail. Courts may, however, make a limited or marginal inquiry to determine the legality of the actions taken, whether church rules have been complied with. Whatever rule is applied must be one which is neutral with regard to the content of religious doctrine.

"[F]or the men who wrote the Religion Clauses of the First Amendment the 'establishment' of a religion connoted sponsorship, financial support, and active involvement of the sovereign in religious activity." However, the Court's reading of the clause has never resulted in the barring of all assistance which aids, however incidentally, a religious institution. Outside this area, the decisions generally have more rigorously prohibited what may be deemed governmental promotion of religious doctrine.

Several recent decisions make clear that the discretion of state and federal bodies to assist financially sectarian elementary and secondary schools is quite limited; at the same time, the Court's prior disposition to allow a greater discretion when colleges affiliated with religious institutions are aided has been reaffirmed.

Mr. President, at the Department of Justice, I had a secretary for a number of years who was from Massachusetts. She mentioned to me that she was a graduate of Boston University. I said, "Well, that is a Methodist school." She argued with me that it was not affiliated with any church.

Here was a young lady who had spent 4 years at a church-related school and was not even aware that the school was church-related. I think that adds a little credence to the suggestion that there is a difference between young people at the elementary and high school level and the more mature students at the college level.

Returning to the notes:

Moreover, these decisions reveal a division of opinion among the Justices upon the application of two of the three tests developed in past litigation to provide "helpful signposts" in the resolution of concrete controversies. *Hunt* v. *McNair* 413 U.S. 734 at page 741 (1973).

In Committee for Public Education against Nyquist—this, to me, is the leading case on the matter before us—reported at 413 U.S. 556, it is indicated that—

A secular purpose is the first requirement to sustain the validity of legislation touching upon religion and upon this requirement the Justices were united; state desire to preserve a healthy and safe educational environment for all of its school children, state interest in promoting pluralism and diversity among its public and nonpublic schools, and state concern to prevent an overburdening of the public school system that would accompany the financial failure of private schools provided adequate legitimate, nonsectarian bases for the legislation under review. Upon the tests of secular primary effect and church state entanglement, however, varied views were expressed. Thus, Chief Justice Burger, in dissent, argued that "government aid to individuals generally stands on an entirely different footing from direct aid to religious institutions." Direct aid to institutions may involve government in assisting the religious institutions sectarian functions and to avoid this impermissible primary effect necessitates the imposition of governmental monitoring and reviewing activities leading to an impermissible entanglement of state with church.

Justice Powell, speaking for the Court, denied any controlling significance to the delivery of funds, either directly in grants or indirectly in tax credits, to parents rather than to schools. Delivery to parents is only one factor among many to consider. The controlling question is whether government has established "an effective means of guaranteeing that the state aid derived from public funds will be used exclusively for secular, neutral, and nonideological purposes." Grants directly to religious schools would be invalid without such a guarantee and no reason existed for treating differently aid to parents "when the effect of the aid is unmistakably to provide desired financial support for nonpublic, sectarian institutions."

Substantial unanimity, at least in result, prevailed among the Justices in dealing with direct financial assistance to sectarian schools, as might have been expected from the argument over the primary effect test. Thus, a state program to reimburse nonpublic schools in the State for a variety of services mandated by state law was struck down because the statute did not distinguish between services, some secular and some potentially religious, the costs of which would be reimbursed.[7] Similarly, a program of direct money grants to nonpublic schools to be used for the maintenance of school facilities and equipment failed to survive the primary effect test because it did not restrict payment to those expenditures related to the upkeep of facilities used exclusively for secular purposes and because "within the context of these religion-oriented institutions" the Court could not see how such restrictions could effectively be imposed.

Two other programs of assistance that went to private, including sectarian, schools were struck down in *Meek* v. *Pittenger*. First, legislation authorizing the loan of instructional material and equipment directly to qualifying nonpublic elementary and secondary schools in the State was voided as an impermissible extension of assistance to religion. This conclusion was reached because 75 percent of the qualified schools were church-related or religiously affiliated educational institutions and the assistance was available without regard to the degree of religious activity of the schools. The materials and equipment loaned were religiously neutral but the substantial assistance necessarily constituted aid to the sectarian school enterprise as a whole and thus had a primary effect of advancing religion. Second, legislation authorizing the provision of auxiliary services—remedial and accelerated instruction, guidance counseling and testing, speech and hearing services—by public employees on nonpublic school premises was invalidated because the Court thought the program had to be policed to ensure religious neutrality and it saw no way that could be done without impermissible entanglement. The fact that the teachers would, under this program and unlike one of the programs held unconstitutional in *Lemon* v. *Kurtzman*, be public employees rather than employees of the religious schools and possibly under religious discipline was insufficient in the Court's view to permit the State to fail to make certain that religion was not inculcated by subsidized teachers.

Substantially similar tuition reimbursement programs from New York and Pennsylvania were also struck down. New York's program provided out of general tax revenues reimbursements for tuitions paid by low-income parents to send their children to nonpublic elementary and secondary schools; the reimbursements were of fixed amounts but could not exceed 50 percent of actual tuition paid. Pennsylvania provided fixed-sum reimbursement for parents who send their children to nonpublic elementary and secondary schools, so long as the amount paid did not exceed actual tuition, the funds to be derived from cigarette tax revenues. Both programs, it was held, constituted public financial assistance to sectarian institutions with no attempt to segregate the benefits so that religious activities did not receive any.

New York had also enacted a program of tax relief for those parents sending their children to nonpublic schools; relief was available to parents not qualifying for the tuition reimbursements so long as they made less than $25,000 per year and the relief was in the form of fixed sums bearing no relationship to the amounts of tuition paid.

Reading from the opinion in the Nyquist case, the court said:

In practical terms there would appear to be little difference, for purposes of determining whether such aid has the effect of advancing religion, between the tax benefit allowed here and the tuition grant allowed under § 2. The qualifying parent under either program receives the same form of encouragement and reward for sending his children to nonpublic schools. The only difference is that one parent receives an actual cash payment while the other is allowed to reduce by an arbitrary amount the sum he would otherwise be obliged to pay over to the State. We see no answer to Judge Hays' dissenting statement below that "[i]n both instances the money involved represents a change made upon the state for the purpose of religious education."

Mr. President, in summary I believe we should give credence to the opinion of the Attorney General that this proposal is unconstitutional. I believe we should give credence to the most recent Supreme Court cases combined by the Court in 1973, the cases from New York and Pennsylvania, holding tuition grants and credits as unconstitutional violations of the establishment clause of the first amendment. I believe we should give credence to the views of the distinguished chairman of the Budget Committee that this measure would add substantially to the cost of Government and further increase the existing deficit.

In my own judgment, rather than promoting diversity and pluralism within our country, it would appear that we should promote unity. The concept that the United States is a place where people can come from various cultures, various races and religions and over a period of time, under the melting pot concept, become Americans regardless

of their race, color or creed. The public school system, with all of its faults, has served our country well.

I do not believe that we can afford to have the taxpayers finance alternate systems, two additional systems of schools. Certainly those who desire to send their children to private schools for any reason should be entirely free to do so. Certainly those who prefer to send their children to church schools for any reason should be entirely free to do so. This is in accordance with the constitutional concept of religious freedom. We should bear in mind, however, the statistics included within the Attorney General's opinion that the proposed law is contrary to the establishment clause of the first amendment. He indicated current statistics on nonpublic schools nationally show nearly 17 percent of the Nation's elementary and secondary schools are nonpublic.

Of that percentage, 85 percent of the nonpublic schools are religiously affiliated. Citing U.S. Department of Health, Education and Welfare, National Center for Education Statistics, nonpublic school statistics, 1976–77. According to the most recent statistics available, 87.5 percent of nonpublic schools at the elementary level and 70.2 percent of nonpublic schools at the secondary level are sectarian. He continues that although sectarian secondary schools do not dominate nonpublic education to the same extent as sectarian elementary schools, we believe that their numbers are sufficiently substantial that no meaningful distinction between credits for elementary and secondary schools could be drawn.

Mr. President, we are considering a bill that the committee estimates will cost something approaching $10 billion within the next 5 years; and, as the court the court in the Nyquist case:

> Government aid programs of any kind tend to become entrenched, to escalate in cost, and to generate their own aggressive constituencies. The greater the class of recipients, the greater the pressure of accelerated increases.

Quoting again from the opinion of the court in the Nyguist case:

> In this situation, where the underlying issue is the deeply emotional one of church-state relations, the potential for seriously divisive political consequences needs no elaboration. And while the prospects of such divisiveness may not alone warrant the invalidation of state laws that otherwise survive the careful scrutiny required by the decisions of this court, it is certainly a warning signal not to be ignored."

I urge, Mr. President, that the proposal be rejected, that we as Senators attempt by our activities to obtain unity. A United Nation can be far more effective in dealing with both domestic and foreign affairs than a divided nation. Regardless of everything else, this is a divisive bill we have under consideration.

In my judgment, it would be rejected by a vast majority, of Americans if it were put to a referendum of the people of the country. In my judgment, it is contrary to the establishment clause of the first amendment.

Mr. President, I yield the floor.

Mr. BENTSEN and Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas had earlier asked for recognition.

The Senator from Texas.

Mr. BENTSEN. Thank you very much, Mr. President. We do not often have debates in this Senate lately that are really educational for the membership. But I think Senator MOYNIHAN and Senator HOLLINGS have made that kind of a contribution by discussing at some length the merits and the problems resulting from a Federal system of private education.

We have heard an outstanding debate on the constitutional questions and that has carried over for three legislative days.

So I will not continue to pursue that part of the subject.

I shall address my remarks instead to the practical problems today of financing public education.

My cosponsorship of the Hollings amendment stems from a deep sense of disquiet about how this Nation is handling its finite resources. Rather than spreading around some more tax credits, I think we should be concentrating on seeing what we can do to improve public education in this country of ours.

This Nation has long embraced an abiding commitment to first class public education and it is a commitment that has served this Nation well.

It has given us a population equipped to sustain democracy and make a success of freedom. Quality public education is fundamental to the American experience but education today faces severe problems in our own country.

Many of these problems are directly attributable to inflation, to a decreasing tax base, to things like proposition 13.

In Brownsville, Tex., a town of about 60,000 people, we have a school district today that is having to add a schoolroom every 15 days—a schoolroom for the children of legal aliens. Now, by any stretch of the imagination you would not think that the private schools can accept that kind of a burden. When you have the children of legal aliens, who is going to question and who is going to deny that child coming into the schoolroom? The public schools have to accept them.

When I told you they are adding a new schoolroom every 15 days, what kind of a schoolroom is it? It is a temporary schoolroom because that is all they can afford. We have the lowest per capita income in the United States along the Mexican border, a low tax base, not able to handle the situation, and that is where we should concentrate our efforts.

These problems are duplicated a thousand times over in communities across the country, many of them with low tax bases, limited resources, and are suffering from inflation. To the extent that we divert the taxpayers' money to private education, we diminish our ability to fulfill our primary commitment, which is the best possible education for the greatest number of people.

Providing tax credits to pay tuition for private elementary and secondary schools is bad educational policy, and it is bad tax policy. In both instances we will be using general revenues to benefit a small and a generally privileged segment of our population.

The Federal Government, of course, is already assisting public education in the States by funding special targeted educational assistance in areas of special need, and private schools also benefit, although to a lesser degree, from these programs.

We help them on aid to the handicapped, on bilingual education, and other programs. I think that is money well spent, and money that must be spent.

In addressing the Texas Council on Exceptional Children last week I stressed my strong support for such programs. I have in-house counsel on that since my daughter is a teacher in special education, so I admit to some bias on that particular subject.

Mr. President, no one is going to quarrel with the right of a parent to be able to send his child to a private school, just as no one is going to quarrel with the right of a private citizen if he does not want to attend the public schools. While no one is required to swim in the public swimming pools, taxpayers should not have to finance a person's private pool. The right of choice is inherent in everything we stand for in this Nation.

My own children attended both public and private schools. That right of choice, however, does not imply that the American taxpayer should be required to shoulder the financial burden of education at private elementary and secondary institutions.

I would submit that the taxpayers' obligation ends where private education begins. I would submit that we have enough problems in the field of public education without diverting our limited resources into the private sector.

It has been suggested that the tuition tax credits do not really go to the children, that they go to the parents. Now, that really seems to me to be a distinction without a difference, since nothing in this bill would prohibit those private schools from raising their tuition to match whatever the tax credit happens to be.

If the tax credits enable additional children to attend private schools, then I think what we really do is run the risk of a two-tiered educational system, and we saw that two-tiered system in the stock market, and it did not turn out too well, and I do not believe it will work to accomplish the objectives we want for education in this country.

Private schools, heavily endowed, could still pick and choose those children who meet their educational standards. They certainly would not be concentrating on the least advantaged. They certainly would not be taking large numbers of alien children. So I believe such a development would jeopardize one of our most cherished precepts, that of providing a free quality education for all of our children.

If, on the other hand, the tax credit is not sufficient to induce new students into private schools, we will simply have

passed a relief bill for the most financially privileged class of our Nation.

And finally, Mr. President, we should all be aware that the budget implications of elementary and secondary tuition tax credits are astounding. Estimates vary on the cost of the proposal because we simply do not know how many people might take advantage of it. We do, however, know that there will be pressure every year to increase the size of any tax credit that might be enacted. We can also predict with certainty that the public school system would want—and could make a very convincing case for—an equal measure of assistance. While we do not know the exact magnitude of the cost involved, we can safely predict the trend, and it is higher and higher. It would go on and on and on.

I am committed to support education—quality public education that serves the needs of all our people. I can see little merit in a proposal that taxes every American to subsidize the few who chose not to take advantage of public educational facilities. There is just not enough money to go around; not enough money to meet current, pressing public educational needs. The issue is that simple, and it leads me to conclude that tuition tax credits for elementary and secondary education are not a proper form of Federal education assistance.

I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I call up an amendment from the floor and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. PACKWOOD. Objection.

The PRESIDING OFFICER. Objection is heard.

The Senator from Delaware.

Mr. ROTH. Mr. President, as we approach a vote on the Roth-Ribicoff-Packwood-Moynihan tuition tax relief bill, I want to emphasize once again my strong support for elementary and secondary tax credits.

In addition to the rising cost of colleges, the cost of nonpublic elementary and secondary schools has also increased substantially. And as a result, enrollment in these elementary and secondary schools has dropped sharply.

In 1960, 14 percent of elementary and secondary school children attended private and parochial schools. By 1976, only 9 percent of our schoolchildren were attending nonpublic schools.

Between 1965 and 1976, nonpublic elementary and secondary schools lost 1.8 million students. And in 1976, there were 2,246 fewer private schools in existence than there were 10 years ago.

Catholic elementary and secondary schools have been hit especially hard by increasing costs. In the last 10 years, Catholic schools have lost 39 percent of their enrollment, more than 2 million students.

Mr. President, I believe in freedom of choice. I believe parents should be free to choose whether to send their children to a public school or a nonpublic school.

But as the sharp drop in nonpublic school enrollment shows, too many parents no longer have a freedom of choice. In fact, more and more parents are being deprived of the freedom of choice to send their children to nonpublic schools by a government which takes more of their own earnings through higher taxes and inflation.

I believe a tuition tax credit will restore freedom of choice to the millions of American families who are struggling to pay both nonpublic school tuition and higher taxes for public schools.

Mr. President, I am a strong supporter of public schools. I personally am a product of public school education, and my two children attend public schools in Delaware.

I do not believe the tuition tax credit will destroy our public schools. The Federal Government will spend $15 billion this year in support for public elementary and secondary schools. Government at all levels will spend $73 billion this year on public elementary and secondary schools.

At the Federal level, Federal assistance for public elementary and secondary schools amounts to $352 per pupil. Total government support per public school student is about $1,400 per student.

According to the Joint Committee on Taxation, the tuition tax credit would be worth, an average of $170 per private elementary and secondary school student. When combined with existing programs, the total government assistance per private school student would be $268 per student.

Clearly, these figures do not support the argument that a tuition tax credit would destroy public schools. Instead, a tuition tax credit will reverse the decline in enrollment which threatens to destroy our nonpublic schools.

Mr. President, I also cannot accept the argument that a tuition tax credit will only benefit the rich. According to Census Bureau figures, 78.5 percent of private elementary and secondary school students are from families with income of less than $25,000; 64 percent are from families with income under $20,000.

By giving them the freedom of choice, low-income minority students will particularly benefit from tuition tax credits. According to Mr. Roy Innis, National Director of the Congress of Racial Equality:

> Passage of tuition tax credits at the elementary and secondary levels will have a tremendous potential impact on poor and minority kids throughout this country by giving them what they desperately need: options.

Finally, I do not believe this bill is unconstitutional. The Supreme Court has never ruled on the constitutionality of tax credits for colleges, vocational, elementary and secondary schools, and arguments exist on both sides of the issue.

The Attorney General has given his opinion, based on an opinion written by the Assistant Attorney General, that tax credits limited to elementary and secondary schools would be unconstitutional. But his immediate predecessor in that position believes this bill is constitutional.

I, too, believe this bill is constitutional, and there are numerous parallels. For example, a tax deduction is allowed for contributions to churches and church-sponsored charities. The GI bill provides direct Federal payments for students attending private and religious schools, including parochial elementary and secondary schools.

Finally, I do not believe Congress should not act on an issue merely because some scholars believe the Supreme Court may rule it unconstitutional. It is about time that Congress recognize it is a coequal branch of government, and I believe we should act and allow the Court to rule on the issue. The sponsors of the legislation have made provision for the Court to rule quickly.

Mr. President, I urge this body to endorse tuition tax credits for elementary and secondary students. At stake in this vote are freedom of choice, pluralism, civil rights, and opportunity for low- and middle-income families and their children. Mr. President, I again urge my colleagues to support tuition tax credits.

The PRESIDING OFFICER. The Senator from Maine.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield to the majority leader, without losing my right to the floor.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

Mr. President, I have been making up what I hope will be an agreement to vote on certain amendments at certain times. It goes like this:

That following the comments of Mr. MUSKIE, the amendment by Mr. HOLLINGS then be temporarily set aside; that an amendment by Mr. PACKWOOD—and Mr. MOYNIHAN?

Mr. PACKWOOD. Yes.

Mr. MOYNIHAN. Jointly.

Mr. ROBERT C. BYRD. That an amendment by Mr. PACKWOOD and Mr. MOYNIHAN be called up, that there be a 30-minute time limitation thereon, to be equally divided between the sponsors and—Mr. HOLLINGS?

Mr. HOLLINGS. I may be on the same side.

Mr. ROBERT C. BYRD. And the minority leader or his designee.

That there then be called up an amendment by Mr. METZENBAUM, Mr. HOLLINGS' amendment continuing to be temporarily set aside; that there be a 30-minute time limitation on the amendment by Mr. METZENBAUM, to be equally divided between Mr. METZENBAUM and Mr. HOLLINGS; and that upon the disposition of the amendment by Mr. METZENBAUM, Mr. MOYNIHAN or Mr. PACKWOOD be recognized to move, without debate, to table the amendment by Mr. HOLLINGS.

Mr. PACKWOOD. I might ask if the time on the Metzenbaum amendment could be divided between Mr. METZENBAUM and myself.

Mr. ROBERT C. BYRD. You mean the time of the proponents, or are you opposed to it?

Mr. PACKWOOD. I am going to oppose the higher education part of it.

Mr. ROBERT C. BYRD. That the time

on the Metzenbaum amendment be equally divided between Mr. METZENBAUM and Mr. PACKWOOD.

Mr. HOLLINGS. That will be all right.

Mr. ROBERT C. BYRD. That upon the disposition of that amendment, Mr. MOYNIHAN be recognized to move to table, without debate, the amendment by Mr. HOLLINGS, and that if that motion to table fails, there be 20 minutes for further debate on the amendment by Mr. HOLLINGS, to be equally divided between Mr. HOLLINGS and Mr. MOYNIHAN, at the conclusion of which an up or down vote occur on the amendment by Mr. HOLLINGS.

That would dispose, one way or the other, of the Hollings amendment, and then other amendments to the bill would be in order.

Mr. STEVENS. Mr. President, reserving the right to object, do I understand this Metzenbaum amendment would have 30 minutes, and then a motion to table the Hollings amendment, and then 30 minutes on each side if it is not tabled, the amendment then to be voted on up or down, and then 30 minutes on the Hodges amendment, to be equally divided?

Mr. ROBERT C. BYRD. No. There would only be 20 minutes for debate on the Hollings amendment if the motion to table fails. After the 20 minutes, the vote would occur up or down on the Hollings amendment.

Mr. HOLLINGS. Then the vote on the Hodges amendment, because mine is an amendment to his.

Mr. STEVENS. After which there would be 20 minutes on the Hollings amendment?

Mr. ROBERT C. BYRD. It presumes the Hollings amendment would be disposed of before the Hodges amendment is taken up.

Mr. STEVENS. And the Hodges amendment would follow?

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENS. What about the Domenici amendment?

Mr. ROBERT C. BYRD. It would come after the Hodges amendment.

Mr. MOYNIHAN. I would like to request 10 minutes, to be equally divided, on each side, if we should get to that point, between the Hollings amendment and the Hodges amendment.

Mr. ROBERT C. BYRD. Is that all right?

Mr. ROTH. Mr. President, reserving the right to object, I am not clear as to what the Senator from Ohio is proposing in the way of an amendment.

Mr. METZENBAUM. The Senator from Ohio has an amendment at the desk which would provide a limitation as pertains to income related to both primary and secondary and higher education, with different levels. There would be a $20,000 limitation, with phase-out to $25,000, for primary and secondary education, and there would be a limitation of $30,000, with a phase out to $40,000, for higher education. That depends; whether the amendment is ultimately in that form or some other form would relate directly to the action taken by this body on the Packwood amendment, because I have indicated to Senator PACKWOOD I would join with him in the Packwood-Moynihan amendment, since it covers the first half of the amendment I am offering. If that amendment fails, then I would make my amendment applicable only to higher education; or to primary, secondary, and higher education, all together. If his passes, I would make it applicable only to primary and secondary education.

Mr. ROTH. Mr. President, I am not willing to agree at this time to an agreement on time with respect to higher education.

Mr. STEVENS. I think I am still reserving the right to object. Do I understand that these are the only two amendments that will take place when the Hollings amendment is set aside?

Mr. ROBERT C. BYRD. That is correct.

Mr. STEVENS. There will be no more requests for setting aside the Hollings amendment and the time would be roughly 2 hours that we are talking about?

Mr. ROBERT C. BYRD. Not 2 hours, no. Well, including the rollcall votes, yes.

Mr. STEVENS. I do not object, as I understand it.

Mr. SCOTT. Reserving the right to object, it is my understanding this does not in any way affect any subsequent amendment to the Hollings amendment. Is that accurate?

Mr. HOLLINGS. Once we have the vote on our amendment and the Hodges amendment, they would be in the bill. I guess it would be parliamentarily in order. We hope to get a motion to reconsider tabled. It would not forego any amendments to the bill itself.

Mr. SCOTT. I am talking about up to final passage. I would still have a right to offer an amendment.

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENS. But not to the amendment of the Senator from South Carolina. This does foreclose any further amendment to the amendment of the Senator from South Carolina.

Mr. DOMENICI. Senator HOLLINGS called me and that is why I am late. Will the leader state again what it is we are agreeing to, please?

Mr. ROBERT C. BYRD. Yes. Mr. President, allow me to restate the request.

Mr. ROTH. Mr. President, reserving the right to object, my only concern with this proposed time limit is to have the limitation on higher education brought up during a discussion of the Hollings amendment. I would be willing to agree to a time limit, once we completed debate on the elementary and secondary.

Mr. METZENBAUM. That would not be acceptable. That is the entire issue. That is the whole purpose of this discussion.

Mr. ROTH. Mr. President, I object.

Mr. PACKWOOD. I wonder if we might do this, and I do not think it would take very long. Could we agree to the order without a time limit on my amendment? That is, the amendments would be taken in the order stated.

Mr. HOLLINGS. Without a time agreement?

Mr. PACKWOOD. You mean the time agreements just on the amendments, do you not?

Mr. ROTH. Basically, I would like to complete the discussion on elementary and secondary before we get into the amendments modifying college provisions.

Mr. ROBERT C. BYRD. I think we have been discussing that for 2 or 3 days, Mr. President. I am not referring to a specific amendment.

Mr. HOLLINGS. Mostly elementary and secondary.

Mr. ROTH. I think it is a parliamentary question as to whether or not the amendment applying to colleges would come in at this stage. It is just a question of trying to bring it up in an orderly manner.

Mr. ROBERT C. BYRD. Could we agree to set aside the Hollings amendment long enough to take up the Packwood amendment?

Mr. MOYNIHAN. Yes.

Mr. METZENBAUM. I object, Mr. Leader. I want to be cooperative.

Mr. ROBERT C. BYRD. The best way to be cooperative is not to object.

Mr. METZENBAUM. I have just had an amendment offered which was objected to by the distinguished Senator from Oregon, and I have no objection to his doing that. But I said to him earlier I was not willing to stand back while his amendment went before mine. He came and inquired of me on that subject and I said I would agree with it. But I am not now willing to stand that far behind and wait until the Hollings amendment is disposed of before I offer my amendment.

Mr. PACKWOOD. It was a time limit situation but not the order, is it not?

Mr. ROTH. I objected to the order.

Mr. HOLLINGS. That is the whole thing.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum—no, I will withhold that.

Will the Senator proceed?

Mr. MUSKIE. I will be happy to.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, I am not sure how relevant my remarks may be to the discussion which has just taken place or how it may influence the final outcome of that discussion, but I wish the conferees all good luck in arriving at a time agreement on this issue.

Since they have left the floor, I take it they are not interested in anything I might say or that anything I might say would influence the result of the conference.

Mr. DOMENICI. Will the Senator from Maine yield for a question to him at this point?

Mr. MUSKIE. I have not made my speech yet.

Mr. DOMENICI. I did not know that. I apologize.

Mr. MUSKIE. I wonder if I might proceed. This is not a long statement today. May I ask, is it a question related to the speech I am about to make?

Mr. DOMENICI. Actually, it relates to asking if the Senator would let me try to exchange an approach I have, to see

if the Senator would have an objection. I have an unprinted amendment. I would like to submit it so that I may make reference to it in the deliberations about time agreements.

Mr. MUSKIE. I yield for that purpose.

Mr. DOMENICI. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. Is it in order for the Senator from New Mexico to submit an unprinted amendment to the bill at this point?

The PRESIDING OFFICER. It requires unanimous consent.

Mr. MUSKIE. If it requires unanimous consent——

Mr. DOMENICI. I do not intend to call it up. I just want to submit it.

The PRESIDING OFFICER. The Senator has that right.

Mr. MUSKIE. Will the Senator withhold just long enough until we find out what the procedure should be? I will be glad to yield shortly.

Mr. DOMENICI. I thank the Senator from Maine.

Mr. MUSKIE. Mr. President, I have followed with respect and interest the forceful presentation Senator HOLLINGS has made against this tax credit bill.

I share his view that we cannot afford this new multibillion dollar program for tuition assistance.

I share his concern that such tuition aid may be abused by those who would establish private schools to perpetuate racial segregation.

I oppose this tax credit bill because it must be deficit financed.

I oppose this bill because it provides the same benefits to the richest family in America as it does to the poorest family in Maine.

And it does so at higher tax cost to all our citizens, whether they ever personally benefit from it at all.

I think we underestimate the citizens we represent here if we think they want this bill when it means more deficit and more inflation.

These are compelling reasons to vote against this poorly designed, budget-busting, deficit-deepening bill.

But I am unable to see how one part of this bill is anymore acceptable than the other.

If the Hollings amendment is adopted, we will save only 40 percent of the $8.5 billion cost of this bill during the next 5 years.

We will save only about 40 percent of the deficit it will cause,

And all the inequities in the bill will continue in the college tuition part of the bill, which accounts for 60 percent of its cost:

The rich will still get exactly the same aid as the poor;

Those millions of taxpayers whose children are beyond college age will pay higher taxes for benefits to other families, including the very well-to-do, whose children do go to college;

The 70 percent of all our young people who will never go to college will pay the bill in higher taxes all their lives for those who do go to college;

And the deficit will be deeper for the indefinite future by the full $1.5 billion cost of the college part of the bill.

I intend to vote against this entire bill because we cannot afford it, because it is a poorly designed response to the problem it seeks to address, and because our fellow citizens want a balanced budget before the Treasury is tapped for new Federal programs which must be bought by higher taxes and deeper deficits.

I am concerned about the potential abuse of Federal tuition aid to start private schools which perpetuate segregation. The basis for my vote against the entire bill includes that concern.

Frankly, if I thought we could afford even half of this bill, I would be hard pressed to decide for which half to vote.

I see no compelling reason to vote against the elementary and secondary part of this very expensive bill which does not apply to the college part as well. We cannot afford either half, but I find no less merit in one half than the other.

In my own view, the preservation of a private elementary and secondary school system is a legitimate and important national objective. Several of my own children have attended parochial grade and high schools, so, perhaps I have a special appreciation of the valuable role such schools play in a wholesomely diverse society like our own.

The argument has been made that tuition aid to private elementary and secondary schools is unconstitutional, because such aid may violate the constitutionally required separation of church and state. Supreme Court decisions have been frequently cited in this debate as if they had settled this difficult question.

Surely the first amendment's guarantee of religious liberty is one of our most treasured freedoms. It derives directly from the religious intolerance and persecution our early settlers experienced in the Europe from which they fled.

At the same time, it is also clear that the application of the first amendment's bar against "the establishment of any religion" is not self-evident. It has required substantial and continuing interpretation by the courts.

I do not believe we are in a position today to determine what the Supreme Court would say about this bill. The Supreme Court has not settled this issue.

As an opinion by the Library of Congress has summed it up: The constitutionality of a bill such as this one "cannot be said to have been definitely determined."

The Supreme Court has found State government tuition aid to be unconstitutional in some cases. But those same cases have refused to formulate any general principle against all such aid, such as the GI bill of rights, which can be used for seminary training, or the Federal deduction for charitable expenses, which may be used to establish sectarian schools. An the court has specifically upheld local property tax exemptions for charitable institutions even though without them, many sectarian schools would find it too expensive to operate.

Also, the tuition cases so far considered have not produced the end of general aid contained in this bill which is directed to both elementary and secondary, and public and private college education.

The Senate has a duty to uphold the Constitution in clear cases. But the Senate is not the Supreme Court. The Founding Fathers could have given the Senate, like the British House of Lords, a duty to interpret the laws. But our Constitution places the burden of interpreting the laws squarely on our Supreme Court.

It is premature to judge the constitutionality of a proposal such as this one. A vote against this is not compelled on constitutional grounds.

The Hollings amendment confronts us with many difficult questions.

It would reduce the cost of the bill, but not sufficiently to make the bill acceptable.

It would eliminate the major constitutional issue the bill presents, but would do so prematurely, since the courts should, and would, eventually decide this open issue.

It would reduce the possibility of segregationist abuse, but it would do so at the expense of every other private elementary and secondary school established for legitimate purposes.

If the Hollings amendment is adopted, it will not reduce the most expensive part of this bill. That is the part which passes out deficit-financed payments for college tuition without regard to need. In fact, success for the Hollings amendment would enhance the chance for passing the more expensive portions of the bill.

We can afford neither this bill nor any of its parts. If our citizens could afford the $8 million in deficit this bill will cost in the next 5 years, the choice might be more difficult. But looking into the jaws of a $40 billion deficit this year—and with more to come—the choice is easy.

The choice is clear: It is to vote no on this amendment, and no on the entire budget-busting bill.

Mr. MOYNIHAN. Mr. President, I should like to say to the Senator from Maine that no one envies his responsibility in this Chamber and that few could equal his performance. I attempted yesterday to make an economist's point about the elementary and secondary school provision of our bill—a point that is not without some relevance to his concerns. A very large proportion of the nongovernment schools in this country comprise a sector which could very easily go out of operation entirely, as the considerable decline in their enrollment over the last decade would indicate. If they do, their students would begin attending public schools, and, as a result the cost per student to the economy would treble or quadruple. I simply make the point that the nonpublic sector is an efficient sector of education, at least to the extent that it spends less. I do not mean by "efficient" anything other than less expensive.

On the second point, I should like to thank the Senator from Maine for acknowledging what we have tried to acknowledge—that it is not at all certain

how the Court would respond if a statute such as ours were presented to it. I see him nodding in agreement. It simply is not certain. And for that reason, we have said repeatedly there is only one way to resolve the matter logically, and that is to enact the statute and find out.

There may be objections for hundreds of reasons on other grounds. The Senator from Maine, it seems to me, has pointed to the most formidable one, which is the cost.

Mr. MUSKIE. I appreciate the Senator's comment. I will not take up his time, or the time of the Senate as a whole, much longer.

But I would like to say this about the problems of the private school sector at the elementary and secondary level, especially that of the problem facing private parochial schools.

I have been a supporter, of course, as a Catholic, of parochial schools. My children have attended them. All except one have attended and benefited from Catholic elementary and secondary education through all of their precollege years. So I appreciate the values that go with it.

As a Catholic and as a parishioner in Maine, two or three parishes at one time or another, and here in Washington, I am concerned about the trends and the difficulties that the schools face, and they are not simple. But there is the problem of cost. There is the problem of recruiting teachers. I suspect that there is also the problem of changing perspectives on Catholic education on the part of Catholic parents in various parts of the country, depending upon how they perceive the quality of the education provided and the values pursued in their schools.

So I suspect that Catholic parochial schools are going through a shaking-down period. I hope it does not mean that they are in danger of fading out. But they are going to a shaking-down period, as are all institutions in our society in the public schools at the present time.

If the problems of these schools as perceived is purely a financial one that can be solved by providing a tuition tax credit of $250 per student per year, no one would be more pleased than I, but I doubt that it is that simple.

I suspect, secondly, that if the problem is principally economic—principally economic—this $250 tax credit is not going to solve that problem. How much it will take to solve it if it does not, we will learn in the years ahead.

I have seen so many entitlement programs grow from so-called modest first year costs. The food stamp program occurs to me. Medicaid occurs to me. Medicare, social security, and all the programs we have tied to it, all have begun with relatively modest costs.

I wrote my senior thesis as a college senior on the Social Security Act, which was enacted the year before I graduated from college.

So I have lived with these so-called solutions to massive social problems that have resulted in massive budgetary impact at the Federal level to which our people are at the present time rebelling in ways we are all seeking to interpret.

My view on this bill is very simple. I am not saying that there is nothing to this proposal that recommends it at the Federal level. But I am saying. No. 1, that at the present time our first priority, in connection with the Federal budget overriding every other priority, should be the Federal budget, the contribution it makes to the state of our economy, and particularly inflation. To me, at the present time, it overrides every other priority.

Second, granted that, then I find myself comfortable with the idea that these proposals, both halves of the bill, if we look at it in halves, as I do, require further maturing and evaluation, and the state of the Federal budget and our national economy impels us to give us the time to do that.

So I find my position serving the national interest from both points of view. I do not say "no" forever to the proposal with respect to elementary and secondary schools. I have been for 20 years, long before the budget process was ever created, opposed to college tuition tax credit for other reasons I have not gone into because I wanted to focus my remarks on the two particular points I have tried.

I know the Senator from New York understands my duty and my responsibility. I appreciate that.

Mr. President, I yield the floor at this time.

Mr. MOYNIHAN. I thank the Senator.

I said that few would envy his responsibilities as chairman of the Budget Committee and fewer still could equal his performance of them.

It was pleasant to hear that this bill is not totally a work of the devil.

I yield for a question to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. It seems to this Senator, may I suggest this, that Senators needlessly confuse themselves when they look upon a tax cut as a Federal expenditure. That, I think, is what has caused people needless cause for concern.

A tax credit is a tax cut. It is a reduction of our taxes. It means the Government takes that much less from our pocket, and it leaves that much more in our pocket.

Now, we can cut taxes two ways. We can do as we do with a gift to education or a gift to charity, where we provide a deduction. We just say that we do not tax the money that is to be used for that purpose. That is an old, long-established part of the law.

Now, one can call that a tax expenditure if he wants to. But we can give a tax cut insofar as income is used for a particular purpose, or we can just cut taxes, period. We have done it both ways. Throughout the code we see it done both ways.

Now, we are going to have tax cuts, just depend on it—not as big as the Senator from Delaware (Mr. ROTH) wants, but we will get some big ones, you can depend on it. We will get a big tax cut this year, and there will be a tax cut in future years for the simple reason that inflation is here to stay for some time and because of the inflationary pressures, the tax laws will be extracting more money from the pockets of taxpayers.

Every Congress will be talking about how we should adjust taxes to take inflation into account and to take various other things into account. The people of this Nation are going to demand tax cuts, if you have not gotten the word. I just read the Economist, a British-published magazine. What happened out in California is sweeping the whole wide world. People are complaining about too much tax and they want their governments to cut back on expenditures.

Mind you, they do not mean the so-called tax expenditures—a tax cut is what they want. That is what they expect. In their mind it does not make too much difference whether we cut taxes by letting them keep some money in their pocket to educate their children or whether we do it by reducing the amount of taxes they pay generally.

So I do not think Senators need to say too much about whether we cut taxes so people can have more money for education or whether we just cut taxes so people can have more money, period.

If we just disabuse ourselves of the theory that a tax cut means Uncle Sam is digging more money out of the people's pockets when it means just the opposite, it seems to me we can face the issue on a more reasonable basis.

We will be bringing a big tax cut bill to the Senate, and we will consider all the needs of the American citizens while we are voting on it. There will be further tax cut bills in the future.

The public would like us to reduce the spending that the Government does. I am not proposing that we have any reduction in spending for education. Some people want to contend that if we let people keep some of their own money to spend to educate their children, we are somehow going to reduce the amount of money available to the public school system. This Senator has no such intention, and I am sure the Senator from New York has no such intention.

Those little children do not get the quality education we would like them to get in the public schools, for the most part, the way it is now, especially in the congested areas. We expect to help with that, but we do not want to neglect any education, whether it is education in the private schools, the public schools, or the parochial schools. You will find a passage in the Bible where the Master said:

> Do ye these things, but leave not the other undone.

By all means, let us provide for public education; but for those who, for whatever reason, want their children to have some education in religion, to go along with their education in other things, so much the better.

Let them pay for it, but let us help them if we can, because they are having a difficult time doing it.

For those who think their children are not getting an adequate education because there is overcrowding in the classrooms and who want to pay their own money to put their children in a private school, why not? It is a matter

of not ignoring anybody. If one wants to put his children in a private school because his conscience as a parent dictates that, why discriminate against him?

We are going to provide for public education and Federal aid to public education, if the money is available, to try to provide the best we can for children in the public schools.

When you try to help everyone look after his children, you have discriminated against none.

I salute the Senator for the fine fight he has made.

Mr. MOYNIHAN. I think that is fine.

Mr. President, I take this occasion to emphasize what the Senator from Louisiana, the chairman of the Finance Committee, has said. This is a tax cut bill—a tax bill that reduces taxes.

There is something about the concept of tax expenditure that bothers me. There is something about it that makes me think of it as a totalitarian idea. There is a notion implicit in it that your income somehow belongs to the Government and the Government has given you the share which you are allowed to keep. It is not so.

I do not want to suggest any disapproval of Prof. Stanley Surrey, who is a good friend and a fine man, but one's income does not belong to the Government. Taxes are a form of forced labor exacted by Government. It is labor that is, in a sense, taken from you.

I refer those who think otherwise to the recent works of Professor Mosteller. Income belongs to the individual who garners it. We give taxes to the Government. The Government does not give income to us.

Mr. LONG. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I yield.

Mr. LONG. Implicit in all this is the theory on behalf of some of us—I know the Senator from New York feels this way—that the Government works for us, rather than the other way around. At least, that is the way it is supposed to be.

Mr. MOYNIHAN. That is the theory. That is why the Constitution is filled with limitations on what government may do.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. MOYNIHAN. The Senator from Idaho was on his feet first.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. HOLLINGS. I would like to be heard on the amendment.

Mr. McCLURE. Mr. President, I commend the Senator from New York on the statement he just made about so-called tax expenditures, because it troubles me in the same way it troubles the Senator from New York: That it is implicit that somehow the Government owns the income and what is left in our hands is a grant from Government.

I believe, in spite of that feeling on my part, that the concept of tax expenditure does allow us at least to take a look at what we have done in terms of priority setting with respect to the use of the economic muscle of this country, but only in that limited concept. I share the instinctive reaction against the idea.

Mr. MOYNIHAN. I appreciate what the Senator has said. No one has suggested that this is not a useful subject to keep an eye on, to index, perhaps, but it should not be subtly transformed into an argument on behalf of Government ownership of income.

Mr. McCLURE. I agree totally.

Mr. MOYNIHAN. The presumption is that Government owns none of your income; a law must be adopted solemnly, in a bicameral legislature, and must then be approved by the executive, before the Government can take a penny of your income.

Does the Senator from Maine have a question?

Mr. MUSKIE. Mr. President, I have the faintest of suspicions that the distinguished chairman of the Finance Committee rose to put his question to the floor manager of the bill because his question followed a speech by the Senator from Maine and perhaps the speech the Senator from Maine delivered yesterday.

I did not use the words "tax expenditure" yesterday or today, at any time. I talked about the cost of these programs.

I could conclude, if I were simplistic in my thinking, and I am not, that these bills can be passed without cost to anybody because they are simply a cut in taxes, so they do not cost anybody anything. Those who are tempted to believe that to be the case are referred to my speech of yesterday, on page 25853 of the RECORD.

I talked about what this bill will cost to those who think they would benefit from it; to children who think they would benefit from it; to those whose children never will go to private elementary or secondary schools; to those whose children will never go to college. Anybody who tries to argue with me that this bill will cost them nothing is going to have a steep argument.

But if those who support the bill choose to believe that the issue really is somebody's definition of "tax expenditure," they are fooling the public.

What we are concerned about is the cost. The cost of this bill—both halves of it, in my judgment—would be unacceptable to the majority of the American people today if they understood what was in it. I think it is intolerable from the point of view of the Federal budget and its potential impact on inflation in the months or year or two immediately ahead. That was my thesis.

We can argue about what "tax expenditure" means or "tax loophole" or "tax-privilege" or "tax avoidance" or whatever bland phrase those who dislike the words "tax expenditure" would like to use. These bills have costs associated with them, and that is the only point I tried to make yesterday and today.

I say this to the Senator from South Carolina, because I understand that he is disturbed that I will not support his amendment. I tried to make that clear in the speech he did not hear because he was understandably engaged in a conference with the leadership and the other side, in an attempt to reach a time agreement.

I have struggled long with this question. I applaud his effort to reduce the cost of the bill. But I find difficulty in confronting this question: Is this half of the bill less palatable, from a budget point of view, than the college part of the bill? To me, it is not. They are equally unpalatable.

Second, just from a tactical point of view, I believe there is a better chance of defeating this bill if we vote on it in its entirety than if we vote on it with a successful Hollings amendment having divided it in half.

Those are the two reasons I voted as I did. But I wanted the Senator from South Carolina to know that to the extent that his opposition to this bill stems from his concern about the budget—which, for my part, is legendary, and I greatly value his contribution to the budget process—I applaud that part of it; and I wanted to explain to him, while he is in the Chamber, the two reasons why I find it difficult to go along.

Mr. MOYNIHAN. The Senator from South Carolina wishes the floor, and I will yield in a moment.

I assure the Senator from Maine that I understand his position precisely. This is a tax cut proposed, and it will reduce Federal revenue; it was the extent of the reduction and its desirability—or lack thereof—to which he addressed himself.

I took the opportunity during a moment when we are trying to get a time agreement and most of the advocates of this measure are not on the floor, to discourse freely—and I hope not too irrelevantly—on this matter. I had been seeking some pause in the Senate's proceedings to touch briefly upon it.

Mr. MUSKIE. I suggest to the Senator that it is well if, from time to time, we discuss things that are of less than global interest.

Mr. MOYNIHAN. I thank the Senator, and I yield the floor.

Mr. HOLLINGS. Mr. President, let me just make one comment or two to bring this into perspective because the Senator from Maine did shock the Senator from South Carolina with his comment, and I say this respectfully. The Senator knows I know how to solicit and try with charm and courage to persuade, and what I am about to say of course will not help persuade him, or to get his vote back, because this is just the most illogic reason I ever heard.

There are certain difficulties that we had in this measure. One of the big difficulties started with the President of the United States when he let it out that he was going to veto the measure. That put everyone in a position of a freebee. So they can tell the bishop, "Surely I will vote for your parochial aid to education, I am with you." And the Senator from Louisiana calls it minority politics. Those are the people who will remember you. The majority that you stand for never remember you on election day, but you take a single concerted organized group, such as the church, and say, "Surely, I will be for you," and then you know the

President is going to veto it. If it is vetoed, it is not going to hurt public education, so you go to the polls having helped someone. That is one of the big difficulties we have, because when the President intimated this, then, of course, the Senator from New York picked up some 51 cosponsors.

So we started with a majority already against us, and not frankly having even considered elementary and secondary education. The history will also show that the Senate has passed tuition credits for higher education six times in the last 10 years. So we did not have to worry whether we got enough help to defeat higher education. On the contrary, what we are trying to do is to take this elementary, secondary, parochial, private school crowd and take an already proved six times successful higher education measure and piggyback the private school system without due consideration for the substance of the measure.

I am confident they did not have a real debate on the House side because I have looked at the RECORD, talked to Members of the House of Representatives, and witnesses, all of these in the coalition who were interested, and they said they were all looking at that higher education part. They had been in the campaigns. They talked about tuition tax credits. It has been in campaigns for over 10 years. Wilbur Mills had it. We had it. I voted for it at least four times myself.

But they say we never could single out elementary and secondary education and get the attention of the Senate, anyone in Congress, on the radical departure with respect to Federal financing of education in this country that the Moynihan-Packwood elementary and secondary part started.

Let us look at the costs. Let us look at the problem. Certainly it is that, and I am using the CBO figures, that we use in the Budget Committee. On higher education in 1978 it is $21 million; in 1979 it is $491 million; in 1980 it is $704 million; in 1981 it is $1.41 billion; in 1982 it is $1.409 billion; and in 1983 it is $1.523 billion.

So the higher education cost part is $5,289,000,000.

And we look at the elementary and secondary. That was drawn so that you could not see it, and it was only the members of the Budget Committee who finally caught it. I am persuaded if they can reduce the limits, if they can reduce the income levels, if they can reduce the amount, if they can get the principal fixed for $1 for a parent, they would be tickled and call it a victory. They arranged it so this year there is no impact, and next year no impact. They tried to get by the budget process, but the budget process caught it. In 1980 then it starts with $100 million; in 1981 it is $754 million; in 1982 it is $1.237 billion; and in 1983 it is $1.238 billion; for a total of $3.329 billion.

The task of the Senator from South Carolina, was to try to bring the attention of this Senate to what we were really doing with respect to a matter of budget-busting proportions, not to mention the constitutional and educational policy ramifications. Here is an opportunity at least budgetwise to save $3.329 billion rather than for the total of almost $10 billion because when you add the three and the five it is $8.5 billion—$8.5 billion rather than $10 billion, and you had a chance to save $3.3 billion.

And the Senator from Maine now comes and says, "No, let us not save that at all. I really think I can kill off the $8.8 billion if I have yours."

Mr. MUSKIE. Mr. President, will the Senator yield.

Mr. HOLLINGS. I yield.

Mr. MUSKIE. I am not saying that at all, may I say to my good friend. There were three votes on college tuition tax credits in the last 2 years, two of them stimulated by motions made by the Senator from Maine. If I remember correctly, the Senator from South Carolina voted for those tuition tax credits.

Mr. HOLLINGS. I just stated that.

Mr. MUSKIE. All right. So the Senator voted for them.

Mr. HOLLINGS. That is right.

Mr. MUSKIE. Now, my objection is to the total cost. I know that I do not have the Senator's support, if the Hollings amendment is defeated. If the Hollings amendment is——

Mr. HOLLINGS. Enacted.

Mr. MUSKIE (continuing). Is enacted. So that is one vote less that I know I do not have against the total bill.

The Senator says, "You are going to lose it anyway, so why fight it."

If I had taken that position, may I say to my good friend, a lot of the memorable fights on this floor that have helped establish the budget process would never have been waged.

I know the tendency of this body. It is to spend unless someone tries to block it. I am not going to avoid a fight simply because I thank the odds are against me.

I fought college tuition tax credits three times in the last 2 years. I know what the odds are. I can remember the votes. But now there are other factors that I hope will cause a majority of the Senate to take another look at it.

No. 1, inflation is a much more serious problem than it was any of the last 3 years.

No. 2, there is an alternative in the President's program to the college tuition part of the bill which may take some votes away from the college part of the bill.

No. 3, the total cost of the two packages, college tuition and elementary and secondary tuition, is so staggering potentially that in combination that should turn some votes around.

So I think what may appear to be a hopeless fight will not be a hopeless fight. At least I see my duty as making the fight, and I think I am going to get more votes if this whole bill stands together on final passage than I got in either of the last 2 years.

No, my argument is not as simple as the Senator from South Carolina puts it, and I think he understands that. If there were a way after final passage on the total package to consider part of it, I would be with the Senator.

Mr. HOLLINGS. Mr. President, I stated just as simply as the Senator from Maine stated it. I heard him and I listened clearly. He said that with the Hollings amendment defeated they would have a better chance to defeat the entire bill. That is exactly what he said. I am saying that is not the problem because we know he is trying to get in other things about the President's program, but I am saying we come to this particular problem with a different history and a different record, and I know it and I know what the odds are when you start up with a bill having passed the House overwhelmingly, then coming over to the Senate. No one on the Human Resources Education Committee was particularly interested. You cannot get them to speak. In fact, they go back and they propose another half billion dollars.

The precedent set here of general financial aid for parochial and private schools for the first time in history does not disturb them. I am not on that committee, and so you have graduation speeches and Harper's articles and Outlook articles and appearances on national TV and all the rest—and 51 votes.

Do not tell me about odds. I am fighting uphill now, and I know it, and I know there is a better way to fight to get your vote, but I told you in the beginning that I heard you clearly. I know I will not, but I can tell you now——

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HOLLINGS. No.

I am talking about the art of the possible. We are talking about how we measure things in that Budget Committee, Senator from New Mexico. We know how we measure it. It is a frustration for all of us sitting there. If we could have it our way we would cut it all down. Many times we actually put in things to head off budget cuts.

One of the best examples I know of is solar energy. Heavens above. No one around here much knows anything about the energy crisis, but there is one way to demonstrate our commitment. This is a political body, so you demonstrate knowledge that there is a crisis. Whenever you hear the word "solar" you raise your hand and say "aye." We go in there and we mark up a budget, the President recommends $60 million, and we say we will give him $80 million. We come out and they put in $50 million more.

We go in with $110 million the next time and we add another $50 million to $60 million and say that will forestall cutting it, and they put in $50 milion more. We are up to more than $404 milion, and the scientists and all say, "We don't know where to spend it."

I think in every budget that comes through the State Department they say they want a solar demonstration project on every embassy in the world to show our concern about the energy crisis. Absolute nonsense and waste.

So I have finally determined, Senator, where you want whole hog, and we have heard about whole hog earlier from the Senator from Oregon, I want what we can get budgetarily, what we can save. I would solicit your assistance to help us knock out at least $3.3 billion. If we cannot get up to $8.5 billion, at least knock out $3.3 billion that is dangerous.

This is not a minor one. This is the dangerous one.

The Senator from Maine also said when I came back into the room, I could hear just part of it, that the real major one was the tuition tax credit for higher education, that that was the big one. If he could head it off with the little one by voting against the little one then maybe he could make them both sink, that is his logic.

On the contrary, the big one is aid for elementary and secondary private schools, because if this carries and we go back home we are going to hear from the constituents saying, "What in heaven's name happened to you? We sent you to Washington charged with looking out, among other things, for the public's interest and the public's concern. We sure did not tell you to take over the church schools down the street. The priests and the bishop of the parish have control of them. We did not send you down there to take care of private schools. You have gone and doubled the amount of aid—general assistance for the first time and for private schools only—to the private and the parochial schools as compared to what you have given to the poor public schools students."

We would do this for 4.5 million youngsters at the expense of the other 44.5 million. Down the road, Congress might decide to include them, too. Take that $250, multiply it out, and see if we would not end up with at least $10 billion more.

The biggie in this one is the foot in the door. The Senator from New York said, in talking of pluralism and diversity, he hoped they did not avoid Greek. The only thing Greek I understood was when the Senator from Maine was talking yesterday about that Trojan horse. I could hear him clearly. How pretty and bright and gentle and sweet and innocent-looking was the Trojan Horse in the daylight. But when the fiscal darkness of night fell, the animal opened up and there came the conquering enemy. I wish you could go back to that staff and yesterday's talk and make it over again. I could hear you clearly then. I cannot hear you now.

Mr. MUSKIE. You cannot hear it now either.

The PRESIDING OFFICER (Mr. DURKIN.) The Senator from New York.

Mr. MOYNIHAN. Mr. President, we have been debating this matter for a full 3 days now, and we have now reached a point where our national motto "E Pluribus Unum," a brief but emphatic hymn to pluralism, has been described as Greek. I think it is time we voted.

But I would be happy to yield to the Senator from Maine for a question.

Mr. MUSKIE. I really would have preferred it if my good friend from South Carolina had yielded.

I really do not have any trouble knowing that you hear what I say, Senator, but you do not alway repeat it in a way that makes it come out the way that my position is.

Just a few moments ago you praised me for yesterday's speech privately. Now you are frustrated that I do not apply the budget-restraining values that prompted that speech in a way that pleases you. Well, it did not please me when you voted for college tax credits against my motions in the past, and I know you are going to vote for it again. If your amendment succeeds and only the higher education tuition tax credit provision remains, you are going to vote for it again.

Just how you presume to judge me because I am against the total bill and you are for half of it I do not understand. You want me to be against the part that you oppose most vigorously but not against the part that you support most vigorously. That, unfortunately, is the kind of standard that motivates us too often on the floor of the Senate.

But I am against the whole bill, and I said it yesterday, and before this debate is finished, before a vote on passage of the bill, I will fully vote to implement yesterday's speech, but you will not.

Mr. METZENBAUM. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. MOYNIHAN. I yield.

Mr. METZENBAUM. I ask unanimous consent that David Lippy and Barry Direnfeld have the privileges of the floor during the pendency of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, does the Senator from California (Mr. HAYAKAWA) desire to ask a question? I will yield to the Senator for a question.

Mr. HAYAKAWA. I have a short statement to make, about 4 or 5 minutes.

Mr. MOYNIHAN. We are about to commence voting. I wonder if the Senator could put his statement in the form of a question to me?

Mr. HAYAKAWA. Let me look at it, let me see. [Laughter.]

It is only a two-page statement.

Mr. MOYNIHAN. If the Senator will put it in the form of an interrogatory I will yield to him.

Mr. HAYAKAWA. I will try to put it in the form of an interrogatory tone.

Mr. President, the last time I spoke on the floor about tuition tax credits, my remarks concerned the rights of minority students and their parents to utilize education as a means of personal liberation from poverty and racism. I want to express my appreciation to our colleagues, Senator PACKWOOD and Senator MOYNIHAN, for their kind appraisal of my speech that day and for their distribution of it to other congressional offices. It is a pleasant surprise to find one's intellectual currency so much in circulation.

As an advocate of tuition tax credits, especially at the elementary and secondary level, I realize that my remarks will draw criticism as well as approval. We have heard dire warnings that, if we give parents control of their children's education, the public schools of America will close their doors and, one presumes, be turned into warehouses. This is nonsense! I, for one, have more faith in public education than to presume that a little bit of competition would finish it off.

This has been a rough issue. The lobbyists have come out of the woodwork. The heavy hand of the National Education Association—what a name; you would think it were something more than a self-interested union—has attempted to stifle the facts with smokescreens about the Constitution, about segregation, and about costs. And one by one, the winds of change have blown away their obfuscations.

But that does not make it easier to take a stand on principle and support tuition tax credits in the face of rigorous political opposition.

Let us make no mistake about it: There will be a price to pay if we stand up for the parents and children of America. Some interest groups will never forgive us for doing that. Their political action committees will target us, and their membership will be instructed to knock us off at the polls. But so what? What, after all, are we here for?

I will not rehearse again today all the arguments in favor of tuition tax credits. We all know them by heart. Are they constitutional? Ask Billy Graham or Antonin Scalia, our former Assistant Attorney General. Would they help minorities and the poor? Ask Prof. James Coleman and the Harlem Parents Union.

Let us look beyond the pressure groups. Let us look toward an America which trusts its citizens enough to permit them their own choices. Let us look toward the day when poor kids have the same latitude in education as the children of Members of Congress. Let us take our stand in defense of parental rights and educational freedom.

The question I would like to ask, Mr. President, is, Has any serious estimate been made of the degree to which public education would suffer from tuition tax credits, or has any clear-cut explanation been made of the degree to which public education will benefit from the inducements offered? Have there been specific instances of cities or communities where that kind of assistance has improved the quality of public education, or have there been specific instances of communities in which there has been a significant loss to public education as a result?

Mr. MOYNIHAN. Mr. President, I would like to say that in the State of Minnesota a tuition tax credit was not accompanied by any decline in public school enrollment; we have been able to establish that there is a fairly clear correlation between the number of students in nonpublic schools and the level of support for public schools. Where there is a fairly large enrollment in nonpublic schools—and the enrollment in nonpublic schools is, of course, never more than 15 percent of the total—the public schools are generally well supported. Where there is a relatively low enrollment, the public schools are comparatively not as well supported. I say to my distinguished friend from California that the validity of the correlation may not yet have been established to his satisfaction.

Mr. HAYAKAWA. I thank the distinguished Senator and my friend from New York.

Mr. President, I ask unanimous con-

sent that an editorial entitled, "The Tax Credit Fight," published in the Washington Star of August 10 be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE TAX CREDIT FIGHT

As the Packwood-Moynihan tuition tax credit bill works its way toward crucial Senate floor action, the quality of the debate steadily deteriorates. What its sponsors view as a measure to promote diversity, choice and fiscal equity in education is denounced as a budget-busting money grab by the rich, or—as *The Washington Post* pronounced the other day—a "radical and ill-considered reversal of longstanding American values . . . a fundamental assault on the public schools," and even a boon for racial segregation.

These conflicting perceptions of the bill cannot be bridged, even allowing for the usual excesses of editorial rhetoric. And indeed the bill clearly raises issues—constitutional, fiscal and educational—of a fundamental sort.

If you think that American education, especially in the lower grades, is always to be a public monopoly; or that "root, hog, or die" must be the iron rule for private religious education; or that the First Congress erected "an eternal wall of separation between church and state," the case for the tax credits is weak indeed.

Happily, those principles, however fervently urged by secular educational lobbies or editorial writers, are largely subjective. They are nowhere chiseled in stone. Still less are they to be found in the Constitution. The Constitution is silent as to how Americans shall elect to educate their children. All it says about religion, apart from banning religious tests for office, is that Congress (and now, by judicial interpretation, the states) may not promote "an establishment" nor interfere with its free exercise.

Set aside the dubious—at times even hysterical—claim that tuition tax credits constitute some sort of foul play against American principles, and what is left? A few practical questions of policy, it seems to us. Would the program injure or strengthen public education? Would it encourage or discourage the proliferation of so-called "segregation academies"? Would it accentuate or arrest racial disparity in education?

It is unthinkable, to us at least, that Congress would seriously contemplate a measure that threatened the basic place of public schools in U.S. education. That primacy is all but universally conceded, and the reasons for it well understood. Rather, the anxieties about the future of public schools, given tuition tax credits, seem to stem from a vast insecurity. The notion, we gather, is that clients of public education are a captive audience, awaiting an incentive to bolt.

Such fears, we faithfully believe, are overwrought. But even if some parents do feel "trapped" in deteriorating and undisciplined public schools (especially in the inner cities), and would welcome an escape hatch, we can attach no other meaning to the ideal of American cultural diversity than that they should have that option. That option is always open to the well-to-do, who usually have mobility to move to the suburbs or the money to pay the steep price of private education, whether or not a fraction of that price may be subtracted from income tax bills—or both.

Prof. James S. Coleman touched on this point in a recent supportive letter to Senator Moynihan. Tax credits, he suggested, "will help give low income people some of the educational opportunity for their children that high income people already have. In a sense," he continued, "it provides an aid to parents to rescue their children from school situations that they find bad; and . . . this is especially the case for black parents who are locked into a given residential situation." Professor Coleman's view has been echoed and endorsed by a number of black scholars, including Thomas Sowell and Walter Williams.

But suppose that a substantial number of public school clients did seize tax credits as an avenue of "escape." Are the public schools so fragile, so far gone in demoralization and indiscipline, as to be incapable of responding? Or would keen competition spur them to reform and to compete? The latter, we firmly believe.

Of course, the nitty-gritty of the matter, politically speaking, is the ageless quarrel over public help for schools of religious affiliation, mainly Roman Catholic. It is notable that every recent Democratic presidential candidate, including Mr. Carter, has given handsome pledges to the Catholic educational community. In an October 1976 letter to the Association of Chief Administrators of Catholic Education, Mr. Carter wrote that he was "firmly committed to finding constitutionally acceptable methods of providing aid to parents whose children attend parochial schools." As governor of Georgia, he said, he had supported "annual grants for students attending non-public colleges" and he was of the view that "we must develop similar supportive programs at the national level for nonpublic elementary and secondary schools if we are to maintain a healthy diversity of educational opportunity." Senator Moynihan himself could hardly have stated the promise more clearly. But as everyone has noticed, Mr. Carter's explicit pledge has gone a-glimmering now that he is faced with an opportunity to make good on it. Why that is so, we can't imagine. But if the president finds it expedient to renege he owes the Catholic educators at least an equivalent legislative alternative.

Of all the attacks on the tuition tax credit proposal, the shabbiest is the insinuation that they are a sugar-coated scheme for promoting racial segregation in the schools. In fact, the main—and the neediest—beneficiaries would be Catholic parochial schools with an old and honorable record of racial equity. And as for the so-called "segregation academies" mushrooming up across the South at the heels of school integration, their students, insofar as racial exclusiveness is their aim, would be ineligible under the tax laws. So much is clearly provided in the latest draft of the bill.

We recognize, again, that there are those who fervently believe that the bill is not in the national interest; that this country is better off with a public monopoly of educational funds. Obviously, keen opposition to the Packwood-Moynihan bill can be squared with that outlook. It cannot, however, be squared with the profession of faith that educational and cultural diversity are what this nation is all about—or should be.

Mr. HAYAKAWA. I thank the Senator from New York.

Mr. MOYNIHAN. I thank the distinguished Senator from California, who has vast experience as an educator in both public and private institutions. He has served a great private university, the University of Chicago, and has also attained renown as an administrator at State universities and colleges, in particular the San Francisco State University. Thus, he is eminently qualified to speak on this subject, and his support has been a matter of great importance to us.

Mr. ANDERSON. Mr. President, will the Senator from New York yield?

Mr. MOYNIHAN. I am happy to yield to the distinguished Senator from Minnesota, about whose State I commented earlier.

Mr. ANDERSON. Mr. President, a number of Members of this body have expressed apprehension that if we have tax credits applying strictly to elementary and secondary levels, there would be a massive desertion from public schools to private schools. I would like to apprise the Members of the body that in Minnesota we have had some experience to go on, because we have had a tax credit in Minnesota that would apply to the elementary and secondary schools. In 1971, we passed a tuition tax credit bill which provided, really, more relief than is being offered in the Senator's bill.

Senators might be interested to know that despite the fact that our tuition credit in Minnesota was in percentage terms more generous, the first year the law was in effect, the enrollment in parochial and private schools dropped over 11 percent. The second year the drop-off was over 8 percent. Perhaps the drop would have been even larger without the tax credit, but the fact is that during the period of time we had the tuition tax credit in effect, there was no dramatic shift out of public education into private education, and in the light of our experience, it appears unlikely that the tuition tax credit would do any damage to public education.

I am also reminded that in Minnesota, despite the fact that the per capita income is normally below the national average, our per capita spending for public education and all forms of education is sixth from the top. We have made a dramatic commitment to public education that has been of great benefit, but we have also found the resources to put into the private sector, and we think it has tremendously benefited our young people, regardless of where they go to school.

Mr. President, in the past decade the cost of a college education has skyrocketed. The overall cost of a private college education rose 119 percent between 1964 and 1976. The cost of attending a public university increased by 99 percent during the same period. The average annual total cost of a private university is now $4,811, with the cost of a public university now averaging $2,906.

These increasing costs are reasons why college attendance has declined in the past few years, with the sharpest declines coming from middle-income students.

All of American society benefits from young people receiving all the education that they desire. One of the most vital tasks of Government is to make education easily available to all who could benefit from it. For that reason, as Governor of Minnesota, I proposed major increases in the funding of public higher education, sought to restrain tuition increases, and, in one budget, proposed a freeze on tuition increases at public colleges and universities and opposed plans to impose tuition at Minnesota vocational-technical institutes.

Private higher education also has a real contribution to make to society and is deserving of public assistance. While the initiatives taken to aid private higher education were modest compared to the increases given to public colleges, they were justified and effective. We enacted

per capita aids to directly subsidize private colleges, provided State guarantees for private college construction programs, and greatly increased State scholarship and loan programs which were available to students going to either public or private institutions. These programs were successful in restoring the financial health of a number of Minnesota colleges which faced deficit budgets.

There is no justification for the allegations that tuition tax credits for higher education represent an attack on public education by private colleges. The trend over the past decades has been clearly in the direction of public institutions, as private colleges have passed on increased costs in tuition while taxes have cushioned the impact of inflation on public colleges. In the early 1950's about 50 percent of all college students were in private institutions. Today less than 25 percent of higher education students attend private colleges and the proportion continues to decline.

The pending Federal tuition tax credit will provide much needed assistance to the 11.3 million U.S. students in public and private postsecondary institutions. It will relieve some of the burden of inflating tuition costs and reverse the trend of decreasing college attendance by middle-class students.

Those who support education must stop thinking in cliches and realize changing American educational needs and traditions. The fluid labor market, different lifestyles, economic pressures, and new types of jobs all influence the educational needs of Americans. Retraining and continuing education have become an economic necessity for many. Other Americans begin or return to college in midlife to refocus their lives or to prepare for a career.

Many of these returning students are women looking to reenter the job market, and many of these women are single heads of households supporting children. College attendance among people 35 and older increased 50 percent between 1973 and 1975. These career adjustments or reentry efforts directly affect our national employment picture; yet these Americans who are trying to help themselves through education receive limited public assistance. Traditional scholarship and grant programs are not designed to assist these types of students. But a tuition tax credit will be of major assistance to these nontraditional students.

In 1980, the Senate version of the tuition tax credit bill would be extended to elementary and secondary schools. While 62 percent of the benefits for the postsecondary tuition tax credits will go to students at public institutions, all of the elementary-secondary benefits will go to students at private schools as no public elementary or secondary schools charge tuition. Approximately 5 million nonpublic school students would become eligible compared to the 11.3 million public and private postsecondary students covered.

During my tenure as Governor, State appropriations for aid to elementary and secondary education rose from $660 million to over $1.7 billion or a $1 billion increase in just 6 years. The system of State aids was reformed to compensate school districts with inadequate access to property tax funds with additional State funds; funding for education for mentally and physically handicapped children nearly tripled; additional aid was given to districts experiencing falling enrollment; and supplemental aid was provided districts with concentrations of children from socially deprived backgrounds.

Public education in Minnesota still faces problems but Minnesota's system of financing is more equitable than most States, our system is more stable than most States, and we remain one of the most generous States in the Nation toward public education as shown by Minnesota's per capita public spending on public education which is sixth highest in the Nation. Minnesota's public education problems, while serious, pale into insignificance when compared to the shortened school years, prolonged Christmas vacations, inability to meet payrolls, and chronic financial crisis which afflict many major school systems around the Nation.

The way in which Minnesota reformed our school finance system, along with significant changes in aids to municipal and county governments and direct property tax relief programs also allowed us to bring property taxes under control. In 1971, when I came into office as Governor, Minnesota property taxes were 13th highest in the Nation and well above the average. Yet Minnesota did this while maintaining the high investment in education, sixth highest in the Nation, and without sacrificing needed public services. Because Minnesota acted wisely and rationally about bringing its property taxes under control, Minnesota does not face the kind of drastic action that is now taking place in California.

Private education has a role in elementary-secondary education that is valuable. Nonpublic education provides diversity and variety in education that is highly desirable as a matter of social policy. This variety has been steadily declining over the past decades as inflation and changes in the programs that schools offer has greatly increased costs. The result has been that nonpublic education has played a steadily smaller and smaller role in American schools.

In the period from 1965 to 1975, the national enrollment in public schools kindergarten through grade 8, declined slightly, from 30,563,000 to 30,545,000. In the nonpublic schools, enrollment in grades kindergarten through grade 8 declined from 4,900,000 to 3,900,000, a decline of 20 percent.

In the last 10 years the decline in enrollment in private secondary schools was 13 percent compared to a net national increase in public school secondary enrollment. In 1965 86 percent of all students were in public schools and 14 percent in private education. By the latest figures that ratio has changed to 91 percent in public education and 9 percent in nonpublic schools. Minnesota figures show a similar trend. In 1967, 14.5 percent of students in Minnesota were enrolled in nonpublic schools. In 1975, the figure was 9.5 percent.

Again, the figures show that the proportion of students in nonpublic education is declining, and, charges that tuition tax credits represent an offensive against public education are not based upon the evidence.

There are several other points about the Senate tuition tax credit bill which should be kept in mind. First, 75 percent of the benefits of the bill would accrue to college and postsecondary students. Of this, 62 percent of the benefits for postsecondary students will be for students enrolled in public institutions. Only 25 percent of the total benefits are for students in elementary-secondary nonpublic schools.

Approximately 57 percent of the benefits will go to families with incomes of $20,000 or less; 85 percent of the benefits are for families with incomes of $30,000 or less. In order to provide greater relief to low-income families the tax credit is made refundable. This will provide relief to low-income families who have no tax liability or whose tax liability is too small to benefit fully from a nonrefundable tax credit.

The strong feeling many people have against tuition tax credits is understandable. Much of the strong objection is based on a commitment to public education, a commitment which I share. But I do not believe that tuition tax credits will damage public education at the college level or the elementary-secondary level.

I do not believe the predictions that if a tuition tax credit is provided that there will be a massive desertion of public education for private schools. In 1971 the Minnesota Legislature passed a tuition tax credit bill which provided a credit of up to $100 for elementary students and $140 for secondary students. While these maximums are lower than those provided in the pending Senate bill, considering the inflation costs and the 50-percent limit of the pending Senate bill, the 1971 Minnesota law was comparable to the pending bill. The 1971 Minnesota law provided a credit which was usually 100 percent of the tuition of Minnesota parochial elementary schools and just under 50 percent of the tuition of parochial secondary schools.

In spite of the fact that the tuition credit in Minnesota was, in percentage terms, more generous than the pending Senate bill, in the first year the law was in effect, enrollment in parochial schools dropped 11.4 percent, nearly double the drop of the prior year. In the second year the drop was 8 percent, still larger than the 6-percent drop prior to the law. Perhaps the drops would have been larger without the credit. But the facts are that in the years the tuition tax credit was in effect in Minnesota, there was no shift out of public education into private education.

In light of the Minnesota experience, it appears unlikely that tuition tax credits will damage public education. If, after enactment, tuition tax credits do harm public education, I will work to repeal the credits. But, I do not believe that any harm will occur. Tuition tax credits will help both public and private postsecondary education and may stop

the decline of nonpublic elementary-secondary education.

Mr. MOYNIHAN. Mr. President, this is remarkably helpful information from a Senator who has been a remarkably successful Governor of a great State which has tried out this system and found that it works. His statement lends remarkable credence to our position, and I thank the Senator very much for his comments.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I am happy to yield to the distinguished Senator from Michigan.

Mr. GRIFFIN. Mr. President, having sponsored and strongly supported tuition tax credit legislation for many years, I am very pleased that the Senate now is considering H.R. 12050.

In past years, legislation to provide tuition tax credits has passed the Senate on six different occasions—but each time it failed of enactment for one reason or another.

I feel confident that it will be different this year; a number of factors lead me to such a conclusion. First, the House of Representatives already has passed its version of the same legislation. The House bill is a bit more modest, but nevertheless the mandate was convincing.

Second, this year tuition tax credit legislation must be viewed in the context of a citizen tax revolt that exploded in California and is now sweeping the country. It is clear that middle-income taxpayers in this country are fed up with excessive Government spending and with tax burdens that have grown too heavy Nowhere is the burden heavier than in the area of education.

When it comes to providing education for their youngsters, middle-income wage earners are caught between a rock and a hard place. If they were poor, they could look to the Government for help. If they were wealthy, of course, they would have no problem. But, being "in the middle" they just pay and pay.

No wonder so many feel so strongly that it is high time for tax relief that helps the middle-income wage earner. This tuition tax credit bill is a good beginning.

I also think prospects for enacting this legislation were improved by modifications made within the Senate Finance Committee—modifications that respond responsibly to many of the concerns expressed about the earlier bill. As revised by the committee, the tuition tax credit program would be implemented in two stages:

First. Effective August 1, 1978, a tax credit of 50 percent of tuition and fees—up to $250 per student—would be available for full-time students in universities, colleges, junior and community colleges, and postsecondary vocational schools.

Second. Effective October 1, 1980, tuition paid for nonpublic elementary and secondary education would be eligible for 50-percent credit—up to $250 per student. In addition, the maximum credit for college and vocational schools would be increased to $500, and tuition paid for students attending less than full time—but at least half time—would become eligible.

The revised version of the bill would reduce the estimated revenue loss associated with the bill from $5.2 billion to $2.88 billion (when fully implemented in 1982)—a cut of 45 percent.

In addition, the Senate committee has included a requirement that the amount of tax credit available in the case of any student be reduced by the amount of any need-based Federal grant which the student might receive; this would prevent a form of "double dipping," and would, in effect, provide a choice.

Finally, the Senate committee added a provision to assure that tuition tax credits would not be used to foster or encourage racial discrimination.

Mr. President, as one of the original architects of a major student assistance program—the National Direct Student Loan (NDSL) program—I have long been concerned about the need and importance of making educational opportunities available on a broad basis.

This year, I am cosponsoring a bill to create an educational savings bond program to provide strong incentives for parents and youngsters to save for a future in college. The interest on such bonds would be tax free if the savings are later used for college tuition, room, and board.

Unfortunately, despite help that is available from a variety of sources, the dream of a college education has been fading for youngsters of many middle-income families who are squeezed severely by inflation, higher taxes, and soaring tuition costs. Consider these disturbing facts:

Between 1967 and 1976, the average tuition costs at public colleges and universities increased 93 percent; the figure is the same for private colleges and universities.

During the same period, the after-tax—or disposable—income of median income families increased only 66.8 percent.

During the same period, the percentage of disposable income required for tuition costs at a public university rose 16.3 percent; for private schools the figure is 15.7 percent.

It is estimated that in 1990 it will cost $47,000 to send a youngster to a public university or college; if he or she goes to a private college, the cost will be closer to $82,000.

In light of such statistics, it is no wonder that the enrollment rate of middle-income students at colleges and universities has been declining over the past 10 years. Unless action is taken soon to help, we may soon reach a situation in which only the very wealthy and the poor will be able to send their children to college. The group in the middle—those who bear the heaviest tax burdens—will be unable to afford it.

This tax credit program is a simple, efficient and equitable means of providing some needed relief. It would allow families to keep a little more of their hard-earned income and would allow them to determine their own spending priorities.

I favor this tax credit approach because it can be easily administered without expanding an already swollen bureaucracy. Eligibility could be declared on one or two lines of an income tax form; students and parents would not be required to fill out reams of HEW forms.

Mr. President, this tax credit program is an investment in our Nation's future. Because it will increase educational opportunities for our children, it will increase their earning potential—and society will eventually reap dividends many times greater than the original cost.

Mr. President, of course I recognize that there is wide disagreement over one aspect of this bill—that portion which provides tax credits for nonpublic elementary and secondary tuition costs.

As nearly as I can boil it down, opposition to this part of the legislation is based upon two major concerns: First, that availability of tax credits for nonpublic schools will lead to the deterioration of our public education system, particularly in urban America; and second, that, because many nonpublic schools are church-related, it is argued that the tax credits would violate the first amendment's prohibition against State action to "establish" a religion.

I know these concerns are expressed sincerely. As a strong believer in our public school system—and as the father of four children who have attended and thrived in public schools—I appreciate the value and importance of a vibrant, healthy public education system. If I thought this bill would actually result in deterioration of our public school system, I would vote against it. I would also vote against it if I thought the tax credits were clearly unconstitutional. I do not agree with such pessimistic appraisals. Let me set forth my reasons.

Implicit in the argument that tax credits for nonpublic schools will produce a mass exodus from the public schools—as Albert Shanker, head of America's largest teachers' union, has suggested—is the assumption that public schools are in such a precarious and tenuous state that they can survive only if they enjoy a monopoly on primary and secondary education. Even to advance such an argument does a grave disservice to our public school system; I do not accept it.

No real evidence has been offered to substantiate dire predictions of the demise of public education with the advent of such tax credits. In fact, the best evidence available indicates that the true cause for alarm is—not the deterioration of public schools—but the continuing decline of the nonpublic alternative.

Over the past 12 years, enrollment in nonpublic elementary and secondary schools has dropped by 1.3 million students—or one-fifth of their enrollment. Further, in 1960, 14 of every 100 students attended nonpublic schools; today the figure is only 9 out of 100.

It is by no means certain that tax credits will halt this erosion; it is only possible that the tide may be stemmed. It should be clear that, tax credits or no tax credits, the overwhelming majority of America's children will continue to receive a public education.

Another concern sometimes suggested is that such a tax credit might provide a windfall for whites and would thereby "foster segregation" of our schools—with whites in nonpublic schools and blacks in public schools. This argument is simply unsupported by the facts.

Some of the leading civil rights advocates strongly support tuition tax credits for nonpublic schools. Just last week, Mr. Roy Innis, national director of the Congress of Racial Equality (CORE), wrote in the Washington Post as follows:

> We believe the passage of tuition tax credits at the elementary and secondary levels will have a tremendous impact on poor and minority youngsters throughout this country by giving them what they desperately need: options. . . . To us, it is perhaps most important that this legislation would provide a competitive stimulus to the public schools . . . Innovation in both public and private education would be stimulated by the tax credit. . . . We believe it is time that the laws of this country give more than lip service to freedom of choice and quality education.

Dr. James S. Coleman, sociologist and a noted expert on desegregation whose studies have been cited by the U.S. Supreme Court, has announced his support for the elementary and secondary tax credit legislation. He said it "would increase the opportunity of black parents to escape from schools they think hurt their children."

It has been pointed out that significant numbers of urban blacks and other minorities already attend nonpublic schools. In testimony before the Senate Finance Committee, the noted black economist, Prof. Thomas Sowell of UCLA, expressed his support for tax credits on the basis of his own extensive research in the area. He found that "one of the great untold stories of contemporary American education is the extent to which Catholic schools, left behind in ghettoes by the departure of their original white clientele, are successfully educating black youngsters there at low cost."

A socioeconomic survey of public and nonpublic student populations at the elementary and secondary levels reveals that family incomes of nonpublic school students are remarkably similar to the income patterns for the entire American population:

About 20 percent of the nonpublic school students are families with income under $10,000.

Fifty-seven percent of all nonpublic school students come from families earning between $10,000 and $25,000.

Eighty-two percent come from families with incomes below $30,000.

Ninety-two percent come from families earning less than $40,000.

Perhaps most significantly, as a percentage of enrollment, nonpublic schools enroll only 2.5 percent more wealthy students than do public schools.

These figures hardly indicate a windfall for the wealthy. Instead, they do suggest that ordinary people who now pay—and will continue to pay—property taxes for support of public schools would receive at least a bit of assistance in paying for the nonpublic education they favor for their children. I do not believe this modest assistance will result in the ruin of public education.

Of course, it is also argued that such tax credits for tuition paid to parochial elementary and secondary schools would be an unconstitutional abridgement of the first amendment's "establishment of religion" clause.

I will not dwell on the relative merits of the arguments on both sides of this constitutional issue. Scholars—and, I suspect, members of the Supreme Court—are very much divided on this difficult question. In recent years, the Court has ruled on a series of State programs which have included various types of assistance for parochial schools. The results have been rather confusing, to say the least.

For example, in a recent decision, Wolman against Walter, involving an Ohio plan, the Court concluded:

> In summary, we hold constitutional those portions of the Ohio statute authorizing the State to provide nonpublic school pupils with books . . . . We hold unconstitutional those portions relating to instructional materials . . . .

If this bill is enacted, the Court should be given an opportunity to rule on its constitutionality as early as possible.

I am pleased that this is precisely what the bill before us contemplates. The measure expressly provides for expedited judicial review, allowing the courts to rule on the constitutionality of any section of the bill—even before tax credits can be claimed. This would insure that there will be no confusion for taxpayers—or the Internal Revenue Service—when the time arrives for the credits to take effect. This is the responsible way to proceed.

Mr. President, this is important legislation that is urgently needed. We pass it at a time when wage earners and taxpayers are expecting and demanding more tax equity. I hope it will become law.

● Mr. CHURCH. Mr. President, reaching a decision on whether to support or oppose the Hollings amendment has not been easy. I have tried to ponder the question carefully and have come to a conclusion only after considerable soul searching.

I believe in diversity at every level in our educational system. A mixture of public, private, and parochial grade schools and high schools has been good for our country. In Idaho, although there are relatively few parochial schools, those that do exist are of fine quality. I, myself, entered the first grade at St. Joseph's School in Boise where I received my first three grades of instruction. Years later, the Bishop Kelly High School was built in Boise and I have enjoyed a cordial relationship with the faculty and student body there. The academic standards and the high order of discipline at Bishop Kelly High School have attracted many students from Protestant, as well as Catholic, homes.

If my vote were governed by sentiment alone, I would vote for the committee bill and against the Hollings amendment. I want to help strengthen the parochial schools but I am unpersuaded that it would be wise to do so at the expense of the public schools.

It is not the constitutional question—the first-amendment provision which separates church and state—that influences my decision. In correspondence with Idaho's Catholic Bishop Treinan, I agreed that the courts, rather than Congress, should settle the constitutional issue.

It is the public policy that Congress must decide upon. This bill brings us to a fork in the road. We must ask ourselves which is the right direction to take. What will happen to our tax-supported public education system, which is available free of charge, to all children of grade school and high school age, if Federal tax credits are given to subsidize tuition paid to competing private and parochial schools?

If we start subsidizing this tuition, where is the stopping place? It is said that the $250 tax credit per student falls far short of actual tuition costs, and that the bill, as reported by the committee, would therefore do no serious damage to the public school system. This argument has been seriously challenged in the course of the debate. However, even if it were true, this bill represents a new departure. The public policy embodied in the bill, that of allowing Federal tax credit to compensate parents for tuition paid to private and parochial schools at the elementary and secondary level, would set the course for the future. The tax credits would later be enlarged, with consequences that could seriously impair the quality, nature, and scope of free public education in America. Moreover, the social impact of such a decision could easily be even more injurious than the erosion inflicted upon the public schools themselves. My concern, in this regard, is documented in a recent article which appeared in the Washington Post on August 8, 1978, captioned, "Tuition Credit's Impact Feared." I submit for the RECORD the full text of this article.

These considerations, despite my sentiments, have led me to conclude that I must vote in favor of the Hollings amendment. Another way can be found to assist private and parochial schools without the risk of undermining the public school system in this country. Too much is at stake to take that risk.

The article follows:

STUDY CITES POSSIBILITY OF MORE SEGREGATION—TUITION CREDIT'S IMPACT FEARED

(By Saundra Saperstein)

White enrollment in private and parochial schools in the 1960s was closely tied to the racial makeup of the nation's largest cities, and these enrollments often increased in cities with heavily black populations, a Johns Hopkins University study has shown.

Washington topped the list of the cities in the study whose white enrollment in nonpublic schools increased. About 37 percent of Washington's white students were enrolled in these schools in 1960; the figure was 47 percent 10 years later.

The study indicates that tuition tax credits designed to aid parents of private and parochial school students "may result in greater social-class and racial segregation of American children than now exists," according to study director Henry Becker.

Becker said the tax credits might intensify

the relationship between race and private school enrollment found in the study. The tax credits, he said, might be "more widely used by white families in cities with large or growing black populations, and could inhibit progress on school desegregation in these cities."

A controversial proposal to establish federal income tax credits for private college, secondary or elementary tuition is scheduled to come up in the Senate this week.

Spokesmen for public schools, including Health, Education and Welfare Secretary Joseph A. Califano Jr., have warned that providing a tax subsidy for private school tuition would increase the exodus from public schools and seriously hurt many systems.

Becker noted in his study that the large cities where white enrollment in private and parochial schools increased in the '60s were either southern cities or northern ones with large black populations. These cities included Washington, Atlanta, Miami, Charlotte, Dallas, Fort Worth, Philadelphia, Detroit, Newark and New York.

The rise in white enrollment in nonpublic schools in Washington between 1960 and 1970 seems "more startling when you realize that in most large northern cities the figure was going down," Becker said.

He pointed, for instance, to Milwaukee, a city with a low minority population, in 1960 about 36 percent of the white students were enrolled in non-public schools; by the end of the decade the percentage was down to 26, he said.

Washington's experience of increasing white enrollment in parochial and private schools appears to be continuing in the 1970s, according to figures provided by the Division of Research and Evaluation. In October 1977, about 55 percent of the city's "non-black" students were attending nonpublic schools, the figures showed.

The Hopkins study was based on data from the 1968 and 1970 censuses. According to Becker, it was the first statistical look at private school enrollment according to race.

Becker emphasized that the figures do not necessarily reflect what has happened in the 1970s.

Still, the Council for American Private Education found the study "alarming and misleading," according to council executive director Robert Lamborn.

"The facts since 1970 are substantially different than the facts prior to 1970," said Lamborn, whose organization is an umbrella group for about 90 percent of the nation's private and parochial schools.

"I'm not criticizing the scholarship of this study, but I am worried when a study done by anyone attributes movement to factors that are basically racial," he said.

"A great deal of movement from public to private schools has had nothing to do with race. Most of the changes have been attitudinal, reflecting desires of parents to find the best schools possible for their children.●

● Mr. SCHMITT. Mr. President, education is New Mexico's and the Nation's most vital resource for the future. Communication through the education of young people is literally direct communication with this future. There is no more awesome responsibility for parents and teachers who teach, or for legislators who create the environment for teaching.

New Mexico's future, the Nation's future, the Earth's future, our leadership, and our survival depend on the success of our educational system. An educated and farseeing electorate is essential to democracy; democracy in the United States is essential to freedom in the world.

These things I believe.

But today's argument is more pragmatic: How to begin the search for a better, indeed an adequate educational environment through legislation. Obviously, what we have been doing recently has not worked for the majority of America's young people. The rate of improvement of their education is not keeping pace with the rate of increase in the societal demands upon them.

The quality of the public school system is declining; the private school system is disappearing. How can we reverse these trends?

The typical American answer is to increase the incentives for providing a good education. Many of us believe this can be done by the tuition tax credit, a simple way of increasing the range of choice available to parents for the education of their children. With increased freedom of choice comes increased competition among schools to become the beneficiaries of that choice. With competition comes improvement of the educational service being offered whether it be public or private.

The argument is raised that providing a tax credit for private education, some of which is church affiliated, is unconstitutional. This question must be answered by the courts; but I ask you, how can an increase in the freedom of choice be unconstitutional in a Nation created to preserve freedom of choice?

Mr. President, as a cosponsor of the tuition tax credit bill, I will vote for H.R. 12050, the Tuition Tax Relief Act of 1978. The question of tuition tax credits is an issue whose time has finally arrived. While the Senate has passed similar bills on numerous occasions in the past, this is the first time that the House has also passed a tuition tax credit bill. Three fundamental reasons exist for support of this concept.

First of all, it provides some tax relief for the citizens of this country. A very clear message is being sent by the citizens of this country to their elected officials on all levels of government. The people of the United States are overtaxed. They want government spending and taxes reduced. They want more personal control of their income.

Second, and more importantly, this bill will provide citizens with a greater degree of freedom in the choice of education programs. The choice of education which has always been available to the rich will now be available to the middle- and lower economic classes. Parents will once again, and in some cases, for the first time be able to have some control over the education of their children.

Third, and most importantly, the quality of education will improve. Through the healthy competition which will certainly result from this proposal, both public and private schools will improve the quality of the educational services which they provide. Our children will be the ultimate beneficiaries of this.

Too many of our children are being denied a good education, and their parents feel helpless to do anything because of financial considerations. Under this bill, finances will play less of a role in the decisionmaking. Though to send one's children to a nonpublic school will still require a major financial commitment, it will be less of one than now. The beneficiaries will be the middle- and lower-economic classes. It is precisely these groups which require the assistance the greatest.

Mr. President, we talk about aiding the poor, eliminating the ghetto, and assisting those individuals who start their lives at a disadvantage. This bill will do more to accomplish those goals than anything else we can do. No longer will a poor family be forced to send their children to the public school even if it fails to provide adequate education. These parents will now be able to exercise some choice. Competition will increase to provide them that choice. Public and private education will both benefit from the competition.

The benefits will be greatest to minorities. On June 26, I submitted for the RECORD an article which appeared in the Washington Post. The article was about the University of Chicago sociologist James Coleman who endorsed tuition tax credits. Professor Coleman, long active in desegregation movements, pointed out that "low-income black parents" will benefit from the increased range of choices. Recently, Roy Innis of the Congress of Racial Equality (CORE) endorsed this approach. The Hispanic community has long favored choice in education.

Mr. President, Coleman and Innis have spent more time working for desegregation and racial equality than almost any two individuals. I do not believe that they would endorse any proposal that would not assist minorities and would promote segregation in the schools. Plus, their position is supported by the logic of their case.

When I contacted Hispanic groups in New Mexico to inquire as to their feelings about tuition tax credit, the response was enthusiastically in support of this proposal. I was told that any proposal which aided education, which gave parents more control over the education of their children, and which prompted competition and choice in education was welcome. These groups, some of which are involved in education, understand that minorities stand to benefit the most under this bill and not at the cost of some other groups.

Mr. President, all too often we in the Congress receive negative mail; that is, mail from constituents who are opposed to legislation being considered. The issue of tuition tax credits, however, has sparked much positive mail. During the past year I have received a great deal of mail supporting tuition tax credits. This mail has been from a cross section of New Mexicans and has outnumbered mail opposed to this issue by a wide margin.

Mr. President, I think many of the fears expressed in the past few days of debate are unfounded. I have supported the bill for elementary and secondary schools as well as for colleges because I feel that this is the best approach to assisting our citizens in providing for quality education.●

Mr. HEINZ. Mr. President, I rise in support of H.R. 12050, the Tuition Tax Relief Act of 1978, and as an original cosponsor of the Packwood-Moynihan bill, S. 2142, whose principles this bill embodies.

I have been an advocate of constitutionally acceptable aid to students in nonpublic schools before I ever ran for Congress many years ago. This is, therefore, a longstanding conviction and goal. The one way I know how to achieve this goal is through a tuition tax credit available only to students or parents. Such a credit is a simple, efficient, and fair approach to providing families some relief from rising education costs. It steers clear of institutional support, and it avoids the costs and invasions of privacy too frequently found when a Federal middleman is invited to collect and disburse the taxpayer's money.

The bill before us today would begin immediately to offer a tax credit to postsecondary students, and beginning on October 1, 1980, 2 years from now, extend that credit to students in elementary and secondary schools. It is a responsible approach and legislation that will be good for American education.

I believe that education in the United States must be a national priority. Toward that end, this bill is an important step; the proposal to create a separate Department of Education, of which I am a cosponsor and expect enactment this year, is another. For education has been and is still the lifeblood of a strong and dynamic America. It has always stood out as the hope of parents for a better opportunity for the next generation. America's greatness does not rest on her military might or economic power or humane instincts alone, but stems also from her unique and successful system of public and private education which has enabled young men and women of diverse races and backgrounds to give flower to their inate skills and abilities.

The bill before us addresses an important and fundamental principle, that of a pluralistic society. Pluralism is a unique part of America, and our confidence in the principle of educational pluralism in America is longstanding. This pluralism is threatened by the increasingly escalating costs of education which have made it more and more difficult for families of modest or moderate means to exercise their freedom of choice to pursue a nonpublic education which they believe may best meet their and their children's needs. This distinguished body has recognized this problem, and has passed six college education tax credit proposals in the past 10 years as a means of providing relief from those escalating costs.

H.R. 12050 is a departure from the past. It would provide tax credits for elementary and secondary education as well as higher education. Both have the same objectives. Tax credits for college tuitions go to parents to relieve public and private education costs: To deny them for elementary and secondary tuition costs, as the sponsors of the Hollings amendment seek to do, would constitute an artificial distinction that is wholly inconsistent with our earlier actions.

Not only would this be inconsistent educational policy, it would be bad social policy. The erosion of the tax base in many of our urban neighborhoods is an inescapable fact. The main cause is the flight of both white and black middle and upper income families from inner city areas. As a result of the decrease in local revenues, public schools in these areas are "educationally deteriorating and physically dangerous." And I for one am deeply concerned with keeping nonpublic schools alive in our urban neighborhoods. This is especially important, for these schools are often the one thing standing in the way of both black and white flight to the surburbs. And here tuition tax credits will help; indeed, I believe they are an essential element in saving our urban neighborhoods and our cities themselves.

As a matter of educational policy, tax credits will mean not less, but more, money for education. The combined impact of the tuition tax credit and the anticipated growth of Federal appropriations for public education programs will mean exactly that, and that will be good for our children as it can only serve to improve our educational system. I trust this proposition is self-evident.

One point I also want to be unambiguous about is that passage of this bill will in no way lessen my strong support for public education. Insofar as I am concerned, our system of public education in America is absolutely essential to the future of America. And I would oppose any measure that would give preference to nonpublic education over public education. But this clearly is not the case with tuition tax credits. Leaving aside the amount of State and local support per child, which in my own State of Pennsylvania totals $1,785 per student, the total elementary and secondary tax credit claimed by Federal taxpayers will be an estimated $900 million by 1983, or approximately $170 per nonpublic education student. This is less than half the estimated Federal support of $352 per public education student. Clearly, then, H.R. 12050 maintains a proper balance of support for public education.

Mr. President, I want to say again that I remain committed to seeking increased support for public education through funding of the Elementary and Secondary Education Act, the Education of the Handicapped Act, and other appropriate measures. But I am equally committed to the support embodied by this bill. I believe that the tuition tax credits provided in H.R. 12050 will allow for support for education in a way that will be good for education.

Philosophically, this tuition tax credit measure goes to the heart of another very serious matter, that of individual choice and personal freedom which we Americans hold so dear. I strongly agree with the noted sociologist James S. Coleman, the author of the landmark Coleman report, who has argued convincingly that any measure such as this that would increase the range of choice for low-income and minority parents and offer greater opportunity for individuals is a positive step forward and that more freedom of choice for Americans cannot possibly be bad for this country.

Mr. President, I am aware that there are those who are opposed, from sincere motivations, to this legislation. At the same time, I believe that the authors of the bill have carefully examined and made every effort to accommodate all legitimate concerns, and I commend the authors for their sensitivity and forthrightness in addressing those concerns:

To the concern of constitutionality, the bill provides for expedited review by the Supreme Court and defers for 2 years the credit for elementary and secondary students to allow the judicial review to be completed;

To the concern of a proliferation of segregated academies, the bill provides for monitoring of IRS enforcement of nondiscrimination standards;

To the concern of nonaccredited "fly-by-night" schools, the bill requires compliance by schools with applicable State laws for its students to be eligible for tax credits;

To the concern that middle- and upper-income families will receive a check from Washington, the bill does not provide for refunds—only credits against taxes owned.

Mr. President, some concern has been expressed about the financial impact of H.R. 12050. The total cost of this program when fully effective by 1983 is estimated to be approximately $2.8 billion: $1.9 billion, attributable to postsecondary education, $900 million to elementary and secondary education. Of the $726 billion in estimated Federal receipts for 1983, the total involved is less than two-fifths of 1 percent. This is a minimal amount. And to those concerned about Federal spending, I want to stress that this is not an outlay. At the worst, this is money we will not collect; at best, this is money over which the taxpayers themselves will have more control, and the opportunity of a better education for their children.

In sum, Mr. President, I believe the public interest is best served by passing H.R. 12050 and making a tuition tax credit available. I am equally confident that the quality of our American system of education will continue to thrive from the diversity and competition that have always been the hallmark of American education, and I urge my colleagues to support this important legislation.

Mr. HELMS. Mr. President, I support the concept of the tuition tax credit. I was a cosponsor of one of the original measures, and I still believe that the concept is sound.

I believe that the concept is sound because it provides a way to offer relief to the taxpayer without involving the Federal Government in the educational process. But that concept has been seriously damaged by the legislation and legislative history that has been developed over the past few days.

As the bill came from the House of Representatives, it was exclusively a revenue measure, unrelated to assistance to education, either public or private. In fact, it even contained a clause insuring that the tax credit not be considered as

Federal assistance to educational institutions. That clause read: "Any educational institution which enrolls a student for whom a tax credit is claimed under this Act shall not be considered to be a recipient of Federal assistance under this Act." That statement was reiterated in the House report.

Yet the Senate Finance Committee, in rewriting the bill, pointedly omitted that clause, even though it accepted verbatim the language of the preceding and succeeding paragraphs. Although that action in itself would not have been determinative, I was deeply disturbed to learn in a colloquy last night with the distinguished Senator from New York that the sponsors did appear to consider this measure as assistance to the institution, rather than as relief to the taxpayer. I gave them every opportunity to deny that interpretation, and they failed to do so.

Now I realize that there are those who maintain that this bill amounts to Federal subsidy for segregated schools. In this day and age, such a charge is a red herring that has very little meaning in practice. It is true that two decades ago many schools were organized as a result of the desegregation decisions of the Supreme Court. But desegregation in itself was not a cause that could long sustain the sacrifices of parents and teachers. Indeed, many of the schools that were set up only for the purposes of avoiding desegregation have already closed.

On the other hand, the development of the Christian school movement is increasing rapidly. With the deterioration of academic standards, moral standards, and teaching standards throughout the Nation, and the steady erosion of cultural and religious values by the infiltration of secular humanism into the curricula of the public schools, many parents have felt the need to remove their children from that environment.

The Christian school movement is based upon the premise that the religious. social, cultural, and academic aspects of education are a totality. To maintain the integrity of that unit, it is necessary to have absolute control over all parts of it. That means control not only over the academic content. but also over the social behavior of students, the attitudes portrayed in textbooks, the Christian witness of the teachers, the ethics of moral problems. There are many, of course, who would disagree with the goals and aims of the Christian schools; but they are not required to participate in voluntary, private activity.

Yet, if by means of false legislative interpretation of the tuition tax credits, we suddenly transform this wholesome, socially useful private activity into an area subject to State action, we destroy the integrity of the activity. Moreover, in a democracy, we open ourselves to the charge of funding religious activity.

Now, although the debate so far has been directed toward the false issue of segregation, we cannot escape the fact that once Federal control is interjected into any portion of an area, it rapidly extends to control the whole area. No one can maintain that Federal concern over possible segregation will stop at that point. The HEW bureaucrats have a totalitarian mentality. They distort the entire educational process because their only priority is to achieve mathematical desegregation. But for most private schools the whole issue of race has very little priority at all. It is simply no big thing. There are so many aspects of education that are so much more important that they of necessity crowd out racial issues. To adopt HEW's ideological and social priorities would completely distort the educational process.

This problem is emphasized by section 3 of this bill, which provides for the Secretary of the Treasury, the Secretary of HEW, and the Attorney General to report on the effectiveness of IRS procedures on civil rights. This in itself is an ominous provision; in effect, it gives the Secretary of HEW oversight on certain private school activities. We have seen how HEW in dealing with public schools looks at everything through the myopic lens of desegregation, and distorts its requirements accordingly. Now HEW is supposed to become an advisor to IRS to "enhance enforcement * * * of public policies against racial discrimination and other forms of discrimination which are contrary to law or against public policy." The three Cabinet officers are also supposed to report to Congress on "Revenue Ruling 71–447, Revenue Procedure 75–50, and any other rulings, procedures, directives, or memoranda designed to enhance civil rights enforcement by the Service."

This is not a narrowly draw directive. It is an open invitation to the Federal Government to invent any kind of rulings it wishes on the basis of its interpretation of public policy. Nor is the directive limited to racial discrimination. It embraces "rulings, procedures, directives, or memoranda designed to enhance civil rights enforcement." Thus even if a problem does not involve racial discrimination per se, it comes within HEW's orbit if it merely enhances enforcement of discrimination.

It does not take too much imagination to see HEW demanding coed sports programs, coed dormitories, the hiring of homosexual teachers, the availability of abortion counselors, and the abolition of male and female choirs, and so forth, all erected upon some pretext of public policy.

Indeed, the very directives mentioned in section 3 are directives which themselves have no legislative foundation. They are directives which were invented out of the air by the admission of the Director of Internal Revenue, Mr. Jerome Kurtz. Mr. Kurtz himself said so in a public speech only 8 months ago on January 9. He said:

> We have almost no specific statutory guidance; our authority and obligations on racial issues derive from the constitutional doctrine announced in *Brown* v. *Board of Education in 1954*, and cases enforcing and interpreting it, and from the broad national policy announced in the 1964 Civil Rights Act.

In the same speech, Mr. Kurtz also describes the role of the IRS in permitting tax exemption to churches. He points out that IRS is making rulings in the definition of what constitutes a "church" without any statutory authority:

> For many years, and now with increased frequency, the Service has been required to rule regularly and with far-reaching consequences on a term about which we have received no guidance from Congress.

Mr. Kurtz goes on to detail the revenue procedures which are mentioned in section 3 of the bill before us today, and points out that they are interrelated with tax implications for church-sponsored schools and the churches themselves:

> Church related private schools are covered within this policy, as well as the churches that operate and control them.

Finally, Mr. Kurtz describes the IRS as being "on the cutting edge of developing national policy."

Mr. President, this bill appears to give sanction to the extraordinary assertions of Mr. Kurtz. But even if section 3 were not in the bill, his statements give full evidence of the tendency to totalitarian control inherent in the bureaucratic mind. For if both the churches and the schools are equally subject to civil rights enforcement, then we are preparing the way for doctrinal and ritual intervention by HEW against religious practices and beliefs involving the roles of the sexes and the morality of sexual practices.

From that kind of intervention, it is only a step to demanding HEW-approved curricula, HEW standards for teachers, HEW approved textbooks, and so on. What can stop "the cutting edge of developing national policy"?

Mr. President, I admit that this trend is already well-advanced, whether or not this bill is passed. But the Senate should not approve—it must not approve—the principle that a tax credit to an individual is a Federal contribution to an institution, thus placing that institution in line for all kinds of Federal control. The area of private action must be jealously safeguarded, and that has not been done in the Senate version of the bill.

Mr. President, I ask unanimous consent that the speech by Mr. Jerome Kurtz, Commissioner of the IRS, be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY JEROME KURTZ

DIFFICULT DEFINITIONAL PROBLEMS IN TAX ADMINISTRATION: RELIGION AND RACE

Of all the interpretative judgments the Internal Revenue Service must make in administering the tax laws, probably none is more difficult and none demands more sensitivity than those concerning tax consequences affected by questions of religion and civil rights. These questions are far afield from the more typical tasks of tax administrators—determining taxable income. Nevertheless, our tax law places the IRS near the forefront in making delicate decisions involving definitions of "religion" and "church" and also places on the Service a substantial responsibility in making determinations relating to racial discrimination.

I'd like to discuss briefly why we must take positions in these areas and the factors considered by the Service in attempting to resolve these problems.

Statutory terms involving religion are found throughout the Code. Significant tax benefits follow from a determination that an organization is a "religious sect." For example, under section 1402(g) it is exempt from payment of Social Security taxes. Donations made to a group "organized and operated exclusively for religious . . . purposes" under section 170(c)(2)(B) qualify for deductions at higher limits.

Moreover churches today have only minimal demands made on them by the Service. For example, they are not required to seek exemption, they have no filing requirement, and they receive the benefit of the restraints imposed on the Service prior to an audit by section 7605(c).

Fundamental to most (but not all) of these usages in the Code is (1) the characterization of an organization's purposes as "religious" as that term is used in section 501(c)(3), and (2) qualification of an organization as a "church."

All of government—including the IRS—is constrained in the largest context by the First Amendment's Free Exercise and Establishment Clauses. In the Supreme Court's words, religious exercise must be permitted "to exist without sponsorship and without interference." (*Walz* v. *Tax Commission*, 397 U.S. 664, 669 (1970)). Exemption of religious institutions, whether from property or income taxes, has been characterized by the Court as representative of a "benevolent neutrality towards churches and religious exercise generally" that is "deeply imbedded in the fabric of our national life." (*Id.* at 676–77). In addition to the constraint implicit in neutrality, government must ensure as well that the *effect* of otherwise appropriate decisions does not result in an "excessive entanglement" with religion.

The most fundamental perception we have of our role then is to administer these provisions with unimpeachable neutrality, using as our premise Justice Douglas' eloquent phrase that this society will "make room for as wide a variety of beliefs and creeds as the spiritual needs of man deem necessary." (*Zorach* v. *Clausen*, 343 U.S. 306, 313–14 (1952)).

Having said that, however, does not mean that these First Amendment rights are absolutes or can be asserted as a screen for any kind of conduct. While the Court has found within the religious clauses of the First Amendment both a freedom to believe and a freedom to act, it has also found that the former is absolute while the latter is not. (Reyonds vs. U.S., 98 U.S. 145 (1878))

The Service, of course, has no concern with an individual's privately held beliefs, but it cannot always avoid concern with actions based on such beliefs. When a group makes its beliefs and programs a basis for seeking preferential tax treatment, then the Service has an obligation to inquire whether such preferences should appropriately be extended to such group.

From this distinction, the Service has constructed the first of two basic inquiries it makes of an individual or organization seeking to meet the "religious purpose" test of section 501(c)(3): Are the practices and rituals associated with the belief or creed illegal or contrary to clearly defined public policy? If a group's actions, as contrasted with its beliefs, are contrary to well established and clearly defined public policy, then tax preferences are inappropriate. The group will fail to meet the religious purpose test. Because "Religious Purpose" implies the absence of activities which are illegal or harmful in an important way to others. Under this test the Service revoked an exemption granted for ostensibly conventional charitable and religious purposes when we learned the group was actually organized to carry out a vicious, anti-semitic campaign.

The second inquiry, which is rather limited, is whether the particular belief is truly held. The Supreme Court ruled more than a generation ago that citizens may not be put to the proof of their religious doctrines or beliefs:

"The Fathers of the Constitution were not unaware of the varied and extreme views of religious sects, of the violence of disagreement among them, and of the lack of any one religious creed on which all men would agree. They fashioned a charter of government which envisaged the widest possible toleration of conflicting views. . . . The religious views espoused by respondents might seem incredible, if not preposterous, to most people. But if those doctrines are subject to trial before a jury charged with finding their truth or falsity, then the same can be done with the religious beliefs of any sect." U.S. vs Ballard, 322 U.S. 78, 87 (1943).

Nevertheless, the Court did hold that to enjoy a benefit based on a religious belief, the belief must be truly and sincerely held. This determination is tilted in favor of the applicant by the Service in this manner: In the absence of a clear showing that the beliefs or doctrines under consideration are not sincerely held by those professing them, the Service will not question the religious nature of those beliefs.

For example, within recent years the Service has ruled favorably on a sect that worshipped pagan dieties. The members of the sect consider themselves pagans engaged in the practice of witchcraft, magic, healing, and clairvoyance. There was no evidence that the beliefs were not sincerely held and none of their activities violated any law or clearly-defined public policies. Their beliefs appeared to serve the same function in the lives of their adherents as the beliefs of a more conventional religion serve in the lives of its adherents, the "functional equivalence" test enunciated by a California appellate court some twenty years ago in upholding exemption for a secular humanist society. *Fellowship of Humanity* vs. *County of Alameda*, 315 p. 2d 394, 409–10 (1957)).

Often associated with the determination of "religious purpose" is the question of whether the organization is a "church." For several reasons, more controversy has been generated in recent years about this part of the religion question than any other. Prior to 1970 all religious organizations and exempt organizations "operated, supervised, or controlled by or in connection with a religious organization" were excused from virtually all accountability to the public. Congress, in the Tax Reform Act of 1969, narrowed the exceptions from filing an information return and indirectly attached greater significance to classification of an organization as a church or an integrated auxiliary of a church. Of less obvious significance than accountability, but of great practical consequence to qualifying as a church under section 170(b)(1)(A)(i), is the absence of the public support tests to avoid private foundation classification.

For many years, and now with increased frequency, the Service has been required to rule regularly and with far-reaching consequences on a term about which we have received almost no guidance from Congress. Frankly, it is a difficult and thankless task, but one that we cannot avoid because of the significant tax implications that follow when an organization qualifies as a church.

In determining whether an admittedly religious organization is also a church, the Service follows the principles enunciated by the Court in *De La Salle Institute* vs. *United States*. In holding that a religious order operating schools and a novitiate was not a "church," and therefore not exempt from the tax imposed on unrelated income generated by a winery operated by the corporation, the Court was terse and direct:

"To exempt churches, one must know what a church is. Congress must either define 'church' or leave the definition to the common meaning and usage of the word; other wise, Congress would be unable to exempt churches. It would be impractical to accord an exemption to every corporation which asserted itself to be a church. Obviously Congress did not intend to do this." *De La Salle Institute* vs. *U.S.*, 195 F. Supp. 891, 903 (N.D. Cal. 1961).

The Tax Court carried that concept further in *Chapman* vs. *Commissioner*, 48 T.C. 358 (1967) when it determined that Congress used "church" more in the sense of a denomination or sect than in a generic or universal sense.

Consistent with these principles, the Service does not accept any and every assertion that an organization is a church. We have adopted a ruling position based on historical and practical considerations in arriving at what the Court in *De La Salle* called "the common meaning and usage" of the word "church." As important as these historical and practical considerations, however, have been our attempts over the years to isolate and distill from authoritative judicial sources those indicia of the existence of a church that are the most objective and least involved with particular beliefs, creeds or practices. But beliefs and practices vary so widely that we have been unable to formulate a single definition. The determination whether a particular organization is a church must, therefore, be made on a case-by-case basis. It may be helpful to list the characteristics we utilize:

(1) A distinct legal existence,

(2) A recognized creed and form of worship,

(3) A definite and distinct ecclesiastical government,

(4) A formal code of doctrine and discipline,

(5) A distinct religious history,

(6) A membership not associated with any other church or denomination,

(7) A complete organization or ordained ministers ministering to their congregations,

(8) Ordained ministers selected after completing prescribed courses of study,

(9) A literature of its own,

(10) Established places of worship,

(11) Regular congregations,

(12) Regular religious services,

(13) Sunday schools for the religious instruction of the young,

(14) Schools for the preparation of its ministers.

We are aware that few, if any, religious organizations—conventional or unconventional—could satisfy all of these criteria. For that reason, we do not give controlling weight to any single factor. This is obviously the place in the decisional process requiring the most sensitive and discriminating judgments. We are aware of this and that awareness is, perhaps, the best guarantee that we are trying to administer this difficult area carefully and evenly.

While I don't want to overstate the case, the alternatives to this admittedly imperfect process would weaken fundamental tax administration principles. Acceptance at face value of the assertion that an organization is a church would invite abuse. We must, for example, make preliminary determinations of bona fides in determining the application of section 7605(c) audit restraints.

A description of a current tax avoidance device illustrates the problem. Some individuals and organizations are marketing and promoting "plans" to avoid income taxes. While the "plans" vary in certain respects, a common theme calls for an individual taxpayer to obtain minister's credentials and a charter for a church or religious order by mail for a fee from churches that may or may not be recognized as exempt from Federal income tax under IRC 501(c)(3). No profession of adherence to a creed, dogma, or moral code is required and no duties or fiduciary responsibilities are undertaken in order to receive and administer these charters or credentials.

The "plan" then calls for the individual to take a "vow of poverty" and to assign his assets (house, car, savings account, etc.) and the income earned from current employment to the purported church or order. A major portion of the income assigned to the church or order from this unrelated occupation is

set aside for housing, food, clothing, and other items for the individual. Most of the remaining income is set aside for the upkeep of the premises in which he resides, the maintenance of the individual's car which is provided for his unrestricted use, and for occasional "spiritual retreats", by the individual to traditional vacation areas. Under the "plan," less than 10 percent of the remaining assigned income is utilized for gifts to the poor, prayer books, bibles, and other church functions.

Typically, the solicitations conclude that a vow of poverty can make a person rich.

Those interested in protecting the preferences for churches must agree that the Service has an obligation to be vigorous in stopping such schemes.

We have been criticized for the scope and breadth of the criteria we use and it has been implied that the Service has been trying in recent years to discourage new religions and new churches. I can assure you that that is not the case with the IRS. But the protection of church preferences requires that such preferences not be distorted.

We will do our best to administer this difficult area with tact and discretion. We may err occasionally but I remind you that Treasury and the Service were among the most vigorous advocates of the declaratory judgment procedures for exempt organizations so that there would be prompt judicial resolution of disputed rulings.

RACE

Equal in difficulty to the religious issues are those involving race. Again, the Service has been pulled from both directions, being criticized at the same time for doing too little and too much. Guidance on racial issues is less clear than that on religious issues. We have only a little more than 25 years of history and development of the law and Federal policy on school integration compared with 200 years of history on religious issues.

We have almost no specific statutory guidance; our authority and obligations on racial issues derive from the constitutional doctrine announced in *Brown* v. *Board of Education* in 1954, and cases enforcing and interpreting it, and from the broad national policy announced in the 1964 Civil Rights Act.

Our policy and administration in this area is developing. As in the case of the religious issue, this is not an area with which tax administrators typically deal. Our experience is limited. We are, however, moving to fulfill our responsibility as promptly as we reasonably can. As I will relate in a moment, the Service has taken significant steps in recent years to improve compliance with its private school policy. We expect further guidance from the courts since we are presently involved in litigation about our enforcement program.

The most demanding tax administration problem for the Service is in determining whether private schools have adopted and implemented a racially nondiscriminatory student admissions policy. While this is obviously not the only tax problem involving race, it is the one that has received most attention from the Service and its constituency in recent years. Service ruling policy is found in Revenue Rulings 71–447 and 75–231. Guidelines and procedures are found in Revenue Procedure 75–50. Essentially, these three documents deny tax exemption to private schools that discriminate in their admissions policy on the basis of race or ethnic origin. Church-related private schools are covered within this policy, as well as the churches that operate and control them.

These rulings positions had their origins in the early part of this decade when a Federal court enjoined the Secretary and the Commissioner from granting exemption to private schools in the State of Mississippi that discriminated on the basis of race in their admissions policies. The first ruling in this area extended a similar prohibition to all private schools in the United States. Schools were notified of this ruling and given an opportunity to adopt a suitable admissions policy and publicize it to the communities they served. More than 100 schools chose not to adopt such a policy, resulting in the revocation of their exemptions.

In 1975, the Service announced that that policy was equally applicable to schools operated or controlled by churches and, in the same year, issued Revenue Procedure 75–50 articulating important standards and guidelines by which both Service agents and the affected schools could determine whether the latter were in compliance. A brief background discussion about the evolution of these latest developments may be helpful.

In the fall of 1974 a Task Force composed of IRS and Chief Counsel personnel undertook to evaluate, in the broadest context, Service policy affecting private schools. They studied every part of the IRS responsibility, from rulings policy in the National Office to examination practices in the field. They discovered what appears to be almost a truism: translating policies and guidelines about race into compliance and enforcement practices presented the Service with the most difficult kind of tax administration judgments. The basic charge to the Task Force was to prepare recommendations to give field agents specific and objective guidance both in considering exemption applications and in conducting examinations of private schools. Within the past few weeks, the final item resulting from the Task Force's work has been issued to the field. In addition to the revenue rulings and procedures, our private school program includes the following:

An internal management reporting system to record and track complaints, audit results, and exemption letter activity.

Specific and detailed examination guidelines and a checksheet to assist field agents.

A revised Schedule A to Form 1023 (Application for Exempt Status) to conform it to the informational requirements established by Revenue Procedure 75–50.

A revised Form 990 to provide for the annual certification required by Rev. Proc. 75–50 that the school is complying with all aspects of the Rev. Proc. and to collect information to assist us in selecting private school returns for examination.

Revised basic training materials for exempt organizations specialists to reflect the new guidelines.

Audit coverage of private schools has increased dramatically in the past two years. In fiscal year 1977 784 private school returns were examined, representing approximately 10% of the private schools with individual rulings in each Key District. That coverage includes a number of church-related private schools as well.

Notwithstanding that the Service is committed to removing tax exemption from schools that discriminate racially, and has devoted significant resources to ensure that its enforcement activity is equal to the task of assuring nondiscriminatory admissions policies, certain troublesome questions persist. One question is how we should evaluate the bona fides of the admission policy of schools located in communities subject to desegregation orders that operate over a long period of time without actually enrolling any minority students. Does that fact create a presumption calling for more careful scrutiny? Might a similar rule be applicable even in the absence of local desegregation orders? And, on the other side of that question, what steps can an exempt school take in such a situation to establish that it, in fact, has been open to children of all races and ethnic groups?

An equally serious question is whether and how far the issue of racial nondiscrimination extends beyond private schools to other exempt activities. Congress gave some intimations of its feelings on this question in 1976 when it added section 501(h) to the Code prohibiting certain social clubs from discriminating in their governing instruments on the basis of race, color, or religion.

Questions in this area are obviously sensitive and put the IRS, in some cases, on the cutting edge of developing national policy. But this is where we find ourselves and we will do our best.

I appreciate this opportunity to share with you some of our views on matters of as great concern to the Service as they are to the public we serve.

Mr. PERCY. Mr. President, I support the amendment offered by Senator HOLLINGS to remove the elementary and secondary school provisions from H.R. 12050, the Tuition Tax Relief Act of 1978. The provision of a tax credit for sectarian elementary and secondary school tuition is clearly, in my judgment and that of many constitutional authorities, unconstitutional. It would be a cruel hoax on many families for the Senate to approve this tax credit, recognizing that the Supreme Court will strike it down.

The evidence for the unconstitutional nature of this tax credit would appear to be conclusive. It is true, as argued by proponents of the tax credit, that the Federal Government is already providing certain subsidies to elementary and secondary sectarian schools. And I fully supported these subsidies. However, the basic distinction which the Court makes in determining the unconstitutional nature of a subsidized activity is whether the educational and religious aspects of that activity can be separated.

Thus, for example, the Court has upheld the use of public funds where it is possible to make the distinction between educational and religious purposes. The most recent finding of the Court in this regard was Wolman against Walter, a case decided in 1977. In this case, the constitutionality of an Ohio law which authorized various forms of aid to nonpublic schools, most of which were sectarian, was challenged. The Court held that—

Those portions (of the law) authorizing the State to provide nonpublic school pupils with books, standardizing tests and scoring, diagnostic services, and therapeutic and remedial services are constitutional. Those portions relating to instructional materials and equipment and field trips are unconstitutional.

In this decision, those activities with either specific educational and secular purposes, such as books for secular subjects and standard tests, or general welfare services, such as diagnostic services, were ruled constitutional. Those activities, though, where no clear distinction could be made between the educational and religious aspects, such as instructional materials and equipment which could be used for teaching both secular and nonsecular subjects, were ruled unconstitutional. This is the case with any type of tuition assistance. In Lemon against Kurtzman, Superintendent of Public Instruction of Pennsylvania, a case decided in 1971, the Court developed three tests regarding the use of public funds for sectarian schools:

Every analysis in this area must begin with consideration of the cumulative cri-

teria developed by the Court over many years. Three such tests may be gleaned from our cases. First, the statute must have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion; finally, the statute must not foster "an excessive government entanglement with religion."

Under the first—the determination of secular purpose—the tuition tax credit would fail because it would be impossible to distinguish nonsecular from secular purposes, since the subsidy is not for a specific educational and secular activity. Under the second test—a determination of primary effect—the tuition tax credit would fail because the Court has already ruled, in a definitive manner, that even indirect aid cannot be used to subsidize sectarian schools when the primary effect of such aid is to advance religion. Under the third test—the determination of excessive entanglement—the tuition tax credit would fail because it would undoubtedly result in a greater, and unwanted, Government involvement with sectarian schools.

Proponents of the tax credit for elementary and secondary school tuition also argue that it is intended to benefit the students and their parents, not the schools themselves, and therefore it is constitutional. However, the Court has specifically rejected this argument on two separate occasions, in its ruling on Committee for Public Education and Religious Liberty against Nyquist, Commissioner of Education of New York, and Sloan, Treasurer of Pennsylvania against Lemon. Both cases were decided in 1973.

In Nyquist, New York State had designed two programs to aid parents who wanted to send their children to private elementary and secondary schools. The programs would have provided a direct reimbursement for a certain amount of tuition costs for low-income families, and a tuition tax relief plan, including both a credit and a deduction, for higher-income families.

In Sloan, Pennsylvania had developed a program to reimburse parents for a portion of nonpublic elementary and secondary school tuition expenses. Although, in Nyquist, the State argued that the tuition subsidies would benefit the parents and not the schools, the Court held that:

1. The propriety of a legislature's purpose may not immunize from further scrutiny a law that either has a primary effect that advances religion or fosters excessive church-state entanglements.

2. The maintenance and repair provisions of the New York State statute violate the Establishment Clause (of the First Amendment) because their inevitable effect is to subsidize and advance the religious mission of sectarian schools. Those provisions do not properly guarantee the secularity of state aid by limiting the percentage of assistance to 50% of comparable aid to public schools. Such statistical assurances fail to provide an adequate guarantee that aid will not be utilized to advance the religious activities of sectarian schools.

The tuition reimbursement grants, if given directly to sectarian schools, would similarly violate the Establishment Clause, and the fact that they are delivered to the parents rather than the schools does not compel a contrary result, as the effect of the aid is unmistakably to provide financial support for nonpublic, sectarian institutions.

The fact that the grant is given as reimbursement for tuition already paid, and that the recipient is not required to spend the amount received on education, does not alter the effect of the law. . . .

The system of providing income tax benefits to parents of children attending New York's nonpublic schools also violates the establishment clause, like the tuition reimbursement program, it is not sufficiently restricted to assure that it will not have the impermissible effect of advancing the sectarian activities of religious schools.

Because the challenged sections have the impermissible effect of advancing religion, it is not necessary to consider whether such aid would yield an entanglement with religion. But it should be noted that, apart from any administrative entanglement of the State in particular religious programs, assistance of the sort involved here carries grave potential for entanglement in the broader sense of continuing and expanding political strife over aid to religion.

The Court made a similar ruling in Sloan, finding that—

There is no constitutionally significant difference between Pennsylvania's tuition grant scheme, with its intended consequences of preserving and supporting religion-oriented institutions, and New York's tuition reimbursement program held volative of the Establishment Clause in (Nyquist).

In short, the Court has definitively ruled that the effect of tuition relief subsidies, in any form, is to provide financial support for sectarian elementary and secondary schools because it has the immediate effect of supporting and advancing religious activities.

In addition, as I have previously stated, sectarian elementary and secondary schools do receive some public funds. This subsidy, for specific educational programs, amounts, I believe, to approximately $61 per pupil. This compares with $115 per pupil in Federal funds received by public elementary and secondary schools. These figures are congressional budget office estimates. Public schools serve 90 percent of our elementary and secondary school students. Thus, from a policy standpoint, I cannot approve of a bill which would provide private schools with a possible $278 per pupil subsidy when the per pupil subsidy for public schools, which are in great financial distress, is only $115 per pupil.

I have long supported private elementary and secondary schools. These schools do provide an invaluable service and a quality education to their students. They provide to us an invaluable yardstick against which to judge the quality of public education, other than to students and parents of those in institutions of higher education. Private schools, parents, and their students need and deserve additional Federal assistance. However, the tuition tax credit is not a constitutionally sound way to provide this assistance.

We can successfully address this problem in a constitutional manner. Through the Elementary and Secondary Education Act and the school food programs, we already provide much needed assistance. When the ESEA authorization and the Labor-HEW appropriations is considered by the Senate, we should seriously consider increased assistance through these channels.

For these reasons, I will vote for the Hollings amendment.

Mr. STEVENS. Mr. President, I would like to express my support for the Tuition Tax Relief Act of 1978 as reported by the Senate Finance Committee. I believe that an excellent case has been made by the proponents of the bill and I commend them on their efforts to promote the concept of tax credits as a means of alleviating the burdensome cost of education. To reiterate the stated arguments would be pointless at this stage of the debate. I feel that my colleagues are all aware of the major issues involved and will take each into account.

There is, however, one subject that has received little, if any, attention and one which I would like to address at this time. The subject is the effect of the present student aid programs on the relationship between the student and his or her parents. While this issue might seem extraneous to the topic discussed today, it is nonetheless important and deserving of consideration. It is my contention that the tuition tax credit concept is a preferable program to the present student aid programs conducted by the Department of HEW with regard to its effects on the student-parent relationship and the whole structure of the family unit.

Mr. President, any proposal which the Senate considers must be viewed in light of its alternatives. We cannot expect to judiciously pass judgment without first reviewing the alternatives. What we are debating today is not the existence of a problem—we all recognize that some relief is needed from the high cost of education. What we are discussing is the method by which this problem can be best addressed.

The cost of education has increased at all levels, in both private and public institutions, and is pricing many students out of the market. Starting with the assumption that education is a desirable commodity, both for the individual and society as a whole, Congress must reaffirm its commitment to insure adequate educational opportunities for all Americans by enacting that proposal which provides education that is both affordable and of the highest possible quality. All aspects of the alternatives must be viewed and it is for this reason that I wish to elaborate on the familial aspects of the tuition tax credits and the existing student aid program.

It has traditionally been assumed that the family has the basic responsibility to provide for a child's education, either directly through tuition payments or indirectly through taxation. The Government's student aid programs were established to provide equal educational opportunities by offering aid based on financial need. The education programs were not intended to shift this basic responsibility or assume the family's role, but merely to provide for education when the family resources are not adequate. I am concerned, however, that the effects of these programs have been to contribute to the breakup of the family unit, a phenomena which disturbs me a great deal. The main contributing factor is the program's encouragement of students to claim independency from their parents for the purposes of eligibility for these Government programs.

The chances of students receiving aid increases with their independent status because the needs analysis does not consider the potential family support for independent students and since most independent students have few resources, they get higher awards. The average award given to an independent student is generally about 60 percent higher than that for the average dependent student. This, of course, is an incentive for students to disassociate themselves from their parents, especially those coming from middle-income families where there is some question as to whether or not they can qualify for aid. This phenomena has been occurring more and more since the early 1970's when the present definition of "independent student" was established for the student aid programs.

From 1974 to 1975 alone, there was actually a 100-percent increase in the number of independent students qualifying for aid in most of these programs, including the BEOG. Students are realizing more and more that independence allows them to receive larger awards and with the increased cost of education, this fact becomes a sufficient inducement for the change in status. The mass media is also helping to encourage this type of claim. For example, Women's Day magazine ran an ad stating:

If your son or daughter has been self-supporting, he or she may be eligible for college aid, regardless of your ability to pay.

One immediate effect of more students claiming independence and receiving higher awards is, of course, that there will be fewer dollars for other eligible and perhaps more needy students. And the results may well be the opposite of what is intended in that lower income students will not receive adequate levels of aid and be priced out of the opportunity for education. There are other ramifications stemming from the eligibility requirements besides the obvious financial ones.

For example, in these student aid programs, "independent student" is defined as one who: First is not claimed as a dependent by anyone except his or her spouse; second, has not and will not receive more than $600 from his or her parents in the calendar year in which aid is received and the calendar year prior to the academic year for which aid is requested, and third, has not and will not live for more than 2 consecutive weeks in the home of a parent during the year in which aid is received and during the year prior to the academic year for which aid is requested.

By disallowing any parental financial assistance in excess of $600 and by not permitting the student to live with the parent for more than 2 consecutive weeks, one can hardly expect that a strong parent-child relationship will be maintained. Those students who are no longer living at home will probably experience some loss of emotional support and declaring independence may well serve to exacerbate the problem. In addition, some tests required by the program in order to establish independence makes things harder.

In order to qualify, many middle-income students have to either get their parents to lie or disclaim them. Also, Government standards are such that some parents refuse to submit the necessary confidential financial information to establish eligibility protesting that it is an invasion into their private lives. Others feel it is degrading to have to establish for one's children that one is too poor to provide the necessary financial educational assistance.

Independence for the student is not necessarily describing a group of individuals whose status as "independent" has been traditionally recognized. Basically, the concept has been created legislatively, through the 26th amendment fixing the age of majority at 18, and through regulatory fiat setting arbitrary parameters for independence. It must be kept in mind, however, that for students, independence means simply that dependency has shifted from the parents to the Government. Through financial incentives, students are encouraged to look to the Government for the assistance traditionally supplied by the parents.

While initially claiming independence may be strictly for the purposes of receiving aid and is based solely on legal technicalities, there are certain to be other psychological effects on the student and the parent relating to their general attitude toward each other and the Government. The situation I have just described is only one example of the trend in our country toward greater reliance on the Government. We look to the Government for financial assistance through social security, economic development, disaster assistance, public housing, old age assistance, and child welfare. The Government further influences our behavior and guides our actions through health and safety guidelines, environmental and energy controls, minimum standards on food and nutrition, and requirement for the activities of both business and labor. And mostly, as a result of the areas of Government involvement I have just mentioned, the Government provides regulation management and enforcement and legal advice and services. As Government continues to grow and invade our private lives, reliance on the Government to provide us with what we need or want will continue to grow and continue to curtail our traditional reliance on the family structure.

In addition to the student aid program, there are other assistance programs which encourage Government dependence such as the food stamp program which requires independency for students. Another example is the welfare program which guarantees a minimum income to poor families. I do not have to remind my colleagues of the famed Seattle-Denver income maintenance program which was found to have actually contributed to family breakups. I understand that the intent of these programs is meritorious, yet, I do not believe they serve the best interests of the students and their families. Mr. President, I do not mean to infer that the student aid program is necessarily leading to the breakup of the family unit, I merely mean to bring my colleagues' attention to the possible consequences of this type of educational aid.

As I stated earlier, every proposal must be viewed in light of its alternatives and if one alternative appears to create an effect we view as detrimental, then let us consider that fact when assessing the overall merits of the proposal. I believe that the tax credit approach to providing aid is preferable for numerous reasons and in light of its familial effects, it is certainly the better alternative. The tax credits will encourage the students to look to their parents for aid instead of the government. The Tuition Tax Relief Act, as reported by the Finance Committee, allows a taxpayer to claim a credit equal to 50 percent of certain education related expenses incurred by himself, his spouse, or his dependent. The credit can only be claimed by a taxpayer and most student's incomes are such that they do not pay any taxes. Therefore, in most cases, the students would have to be a dependent of his parents in order for the credit to apply toward his education. With the tax credit, there is no incentive for the student to disassociate himself from his parents for the purposes of receiving educational assistance.

Another advantage of the tax credit relative to the student aid program is its simplicity and lack of Government intrusion. A family need not submit confidential financial statements to HEW; there are no long and complex application forms to be filled out; there is no uncertainty as to whether or not the assistance will be granted; and the decision rests with the taxpayer, not HEW.

Mr. President, I support the concept of tuition tax credits as a means of alleviating the increasing cost of education. I feel it is a far superior mechanism, especially with regard to its effects on such a fundamental unit in our society as the family, and I would certainly hope that my colleagues will not ignore this effect when voting on this legislation.

Mr. MOYNIHAN. Mr. President, I move that the pending amendment be laid on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New York.

Mr. HOLLINGS. Mr. President, I ask for the yeas and nays on that motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HOLLINGS. I ask for the yeas and nays also on the amendment, if the motion to table fails.

The PRESIDING OFFICER. That would require unanimous consent.

Mr. HOLLINGS. I ask unanimous consent to that effect.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HOLLINGS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HODGES. Mr. President, assum-

ing the Hollings amendment to my amendment prevails, I ask unanimous consent that it be in order to ask for the yeas and nays on my amendment also.

The PRESIDING OFFICER. Is there objection?

Mr. LONG. I object, Mr. President. I do not know about that amendment.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the motion to lay on the table. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 40, nays 57, as follows:

[Rollcall Vote No. 317 Leg.]

YEAS—40

Allen	Hayakawa	Nelson
Anderson	Heinz	Packwood
Biden	Huddleston	Pearson
Curtis	Jackson	Proxmire
Danforth	Laxalt	Ribicoff
DeConcini	Long	Roth
Dole	Lugar	Schmitt
Durkin	Magnuson	Schweiker
Garn	Mathias	Stevens
Goldwater	Matsunaga	Tower
Griffin	McIntyre	Wallop
Hansen	Melcher	Zorinsky
Hatch	Moynihan	
Hathaway	Muskie	

NAYS—57

Abourezk	Domenici	Metzenbaum
Baker	Eagleton	Morgan
Bartlett	Ford	Nunn
Bayh	Glenn	Pell
Bellmon	Gravel	Percy
Bentsen	Haskell	Randolph
Brooke	Hatfield,	Riegle
Bumpers	Mark O.	Sarbanes
Burdick	Hatfield,	Sasser
Byrd,	Paul G.	Scott
Harry F., Jr.	Helms	Sparkman
Byrd, Robert C.	Hodges	Stafford
Cannon	Hollings	Stennis
Case	Humphrey	Stevenson
Chafee	Inouye	Stone
Chiles	Javits	Talmadge
Church	Kennedy	Thurmond
Clark	Leahy	Weicker
Cranston	McClure	Williams
Culver	McGovern	Young

NOT VOTING—3

Eastland	Hart	Johnston

So the motion to lay on the table UP amendment No. 1655 was rejected.

Mr. HOLLINGS. I move to reconsider the vote by which the motion was rejected.

Mr. HODGES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from South Carolina. The yeas and nays have been ordered. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 56, nays 41, as follows:

[Rollcall Vote No. 318 Leg.]

YEAS—56

Abourezk	Domenici	Morgan
Baker	Eagleton	Nunn
Bartlett	Ford	Pell
Bayh	Glenn	Percy
Bellmon	Gravel	Randolph
Bentsen	Haskell	Riegle
Brooke	Hatfield,	Sarbanes
Bumpers	Mark O.	Sasser
Burdick	Hatfield,	Scott
Byrd,	Paul G.	Sparkman
Harry F., Jr.	Helms	Stafford
Byrd, Robert C.	Hodges	Stennis
Cannon	Hollings	Stevenson
Case	Humphrey	Stone
Chafee	Inouye	Talmadge
Chiles	Javits	Thurmond
Church	Kennedy	Weicker
Clark	Leahy	Williams
Cranston	McGovern	Young
Culver	Metzenbaum	

NAYS—41

Allen	Hayakawa	Muskie
Anderson	Heinz	Nelson
Biden	Huddleston	Packwood
Curtis	Jackson	Pearson
Danforth	Laxalt	Proxmire
DeConcini	Long	Ribicoff
Dole	Lugar	Roth

Goldwater	Matsunaga	Stevens
Griffin	McClure	Tower
Hansen	McIntyre	Wallop
Hatch	Melcher	Zorinsky
Hathaway	Moynihan	

NOT VOTING—3

Eastland	Hart	Johnston

So Mr. HOLLINGS' amendment (UP No. 1655) was agreed to.

(Mr. BIDEN assumed the chair.)

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HODGES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. STEVENSON). The question is on agreeing to the amendment of the Senator from Arkansas, as amended.

The amendment, as amended, was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HODGES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD and Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the Senator from Ohio was seeking recognition. If the Chair will recognize the Senator, then the Senator will yield to me.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

UP AMENDMENT NO. 1656

(Purpose: To provide for a phase out of the credit as adjusted gross income exceeds $30,000 for higher education expenses)

Mr. METZENBAUM. Mr. President, I call up an amendment at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 1656.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, between lines 11 and 12, insert the following new paragraph:

"(4) Phase-out of credit above certain adjusted gross income amounts.—Notwithstanding any other provision of this section, the credit allowable under subsection (a) shall be reduced to the extent that the amount of the credit allowable for the taxable year is attributable to educational expenses other than expenses described in paragraph (2), by 5 percent of the amount by which the adjusted gross income of the taxpayer for the taxable year exceeds $30,000 ($15,000 in the case of a married individual making a separate return of tax).

Mr. MOYNIHAN. Mr. President, may we have order?

Th PRESIDING OFFICER. The Senate will be in order.

TIME AGREEMENTS ON AMENDMENTS

Mr. ROBERT C. BYRD. Mr. President, I wonder whether it would be possible at this time to get some indication from Members as to whether or not they are going to call up amendments, Mr. METZENBAUM has an amendment pending. I understand that Senator DOMENICI has an amendment. Are there any other amendments?

Mr. BUMPERS. Mr. President, will the Senator yield for a question?

Mr. ROBERT C. BYRD. If the Senator from Ohio will allow me.

Mr. METZENBAUM. Without losing my right to the floor.

Mr. BUMPERS. I understood that the floor managers were going to offer an amendment on the refundability of this tax credit. Has that been done?

Mr. MOYNIHAN. The floor managers were to have done that, had the tax credit for elementary and secondary schools been retained. It has not been retained.

Mr. BUMPERS. But the Senator does not anticipate offering such an amendment for tuition tax credit. Is that correct?

Mr. PACKWOOD. That is correct.

Mr. BUMPERS. I thank the Senator.

In light of that, I probably will offer an amendment to accomplish that.

Mr. ROBERT C. BYRD. Mr. METZENBAUM has an amendment, Mr. DOMENICI has one, and Mr. BUMPERS probably will offer one. Are there any others?

May we get a time agreement on the amendment?

Mr. METZENBAUM. I am agreeable to a time limit.

Mr. HOLLINGS. I understand that the amendment of the Senator from Ohio refers to higher education and not elementary or secondary.

Mr. METZENBAUM. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the amendment by Mr. METZENBAUM of 30 minutes, to be equally divided in accordance with the usual form. I have discussed this with Mr. METZENBAUM, and he is agreeable.

Mr. PACKWOOD. Mr. President, reserving the right to object, has it been

discussed with Senator LONG? I reserve the right to object, for the moment, because I know he is very interested.

Mr. ROTH. What is that?

Mr. PACKWOOD. A time limit on the Metzenbaum amendment.

Mr. ROBERT C. BYRD. Thirty minutes all together.

Mr. ROTH. That is all right.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the amendment by Mr. DOMENICI of 1 hour, to be equally divided in accordance with the usual form. I have discussed this with Mr. DOMENICI.

Mr. MOYNIHAN. The time to be divided between whom?

Mr. ROBERT C. BYRD. Who opposes it?

Mr. PACKWOOD. I am not sure.

Mr. MOYNIHAN. Shall I accept the opposition time and manage it as seems appropriate?

Mr. DOMENICI. Fine.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, Mr. GLENN has an amendment. How much time does the Senator want on his amendment?

Mr. GLENN. Thirty minutes on a side.

Mr. PACKWOOD. Is that the sunset amendment?

Mr. GLENN. Yes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limitation on the amendment by Mr. GLENN of 30 minutes, to be equally divided between Mr. GLENN and Mr. MOYNIHAN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on the amendment by Mr. METZENBAUM there be a time limitation of 40 minutes, instead of 30 minutes, to be equally divided in accordance with the usual form.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, that covers all amendments with the exception of that by Mr. KENNEDY.

Mr. KENNEDY. Mr. President, I have an amendment together with the Senator from New Hampshire (Mr. DURKIN). We intend to offer it, and we would like a brief time for discussion. I do not believe there will be a vote on it. We will be glad to schedule it when it is convenient. If we could have 20 minutes, that would be sufficient.

Mr. ROBERT C. BYRD. Twenty minutes equally divided?

Mr. MOYNIHAN. If the Senator is not going to ask for a vote, I am sure 20 minutes will be sufficient.

Mr. BELLMON. Mr. President, reserving the right to object, I would like to have time on this amendment. Could I have 5 minutes?

Mr. KENNEDY. That is fine.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a time limit on the amendment by Mr. KENNEDY of 20 minutes, all of which is to be controlled by Mr. KENNEDY.

The PRESIDING OFFICER. Is there objection?

Mr. PACKWOOD. Mr. President, reserving the right to object, and before the final agreement, I ask that it be repeated, as to how many amendments we have and what we have agreed to, or what we are about to agree to.

The PRESIDING OFFICER. There is 1 hour on the Domenici amendment, 30 minutes on the Glenn amendment, 20 minutes on the Kennedy Amendment, and 40 minutes on the pending Metzenbaum amendment.

Mr. PACKWOOD. So we have 2½ hours, plus votes, and other amendments still to be called up.

Mr. ROBERT C. BYRD. I see no indication of other amendments, except for Mr. BUMPERS, who possibly will call up an amendment.

Mr. KENNEDY. Mr. President, that is not correct. I think it is going to be acceptable to Mr. ROTH. It is a refundability amendment.

Mr. ROBERT C. BYRD. Can we have a time limitation on the amendment by Mr. BUMPERS?

Mr. BUMPERS. I am happy to agree to an hour, with the understanding that we will do our best. I think the amendment may be accepted, and we may be able to do it in 15 minutes. I would like the agreement to be for an hour, equally divided.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a limitation of 1 hour on the amendment by Mr. BUMPERS, to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, apparently these are the only amendments that will be offered. Senators, therefore, should be prepared to vote on final passage of the bill this evening. The way it looks now, it will be between 8 and 9 o'clock. I hope it is not that late.

Mr. METZENBAUM. Mr. President, on August 10, the distinguished chairman of the Budget Committee circulated a letter to all Senators in which he warned that passage of this legislation and the Carter tuition grant proposal will make it virtually impossible to achieve the goal endorsed by the Senate of balancing the Federal budget by 1981. "If either of these bills is enacted," Senator MUSKIE wrote, "We will certainly fail to balance the budget by 1981—or even 1983." "Whatever the merits of any of these bills," he added, "we cannot afford them now. We cannot have them and a balanced budget."

And I agree with him that this bill is indeed a budget buster.

According to the Congressional Budget Office, the bill before passage of the Hollings amendment would have added over $8.6 billion to the Federal deficit by the end of 1983, and because the bill has no income limitation on eligibility for credits half of those dollars would have gone to the fewer than 5 percent of the families in this country that earn in excess of $40,000 per year.

Mr. President, the bill as written will give Federal aid to anyone, to everyone, who pays tuition, to the successful doctor, to the lawyer, to the businessman, as well as to the hard-pressed middle-class wage earner struggling to keep children in college.

We talk about legislation of this kind as if it were intended for the middle class. But the fact is that as drafted this bill in its present form really provides a tax bonanza, a giveaway to those who need it the least in our community. It subsidizes elite education for the well-to-do.

It is yet another example of welfare for the rich, and I believe that it is grossly unfair to ask the average American working family in this country to pay additional taxes to provide for it.

Let us not kid ourselves. What comes in must go out, and if you reduce the amount of money coming into the Federal till by reason of the benefits provided in this legislation for those who need it the least, then those who can afford to pay it the least will wind up paying the most, and it will be an unfair piece of legislation.

Mr. President, the amendment by the Senator from South Carolina to exclude elementary and secondary school tuitions from eligibility for the credit will reduce the estimated cost of the legislation between now and 1983 by more than $3 billion.

Mr. HATCH. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. METZENBAUM. I yield.

Mr. HATCH. Mr. President, I ask unanimous consent that Matthew Goldman, Becky Mosely, and Vicki Degges, of my staff, be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. But even with that reduction, the cost by 1983 for the higher education component of the bill will come to more than $5.25 billion.

That, I am convinced, is still far too high a price to pay and, unless the Senate acts to place an income limit on eligibility for the higher education credits, the most affluent families in our country will get a disproportionate share of the benefits that will be available.

Without an income limit, families earning over $25,000 per year will be the recipients of approximately $2.9 billion in higher education subsidies tuition tax credits by the end of 1983, and families in the $40,000-plus category will receive over $1 billion of that amount. And the 38 percent of American families earning $15,000 or less per year, the ones that we talk about in proposing legislation of this kind, will receive only 12 percent of the benefits, a little more than half of the share that will go to the rich.

Mr. President, the amendment I am offering today is designed to cut the fat out of the tuition tax credit for higher education. It will, quite simply, reduce

eligibility for tuition tax credits by 5 percent of family income above an adjusted gross income level of $30,000.

I point out to the Senate we are not talking about gross income. We are talking about adjusted gross income of $30,000, which is something totally different. If anything, maybe my amendment is too generous, but leaning over on the side of conservatism and trying to be fair we adopted it so that it will start at an adjusted gross income of $30,000 and phase out by adjusted gross income of $40,000.

With this formula, a family earning $35,000 would receive 50 percent of the credit. At an income of $40,000, there would be no credit.

According to the estimate by the Congressional Budget Office, my amendment will reduce the cost of the higher education component of the bill by approximately $2 billion, and that is a saving of $2 billion over and above the $3 billion saved by the passage of the Hollings amendment. We are talking, Mr. President, about savings of over $5.25 billion.

Mr. President, I make no bones about it. I do not intend to vote for the bill in its final passage because I do not believe the Federal Treasury can stand this kind of beneficence. I do not believe that we can come to the floor of the Senate and talk about saving money, talk about economies, and talk about balancing the budget, and then start on the legislation that is before us on that very day.

But the fact is that if the Senate is inclined to move in that direction, and it seems to me there is some sentiment moving in that direction, we should do so in as fair and fiscally prudent a manner as possible.

I believe that my amendment will move the bill in the direction of fiscal prudence by substantially reducing the drain that it would produce on the Treasury, and I believe that it will also move the bill in the direction of fairness by confining tax subsidies to those families that truly need them.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, is the Senator from Louisiana seeking recognition?

Mr. LONG. No.

The PRESIDING OFFICER. Does the Senator from New York yield time to the Senator from Delaware?

Mr. MOYNIHAN. The Senator from New York yields such time as needed. There are 20 minutes on the bill from this side, and the Senator yields the 20 minutes or as much as he may wish to the Senator from Delaware.

Mr. ROTH. I thank the Senator from New York and I ask the Chair to advise me when I have consumed 10 minutes.

Mr. President, I think it is important to keep in mind exactly what we are trying to do through this legislation, that is, to make it possible for Americans to go to college. The problem with the amendment proposed by the distinguished Senator from Ohio is that he is limiting the effect of this legislation so that in effect it is not of great help to most of working America.

Mr. President, I think first of all it is important to recognize what is happening to the cost of college. I just wish to point out in the New York Times on Sunday, July 6, there was an article that says:

> All but people in the very highest income brackets feel the pinch of paying for their children's college education. The effect this is having on college-going is substantial. From the look of things most middle income families are going to need all the help they can get.

Cost of college is rising substantially. According to the Congressional Budget Office total annual college costs increased approximately 75 percent between 1967 and 1976. According to the National Center For Education the average tuition fees at a private university increased 93 percent between 1967 and 1976, from $1,297 to $2,500.05.

It has been estimated for a child 1 year old it will cost something over $83,000 to send that child to private college, or $47,000 at a public school.

And yet, Mr. President, the Senator from Ohio would limit the benefits to those earning more than $30,000.

Mr. President, according to the Joint Committee on Taxation, 78 percent of the benefits will, under our legislation, go to families earning less than $30,000. Only 5 percent of the benefits will go to those earning more than $50,000. Only 11 percent of the benefits will go to those earning more than $40,000.

And I think it should be pointed out that those earning more than $30,000 are paying over 39 percent of the total income tax. So it is inequitable and it is unfair to claim that these people are getting a gift, as has been indicated earlier.

Mr. President, what we are trying to enable working America to do is to keep their own earnings to send their children to college. It makes no sense to put on an income limit, to require paperwork, needs allowances, and invasion of privacy.

I point out that we have many kinds of tax credits. They are not limited by an income limit. We have a home mortgage deduction. We have personal exemptions. We have child care credits. The administration has proposed a home insulation credit and a solar tax credit. But it does not propose that in these cases that there be any income limitation.

Mr. President, in the newspaper just a few weeks ago there was an article that a Congressman, Mr. HARRINGTON, was stepping down from Congress because he could not afford to send his children to college. In this case we are talking about $57,500.

A few years ago, Mr. Bell, the Commissioner of Education, resigned for exactly the same reason. He said he could not afford to send his children to college.

What we are trying to do, Mr. President, is to give some aid to the middle class, to the working Americans, not through an expensive grant form or which requires administrative paperwork but in a manner that enables them, as I say, to keep their earnings, has no expensive administrative costs, will not require and will not be a charge with respect to fraud and waste, as some of the other programs are.

So I would urge the Senate to again vote against this cap, exactly as it did last year.

The House of Representatives, in adopting legislation providing for a tax credit, has no income limitation. I think Senators ought to recognize that the people who are making $30,000 and $40,000, even $50,000, are entitled to some help in sending their children to college.

The facts show that the one group that is sending less children to college today is these middle-income people. The Roper poll recently showed, for example, that the average American considers middle class to be $20,000 to $40,000, and yet under this proposal we would give them no assistance.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. ROTH. I would be happy to yield to the Senator.

Mr. LONG. If I understand the amendment, it would provide that if a man is making $20,000, say—and we have lots of people working right in our office buildings, working for us, who are making that much, and, let us say, his wife is making $20,000, or he is making $30,000 and his wife is making $15,000, and they have four children going to college, they would not be able to get any benefit out of the bill.

Mr. ROTH. That is absolutely correct.

Mr. LONG. I think that the bill ought to be amended to make this a refundable tax credit, and I woulld vote for such an amendment, whoever offers the amendment. It seems to me that if you are going to help parents send their children to school, you ought to do it for all parents, not just some of them. This is a substantial benefit we are talking about. How would you like to go around and have somebody ask you, "Are you one of the Senators who voted for that tuition credit for youngsters to go to college?" If he is a man with four children and if he and his wife have a combined income of $40,000, he makes $25,000 and she makes $15,000, and you say yes, I voted for that credit, you would probably get punched in the nose rather than get thanks.

If you are going to vote for the credit, you should vote to treat all parents alike, and Senators should keep in mind that those couples who make over $40,000 as a couple have a lot of expenses to contend with, and they are paying a lot more taxes.

It is fine to talk about all they make. But if you talk about adjusted gross income, you had better talk about what they have left after getting through paying all these taxes at the Federal, State, county, and city level.

Mr. ROTH. I agree wholeheartedly with the Senator from Louisiana. It is my understanding that there is going to be a refundability provision offered at a later stage. As far as this Senator is concerned I would be happy to accept that so that there is equity built into it. As a matter of fact, we had it in the earlier legislation, but because of questions raised we decided it was better to

take it out and not have it in the bill reported.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. ROTH. I yield myself 5 more minutes.

But the Senator from Louisiana makes a very valid point that the people are paying high taxes, they are facing inflation. In many cases, the Senator says, they have one, two or three children, and it is extraordinarily difficult for them to make the after-tax savings to send those children to college.

Mr. LONG. Frankly, I say to the Senator, if we voted for the credit with the Metzenbaum amendment in it, I would think anybody would take his life in his hands to go before a civic club and discuss what he did with the people in that club, because about half of them would benefit and the other half would not benefit. I can imagine that the half who would not benefit would be just as sore as hornets to find out that you voted for something that took care of their neighbor but did not let them, paying as much tax as they pay, participate in that program.

Mr. ROTH. Absolutely.

Mr. LONG. Furthermore, who has the greater burden, the family that has $41,000 and four children to educate or the family that has $40,000 and one child to educate?

Mr. ROTH. That is a difficulty with this kind of an approach. You are getting into all kinds of difficult questions to answer, and you are overlooking basically what we are trying to do, which is to provide this country with well-educated people. I can give the Senator one illustration of exactly what the Senator is talking about.

A teacher came into my office about a year ago. She said she had a full-time job in the daytime, she had a nighttime job, and her husband worked as an administrator, and I gather they made well in excess of $40,000.

But they had three children in college. She said, "Mr. Senator, I cannot afford to pay that. We had to withdraw one of them. What are you going to do about it?" That is the very point the Senator from Louisiana is making now.

Mr. President, I hope the Senate again will reject this cap and provide that this tax credit, which has as its goal that of helping working America send its children to college irrespective of what they have, one, two, three, or four, and I would point out that the cost of this legislation is well within the budget. It has been provided for. It is substantially less than what the President has proposed in his extension of the college grant.

For that reason I urge the Senate to reject the amendment of the Senator from Ohio.

Mr. DANFORTH. Mr. President, will the Senator yield for a question?

Mr. ROTH. I would be happy to yield.

Mr. DANFORTH. I wonder if the Senator or Senator METZENBAUM or anyone has any idea of what the revenue effect would be of Senator METZENBAUM's amendment?

Mr. METZENBAUM. What? The revenue what?

Mr. DANFORTH. The revenue effect.

Mr. METZENBAUM. Two billion dollars.

Mr. DANFORTH. Two billion dollars when?

Mr. METZENBAUM. Between now and 1983.

Mr. DANFORTH. When the program is fully in effect, how much per year would it be?

Mr. METZENBAUM. I will have to give you that answer later.

Mr. ROTH. We do not have the exact figures, but I would say, if I understand these figures—Mr. President, I yield back the floor. We are seeking the figures. As soon as we get them, we will let the Senator know.

Mr. DANFORTH. Mr. President, who has the floor?

Mr. ROTH. Mr. President, I yielded back the floor, without yielding back the time of the Senator from New York.

Mr. MOYNIHAN. Yes. Mr. President, how much time has the Senator from New York?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. MOYNIHAN. Does the Senator from Missouri desire 2 minutes?

Mr. DANFORTH. Well, I would simply like to ask a question, either of the Senator from New York, the Senator from Ohio, or whoever can answer it.

As I understand, the program will be fully in effect 2 years hence; is that correct?

Mr. MOYNIHAN. That is right.

Mr. DANFORTH. What is the total revenue effect of the program, with and without Senator METZENBAUM's amendment?

Mr. MOYNIHAN. I believe those numbers are being computed at this moment by the Senator from Delaware (Mr. ROTH) and his able assistant, Miss Barker.

Mr. METZENBAUM. Mr. President, will the Senator yield? I believe I can answer that question, if the Senator from New York will yield.

Mr. MOYNIHAN. I yield.

Mr. METZENBAUM. It was $8.6 billion before the Hollings amendment. The Hollings amendment saved $3 billion. My amendment would save an additional $2 billion. The cost thereafter would be approximately $3.5 billion. That is between now and 1983. Those figures are cumulative figures between now and 1983.

Mr. DANFORTH. What would be more helpful as far as I am concerned would be not the cumulative figures, because the program does not start for 2 years, but when the program is fully in effect, what would be the revenue loss of the program with and without Senator METZENBAUM's amendment?

Mr. METZENBAUM. The revenue loss for fiscal 1981 of the bill as reported by the Finance Committee is $1.5 billion, rounded.

Mr. ROTH. I have the figures here. For 1979, the figures would be $116 million. In 1980, it would be $199 million. In 1981, when it would go into full effect, it would be $318 million.

Mr. DANFORTH. Three hundred eighteen million dollars?

Mr. ROTH. Yes.

Mr. DANFORTH. What would be $318 million?

Mr. ROTH. The savings.

Mr. DANFORTH. With Senator METZENBAUM's amendment?

Mr. ROTH. Yes.

Mr. DANFORTH. So in 1981 the total cost of the program for college education only, without Senator METZENBAUM's amendment, would be what?

Mr. ROTH. It would be $1.4 billion.

Mr. DANFORTH. And with Senator METZENBAUM's amendment?

Mr. ROTH. It would be $1.5 billion.

Mr. METZENBAUM. Mr. President, if the Senator will yield, let me give you the figures we have received from the Congressional Budget Office.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. ROTH. I would point out that the figures I quoted were from the joint committee.

Mr. MOYNIHAN. I yield the remaining 3 minutes to the Senator from Delaware, if he desires.

Mr. ROTH. I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I did not hear the Senator. Is he yielding to me?

Mr. ROTH. I yield the floor.

Mr. METZENBAUM. Let me respond to the Senator from Missouri. In 1981, with the Senator's amendment, the cost would be $1.481 billion, and with my amendment in, it would only be $645 million. If I may have the attention of the Senator from Missouri——

Mr. DANFORTH. Yes.

Mr. METZENBAUM. I am only answering for him. In 1983, the cost of the bill in its present form would be $1.523 billion. With my amendment, it would be reduced to $849 million, or approximately half.

Mr. DANFORTH. I thank the Senator.

Mr. PACKWOOD. May I ask how you come to those conclusions? I agree with you on the $1.5 billion for the bill in its present form, but your cap is $480 million?

Mr. METZENBAUM. My figures were from the Congressional Budget Office.

Mr. PACKWOOD. I am looking at——

Mr. METZENBAUM. Mr. President, I reserve the remainder of my time.

Mr. PACKWOOD. I am looking at figures from the Joint Committee on Taxation, which show that 89 percent of the benefits——

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Will the Senator from Delaware yield me 1 minute?

Mr. ROTH. I yield.

Mr. PACKWOOD. Eighty-nine percent of the benefits, according to the Joint Committee on Taxation, go to people making $40,000 or less, 38 percent to people making $30,000 or less, so, sliding from 40 to 30, you have about 49 percent of the benefits to those making between $30,000 and $40,000. So all you are saving is about 13 percent, or $200 million, as I look at it. I do not know where you cut the cost of this in half.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. How much time do the two sides have remaining, Mr. President?

The PRESIDING OFFICER. The Senator from Delaware has 2 minutes. The Senator from Ohio has 9 minutes.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally against both sides.

The PRESIDING OFFICER. Is there objection?

Mr. ROTH. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. METZENBAUM. I do not have the floor, do I?

The PRESIDING OFFICER. If neither side yields time, the time shall run equally against both sides.

Mr. ROTH. Mr. President, I ask unanimous consent that if a quorum call is going to be made, the time not be charged against either side. We have only 2 minutes left.

The PRESIDING OFFICER. Is there objection?

Mr. DANFORTH. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MOYNIHAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MOYNIHAN. What is the rule when neither side wishes to use time and the time is running?

The PRESIDING OFFICER. Under the precedents of the Senate, the time runs equally against both sides.

Mr. MOYNIHAN. Then it is not possible for us to object.

The PRESIDING OFFICER. Then what?

Mr. MOYNIHAN. That is the precedent, and it must be followed.

The PRESIDING OFFICER. The Senator is correct.

Mr. MOYNIHAN. What is the precedent for breaking precedents?

The PRESIDING OFFICER. It requires unanimous consent.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the time——

Mr. GOLDWATER. I object, anyway.

Mr. MOYNIHAN. Objection having been heard, this Senator withdraws any implication he might have made that he might have been going to make a unanimous-consent request.

The PRESIDING OFFICER. The time runs equally against both sides.

Mr. ROTH. Is the Senator from Ohio willing to yield back the remainder of his time?

Mr. METZENBAUM. No; I am considering amending my amendment. That is the reason I am perfectly willing to leave the time as it is.

Mr. BARTLETT. Mr. President——

The PRESIDING OFFICER. Who yields time?

Mr. BARTLETT. Will some Senator yield me enough time for a unanimous-consent request?

Mr. GOLDWATER. I yield it.

Mr. BARTLETT. Senator Goldwater yields me such time as he has.

Mr. SCHMITT. You may have a minute of my time.

Mr. BARTLETT. Will someone yield me time?

Mr. METZENBAUM. I yield.

Mr. BARTLETT. The distinguished Senator from Ohio, I think, is yielding me a few seconds to ask that Mike Roush of my staff be accorded the privilege of the floor during the consideration of this bill and all amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I would like to be heard.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I was quite certain that my amendment achieved a certain objective but I was not positive about it. I wanted satisfactory clarification provided for myself. The amendment has a specific intent. I thought it was drafted in accordance with that intent. I am now satisfied that it is.

Some have indicated a concern that if the earnings of the individual or the family run between $30,000 and $40,000, and if they have four children in college, that still might be an unbearable burden for them because of the high cost of education today.

The intent of this amendment was and is to provide that the tax credit would be applicable between $30,000 and $40,000 and phased out at $40,000 if there was one child in college; it would go to $40,000 to $50,000 if there were two children in college, and proportionately higher as the number of children in college that the particular family had increased. Some Members of the Senate have indicated some concern on that subject. I feel that that was the desirable road to go because that extra $10,000 after taxes would not really provide that much extra funding, particularly in view of the high cost of education at the present time.

I am now satisfied to represent to the Senate that it is both the intent and the structure of the language of the legislation that that indeed is what will occur under this legislation. Should there be any question raised subsequently, the Senator from Ohio would be prepared to see to it that appropriate clarification was made at some point in the legislative process.

I reserve the remainder of my time.

Mr. ROTH. Mr. President, have I any time remaining?

The PRESIDING OFFICER. The Senator has no time remaining.

SEVERAL SENATORS. Vote. Vote.

Mr. METZENBAUM. What did the Senator from Delaware ask?

The PRESIDING OFFICER. He asked how much time he had remaining. He has no time remaining. The Senator from Ohio still has time remaining.

Mr. METZENBAUM. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. EASTLAND), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from South Dakota (Mr. McGOVERN) are necessarily absent.

The result was announced—yeas 39, nays 58, as follows:

[Rollcall Vote No. 319 Leg.]

YEAS—39

Abourezk	Hart	Metzenbaum
Bayh	Haskell	Muskie
Bumpers	Hatfield, Mark O.	Pell

NOT VOTING—3

Eastland	Johnston	McGovern

So the amendment (No. UP 1656) was rejected.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ROTH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. LEAHY. Will the Senator yield?

Mr. DOMENICI. Yes.

Mr. LEAHY. Mr. President, I ask unanimous consent that Harry Jaffe be granted privilege of the floor during debate and voting on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOMENICI. Mr. President, I yield to the Senator from Wyoming for a unanimous consent request.

Mr. WALLOP. Mr. President, I ask unanimous consent that Bob Reynolds of my staff be granted privilege of the floor throughout the debate and votes on this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask

unanimous consent that Letitia Chambers of my staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1657

(Purpose: To strengthen participation of private school children in Elementary and Secondary Education Act programs)

Mr. DOMENICI. Mr. President, I have an unprinted amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 1657.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, between lines 18 and 19, insert the following:

TITLE I—TUITION TAX CREDIT

On page 27, after line 4, insert the following:

TITLE II—PARTICIPATION OF PRIVATE SCHOOL CHILDREN IN ELEMENTARY AND SECONDARY EDUCATION ACT PROGRAMS

AMENDMENT RELATING TO PRIVATE SCHOOL PARTICIPATION IN TITLE I PROGRAMS

SEC. 201. Section 141A of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"PARTICIPATION OF CHILDREN ENROLLED IN PRIVATE SCHOOLS

"SEC. 141A. (a)(1) To the extent consistent with the number of educationally deprived children in the school district of the local educational agency who are enrolled in private elementary and secondary schools, such agency shall make provision for including in projects assisted under this title special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) which meet the requirements of section 122, subsections (a), (b), and (d) of section 124, and subsections (b) and (c) of section 126, and which provide to those children an opportunity to participate in programs and projects assisted under this title on a basis equitable to that provided to similarly deprived children enrolled in public schools.

"(2) Expenditures for educational services and arrangements pursuant to this section for educationally deprived children in private schools shall be equal (taking into account the number of children to be served and the special educational needs of those children) to expenditures for children enrolled in the public schools of the local educational agency.

"(3) The Commissioner shall set forth procedures for the determination of the pro-rata share of funds necessary to provide equitable expenditures for educationally deprived children enrolled in private schools, and such other regulations as may be required to implement this section.

BY-PASS ARRANGEMENTS

"(b)(1) If a local educational agency is prohibited by law from providing for the participation in special programs for educationally deprived children enrolled in private elementary and secondary schools as required by subsection (a), the Commissioner shall waive such requirement, and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of subsection (a).

"(2) If a State educational agency does not choose or is unable to provide for participation in special programs for educationally deprived children enrolled in private elementary and secondary schools as required by subsection (a), the State educational agency shall notify the Commissioner at such time as the Commissioner deems appropriate. Upon notification, the Commissioner shall waive the requirements of subsection (a) and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of subsection (a).

"(3)(A) If any private elementary and secondary school determines that the State or local education agency has substantially failed to provide for the participation on an equitable basis of the educationally deprived students enrolled in that school, the private school may appeal to the Commissioner following such procedures as he may establish.

"(B) If the Commissioner determines that a State or local educational agency is not providing for the participation on an equitable basis of educationally deprived children enrolled in private elementary and secondary schools as required by subsection (a), he may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of subsection (a) upon which determination the provisions of subsection (a) shall be waived.

"(C) The Commissioner shall decide on any appeal from a private school under this paragraph within 90 days.

"(D) After the decision of the Commissioner pursuant to subparagraph (C) of this paragraph, the Commissioner shall not take any final action under this section until he has afforded the State educational agency and local educational agency affected by such action at least 60 days' notice of his proposed action and an opportunity for a hearing with respect thereto on the record.

"(E) If a State or local educational agency is dissatisfied with the Commissioner's final action after a hearing under subparagraph (C) of this paragraph, it may within 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commission. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

"(F) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

"(G) Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Commissioner or to set aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

"(c)(1) When the Commissioner arranges for services pursuant to this section, he shall, after consultation with the appropriate public and private school officials, pay the cost of such services, including the administrative cost of arranging for the services, from the appropriate allocation or allocations under this title.

"(2) Pending final resolution of any investigation or complaint that could result in a determination under this subsection, the Commissioner may withhold from the allocation of the affected State or local educational agency the amount he estimates would be necessary to pay the cost of these services.

"(3) Any determination by the Commissioner under this section shall continue in effect until the Commissioner determines that there will no longer be any failure or inability on the part of the local educational agency to meet the requirements of subsection (a).".

PARTICIPATION OF CHILDREN ENROLLED IN PRIVATE SCHOOLS IN TITLE IV PROGRAMS

SEC. 202. (a) Section 406(b) of the Elementary and Secondary Education Act of 1965 is amended by inserting "(1)" after the subsection designation and by adding at the end thereof the following new paragraph:

"(2) The Commissioner shall set forth procedures for the determination of the pro rata share of funds necessary to provide equitable expenditures for children enrolled in private schools and such other regulations as may be required to implement this section."

(b) Section 406(d) of such Act is amended by inserting "(1)" immediately after the subsection designation and by adding at the end thereof the following new paragraph:

"(2) If a State educational agency does not choose or is unable to provide for the participation in programs of children enrolled in private elementary and secondary schools as required by this section, the State educational agency shall notify the Commissioner at such time as the Commissioner deems appropriate. Upon notification, the Commissioner shall waive the requirements of this section, and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this section.

"(3) If a private elementary and secondary school determines that the State or local educational agency has substantially failed to provide for the participation on an equitable basis of children enrolled in private schools, the private school may appeal to the Commissioner following such procedures as he may establish. The Commissioner shall rule on any appeal from any private school under this subsection within 90 days."

STUDY OF THE IMPACT OF FEDERAL PROGRAMS ON PRIVATE SCHOOLS

SEC. 203. (a) The Secretary of the Department of Health, Education and Welfare shall conduct, either directly or by way of grant, contract, or other arrangement, a thorough study of—

(1) the impact of current Federal assistance programs in elementary and secondary education on private schools; and

(2) the potential impact of a tuition tax credit for private elementary and secondary education on public elementary and secondary schools.

(b) The Secretary shall report to the President and to the Congress, not later than one year after the date of enactment of this Act, on the results of the study required by subsection (a) of this section, together with—

(1) proposals which are considered constitutional for alternative methods of providing assistance to nonpublic elementary and secondary schools; and

(2) such other additional recommendations as the Secretary deems appropriate.

(c) There are authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, even though I have an hour, I am not going to take much time.

Mr. MOYNIHAN. Mr. President, if I may interrupt the Senator, I suggest it is an hour on his amendment, equally divided.

Mr. DOMENICI. I understand.

Mr. President, I yield myself 10 minutes.

Mr. President, the bill before us today provides fiscal relief for two purposes. First, it contains a provision establishing a tuition tax credit for higher education, as originally introduced by Senator ROTH. This proposal has passed the Senate three times, and on each occasion I have actively supported and voted for this much needed relief from the spiraling costs of college tuition for middle-income families. The second purpose of the bill is to provide a tuition tax credit for parents of private school students. The policy questions inherent in these two provisions are quite different, and for that reason I believe the merits of both should be considered separately.

The cost of higher education has increased significantly over the past 10 years. At the same time, disposable income available to middle- and lower-income families to spend on a college education for their children has actually decreased due to inflation and increased tax liability. The resultant squeeze on families sending their children to college is a major problem. This country has made a strong commitment to the proposition that all who wish to go to college should have access to it. The Congress has clearly adopted this policy through the provision of student grant and loan programs.

The basic educational opportunity grant and other student aid programs have made access to higher education possible for children at the lower end of the income scale. We are now faced with a situation where the poor have access to college, the rich certainly are able to send their children to college, but many middle-income families, ineligible for student aid and without the needed disposable income, are unable to afford college for their children, without great sacrifice.

I believe the Congress should continue the established policy of seeing that all qualified persons have access to higher education if they so desire. The easiest, least entangling and least bureaucratic way of providing fiscal relief to these middle-income families is through a tax credit. I am firmly convinced that a tax credit for higher education is a sound and desirable public policy.

The issues raised by the elementary and secondary tax credit are of a different nature. In this country children already have access to elementary and secondary education through the public schools. Private schools provide an option or choice for families who desire, for their children, an education that is different than the public school provides. I myself am a product of a private parochial school. Because I place great stock in the values inculcated by parochial schools, several of my own children attend parochial school. I have exercised this option because I want my children to learn the values that I adhere to, as they are taught in church schools.

Not only am I a product of Catholic education, but I happen to have members of my family who have given their entire lives as educators in the parochial school system. My older sister has been a teacher, a principal and a nun for almost 30 years.

As a supporter of private education, I recognize that inflation and increased taxes on middle- and lower-income families have made it more and more difficult to opt for a private education. I am also sympathetic to the plight of private institutions Most private schools are struggling to make ends meet. Inflation has made the cost of education more expensive and many private schools are in the sad situation of having to reduce services or raise tuition.

Mr. President, I am a strong supporter of education. An examination of my record on educational issues will show that, as a legislator, I have given high priority to education. As a fiscal conservative with a commitment to a balanced budget, I have felt that support for education should not be diminished, but in fact that it should be increased substantially. I believe an investment of Federal dollars in the education of our children is a sound investment in the future. If we have schools, public and private, who are doing their jobs well, we can eliminate many of the social problems of this country.

Federal support for education has risen dramatically over the past few years, but it still constitutes less than 10 percent of the total funds used to operate our public school system. Procedures for financing education vary from State to State, and it should be stressed, Mr. President, that education is and should remain primarily the responsibility of State and local officials.

In recent years the Federal Government has provided programs for special purposes targeted at specific students. That aid flows to the public schools, and private school children are eligible for these services through the public schools. Unfortunately, while the system for serving private school students with Federal money is constitutional, it is not working. While the average per pupil Federal expenditure for students in public schools is $128 per pupil, the average per pupil Federal expenditure for private school students is estimated by HEW to be only $40, and I am told that figure is overstated.

Private school students are not receiving their fair share of Federal programs. I believe this fact has been partially responsible for the push for tuition tax credits for the parents of private school students.

Since the mechanism for providing Federal programs to private school students is not adequate, I believe it is appropriate to explore other methods to see that private school involvement in Federal programs is equitable.

Tuition tax credits for elementary and secondary education would certainly help hard-pressed families who wish to send their children to private schools. For that reason, I am sympathetic to such a tax credit. When elementary and secondary credits were first proposed I was taken by the idea. It seemed an ideal way to help taxpayers and to provide some fiscal relief for struggling private institutions. The fact that private school students are not receiving a fair share of Federal funds made the idea even more appealing.

In studying the issue, which I have now done in depth, I found that there were several policy issues to be considered. Federal policy in education has centered around access—access to higher education for all students regardless of income level, access to public schools for the handicapped, access to the public school classroom through compensatory programs and bilingual programs, access for all students to needed materials and books.

The elementary-secondary tuition tax credit does not provide basic access to education, but rather provides choice for those who already have access. I believe in freedom of choice. Our system should and does allow choice. It is a far different issue, however, to ask the Federal Government to provide choice in addition to access.

Mr. President, I have serious questions concerning the Federal Government's involvement in private education. I know that most private school educators favor the elementary and secondary tax credit. I have strong reservations, however, about allowing a Federal "foot in the door" of private schools. The entanglement which could occur in regard to administration of the tax credit is not to be taken lightly.

Another area of concern to me was the level of the proposed tax credit. The current Federal average-per-pupil expenditure is $128. The tuition tax credit would provide up to $250 per pupil. I recognize that private school students are not now getting their fair share, and I believe it is encumbent upon the Congress to see that they do.

However, tax credits of $250 will overcompensate for the inequity that exists and could provide an average Federal expenditure on private school students that is twice as much as the average per pupil expenditure for public education.

From the standpoint of public policy, I cannot justify in my mind this disparity. Perhaps some means other than a $250 tuition tax credit, which is general aid, can be found to provide private school students with a fair share of the targeted programs which the Federal Government provides for education.

Mr. President, my amendment proposes to increase the participation of private school students in existing Federal elementary and secondary school programs. The purpose of this amendment is to decrease the disparity between Federal expenditure on public and private school students. Since the current mechanism for serving private school students is not adequate, I have worked to develop a plan to improve the mechanism so it will work.

Mr. President, this issue is very complex, due to the fine line between what is

and what is not constitutional in regard to aid for private school students. Of the two major proposals the Senate will consider this year to aid private elementary and secondary schools, I believe one, the new title XII to the Elementary and Secondary Education Act, which has been reported by the Human Resources Committee, is clearly unconstitutional.

It provides direct grants to private schools, which I believe offers a false promise to parents of children enrolled in private schools. I also believe the other proposal, tuition tax credits for elementary and secondary education, is unconstitutional, though that is a debatable point.

The amendment I propose, which is constitutional, will provide an increase in participation in Federal programs for private school students. The amount of the increase is difficult to project. While the disparity in per pupil expenditure between public and private students will not be eliminated, I do believe my amendment will significantly increase private student participation in existing Federal programs for elementary and secondary education.

The current mechanism for private school participation puts the burden for service on the local public education agency. The public schools get the funds, plan the programs to meet their own needs, and then allow eligible private school students to participate in the program. This mechanism works well in some school districts and does not work at all in others. Some districts refuse to provide service or offer only token assistance. Even in the local districts that do meet the responsibility of serving private school students, the programs are planned around public school and not private school needs.

In an effort to rectify the disparity in service, the administration has recently taken several steps to increase participation of private school students. In addition, the Human Resources Committee in the Education Amendments of 1978 requires State and local education agencies under titles I and IV of the Elementary and Secondary Education Act to provide for equality of service. However, if we are to be certain that eligible private school students receive a fair share, additional action will be necessary.

My amendment proposes several steps in order to insure service for private school students. The first step directs that the Commissioner of Education shall establish, by regulation, procedures to be followed in determining a pro rata share of service for private school students. Thus, public and private education agencies will be clear on what constitutes equitable service.

If a private school determines that its students are not receiving a fair share of services, it can appeal to the Commissioner. My amendment defines the appeals process and directs the Commissioner to rule on all appeals within 90 days. The Commissioner is directed to waive the State or local education agency requirement to serve students and to bypass the State or local education agency, providing service directly through whatever arrangements the Commissioner deems appropriate. The public education agency allocation shall be reduced by the private schools' "fair share" of expenditure in order to fund these direct services.

In several States it is illegal for local education agencies to serve private school students. In order to provide services in these States, the Elementary and Secondary Education Act contains a bypass provision under which the Commissioner of Education makes other arrangements to serve private school students. This is usually accomplished by contracting with a private nonprofit, nonsectarian organization to provide the services directly to the private school students.

The bypass arrangements, where they exist, have several advantages. The private school students get their fair share of the funds, the programs are planned around the needs of the private school students, and the local education agencies are relieved of the responsibility to serve such students.

The bypass mechanism works to the advantage of all. My amendment will expand this bypass mechanism in ESEA in title I which provides compensatory services, and in title IV, which provides for materials, equipment and innovative programs.

The amendment will allow any State on behalf of itself and all its local education agencies to invoke the bypass arrangement. The State will simply notify the Commissioner of Education that it does not intend to serve private school students.

The Commissioner, by regulation, will set the deadline for such notification prior to the school year. Upon notification, the Commissioner will reduce the grant award for the State education agency by the private schools' pro rata share based upon regulations promulgated by the Commissioner. The Commissioner will then make arrangements for the provision of services using the private schools' pro rata share.

This expansion of the bypass to any public education agency which wants it will provide an option in areas where the present system is not working.

My amendment then provides three situations where the bypass will be used:

First. In States where it is unlawful for the public school to serve private school students (as in current law);

Second. In State education agencies which choose not to offer such services; and

Third. In State or local education agencies which assume the responsibility for serving private school students but fail substantially to do so.

The final portion of my amendment directs the National Institute of Education to conduct a study of the impact of current Federal assistance on private schools, and an analysis of the potential impact on public schools of a tuition tax credit for private elementary and secondary school students.

This study is necessary for several reasons. The debate concerning elementary and secondary tax credits has suffered from both a lack of valid data concerning current private school involvement in Federal programs, and lack of objective analyses on the potential impact of tax credits. Claims that tax credits would destroy public education are certainly cause for lengthy and detailed analysis. Tuition tax credits are popular though controversial, and I do not expect the issue to disappear. Congress needs real information, not emotional arguments, concerning the impact of elementary and secondary tax credits.

In summary, my amendment is designed to increase participation of private school students in Federal education programs. This is accomplished through stronger requirements, an appeals procedure, and through expansion of the bypass mechanism which insures that the private school gets its fair share and allows programs to be based upon the needs of the private school students.

This amendment does not expand the eligibility of private school students or add any new programs for which they were heretofore ineligible. It simply deals with the mechanism for providing service that these children are already eligible for under the Elementary and Secondary Education Act.

Several sets of contradictory figures have been bandied about in the debate on tuition tax credit. However, the one thing that everyone agrees on is that the Federal Government programs are not providing equal services to eligible private school students. My amendment is designed to rectify this fact. I urge all Senators, regardless of position on elementary-secondary credits, to support my amendment which provides for additional service to private school students in a manner that is constitutional.

Mr. President, this is a difficult issue. As a strong supporter of education, both public and private, I have given long and careful thought and study to this matter, as have many of my colleagues. While this is not an easy issue, I want to commend my colleagues on the Finance Committee for their attention to and their support for education.

In closing, Mr. President, let me summarize briefly, once again, the provisions in my amendment:

First, it directs the Commissioner of Education to establish procedures for determining the pro rata share of funds necessary to provide equitable expenditures under title I and title IV of the Elementary and Secondary Act.

Second, it establishes an appeal process for use by private or parochial schools which feel that their students are not getting their fair share as mandated by Congress.

Third, we expand the public school bypass mechanism which currently exists in States where service to private or parochial school students is prohibited by State law. The bypass mechanism will be expanded to any State which prefers to use that mechanism for serving private school students.

That merely means that, in some States, a nonprofit entity can be established to accept and distribute Federal money to private schools in a constitutional manner.

Fourth, there has been much concern on the part of public schools that aid to private and parochial schools, by way of

the tax credit which was defeated today, might have an adverse impact on the public schools. My amendment directs the Secretary to study the impact of Federal programs on private school students, constitutional methods of increasing aid to private schools, and an analysis of the potential impact on public schools of a tuition tax credit for private elementary and secondary education.

I am a strong proponent of tax credits for higher education. I have no questions concerning the need for and the appropriateness of the original Roth proposal for higher education credits.

I understand and appreciate what Senators PACKWOOD and MOYNIHAN were trying to do for private school students. I had reservations, however, concerning the elementary-secondary tuition tax credit. I fear that the controversy over the elementary-secondary portion could have the effect of killing the higher education portion. Since the President has indicated he will veto the measure, I was concerned that Senators opposed to the elementary-secondary portion will be hesitant to vote for a veto override.

In addition, I was concerned about the constitutionality of the elementary and secondary credit. The amendment I am offering will provide programs in a manner known to be constitutional. Thus, the current inequity to private school students can be lessened. I ask the Senate to adopt this important amendment as a part of H.R. 3946.

It is here and now, while we are in the midst of a thorough debate on Federal support for private school students, that we should let our intent be known. Past inequities to private school students must be corrected. I urge passage of this amendment.

Mr. MOYNIHAN. Mr. President, although I can speak only for myself, I believe it would be the disposition of those of us who have joined in sponsoring this legislation to accept and to vote for the amendment of the Senator from New Mexico.

I take the time of the Senate to draw attention to a certain anomaly in the proposal before us.

We have heard through the better part of 3 days of debate about the unconstitutional nature of our tuition tax credit, which would provide aid to the parents of students in nonpublic schools. It is evident that that position has prevailed. The members of my party, it seems, voted 2-to-1 that any such aid would be unconstitutional.

Now we proceed to the next step, proposing a large effort to increase the flow of direct aid, in one form or another, to these very schools, to which indirect aid was held to be unconstitutional. It is a fact, then, that just as the opinions of the Court in this matter are in disarray, so is the practice of the Government.

The position I would find most favorable—not surprisingly—is that stated by Chief Justice Burger in his opinion in the Nyquist decision. He said:

> The establishment clause does not forbid governments, State or Federal, to enact a program of general welfare under which benefits are distributed to private individuals, even though many of those individuals may elect to use those benefits in ways that "aid" religious instruction or worship.

The Chief Justice concluded:

> However sincere our collective protestations of the debt owed by the people generally to the parochial school systems, the wholesome diversity they engender will not survive on expressions of good will.

We have chosen today not to provide aid to students in order that the enrollments in these schools might be maintained or even, conceivably, increased. Now the proposal of the Senator from New Mexico would increase the flow of HEW program funds in the manner contemplated by the Democratic Party platform in 1964, in the plank which I wrote. I still think is is a good thing to do.

There was a small office in the Office of Education that looked after this matter. One of the first steps the current Secretary of HEW took when he came to office was to abolish it. Then when our bill was put forth he announced that he was creating the office which in fact he had been busy abolishing. So this measure will undoubtedly add to the bureaucracy. We know that.

I have one concern: what this measure will in large measure accomplish is simply to add to the slack and waste in the school system which now accounts for the fact that the average public systems generally cost four times as much per capita as nonpublic systems. We will get more nonsense this way. I doubt that we will get more education. But it will do little harm, I suppose.

However, I would like to make one further suggestion, and for that reason I send to the desk a perfecting amendment to the amendment of the Senator from New Mexico.

The PRESIDING OFFICER. Until the time on the pending amendment either has been used or yielded back, the amendment would not be in order.

Mr. MOYNIHAN. I withhold my request. I will yield my time back very shortly.

I should like to describe the amendment, which I think the Senator will find rather simple.

This amendment simply adjusts section 203 of his proposal, which asks that the Secretary of the Department of Health, Education, and Welfare conduct the study he discusses and that he report the results to Congress a year later.

Mr. President, I regret to say this, but I have no confidence that a study conducted by the incumbent Secretary of Health, Education, and Welfare in this matter would be unbiased. An unbiased man would never have requested of the Attorney General that he rule on the constitutionality of this matter by selecting from our bill only the provision for aid to nonpublic schools, so as to make certain that the response of the Attorney General would be that our bill was unconstitutional. In fact, only a caricature of our bill was being considered.

Mr. DOMENICI. The Senator is going to ask that the Comptroller General do that?

Mr. MOYNIHAN. I ask that.

Mr. DOMENICI. That is what I was also going to propose. I will have no objection.

Mr. MOYNIHAN. That is fine. The Comptroller General is an officer of Congress, and we have the highest regard for the personal capacities of the incumbent and for the continued performance of his good office.

With that change, I am happy to support the Senator from New Mexico.

I suggest one further change. His section 203, subparagraph 2 reads:

> The potential impact of a tuition tax credit for private elementary and secondary education on public elementary and secondary schools.

I wonder if he will agree to change that wording to "public and private elementary and secondary schools," because we have been asked by both the Senator from Minnesota and the Senator from California about the impact of tuition tax credits on both the public and nonpublic sector.

Mr. DOMENICI. I say to my friend from New York that we modify my amendment to provide that the "Comptroller General" not the Secretary of HEW will undertake these studies. I also agree to add "public" and on line 18, page 8 of my amendment.

Mr. MOYNIHAN. That is fine.

Will the Senator submit those amendments when we are through and yield back our time?

Mr. DOMENICI. I will shortly, that is right.

Mr. MOYNIHAN. In that case, Mr. President, I wonder if there is another Senator who wishes to speak on this matter?

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that Mr. Tom Cator, of Senator HUMPHREY'S staff, be accorded the privilege of the floor during the debate and votes on the present bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for 2 minutes.

Mr. DOMENICI. Mr. President, I greatly appreciate the comments of the distinguished Senator from New York, and I simply wish to make this point.

We are not adding new programs. I tend to agree with the Senator that there probably is a better way to spend the dollars we do spend. My amendment seeks to change some of these laws so Federal dollars will be spent more effectively.

We do not add any new constitutional issue because the kinds of services presently being received in the United States by some students in parochial schools have been ruled constitutional. We are just trying to direct some attention to the problem areas where eligible students are not getting assistance, in that respect nothing else changes. I am merely saying since we do not have the tax credit we should do everything we can to see that the original intention of Congress be carried out in terms of students with special needs. We should

make certain that they receive the services they need in a constitutional manner.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, I thank the Senator from New Mexico for his initiative.

I take this opportunity to note that the senior Senator from Rhode Island is in the Chamber and that he proposes a new section. He informed us yesterday that there will be a new title XII to the ESEA bill which he will be bringing forward shortly. It will provide up to a half billion dollars in aid for nonpublic schools, according to schedules that will be discussed and reported on by the Senator from Rhode Island when he brings the bill to the floor. I believe that will occur immediately after we dispose of the legislation before us now.

Mr. DOMENICI. Mr. President, will the Senator from New York yield for just a moment?

Mr. MOYNIHAN. I am happy to yield to the Senator from New Mexico, and then I will yield to the Senator from Rhode Island.

Mr. DOMENICI. I understood that the Senator wanted to go ahead and modify the amendment before we proceeded any further.

Mr. MOYNIHAN. I do think we are going to proceed. I think the Senator simply wants to make a comment.

Mr. DOMENICI. Let me see if we can do it this way.

I send a modified version of my amendment to the desk which complies and comports with the request of my good friend the Senator from New York and I ask unanimous consent that the modified amendment be in order.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request by the Senator from New Mexico that the amendment which he has offered be modified in accordance with what he sent to the desk?

Hearing none, it is so ordered. The amendment is so modified.

The modified amendment is as follows:

"(3) If a private elementary and secondary school determines that the State or local educational agency has substantially failed to provide for the participation on an equitable basis of children enrolled in private schools, the private school may appeal to the Commissioner following such procedures as he may establish. The Commissioner shall rule on any appeal from any private school under this subsection within 90 days."

STUDY OF THE IMPACT OF FEDERAL PROGRAMS ON PRIVATE SCHOOLS

SEC. 203. (a) The Comptroller General shall conduct, either directly or by way of grant, contract, or other arrangement, a thorough study of—

(1) the impact of current Federal assistance programs in elementary and secondary education on private schools; and

(2) the potential impact of a tuition tax credit for public and private elementary and secondary education on public elementary and secondary schools.

(b) The Comptroller General shall report to the President and to the Congress, not later than one year after the date of enactment of this Act, on the results of the study required by subsection (a) of this section, together with—

(1) proposals which are considered constitutional for alternative methods of providing assistance to nonpublic elementary and secondary schools; and

(2) such other additional recommendations as the Comptroller General deems appropriate

(c) There are authorized to be appropriated such sums as are necessary to carry out the purposes of this section.

Mr. DOMENICI. I thank the Senator.

Mr. MOYNIHAN. I thank the Senator, and I thank the Chair.

I yield to the Senator from Rhode Island such time as he may desire.

Mr. PELL. I thank the Senator very much.

Mr. President, the bill which immediately follows this, the College Opportunity Act, S. 2539, will contain provisions for increasing the income limitations of the families of those students who now get basic grants from $12,500 to approximately $25,000.

The bill we are talking about, however, of concern to the Senator from New Mexico is S. 1753, the Education Amendments of 1978, which we have reported out of the Committee on Human Resources and which is on the calendar, I am informed by the leadership that it will be taken up within the next week. That is the expectation.

Mr. MOYNIHAN. Fine.

Mr. PELL. That legislation contains in it two items I think of very real interest to the discussion in the Chamber here today. It contains a bypass provision in title I of the Elementary and Secondary Education Act. By chance if any Senators have it before them, it is at page 59. This provision contains many of the elements of the amendment of the Senator from New Mexico. In addition to that S. 1753 contains another provision in title XII that would provide a half billion dollars for textbooks, instructional materials, guidance and counseling, speech and hearing services, psychological services, testing services, and transportation services, all previously approved as being constitutional. It would simply enlarge the amount of money going there.

So that is another way of helping the private schools, the students, and their parents who certainly need help.

I recognize the merit of the amendment of the Senator from New Mexico and I intend to support it, but I add that if any perfecting amendment is needed, or we may want to examine it in greater length, we will have another go-round within a week as we go over the bypass provisions in our act.

Mr. MOYNIHAN. I thank the Senator from Rhode Island, who has been as staunch and effective in this matter as he was in founding the Pell grants, which he hopes now to expand.

Having become excessively sensitive to the problems of constitutionality in the course of this debate, I wish to warn him that under the provisions of Wolman against Walter, decided last June, we may provide textbooks but not teaching aids. Teaching aids are unconstitutional. Textbooks are different. They are apparently not teaching aids these days. The Court is passing on the quality of textbooks as well as on the Constitution.

Mr. PELL. The Senator may have noticed I very carefully did not mention teaching aids.

Mr. MOYNIHAN. I did notice, and I warn: do not let any careless staff work slip "teaching aids" in.

If you will read the debate of the House of Representatives in 1787, it was then held that textbooks are constitutional, and that teaching aids are not. A map, for instance, is a teaching aid. A book of maps, which is an Atlas, poses a deep problem. But I do not think we can resolve this today.

Mr. PELL. Teaching aids, and "aides" spelled with an "e" between the "d" and "s."

Mr. MOYNIHAN. Teaching aides could consist of the Sisters of Mercy, and then the roof would certainly tumble down.

Mr. PELL. So aids or aides are not constitutional; is that correct?

Mr. MOYNIHAN. I think that is the present standing in the Court. But we have not heard so for sure. The Court is in recess, so I think we are safe in that judgment, at least until October.

I would like to ask one last question of the Senator from New Mexico. Would he have any judgment about the approximate extent of the flow of additional funds which might proceed under this? It is not possible to assess?

Mr. DOMENICI. No.

Mr. MOYNIHAN. That is something we might learn from the Comptroller General?

Mr. DOMENICI. That is correct. I believe if it turns out that this is a more equitable flow, it may put us in a posture of needing additional funds. Of course, it would be to the overall cost of the program not to any one phase of it, to the private or to the public. It could be that equalizing these services will cause us to need to put more money into the overall appropriation.

I want to say to the Senator from Rhode Island that I am most appreciative of his support here today. I clearly understand that we have a chance to perfect and make much improvement on the amendment the Senate will vote on here today. I hope it will help the Senator's bill when the Senate tonight, as I think they will, indicates its support for more equity in terms of special needs of our Nation's children, whether they are in private or parochial schools.

● Mr. JAVITS. Mr. President, I believe the Domenici amendment is based on a sound principle, to wit, nonpublic school children should participate fully in the existing Federal education programs in the Elementary and Secondary Education Act (ESEA).

Later this month, the Senate will turn to S. 1753, the Education Amendments of 1978, which will reauthorize ESEA. During 2 years of consideration of these amendments by the Human Resources Committee, I and other members have carefully reviewed the participation of nonpublic school children in these programs. We have found that participation to be woefully low in terms of numbers of students and in terms of dollars per student. I have authored or cosponsored over 15 amendments now

contained in S. 1753, as reported by the Committee on Human Resources, which strengthen and will increase the participation of nonpublic school students.

I submit for the RECORD the list of these nonpublic school related amendments prepared by the Human Resources Committee.

Mr. President, this amendment is a means for the Senate to express its desire to use ESEA programs to aid nonpublic school students who qualify. Between today and the floor consideration of S. 1753, we can review in detail the provisions of the Domenici amendment and determine if any improvements are advisable. For these reasons, I will vote for this amendment.

The material follows:

[From the Human Resource Committee staff paper]

PROVISIONS FOR PARTICIPATION OF CHILDREN IN PRIVATE, NON-PROFIT SCHOOLS IN FEDERAL ELEMENTARY AND SECONDARY EDUCATION PROGRAMS AS AMENDED BY S. 1753, THE EDUCATION AMENDMENTS OF 1978

TITLE I: SPECIAL EDUCATIONAL PROGRAMS AND PROJECTS FOR EDUCATIONALLY DEPRIVED CHILDREN

The largest single program of aid to elementary and secondary schools, Title I will provide well over $2 billion to local school districts for the 1978–79 school year. School districts receive aid according to their numbers of children in low-income families. Within the districts, aid goes to the schools with the greatest numbers or proportions of such children. The aid is used for special compensatory programs designed to contribute to the cognitive, emotional, social, or physical development of educationally disadvantaged children.

Current law

The Title I legislation currently enacted requires that local public schools which receive Title I funds extend the services provided from those funds to children in nonpublic schools who live within the attendance area served by the public school. Non-public school children must participate on an equitable basis with the public school children. When a public school system fails to include such children as the law requires, or is prohibited from doing so by state law, then the U.S. Commissioner of Education must by-pass the public agency and arrange for appropriate services to the non-public school children. Funds for this purpose are to be derived from the local school system's allocation.

Additional provisions in S. 1753

S. 1753 supplements the existing law with the following provisions:

Where a public school provides compensatory services to its own students from state or local funds and therefore is excluded from the Title I program, Title I services must be made available to eligible non-public school students who otherwise would have participated in that school's Title I services.

When the Commissioner of Education arranges for a by-pass and deducts funds from the public school system's allocation to provide services to non-public school children, he must deduct the administrative costs as well as the actual costs of the services.

If a complaint has been filed or an investigation is underway regarding insufficient participation of non-public school children, the Commissioner of Education may withhold from the public school system in question the amounts of Title I funds necessary to fund appropriate non-public school services pending final resolution of the complaint or investigation.

The Commissioner's determination that a by-pass of services is necessary will remain in effect until the Commissioner determines that the local education agency will properly meet the requirements for serving non-public school students.

When a complaint has been filed against a state or local education agency regarding inadequate participation of non-public school children, the amount of time allowed for the agency to show cause before the Commissioner makes a determination is reduced from sixty to forty-five days.

The state education agency must have a plan for monitoring and enforcing local school systems' compliance with Title I requirements. This plan must describe how the state education agency will determine whether local school systems are serving non-public school children as required. It must also contain procedures for resolving complaints that non-public school children are not receiving services for which they are eligible.

The Commissioner of Education must develop and implement written procedures both for resolving appeals of state complaint resolutions, and for conducting independent onsite investigations. These procedures must include the following elements:

specific time limits for resolving a complaint or for completing a review and any necessary independent investigation within sixty days;

opportunity for the complainant to present evidence;

requirement that the complainant and others involved be notified in writing within ten days after the resolution of the appeal of the nature of the resolution, the reasons therefor, and the right to an administrative appeal;

dissemination of information concerning the procedures.

TITLE II: BASIC SKILLS AND EDUCATIONAL PROFICIENCY

This is a new program of aid proposed to help state and local education agencies improve the skills of children in reading, mathematics, and written and oral communication.

In order to receive funds, state and local education agencies must consult with non-public school officials and design their funding proposal to take into account the needs of children in non-public schools and provide an opportunity for them to participate on an equitable basis with public school children.

TITLE III: SPECIAL PROJECTS ACT

This Act provides funds to state and local education agencies, other public and private agencies, organizations and institutions, and to individuals, to carry out projects which meet special educational needs or place particular emphasis on national education priorities, or to disseminate information to state and local education agencies. The Act is an umbrella for a number of specific program areas, including separate funds for metric, arts, consumers law-related, environmental, health, correction, and population education, plus funds for preparing disadvantaged youth to pursue training in the biomedical sciences, and for preparing young people for jobs.

S. 1753 adds the following new provision which is applicable to all programs under the Special Projects Act:

In order to receive funds, state and local education agencies must consult with non-public school officials and design their funding proposals to take into account the needs of children in non-public schools and provide an opportunity for them to participate on an equitable basis with public school children.

TITLE IV: EDUCATIONAL IMPROVEMENT, RESOURCES, AND SUPPORT

Title IV provides funds to state and local education agencies for a number of different purposes, including acquisition of instructional materials and library resources; improvement of educational practices (such as meeting special local educational needs, or involving parents more in the education of their children); guidance, counseling, and testing; and special programs for gifted and talented children.

Current law

Existing law for Title IV mandates the equitable participation of non-public school children in programs operated by public school systems. When the local school system is prohibited by state law from providing, or has substantially failed or is unwilling to extend its Title IV programs to non-public school children on an equitable and comparable basis, the Commissioner of Education is authorized to by-pass the public school system and pay for the cost of services to these children from the state's allotment of Title IV funds. The findings of the Commissioner with respect to proper participation of non-public school children are to be conclusive, except that the courts may remand a case to the Commissioner for further action if deemed appropriate. In addition, the guidance and counseling programs newly incorporated under Title IV by S. 1753 contain provision for institutes, workshops, and seminars to improve the qualifications of teachers and counselors in non-public schools as well as in public schools.

Additional provisions in S. 1753

S. 1753 retains the above provisions of existing law and adds the following new provisions:

Pending final resolution of an investigation or complaint, the Commissioner may withhold from the state or local education agency the amount of their Title IV funds necessary to pay the cost of appropriate services to non-public school children.

The Commissioner's determination that a by-pass of funds to serve non-public school children is necessary is to remain in effect until the Commissioner determines that there will no longer be a failure of the state or local education agency to meet the requirements of equitable and comparable participation of non-public school children.

The amount of time allowed for a local or state education agency to show cause or submit objections before the Commissioner make a determination in response to an allegation of insufficient non-public school participation is reduced from sixty to forty-five days.

When a local school district receives no Title IV funds for acquisition of library and learning resources, the state education agency is to arrange for services to non-public school children in that district when such services are requested.

Title IV funds for "improvement in local educational practices" can be used to meet the need of children in non-public schools for improved educational services, and to diagnose learning problems and asseess educational problems of children in such schools.

In order to qualify for funds for acquiring library and learning resource materials and for programs for gifted and talented children, local education agencies must consult with private school officials in order to take into account the needs of non-public school children in the design of their proposal.

TITLE V: STATE LEADERSHIP

This is a new title which provides funds to state education agencies for administering ESEA* programs and for strengthening education agency management. The title contains the following provisions with respect to participation of non-public school children in ESEA programs:

A state education agency may withhold ESEA funds from local education agencies which do not comply with requirements for

*Elementary and Secondary Education Act.

participation of non-public school children.

A state education agency may use Title V funds for strengthening management for:

Assessing the educational progress of children in non-public as well as in public schools;

Coordinating public school programs with non-public school programs;

Monitoring participation of non-public school children in Federal education programs.

States must make information and technical assistance available to private school officials who desire to arrange for children in their schools to participate in Federal education programs.

State Advisory Councils on Quality Education must include representatives of non-public elementary and secondary schools.

TITLE VI: EMERGENCY SCHOOL AID ACT

This Act provides assistance to local school systems and certain organizations for instructional services, human relations efforts and other activities related to the purposes of preventing, reducing and eliminating minority group isolation and the resulting educational disadvantagement.

Current law

S. 1753 extends the provisions currently in the law regarding participation of non-public school children and staff in ESAA programs. The law requires that there be equitable participation of children, teachers, and other educational staff in non-public schools when such schools meet certain non-discrimination criteria and when their participation would help achieve the purposes of ESAA.

Current law provisions continued by S. 1753 also require that there be a by-pass of the local public school system and direct provision of services to non-public school children and education staff when the local education agency fails to provide for their appropriate participation or when the agency is prohibited by state law from doing so.

TITLE VII: BILINGUAL EDUCATION ACT

The Bilingual Education Act supports programs in local school systems which demonstrate effective ways of helping children with limited English proficiency progress through the educational system.

Current law

The law currently requires that services funded under this act must be extended to non-public school children whose educational needs are of the type the program is intended to serve and who attend schools in the area to be included in the public school program.

Additional provisions in S. 1753

S. 1753 retains the requirements of existing law and adds the following new provisions.

When a public school system which applies for funds is unable or unwilling to provide for the required participation of non-public school children, the Commissioner of Education may either withhold approval of the application until the school system demonstrates compliance with the requirements, or reduce the amount of the grant by the amount required to assess the needs of the non-public school children and to carry out a program for them.●

Mr. MOYNIHAN. Mr. President, on the strict understanding that no teaching aids will be authorized under any of these companion measures, I yield back the remainder of my time and I call for the yeas and nays on the amendment.

Mr. DOMENICI. They are already ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from New Mexico. The yeas and nays have been ordered on the amendment, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The result was announced—yeas 85, nays 10, as follows:

[Rollcall Vote No. 320 Leg.]

YEAS—85

Allen	Hansen	Moynihan
Anderson	Hart	Muskie
Baker	Haskell	Nelson
Bartlett	Hatch	Nunn

Curtis	Huddleston	Weicker

NOT VOTING—5

Abourezk	Eastland	Kennedy
Durkin	Johnston	

So Mr. DOMENICI's amendment (UP No. 1657) was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. SARBANES). The Senate will be in order. Senators will please take their seats.

Mr. MOYNIHAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MOYNIHAN. May I call up the amendment of the Senator from Ohio?

The PRESIDING OFFICER. The Senator may call up an amendment of another Senator, yes.

Mr. MOYNIHAN. In that case, Mr. President, I do so. I call up the amendment of the Senator from Ohio, and ask for its immediate consideration.

Mr. President, I regret that the amendment is not at the desk. Senator GLENN is on his way to the Chamber. As soon as he comes in, he will be able to proceed.

Mr. President, does the Senator from Louisiana desire the floor?

UP AMENDMENT NO. 1658

(Purpose: To provide for the refunding of credit in excess of tax liability)

Mr. LONG. Mr. President, I send an amendment making this tax credit refundable to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment No. 1658.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, it is so ordered.

The amendment is as follows:

On page 18, strike out lines 5 through 11.

On page 23, between lines 2 and 3, insert the following:

(b) Refund of Excess Credit.—Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

On page 23, line 3, strike out "(b)" and insert in lieu thereof "(c)".

On page 23, line 19, strike out "(c)" and insert in lieu thereof "(d)".

On page 25, line 3, strike out "(d)" and insert in lieu thereof "(e)".

On page 25, line 15, strike out "(e)" and insert in lieu thereof "(f)".

On page 25, line 21, strike out "(f)" and insert in lieu thereof "(g)".

Mr. MUSKIE. What was the unanimous-consent request?

The PRESIDING OFFICER. That further reading of the amendment be dispensed with.

Mr. LONG. Mr. President, if we pass a tuition tax credit, the vote of the Senate on the Metzenbaum amendment indicates that it is the judgment of the Senate that no one should be denied a tax credit because he is too rich.

I believe that the counterpart of that judgement is that no one should be denied this tax credit because he is too poor.

Mr. President, many times I have voted against measures that seemed meritorious to me. I have voted that some measures were not germane; because I thought we should stick to a germaneness rule. I have lost several times in recent years because of that. It has happened two times during this last month.

Here, Mr. President, it would be a complete travesty if we say, "You cannot be denied the tax credit because you are too rich, but you can be denied it because you are too poor and do not owe quite enough in taxes."

I have no doubt what the Senate's view would be if the Senators vote on the merits—of my amendment.

The Senate would decide to give the tax credit whether it is a credit against your income tax, or whether it is more than your tax, if you did not owe enough to get the full credit.

A refundable tax credit is already in the law. This credit is called the earned income credit. We provide it for the working poor. We give a working poor man a right to a refundable tax credit because he is working and trying to support his family, instead of being on the welfare. The same thing, Mr. President, ought to be true if a poor working man wants to send his youngster to college. Sending a child to college is a great sacrifice for a low-income family. But if they want to do it, they ought to have the help of a refundable tuition credit.

Mr. President, I suppose an objection will be raised that my amendment does not comply with the Budget Act.

Well, that may be so. But in this case, Mr. President, I just do not feel like standing still for the kind of miscarriage of justice which would occur if that objection defeated my amendment. It would be unfair to deny the tax credit to the least well off of all Americans. I may be compelled to appeal the ruling of the Chair in this case. I think we would be justified in doing so.

Mr. President, I would point out that the cost of this amendment to benefit lower income people would be only $45 million in fiscal year 1979, $81 million in fiscal year 1980, $133 million in fiscal year 1981, $204 million in fiscal year 1982, and $196 million in fiscal year 1983. It would not work out to more than about 10 percent of the cost of the bill.

For my part, I would prefer that those who are less fortunate have the benefit of this bill just as those who are more fortunate. I am pleased to vote so that no one would be denied the credit because he is in reasonably good circumstances. I think that we also should not deny the credit to someone because he is in less fortunate circumstances.

Mr. MATSUNAGA. Will the Senator yield?

Mr. LONG. I yield.

Mr. MATSUNAGA. I rise in support of the amendment offered by the Senator from Louisiana. We have been talking here about helping the poor, helping the poor, that is what this is all about, that the poor are unable to send their children to college. This amendment would take care of the really poor, as the Senator has so well put it, who are unable to take advantage of the tax credit because they are so poor, their earnings are so small, that they do not pay enough taxes to even take advantage of the credit provided by the bill.

If we are going to provide credit to the rich, as this bill would, and we are saying we are intent upon helping the poor to send their children to college, the amendment which the Senator from Louisiana offers is one which just fits the bills. I rise in support of this amendment.

(Mr. PAUL G. HATFIELD assumed the chair.)

Mr. MUSKIE. Mr. President——

The PRESIDING OFFICER. There is no time remaining.

Mr. MUSKIE. Mr. President, I raise a point of order.

First of all on procedural grounds, which I will explain as extensively as I can within the time limitation I have. The first tuition tax credit bill reported by the Finance Committee had this provision included. The Finance Committee also reported out a waiver resolution as required under the Budget Act. The waiver resolution is required in part because of this refundable provision. That waiver resolution, as required by the Budget Act, was sent to the Budget Committee. The Budget Committee rejected it on other grounds. The Finance Committee reconvened and reported the bill we have been considering on the Senate floor, striking the provisions that met with the disapproval of the Budget Committee.

So if the distinguished chairman of the Finance Committee really intends to fight for a principle, why did he not fight it through the Budget Committee in accordance with the procedures of the Budget Act, face the waiver resolution, which was reported unfavorably, and face the fight on that resolution?

Unfortunately for those who are concerned with the budget process, this amendment is subject to a point of order just as would the original bill have been subject to a point of order if it had been referred to the Budget Committee.

So this is the Finance Committee chairman's final act in a strategy to get around the Budget Act, to get around the Budget Committee, and to bring this proposal to the Senate.

I warned the Senate yesterday that this was coming. Another Senator gave consideration to offering it and rejected it on the basis of the next point I am going to make. In any case, this is a clear case of a strategy which backed off the bill the Finance Committee really wanted, a bill that would have cost $5.3 billion a year by 1983. That is the bill they really wanted, but they knew the Budget Act required a waiver resolution. They reported it out, it came to the Budget Committee, we debated it at length, reported it unfavorably by a vote of 9 to 4 to the Senate floor.

After that action was taken by the Budget Committee and in order to avoid a fight on that waiver resolution, the Finance Committee chose this other route, with a bill with lower benefits, a lower cost, and without this refundable provision.

That is what has taken place, and I cannot think, if I said nothing more, of a clearer way for the Senate to repudiate the budget process than to support this proposal by the chairman of the Committee on Finance.

I make another point: Under the provisions of this bill, a family would be eligible for a tax credit up to $250. However, recipients of direct categorical assistance for education, low- and moderate-income families will receive little, if any, assistance from the tax credit since the amount of the grant is deducted from the prospective tax credit. So that, for the poor, this refundable credit provision will provide no assistance, because the bill itself trades off the tax credit against the direct categorical aid programs.

So we are being asked to go through a procedure in defiance of the budget process to provide no benefit to the people that the chairman of the Finance Committee will tell us he is intending to help.

To take up the time of the Senate at this late hour on this bill for those purposes, seems to me to be indefensible. I do not think I need to say anything more on this bill, so I yield the floor.

Mr. LONG. Mr. President, if there is any question about an offset in the credit bill which affects welfare or other aid, we can take care of that matter when the Finance Committee acts on the welfare bill. If it is the judgment of the Senate that low-income people should have the same benefit as those who are better fixed, we shall provide that result in the bills within the jurisdiction of the Finance Committee. That is no problem.

The problem, Mr. President, is with the budget process. I voted for that budget process. I helped to establish it. I was on the original committee that worked on it. But, the one thing that I recognized about the budget process was that it would always be the decision of the Senate whether it wants to observe or waive the budget procedures.

Now under the Budget Committee procedures, if we think something is just, or unjust, but voting on it on the floor violates the Budget Act, we have to send it to the Budget Committee first.

Mr. MUSKIE. Will the Senator yield? The Senator knows that the waiver resolution comes to the Senate and whether it is unfavorable or favorable, the Budget Act makes the Senate the final actor. But the Senator chose not to go that route.

Mr. LONG. I do not know about that.

Mr. MUSKIE. I think the Senator knows that very well.

Mr. LONG. I just happen to think that I am a better witness about what I know than somebody else is. But I know something about the Budget Act, because I helped to write that act—I played a part in some of the early negotiations on that bill and some of the first versions that were reported out. In the Budget Act, we posed a great number of procedural difficulties for somebody who wants to do something that the Budget Committee does not want done. But in the last analysis, the decision whether or not to do something is the decision of the Senate and not the decision of the Budget Committee. It is not the Finance Committee's decision, not the Appropriations Committee's decision; it is the full Senate's decision.

Now this bill now creates an obvious miscarriage of justice. No one will be denied the tax credit because he is too rich. The bill takes care of that group—the rich—very well. And I am proud that I have voted that way. But the bill does not allow some people the credit because they are too poor. That result is not fair.

As far as this Senator is concerned, I have tried to comply with the budget process. The Senate sent the bill to the Budget Committee, and to the Appropriations Committee. Then they sent it back to the Budget Committee. By the time everyone got through kicking it between one committee and another, it

was decided that it could not contain the refundable feature.

So we said that we will try to add it on the floor. Then we come out to the floor and we are told there will be an objection on a point of order.

In the last analysis, if the majority of the Senate wants to do something, they will do it—notwithstanding the objections of the Budget Committee and notwithstanding the objections of some other committee. At some point, I say to the Senators, you just ought to vote your conscience on the merits of the issue in spite of all the procedural impediments that may be posed in front of you.

This refundable credit is not a big budget item. It adds less than 10 percent to the cost of the bill. At some point, we ought to go ahead, do what is right, and make the credit refundable.

Has the Chair ruled on the point of order?

Mr. MUSKIE. Mr. President, I have not yet made the point of order.

Mr. LONG. I will make that point of order that this is out of order under the Budget Act. I appeal the ruling of the Chair.

Mr. MUSKIE. Mr. President, may I make the proper point of order? I understand the Senator from Louisiana wants to cut me off by using the rules in spite of the fact that he is just arguing that every Senator——

The PRESIDING OFFICER. The Senator from Louisiana has made a point of order which is not debatable——

Mr. MUSKIE. What is the parliamentary situation?

The PRESIDING OFFICER. The Senator from Louisiana has made a point of order which is not debatable.

Mr. MUSKIE. I have another parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MUSKIE. I understood earlier, when I inquired of the Parliamentarian, that a point of order could not be raised until all time is expended. The time on this amendment has not been expended.

The PRESIDING OFFICER. There is no time limit on this amendment.

Mr. KENNEDY. Mr. President, I suggest the absence of a quorum.

Mr. DOLE and Mr. MOYNIHAN. Regular order, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

A point of order having been made that, under section 401 of the Budget Act, new spending authority is created by this amendment and further that section 303 of the Budget Act is violated, the point of order is sustained.

Mr. LONG. Mr. President, I appeal the ruling of the Chair. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the decision of the Chair stand as the judgment of the Senate? The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

The result was announced—yeas 75, nays 21, as follows:

[Rollcall Vote No. 321 Leg.]

YEAS—75

Allen	Goldwater	Muskie
Anderson	Griffin	Nelson
Baker	Hart	Nunn
Bartlett	Haskell	Pearson
Bellmon	Hatfield, Mark O.	Pell
Bentsen	Hathaway	Percy
Bumpers	Helms	Proxmire
Burdick	Hodges	Randolph
Byrd, Harry F., Jr.	Hollings	Riegle
Byrd, Robert C.	Huddleston	Sarbanes
Cannon	Humphrey	Sasser
Case	Inouye	Scott

Curtis	Long	Schmitt
Danforth	Matsunaga	Schweiker
Gravel	Melcher	Talmadge
Hansen	Moynihan	
Hatch		

NOT VOTING—4

Abourezk	Eastland	Johnston
Durkin		

So, the ruling of the Chair was sustained as the judgment of the Senate.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the ruling of the Chair was sustained as the judgment of the Senate.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1659

(Purpose: To provide for the refunding of credit in excess of tax liability)

Mr. LONG. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 1659.

Mr. LONG. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with. I will explain it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, reserving the right to object, does the Senator have a copy of his amendment we can read?

Mr. LONG. It has the same basic effect as my earlier amendment. I have made a few changes. I have stricken some of the cross references and the conforming references. This amendment stands for the same moral principle as the earlier one, but it changes the legislative language, for parliamentary reasons.

Mr. MUSKIE. The vote just taken indicates that those technicalities can be very significant.

Mr. LONG. The Senator can appeal the ruling of the Chair, if he wishes.

Mr. MUSKIE. How long is the amendment? I am not inclined to object. I am reserving the right to object. I would like some clear idea——

The PRESIDING OFFICER. The Senator from Maine has a right to have the amendment read.

Mr. MUSKIE. I am not asking for that at this point. I am hoping that the distinguished sponsor of the amendment might give us enough of a clue in advance so that—Mr. President, a parliamentary inquiry. Could I ask to have the amendment read later?

Mr. LONG. Of course, I am just trying to save the time of the Senate. I will explain the amendment.

Mr. MUSKIE. I am willing to go that route, until I find it unsatisfactory.

The PRESIDING OFFICER. If the Senator does not waive the reading, he may have it read later.

Mr. MUSKIE. I do not insist that it be read now. I reserve the right to have it read later and will permit the Senator from Louisiana to proceed.

Mr. LONG. Mr. President, I ask unanimous consent that the amendment can be read any time the Senator wants it read.

Mr. MUSKIE. That is satisfactory.

The PRESIDING OFFICER. The Senator has that right.

The amendment is as follows:

On page 18, strike out lines 5 through 11.

On page 23, between lines 2 and 3, insert the following:

(b) Refund of Excess Credit.—Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

Mr. LONG. Mr. President, I wish to comply with the budget resolution. But, I do not want to do a grave injustice to some poor people, just because they do not happen to be well fixed financially. And we will do such an injustice, if we do not agree to this amendment.

Mr. President, the Senator pointed out what he thought was the right way to obtain a waiver of the budget rules. The Budget Committee has pointed out its procedures. We tried to follow that. At least we thought we did. We sent our proposal to the Budget Committee. The Budget Committee sent it on to the Appropriations Committee, and the Appro-

priations Committee sent it back to the Budget Committee. The last I heard of it, the Budget Committee was not willing to grant a waiver.

Mr. MUSKIE. Mr. President, will the Senator yield for a point of clarification?

Mr. LONG. That is my impression.

Yes; I yield to the Senator.

Mr. MUSKIE. The Budget Act requires certain provisions go to the Appropriations Committee. We did not arbitrarily refer it to the Appropriations Committee. The Budget Act provides that because it involved the spending of money or at least a budgetary cost. The Budget Committee exercised the responsibility with which it is charged under the Budget Act and so did the Appropriations Committee. There is nothing arbitrary about it.

Mr. LONG. Yes; I am not complaining about that. I did not say the Budget Committee did not do everything it is supposed to do and did not exercise its conscience. All I am saying is that we on the Finance Committee followed the procedure as we understood the procedure, we were asking for a waiver and did not receive it.

But I read, Mr. President, under the Budget Act, section 904(b) which is the provision from which I appeal because I am trying to do what is right for those who are not so fortunate:

Any provision of title 304 may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by unanimous consent of the Senate.

Obviously we would not obtain unanimous consent on this waiver. However, a quorum is here. By majority vote, the Senate can waive section 303, which is the section that we have to request to waive.

So, Mr. President, so that not only rich and middle-income parents have the benefit of the tax credit, but so that lower income parents may have it, also, it will be necessary to ask the Senate for a waiver.

Mr. President, the Senator from Maine said there were provisions in the bill that kept the poor from receiving as much benefit as some of us think they should out of this legislation. But, the cost estimates for this amendment show that these people would be helped. The fact is that only if they are getting a fellowship for a scholarship or Government grant or something of that sort, they cannot get the credit.

By adopting my amendment, the Senate would increase the cost of the bill only $45 million in fiscal 1979; $81 million in fiscal 1980; and $133 million in fiscal 1981. But this additional cost would help a lot of low-income people who could participate in this if the Senate wants to let them participate in it.

I hope that this is the proper way to act, Mr. President. I move that under section 904(b) the requirements of section 303 of the Budget Act be waived so that the amendment can be considered.

Mr. MUSKIE. Mr. President, a parliamentary inquiry.

Mr. PACKWOOD and Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. Does the Senator yield for that purpose?

Mr. LONG. Yes; I yield for that purpose.

The PRESIDING OFFICER. The Senator will state it.

The Senator from Maine.

Mr. MUSKIE. I ask whether or not there has been a sufficient change in the amendment to make it in order at this point under the Senate rules, not under the Budget Act?

The PRESIDING OFFICER. Under the precedents of the Senate once an amendment has been rejected or ruled out on a point of order it can not be reoffered unless it is substantially different.

Mr. MUSKIE. I make that point of order, Mr. President.

The PRESIDING OFFICER. Does the Senator yield for the point of order?

Mr. LONG. I yield for the point of order.

The PRESIDING OFFICER. It is the ruling of the Chair that there is no substantial change in the amendment, therefore, the point of order is sustained.

Mr. LONG. Then I will make some more changes.

Mr. President, send it back to me and I will make some more changes.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1660

(Purpose: To provide for the refunding of credit in excess of tax liability)

Mr. LONG. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes unprinted amendment numbered 1660.

On page 18, strike out lines 5 through 11.

On page 23, between lines 2 and 3, insert the following:

(d) refund of excess credit.—subsection (b) of section 6401—

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with except for the change that was penciled in. Please read the change on the second page.

The assistant legislative clerk read as follows:

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit) and 44C (relating to credit for educational expenses incurred after September 30, 1980),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 18, strike out lines 5 through 11.

On page 23, between lines 2 and 3, insert the following:

(b) Refund of Excess Credit.—Subsection (b) of section 6401 of such Code (relating to excessive credits) is amended—

(1) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44C (relating to credit for educational expenses incurred after September 30, 1980),", and

(2) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44C".

Mr. LONG. Mr. President, under section 904(b) I move that section 303 of the budget rule be waived in order that the amendment might be considered.

Mr. MUSKIE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. MUSKIE. I still do not have a copy of this amendment. I do not know whether a substantial change has been made. We had a decisive vote on the point of order relating to the Budget Act under section 401 and section 303. I do not know how many times we have to go through this exercise, but a reading of the amendment such as we have had from the clerk is not a sufficient basis for me to make a judgment on whether or not we are being asked to vote on substantially the same amendment.

So I put the parliamentary inquiry to the Presiding Officer.

The PRESIDING OFFICER. The Chair at this point will state that this amendment is substantially different than the last amendment; therefore, it is in order under the Senate rules and precedents. As to the Budget Act, that is another matter.

Mr. LONG. Mr. President, I renew my motion under section 904(b) of the Budget Act, that the provision of section 303 of the Budget Act be waived in order that this amendment might be considered.

Mr. MUSKIE. Mr. President, I will make the point of order, but before I do I think I owe the Senate some explanation of section 904.

In the first place, with respect to this amendment, I have not seen it. Only one Senator has seen it. This subject of refundable credits was considered at length by the Finance Committee. It was included in legislation which was referred under the Budget Act from the Budget Committee to the Appropriations Committee. They had specific language before them dealing with this proposal. They acted on it. Both committees, overwhelmingly reported unfavorably on it. And the language was actually reported. Before those reports could get to the Senate floor so that the Senate could consider the waiver resolution which had been acted on unfavorably, the Finance Committee changed its legislative vehicle and did not include this language at all. I have no idea whether the language the distinguished chairman of the Finance Committee has just sent to the desk is the same language that came to the Budget Committee at one point or not. There is no basis for me to make a comparison. There is no basis whatsoever.

Now, what I have said goes to section 904.

As a member of the Government Operations Committee I spent most of a year writing the Budget Act, and spent the time in conference with the House of Representatives. I know that section 904 is intended to state only what is obvious, that the Senate can at any time suspend the Budget Act. So the question before us now is do we do that casually, do we do it when the Budget Act itself provides an orderly procedure for considering the issue in question?

There is an orderly procedure under the Budget Act to consider the very subject of this amendment. It was used by the Finance Committee.

It went through the Budget Committee. The Budget Committee reported it to the floor. That report is before the Senate. But the Committee on Finance backed off that because, following the procedure set down by the Budget Act, it did not give them the result they wanted. They wanted a favorable report, and because they did not get it they pulled back from that procedure and came back to the Senate without the refundable credit, which the chairman of the Committee on Finance now sends to the desk in language that no other Senator has seen, in language that may or may not be the same as that which the Budget Committee and the Appropriations Committee considered, and now the chairman of the Committee on Finance says we ought to get away from the specific procedure which was provided to handle just this kind of a problem, and waive the Budget Act altogether, which is what section 904 is.

It says that any time the Senate wants to it can suspend the Budget Act altogether and, of course, that is a statement of fact. It did not have to be written into section 904.

So now the chairman of the Committee on Finance puts it as boldly and as blatantly as he has wanted to for a long time. He does not like the Budget Act, and he wants to suspend the Budget Act so that he can do in his own way what the Budget Act makes possible for him to do in an orderly way.

So I oppose the motion and I hope the Senate will support my opposition.

Mr. LONG. Mr. President, I dare say, 90 percent of the Senators, and maybe more than 90 percent of the Senators, will find the same difficulty with which I am confronted. They will be confronted with all the parliamentary obstacles placed in the way of getting something to a vote, if they always have to go past the Budget Committee and the Budget Act.

But if you are right, Mr. President, it only takes 51 votes to sustain your position.

Why should we provide that everybody, except those who need it the most, will have the tax credits? Under the bill, the very rich will have it. I voted for that. But why deny the poor the credit, why deny the credit to the working poor, the least of them all, merely because of a technicality? Well, not if we have it within our power to do something about it.

I am no longer trying to overrule the Chair, I am not talking about that. I tried that. I was badly defeated. I accept the verdict and do not complain about that.

The ruling that the Chair made is not involved here. What is involved here is doing what is right. I find I have precedent for what I seek to do.

In April 1976, the Senate considered food stamp legislation which created new entitlement authority. Senator MUSKIE made a point of order against it under section 401 of the Budget Act. Senator TALMADGE then moved to suspend the provisions of the Budget Act under section 904(b), the same section I am referring to here.

The motion was carried by a vote of 63-to-27. So you voted in favor of that waiver, Senators, at least two-thirds of us voted that way. We did it so that we could vote on a proposal dealing with food stamps. So the precedents are on my side this time.

I am just asking that we waive the Budget procedures for this worthy amendment. I am not asking to suspend the Budget Act as Senator TALMADGE did. I am just asking that we waive it enough so that we can offer one little amendment. I am not talking about a $1 billion amendment, but talking about an amendment that costs about $133 million the first year. By comparison, that is a small amount of money. I am asking that we waive the Budget Act provision so that the Senate can consider the amendment.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Several Senators addressed the Chair.

Mr. PACKWOOD. I might say further in support of the motion that when we waived the Budget Act during the food stamp consideration, the Senator from Maine had several comments, and I might quote what he said:

> Under the Budget Act, a procedure open to him is a motion to suspend section 401 (b) with respect to this point of order, and I should support that motion, for the reasons that I have outlined here briefly . . .
>
> But the Senate also has a procedural right under the act which enables it to say: "We are going to take it up on the floor of the Senate, notwithstanding the point of order." That is not a waiver of the procedures. It is an exercise of rights that the Senate has under the procedures.
>
> If we had so structured the Budget Act as to absolutely prohibit Congress from considering any change in entitlement programs, including this bill by these months of delay, I doubt that Congress would have adopted the Budget Reform Act.
>
> So when the Senator says that somehow the Budget Committee ought to deprive the Senate of that option, I say to the Senator in all respect that I do not think that it is what the Budget Act says. If we tried to impose that rigid a discipline in the process, the process would break down before the year was up.

So, Mr. President, what we are back to again is a whose-ox-is-gored argument. At the time that the Senator from Maine wanted to waive the Budget Act to consider an amendment by Senator DOLE under the food stamp bill, he was in favor of waiving it under the procedures, as is allowed. When he is opposed to this whole act, and he has made it clear from time immemorial—I will give him credit for consistency—that he is opposed to primary credits, secondary credits, college credits, vocational credits, part-time credits, graduate credits, and all other kinds of credits, he is opposed to it, so he does not want to follow the procedures of the Budget Act and allow us to vote on this, to do the very same thing that he endorsed doing on a bill making an issue of a waiver when he supported it.

It is simply a question of whether or not you agree with the issue of refundability and want to consider it. If you do not, that is fine. Leave it out. But we should not think that we are making a change in the Budget Act, that we are doing anything we have not done before or we are doing anything that the Senator from Maine has not supported before when the issue that he wanted to consider was one that he supported.

Several Senators addressed the Chair.

Mr. MOYNIHAN. Mr. President, a brief word on the substance of the amendment of the Senator from Louisiana. With the elementary and secondary school provisions eliminated, the legislation before us is, of course, different legislation.

On the 1st of October 1980, the bill moves up to a different level altogether: there is at that point a potential refund tax credit of $500 at the college and university levels.

This amendment would take effect on October 1, 1981. We are talking about quite a substantial sum of money that persons will receive if we accept this, and will not receive if we fail to do so. This is, therefore, an important amendment.

Mr. MUSKIE. Mr. President, first of all, in response to the distinguished Senator from Oregon, I think my memory is pretty good, and I would not try to reconstruct the circumstances to which he speaks.

Mr. President, I am as sure as I am that I am standing here that those circumstances were no precedent for these. Here a route was deliberately not taken, under the Budget Act, by the Finance Committee, a route open to accomplish precisely what the Senator from Louisiana seeks to accomplish today, and he backed off; with what consequence? Leaving us in doubt as to precisely what legislative language we are considering, leaving us in doubt as to the cost, unless he chooses to presume that he ought to be the final authority on cost, and without the benefit of CBO's analysis of the cost in the light of the changes that have been made in the bill on the Senate floor.

The whole purpose of this process is to make sure the Senate has complete information on costs when it votes on legislation with these long-term cost implications. There is precedent for that.

As to what weight ought to be given to that precedent, I would not presume to try to suggest, without being able to review the record myself, before the tactic of the chairman of the Finance Committee is adopted. But I know if we were to approve what he has proposed, if we were to support his motion, we would set a

precedent with much more significant, serious, and lasting implications for the viability of the budget process than the one to which the Senator from Oregon refers.

The second point I would make, that I made in my discussion of the Senator's first amendment—we are now considering his third one—his first one did not eliminate an offset provision, which means that students would lose any direct assistance they get from Federal programs, dollar for dollar, for the tax credit relief they get up to $250.

That was a weakness in the Senator's first amendment. He has not discussed it in connection with the second one, but if the weakness has not been corrected, then it still stands, and the amendment would not do the poor any good.

But the final point I make, Mr. President, is that the Senator justifies this because it is needed to correct an obvious injustice. Well, if the injustice is that obvious, why did the Finance Committee, in its deliberations, put this offset provision in? Earlier the Senator from Louisiana said, "Oh, well, that is within our jurisdiction, we can correct it."

I ask him, why did you not correct it when it was before you? My understanding is that the offset provision was put in deliberately, because there were those in the committee who felt that not to have it would mean that there would be people who would get benefits under both the tax credit option and the direct assistance, and they did not want to subject the bill to that criticism.

I say much of this on the basis of hearsay, because I do not have the benefit of the Finance Committee report, which was before us with respect to the original bill, which gave us the Finance Committee's arguments, which evaluated the bill for us so that we could have the benefit of their deliberations.

I have to act ad hoc, on the basis of the third amendment the Senator from Louisiana was able to put together this afternoon, without seeing the language, without being able to compare it with what we had before. I have the responsibility, whether the Senator from Louisiana likes it or not, and I am going to discharge that responsibility even if no one on this floor listens. I have the responsibility of giving the Senate the benefit of my best advice. This is the way I see it, and I would appreciate the Senate's support.

Mr. PACKWOOD. Mr. President, the Senator has asked why we did not preserve the offset. I can tell the Senator why. It was to prevent double dipping. We offered the Department of HEW this provision, and they turned it down out of hand.

The matter is very simple. If somebody, in September, when starting school if students feel they are so desperately poor and are entitled to a grant, and they get it, and they could not go or they do not think they could get through school without the grant, this would let them take it, and then, when it comes time to sign the tax return in April, they can offset the amount they got as a grant against the credit, but they cannot take a grant and also take a tax credit if they paid tuition.

Conversely, if you think you can make it until April without a grant, if you take the tax credit you cannot also take the grant. It was designed to offer the students a choice, and to offset the cost of the bill, which the Finance Committee tried to do in a number of respects.

That was all this offset provision was. It had to do with preventing double dipping, and with the philosophy that I think the Finance Committee, almost to a man, shared: It endeavored to give the recipients a choice, in September, as to whether they wanted to go the grant route or the credit route. Pay your money and take your choice.

I think the reason we were turned down by the Department of HEW is that they did not want these two programs side by side, because I think I know what will happen. For most students going to school, and who are dependent on their parents, when they are faced with this situation, if the parent pays any tax at all, and they look at the BOEG form and what they have to reveal, they say, "To heck with it, I will pay it now and take it off the tax next April."

When this measure has been in effect 3 or 4 years, and HEW finds they prefer to go the tax credit route instead of the BOEG route, I believe HEW will be disappointed. But that is all that offset provision is about. It should not even be discussed in connection with this refundability and waiver of the Budget Act tonight.

Mr. LONG. Mr. President, I would hope the Senate by now understands what this is all about.

When we try to debate a tax credit so people can send their children to college, we are confronted with the argument, "Oh, that only helps those who are taxpayers; the poor will not benefit; you are going to help the rich people with this, and the poor could not enjoy it. How could you be so unfair?"

If we pass this bill without the amendment I am trying to offer, and if the President decides to veto the bill, as sure as I am talking to you, the President will come down on the fact that the bill would not benefit the poor. It will not be available to the poor because they do not pay any tax, or not enough tax to take advantage of the credit. We want to help the poor, but so far the poor are left out of this bill. When we tried to help the poor, we were confronted with every complexity that the Budget Committee can devise.

The Budget Committee is not against the poor; that committee is against this bill. Their chairman might deny it, but if he had his way he would deny the Senate the opportunity to make this bill applicable to all American children and their parents, rich or poor.

The chairman of the Budget Committee has made his position clear. He is going to work to defeat this bill however he can. He has talked about the cost of this amendment. But this amendment's cost is small in the totality of things. The Senator says he cannot rely on my estimates. Mr. President, all I have ever been able to rely on is the Joint Committee on Internal Revenue Taxation, now known as the Joint Committee on Taxation. I always have regarded that staff as the most reliable group anywhere for estimating the impact of a revenue measure whether on the House side or the Senate side of the Hill. I stand by their estimate.

Mr. President, I have stricken fiscal years 1979 and 1980 from my amendment; it would not apply for the next couple of years. That is a substantial change in the amendment. So, parliamentarywise, we are within the rule. We are following precedent; we are seeking to invoke the same precedent that Mr. MUSKIE himself approved on the food stamp bill.

We are trying to address the merits of the issue. Why not just vote on the amendment? The technicalities are finally behind us. It is just a question of whether the Senate wants to let us vote on the amendment.

As I say, we tried to follow the procedures of the Budget Committee and did not have any luck there. We did the best we could. We now seek to invoke the precedent the Senator has recognized. We now ask for a vote on the amendment.

(Mr. DECONCINI assumed the chair.)

Mr. MUSKIE. Mr. President, I will undertake to do my best to give the details on that precedent, and provide the Senate with as much information as I can. We would have been able to provide more if regular procedures had been followed.

As to that precedent—and it may have been a mistake—let us understand what it was. It had to do with the 1976 food stamp reform. My good friend from Kansas would probably remember that.

It involved another amendment which had been sanctioned by the budget resolution and taken into account by the budget resolution, and upon the adoption of the budget resolution by Congress, it effected the sanction.

So it is not outside the budget resolution.

The point of order was raised that the McGovern amendment had an immediate effective date rather than October 1. Under the budget resolution, section 401, any entitlement legislation which takes effect before October 1 or the next fiscal year, is not in order.

The fact is that because of the complexity of the food stamp bill, this judgment came to us on the basis of Senator DOLE'S advice and Senator TALMADGE'S advice. It was not possible to draft the McGovern amendment in another form to eliminate that technical objection.

We could not see at that point that any Budget Act purpose could be served by the point of order. The point of order would simply have obstructed a bill that had been assumed by the budget process.

That is the best and clearest reconstruction I can give of the circumstances at that time.

To me, those circumstances are far different from these.

With respect to the offset provision,

the basic education opportunity grant program for the income group $5,000 to $10,000, the average grant, is $1,132. As I understand it, the amount of the grant is deducted from the prospective tax credit. As a result an average grant recipient from a family with an income below $10,000 would not get any benefit under the tax credit, since his BEOG's grant of $1,132 would greatly exceed the prospective $250 tax credit. The refundability provision, cannot restore the tax credit to these students.

For people in the income group up to $10,000 there is no injustice being corrected here. The result I am told the offset provision would have would still obtain. So we are being asked to set a serious precedent under the Budget Act which does not accomplish what its sponsor proposes. That is the simple fact.

The PRESIDING OFFICER. The question is on agreeing to the motion. The yeas and nays have been ordered——

Mr. LONG. Mr. President, if this would not help the poor, why does it cost $81 million in fiscal year 1980, and $133 million in fiscal year 1981? Those are the budget estimates. They show what it would cost to help the poor.

If this amendment leaves anything to be desired, if there is anything in this bill or in this amendment that would deny some poor person a benefit to which he is entitled, we still have the right to correct it. I would be glad to support an amendment to do that or support further legislation to achieve a proper result. But, we will not have the opportunity to do anything about an obvious injustice in this bill affecting the poor unless my motion prevails, and we are offered the opportunity to vote on my amendment.

Mr. PACKWOOD. Mr. President, one last clarifying point, so we understand who is saving money and who is not saving money. When we waived this provision on the food stamp bill 2 years ago, what happened is that the Agriculture Committee had worked extensively in trying to cut down food stamp expenditures. We had a program then estimated to cost about $6.5 billion. The Agriculture Committee, with GEORGE MCGOVERN and BOB DOLE leading the fight, came up with reforms that would have cut it to about $6 billion but they would not have gone into effect until October 1 of that particular year. At the same time, the Department of Agriculture announced regulations to go into effect immediately which would have cut the annual cost of the food stamp program to $4.8 billion.

This Senate, I was one and most of the other Senators were on final passage, let alone the budget waiver, thought that cut, which was legal under the existing law, was too deep. So by virtue of waiving the rules we cost ourselves and this country about $1 billion during that year, money we thought justifiable was to be spent. But let no one think that by that waiver we saved money from what would have been cut from the food stamp program had we not waived it. We would have cut an additional $1.2 billion by administrative action. It is because our ox collectively was being gored. We did not want to cut it that far and we waived it.

The PRESIDING OFFICER. The question is on agreeing to the motion. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from New Hampshire (Mr DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Hawaii (Mr. INOUYE), the Senator from Texas (Mr. JOHNSTON), and the Senator from Mississippi, Mr. STENNIS) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Virginia (Mr. SCOTT) is necessarily absent.

The result was announced—yeas 31, nays 62, as follows:

[Rollcall Vote No. 322 Leg.]

YEAS—31

Allen	Hansen	Melcher
Anderson	Hatch	Moynihan
Bentsen	Hatfield, Paul G.	Packwood
Biden	Hathaway	Ribicoff
Brooke	Hayakawa	Roth
Cannon	Heinz	Schmitt
Case	Long	Schweiker
Curtis	Mathias	Sparkman
Danforth	Matsunaga	Talmadge
DeConcini	McIntyre	Williams
Gravel		

NAYS—62

Baker	Griffin	Nelson
Bartlett	Hart	Nunn
Bayh	Haskell	Pearson
Bellmon	Hatfield, Mark O.	Pell
Bumpers	Helms	Percy
Burdick	Hodges	Proxmire
Byrd, Harry F., Jr.	Hollings	Randolph

Garn	Metzenbaum	Young
Glenn	Morgan	Zorinsky
Goldwater	Muskie	

NOT VOTING—7

Abourezk	Inouye	Stennis
Durkin	Johnston	
Eastland	Scott	

So Mr. LONG's motion was rejected.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE. Mr. President, what is the parliamentary situation at this point?

The PRESIDING OFFICER. The amendment of the Senator from Louisiana is the pending question.

Mr. MUSKIE. Then, Mr. President, I raise a point of order as to the amendment under the budget.

The PRESIDING OFFICER. The waiver not having been granted, this amendment, like the predecessor, violates section 303 of the Budget Act. Therefore, the point of order is sustained.

The Senator from Massachusetts.

UP AMENDMENT NO. 1661

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself, the Senator from New Hampshire (Mr. DURKIN), and Senator from South Dakota (Mr. MCGOVERN).

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. DURKIN and Mr. MCGOVERN, proposes unprinted amendment No. 1661.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tuition Advance Fund and Tax Credit Act".

SEC. 2. TUITION ADVANCE FUND; REPAYMENT

Title IV of the Higher Education Act of 1965 is amended by adding immediately after part C thereof the following new part:

"Part D—TAX COLLECTABLE TUITION ADVANCES TO STUDENTS IN INSTITUTIONS OF HIGHER EDUCATION

"STATEMENT OF PURPOSE AND AUTHORIZATION OF APPROPRIATIONS

"SEC. 451. (a) It is the purpose of this part to authorize the Commissioner to establish a program for the making of advances to cover costs of tuition and other education-related expenses to students at institutions of higher education and to provide for the referral to the Secretary of the Treasury for collection under the Internal Revenue Code of 1954 of those obligations which are in repayment status.

"(b)(1) There is hereby established in the Treasury a trust fund which shall be available, without fiscal year limitation, to the Commissioner for purposes of this part. There shall be deposited in such fund amounts appropriated pursuant to paragraph (2) and all amounts collected pursuant to section 5 of the Internal Revenue Code of 1954.

"(2) There is authorized to be appropriated, for each fiscal year beginning on or after the effective date of this part, to the fund established by paragraph (1) an amount sufficient to fulfill the purposes of section 452 of this Act, not to exceed $4,500,000,000 adjusted by the inflation adjustment factors established by the Commissioner under section 454(b)(2). Such authorization shall not apply to any fiscal year which is more than two fiscal years after the fiscal year (hereinafter referred to as the 'break-even year') in which the income from the unused portion of such funds plus the amount collected pursuant to section 5 of such Code for such break-even year exceeds the amount necessary to fulfill the purposes of section 452 of this Act for such break-even year.

"(3) If the sums available in any fiscal year for making advances to students under this part are not sufficient to pay in full the total amounts which all students are entitled to receive under this part for such fiscal year, the maximum amounts which all students are to receive for this year shall be ratably reduced. In case additional funds become available for making such advances for any fiscal year during which the preceding sentence is applicable, such reduced amounts shall be increased on the same basis as they were reduced.

"ELIGIBILITY OF STUDENT BORROWERS AND TERMS OF OBLIGATIONS

"SEC. 452. (a) An advance shall be made by the Commissioner under the provisions of this part only to a student—

"(1) who has not successfully completed a program of undergraduate education and is thirty-five years of age or younger;

"(2) who is enrolled in such a program at an eligible institution, has successfully completed the first year of such program, and is in good standing as determined by the institution; and

"(3) who is carrying at least one-half the normal full-time academic workload as determined by the institution.

"(b) No advance made under this part to any student for any academic year shall exceed $5,000, adjusted by the inflation adjustment factors established by the Commissioner under section 454(b)(2) or the allowable tuition and expenses, whichever is less. The aggregate unpaid principal amount for all such advances made to any student shall not at any time exceed $15,000, adjusted by the inflation adjustment factors established by the Commissioner under section 454(b)(2).

"(c)(1) An advance made under this part shall be evidenced by a note or other written agreement which—

"(A) is made without security and without endorsement;

"(B) provides for disbursement of the proceeds of the advance by check, payable to the institution at which the advance recipient is in attendance, requiring endorsement by such recipient;

"(C) provides that the portion of such proceeds allocable to nontuition expenses described in subsection (d)(2) shall be paid by such institution to the advance recipient upon presentation of satisfactory evidence to the institution that such portion shall be used for such expenses;

"(D) provides for repayment in accordance with section 5 of the Internal Revenue Code of 1954 during the period in which such student is in repayment status;

"(E) provides for repayment of the total principal amount of advances under this part plus an amount equal to 50 per centum thereof, subject to the limitations contained in paragraph (2);

"(F) entitles the advance recipient to accelerate without penalty repayment of the whole or any part of the advances, plus an amount equal to 50 per centum thereof, in accordance with regulations prescribed by the Commissioner; and

"(G) contains such other terms and conditions, consistent with the provisions of this part, as may be required by the Commissioner and agreed to by the borrower.

"(2) For purposes of this subsection and section 453, an advance recipient shall be deemed to be in repayment status from the beginning of the first calendar year which begins after such recipient ceases to carry at an eligible institution at least one-half the full-time academic workload as determined by the institution and certified to the Commissioner until the earlier of (A) the beginning of the calendar year in which such borrower will become sixty-five years of age, or (B) the date on which the total principal amount of advances made to the borrower, plus an amount equal to 50 per centum of the total of such advances, is paid in full.

"(d) For purposes of subsection (b), the term 'allowable tuition and expenses' means—

"(1) the tuition charged by the eligible institution at which the borrower is enrolled, plus

"(2) an amount determined, in accordance with regulations prescribed by the Secretary, as necessary to cover education-related expenses such as transportation, room, board, and materials, but not exceeding $1,000.

"COLLECTION PROCEDURES

"SEC. 453. (a) The Commissioner shall, not later than January 1 of each year, certify to the Secretary of the Treasury for each borrower in repayment status on such date an amount equal to the sum of the total principal amount of advances made to such borrower plus an amount equal to 50 per centum of such total minus the sum of any amounts collected pursuant to section 5 of the Internal Revenue Code of 1954. A copy of such certification with respect to a borrower shall be sent by the Commissioner to such borrower.

"(b) Any borrower who receives a notice of certification under subsection (a) and who believes such notice to contain an error of statement or omission, or asserts a debt for which the borrower is not obligated or to which he desires to raise a defense or excuse, shall file an objection thereto with the Commissioner within sixty days after receipt of such notice. The Commissioner shall, within thirty days of receipt of such an objection, affirm, adjust, or withdraw such certification and send notice thereof to the borrower and to the Secretary of the Treasury. Such decision shall be reviewable by an appropriate district court of the United States as a final agency decision.

"DEFINITION

"SEC. 454. (a) The term 'eligible institution' means an institution of higher education as defined in section 1201(a)—

"(1) which has not, except under circumstances certified by the Commissioner as vital to the mission and purpose of such institution, increased undergraduate enrollment—

"(A) by more than 2 per centum in any academic year beginning after the enactment of this part; or

"(B) by more than 10 per centum in all the academic years beginning after such enactment;

"(2) which has not imposed any excess charges in any academic year beginning after the date of enactment of this part, except under circumstances certified by the Commissioner as vital to the mission and purpose of such institution.

"(b)(1) For purposes of subsection (a)(2), the term 'excess charges' means any amount charged by an eligible institution for tuition which exceeds the tuition charged by such institution in the academic year which ends in the calendar year preceding the calendar year in which this section is enacted (hereafter referred to as the 'base tuition') plus an amount equal to the sum of—

"(A) such base tuition adjusted by the inflation adjustment factors determined under paragraph (2), plus

"(B) in the case of eligible public institutions, an amount not to exceed 10 per centum of such base tuition.

For purposes of applying subparagraph (B), no additional amount of tuition at any eligible public institution shall be taken into account unless the Commissioner determines that such additional amount is available to such institution to carry out its educational purposes.

"(2) The Commissioner shall prescribe a schedule for the calculation of inflation adjustment factors for purposes of paragraph (1) for each academic year beginning after enactment of this section which shall be based upon the increase in the Consumer Price Index as determined by the Secretary of Commerce for the calendar year preceding the calendar year in which such academic year ends.".

SEC. 3. REPAYMENT

(a) IN GENERAL.—Part I of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to tax on individuals) is amended by redesignating section 5 as section 6 and by inserting after section 4 the following new section:

"SEC. 5. TAX IMPOSED FOR REPAYMENT OF FEDERAL TUITION ADVANCES.

"(a) IMPOSITION OF TAX.—In addition to the other taxes imposed by this chapter there is hereby imposed on the includible adjusted gross income of every Federal tuition advance recipient in repayment status for the taxable year a tax equal to the lesser of—

"(1) the amount equal to the applicable percentage of such includible adjusted gross income, or

"(2) the sum of the aggregate amount payable on all Federal tuition advance of such recipient plus an amount equal to 50 per centum of such aggregate amount payable.

For purposes of paragraph (2), the aggregate amount payable on any such advance shall be determined as of the last day prescribed by law for filing the return of tax imposed by this chapter for the taxable year.

"(b) Applicable Percentage.—For purposes of subsection (a) the applicable percentage with respect to any Federal tuition advance recipient in repayment status shall be determined in accordance with the following table:

[In percent]

	Annual income of recipient					
	Up to $5,000	$5,000 to $10,000	$10,000 to $15,000	$15,000 to $17,500	$17,500 to $20,000	$20,000 and above
Total tuition advance fund obligation:						
Up to $3,750	0	2	2	2	2	2
$3,750 to $5,250	0	2	2	2	2	2
$5,250 to $6,750	0	2	2	2	2	2
$6,750 to $8,250	0	2	2	2	2	2
$8,250 and up	0	2	2	2	2	2

"(c) DEFINITIONS.—For purposes of this section—

"(1) Tuition advance.—The term 'tuition advance' means any advance made pursuant to part D of title IV of the Higher Education Act of 1965.

"(2) Tuition advance recipient in repayment status.—The term 'tuition advance recipient in repayment status' means for any taxable year any individual from whom a certification has been received by the Secretary pursuant to section 453(a) of the Higher Education Act of 1965 and has not been withdrawn pursuant to section 453(b) of such Act.

"(3) Includible adjusted gross income.—The term 'includible adjusted gross income' means—

"(A) in the case of a single individual the adjusted gross income of such individual,

"(B) in the case of married individuals filing a joint return under section 6013, where both spouses are tuition advance recipients, an amount equal to the adjusted gross income of such individuals,

"(C) in the case of a married individual filing a separate return, or a married individual filing a joint return under section 6013 where the spouse of such individual is not a tuition advance recipient, the greater of—

"(i) the adjusted gross income of such individual, or

"(ii) an amount equal to one-half of the sum of the adjusted gross incomes of such individual and such individual's spouse.

"(d) SPECIAL RULES.—

"(1) TAX TREATED AS INCOME TAX.—For purposes of this title, the tax imposed by subsection (a) shall be treated, under regulations prescribed by the Secretary, as an income tax imposed by this chapter.

"(2) MARITAL STATUS.—For purposes of this section, marital status shall be determined under section 143.

"(3) CERTIFICATION BY SECRETARY OF ADVANCE AMOUNT REPAID.—The Secretary shall certify to the Commissioner of Education the amount of tax paid under subsection (a) for the taxable year with respect to each tuition advance recipient in repayment status.".

(b)(1) CONFORMING AMENDMENTS.—The table of sections for such part I is amended by striking out the item relating to section 5 and inserting in lieu thereof the following:

"Sec. 5. Tax imposed for repayment of Federal tuition advances.
"Sec. 6. Cross references relating to tax on individuals.".

(2) Subsection (a) of section 6012 of such Code (relating to persons required to make returns of income) is amended by striking out "and" at the end of paragraph (6), by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(8) Every individual who, at the close of the taxable year, is a Federal tuition advance recipient in repayment status (as defined in section 5(c)(2)).".

(3) Subsection (a) of section 3402 of such Code (relating to income tax collected at source) is amended before the period in the third sentence by inserting "and to reflect an additional amount of tax to be deducted and withheld by reason of the tax imposed by section 5".

(c)(1) EFFECTIVE DATES.—The amendments made by subsections (a) and (b) of this section shall apply to taxable years ending on or after the first day of the first calendar year beginning after the date of the enactment of this Act.

(2) The amendment made by subsection (b)(3) shall apply to wages paid on or after the first day of the first calendar year beginning after the date of the enactment of this Act.

(d) BANKRUPTCY.—For the purpose of section 17 of the Bankruptcy Act, any tax imposed by section 5 of the Internal Revenue Code of 1954 shall be deemed to be a tax which became legally due and owing by the bankrupt to the United States within three years preceding bankruptcy.

(e) REPORT.—The Secretary of the Treasury and the Commissioner of Education shall, not later than January 15 of each year, submit to the Committee on Ways and Means of the House of Representatives and to the Committee on Finance of the Senate any recommendations for changes in the rates or methods of collection of the taxes imposed by section 5 of the Internal Revenue Code of 1954 that may be necessary to insure the continued solvency and availability of the trust fund established pursuant to section 451(b)(1) of the Higher Education Act of 1965.

Mr. KENNEDY. Mr. President, I yield myself such time as I might need.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Massachusetts is entitled to the attenion of the Senate.

Mr. CHILES. Will the Senator yield?

Mr. KENNEDY. Yes, for a unanimous consent.

Mr. CHILES. Mr. President, I ask unanimous consent that Rick Brandon and Carnie Hayes of my staff be granted privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I offer this amendment on behalf of myself, the Senator from New Hampshire, and the Senator from South Dakota. We are considering ways in which we might meet the problems of higher tuition costs. I think the tuition advance fund provides a new, creative and financially responsible way of dealing with this problem.

This proposal has not had the consideration of the Education Subcommittee, although I have talked to the chairman of the Education Subcommittee and he has given assurances that we will have the opportunity for hearings on this proposal in the next session.

Basically, Mr. President, what this amendment would do is provide for a tuition advance fund which would make enough money available to allow people to go to college and to continue in college. The tax credit is only for $250 and we know that the burdens of tuition far exceed that.

It would also provide additional resources for room and board. It would be generally available to all of those who seek higher education.

The loan would be paid back over a period of years during which the particular student that took advantage of the program is working and earning. These funds would go back into a revolving fund for use by future students.

This fund would be self-sustaining after a period of years and would no longer drain the Federal Treasury, as a tax credit program would or even as a scholarship does.

And, it puts the responsibility on the one who will benefit, the student, rather than the parent.

Mr. President, this particular concept has been placed forward by a distinguished educator in my own State, President John Silber, president of a great university, Boston University. He has given it a great deal of thought, a great deal of study.

It seems to me to be both the financially responsible and the educationally responsible approach toward meeting the extraordinary burdens of higher tuition on the young people in this country, and their families.

Mr. President, I would now like to more formally list the virtues of this proposal for my colleagues.

Mr. President first, the tuition advance fund would make enough money available to allow people to continue in college. It is difficult for students to meet the burden of tuition, room and board today. Average tuition alone in a private college is now $2,500; room and board costs $1,000 or more. The proposed tuition tax credit would return only $250 a year in tax savings to the family which was putting someone through college—and this money would be returned some 10 months after the close of the school door for the year. It is obvious that $250 10 months late is not going to make much of a difference.

Second, the tuition advance would be available to all people who are going to accredited colleges, the 925,000 in private schools and the 3.7 million in State schools. People with financial needs would not have to search through a variety of programs and hope that, in the year in which they are applying, enough money remains in the program, or that they meet that year's eligibility criteria. It is thus as comprehensive as the tax credit.

Third, the proposal recognizes that students who go through college are the primary beneficiaries of a college education. They owe something to a society which has allowed them the resources to enjoy that education. They begin to pay society for the benefit which has been extended to them through this bill. In turn, they make it possible for society to award similar funds to students who follow in their path. It is fair that they do so. Those who go to college enjoy far greater earnings over the course of their lifetime than those who do not. The bureau of the census reports a $232,000 difference between the wages of a college and a high school graduate. They enjoy the other benefits that education bestows. They should be paying for that education when they can afford to do so, to help those who subsequently need assistance.

Fourth, the bill promotes, societal values through a payback scheme which does not force people into taking jobs purely because those jobs offer higher salaries. Those people who wish to take lower paying jobs which might be of service to society—those people who want to enter VISTA after their graduation, or those who cannot find higher paying jobs would only pay a flat percentage of their salary that year, rather than an amount calculated purely on the basis of the amount that they borrowed. This compares to the present system where, like a home mortgage, people must pay back their loans in a certain period regardless of their incomes. Gaging payback rates to income will also probably lead to fewer outright defaults.

Fifth, the program would eventually be self-sustaining. During the first few years, we would have to spend more money on the educational loans than we now do. But within a few years college graduates would begin paying back loans. As compared to the social security system, the tuition system would result, over the next few decades, in a larger and larger proportion of people graduating and paying back the amount they borrowed as they moved into jobs. There are always far more people in the work force, who are there for a 40-year period, than in college, where they are eligible for a tuition advance for a 3-year period.

Mr. President, the tuition advance fund is simply a better way to insure a college education to all the people in America who want one. It is simply a fairer way of allocating the cost of guaranteeing a college education.

I hope we will be able to test out these thoughts in the Education Committee

and come back and make a recommendation to the Senate.

● Mr. DURKIN. Mr. President, our amendment strikes those portions of the tuition tax credit bill dealing with tax credits to parents paying tuition to colleges and universities. In place of those provisions, my amendment substitutes an alternative college financing plan.

There is little doubt that a $250 tax credit would be welcomed by any person struggling to meet the high costs of tuition. But that $250 which comes in the spring will be of cold comfort when a $3,000 tuition bill arrives in the fall. For this reason, I am offering an amendment which establishes a program covering up to $5,000 of tuition and related expenses while placing responsibility for repayment where it belongs—squarely on the shoulders of the person who benefits from that education, the student. Repayment will be made over the borrower's working lifetime.

My amendment, which is cosponsored by the Senator from Massachusetts, Mr. KENNEDY and the Senator from South Dakota, Mr. MCGOVERN, is identical to the Tuition Advance Fund Act which I introduced earlier this year. Similar legislation has been introduced in the House by Congressman HARRINGTON, who helped develop the plan along with President John Silber of Boston University.

There is no question that a comprehensive program is needed now if a college education is to be a realistic goal for those who are not wealthy.

The cost of sending a child to college has risen by more than 77 percent in the last 12 years. The average cost of tuition, room, and board at a nonpublic institution of higher education is more than $19,000 over 4 years, and still rising. The costs at taxpayer supported colleges have also risen considerably to the point where it now costs an average of $2,500 per year to cover education expenses for students at these schools.

Federal loan and grant programs have been a partial solution to the problem of rising costs but have not been enough to place a college education within reach of all who wish to attend. The primary Federal program to assist middle class students, the guaranteed student loan program, has been of considerable help, but has not been a universal answer. Some lenders have been unwilling to write such loans at all or have set aside an insufficient amount to meet the needs of all those wishing to borrow. Other Federal student assistance programs are not available to middle class because their incomes are supposedly too high. For instance, 94 percent of all basic education opportunity grants go to persons with family incomes under $15,000. We all know that the financial burden on families with incomes over this level is great, too great, and as a result they may not be able to offer their children the opportunity of a higher education.

Our proposal authorizes the commissioner of education to make advances of funds to students to cover the costs of tuition and certain other related expenses such as room and board up to a limit of $5,000 annually. The loans would be made to undergraduates in their sophomore, junior, or senior years, that is, to students who have made a commitment to their education. Also, to be eligible for an advance, the student must be in attendance on at least a half-time basis at an eligible institution. An eligible institution is one which has allowed only reasonable increases in its charges to students.

The repayment method contained in our amendment is also simple and will avoid the problem of defaults found with current student loan programs. Recipients will repay the money advanced to them during their working lifetime through the Federal income tax system. The student will begin payments once he or she ceases to be in school on at least a half-time basis and will continue until the amount borrowed plus a 50-percent surcharge has been repaid or until the recipient reaches age 65.

The funds will be withheld from the advance recipient's salary as a tax, and, as such, are not avoidable by declaring bankruptcy. The abuses which exist under the present student loan programs would not be possible.

Two other aspects of the proposed repayment plan are important to note. First, students with an annual income of less than $5,000 during their repayment period will not be taxed during the years their income is below that level. Second, married individuals with a tuition advance obligation will repay 2 percent annually on the greater of (A) his or her individual earnings or (B) half of the combined income of both spouses.

Mr. President, we are fond of saying that education has made this country great, and that human capital is our most important asset. It is time we backed rhetoric with action. This plan recognizes that an investment in education is an investment in human capital. Just as the Federal Government subsidizes other capital investments through tax credits and other incentives, so should we recognize investments in human capital. Just as we amortize our other capital investments, so should we allow the amortization of human capital investments, that is investments in education.

The system provided for in our amendment will give all students a chance to pursue higher education, a chance to invest in their future. I urge its consideration by the Senate.●

Mr. BELLMON. Will the Senator yield?

Mr. KENNEDY. Yes, I yield such time as the Senator from Oklahoma wants.

Mr. BELLMON. I thank the distinguished Senator from Massachusetts for yielding.

Mr. President, I want to begin by saying that I agree with the position the Senator has taken favoring student loans.

On last Friday, I introduced a National Student Loan Bank Act (S. 3403) bill intended to provide source of funds to young people whose families cannot or will not furnish needed support.

It is a loan program. It is not grants. The loans are to be fully repaid at the cost of interest to the Treasury.

I agree with Senators DURKIN and KENNEDY that affordable loans are the answer to the cash crunch problem confronted by middle-income families, particularly if their children want to attend high cost private schools or colleges.

S. 3403, the National Student Loan Bank Act is different from the Durkin-Kennedy plan in both its repayment requirements and its structure.

Mr. President, this matter is of great import, both from a budgetary and a humanitarian standpoint, because it does offer the students what they might have at a minimal cost to the Treasury.

I hope we could have hearings on both the Kennedy-Durkin bill and on S. 3403.

I think we can learn a lesson from our experience this week. The Senate has had under consideration two bills—the tax credit now on the flooor and the President's proposed expansion of the basic education opportunity grant program, which we will soon consider. It is plain that a more orderly, more workable, more inclusive system of student aid is needed.

I join Senators DURKIN and KENNEDY in calling for hearings, hopefully one set of hearings which will address both their bill and S. 3403.

I hope hearings could occur early next year, so the product of such hearings can be considered in conjunction with the reauthorization of all existing higher education programs, which is due to occur next year.

Mr. President, I believe that this is the first step toward a reasonable, comprehensive, affordable program for student loans which will offer a solution to the problems of students from middle income families when they attempt to seek higher education.

Mr. KENNEDY. I just want to express my appreciation to the Senator from Oklahoma for his suggestions.

We are approaching this in a similar way by a revolving loan fund with a payback provision. It seems to me to be sound education policy as well as financial policy.

I want to give assurance to the Senator from Oklahoma as a member of the Education Committee that we will certainly consider his approach to it with Senator DURKIN'S, Senator MCGOVERN'S and mine.

I yield to the Senator from Rhode Island.

Mr. PELL. Mr. President, I congratulate the Senator from Massachusetts for bringing up this matter for discussion. I know it is a very interesting approach and a very novel and sensible one.

I have had several conversations—at least one long one—with President Silber, of Boston University, and think the idea has a great deal of merit.

I look forward in the coming session of Congress—if it does not pass this session, it may pass in the next session, although I make no commitments in that regard—but I am looking forward to a hearing and a discussion on it in our Education Subcommittee.

Mr. KENNEDY. I thank the Senator.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

UP AMENDMENT NO. 1662

(Purpose: To provide a termination date for the tax credit)

Mr. GLENN. Mr. President, I send to the desk an unprinted amendment for myself, Mr. EAGLETON, Mr. MUSKIE, Mr. BELLMON, and Mr. KENNEDY.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN), for himself and others, proposes an unprinted amendment numbered 1662.

At the end of the Act insert the following: "SEC. —. TERMINATION DATE. No credit shall be allowed under this Act for any taxable year beginning after December 31, 1983."

Mr. GLENN. Mr. President, the House-passed version of the tuition tax credit bill provided for a termination date for the credit at the end of 1980, thus allowing for review of the legislation by the Congress 2 years after enactment. The bill reported by the Senate Finance Committee would not provide for a termination date and thus would enact the credit in perpetuity.

My amendment would provide for a termination date of December 31, 1983, thus rejecting the in perpetuity feature of the committee bill but allowing for a more realistic review schedule than that provided by the House.

It is my view that as a general rule major tax credits or incentives—and major authorizations for that matter—ought to be reviewed routinely after they have been in operation for a time period long enough to enable us to evaluate them. Only by adopting this principle will we be able to establish control of our budget deficits and, more than that, control of government as a whole.

The college tuition tax credit, whether attractive to the Congress at this time or not, ought to be no exception to this rule. The House acknowledged this by providing for a termination date in its bill. My view, however, is that the review schedule provided by the House is too tight and that more effective review would be possible 5 years after enactment. Accordingly, my amendment would terminate the credit at the end of 1983 with the understanding that at that time Congress could leave the credit at the level provided in the legislation or revise it upward or downward.

Mr. President, every Senator in this body is very concerned about budgetary controls and the resulting impact on inflation—inflation that erodes not only our buying power but which is literally seeing the dollar drift to a second-rate currency around the world. The most uncontrollable part of our Federal budgeting process has been the rapid increase over the last 10 years of tax incentives, deductions, and credits, which all lumped together have been called tax expenditures, or in other words, Federal-revenues-not-realized.

The revenue loss through tax expenditures has grown rapidly. It amounts to an estimated $124 billion in 1978, and is estimated to increase to $187 billion by 1983. While these figures point the need for sunset tax legislation which I have previously proposed and will propose again as part of the broader sunset legislation, I believe we must address this revenue loss problem on each major addition to tax expenditures which come before us, including this bill.

The House has addressed this problem in their version of this tuition tax credit legislation by placing a 2-year sunset provision in their bill. I believe 2 years is an insufficient time in which to properly assess a change in educational patterns of this magnitude, and my amendment would propose a sunset provision in the Senate version of 5 years. Certainly 5 years is an adequate time period to assess the impact and value of this legislation. I think the House has correctly specified that they also intend to review the credit and may revise or adjust it. If the legislation is working satisfactorily at that time, Congress could extend the credit beyond the cutoff date. If, however, the tax credit is not working as planned and has some adverse impacts not foreseen at this time, then it should be sunsetted, terminated.

Mr. President, I understand that the floor managers of the bill are prepared to accept this amendment, and I would be prepared, upon their acceptance, to yield back the remainder of my time. I urge acceptance of this amendment.

Mr. HART. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. HART. Will the Senator add my name as a cosponsor?

Mr. GLENN. Mr. President, I ask unanimous consent that the name of the Senator from Colorado (Mr. HART) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. We accept the amendment.

Mr. MOYNIHAN. Mr. President, the Senator from Ohio is correct. The managers of the bill are happy to accept his amendment and do so.

I yield back the remainder of my time.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. GLENN. I yield.

Mr. BELLMON. Mr. President, I ask unanimous consent that Carol Cox, Peter Boyd and George Merrill, of the Budget Committee staff, have the privilege of the floor during the debate and votes on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. GLENN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, the Senator from California has asked for the floor.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. HAYAKAWA. Mr. President, some of my colleagues may be surprised at what I am about to say. I intend to vote against final passage of the tuition tax credit bill.

Because my career in education was at the university level, many people have assumed that my support for the so-called Packwood-Moynihan bill was based on a desire to provide tuition tax credits at the college level. However, I have indicated throughout the months of discussion on tuition tax credits that my real interest was in providing the credit for elementary and secondary education. Now that we have eliminated the credit for elementary and secondary education, I find that I can no longer support the bill.

Mr. President, we have dealt private education a severe blow today. Despite empty gestures that we may make through other amendments, I believe that parents who chose the alternative of private education for their children will not be fooled.

But most important, Mr. President, by accepting the Hollings amendment, the Senate has made this bill as regressive and as racist as it could be. Whether we make the credit refundable or not, whether we accept an income limitation or not, this bill is regressive.

It is regressive because those who need the assistance of a tuition tax credit the most are those less fortunate parents whose children's futures are held captive to poor quality public schools in the ghetto. Their children do not go to college. They don't make it that far. And they do not make it that far because their parents cannot afford to provide them with an alternative to the miserable neighborhood public schools.

These are the students that drop out of high school before they graduate. They drop out because of a lack of discipline. They drop out because their schools are not safe. They drop out because their minds are not challenged.

Mr. President, I want these children to go to college, too. But they will never be able to so long as we do not do something meaningful to help them get a decent education at the primary and secondary levels.

I in no way wish to imply any dissatisfaction with my distinguished colleague from Delaware. I commend his efforts to secure some relief in these times of high taxes for those who pay college tuition for themselves or their children. And I appreciate his efforts to help secure the same consideration for parents of elementary and secondary students. But I cannot in good conscience turn my back on those I most wish to help. So I must therefore cast my vote against final passage of this bill.

Mr. MOYNIHAN. Mr. President, I ask for third reading of the bill.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. HAYAKAWA. I yield.

Mr. GOLDWATER. Mr. President, I asked the Senator to yield just to say that I agree with his remarks completely.

I think I was the first one to have introduced this bill in the Senate, way back in 1958.

The way this bill has been butchered and amended and changed, it is not going to help the young student who wants to go to college, and I therefore will vote against it.

Mr. MOYNIHAN. Mr. President, I ask for third reading.

Mr. MORGAN. Mr. President, since last Thursday the Senate has been engaged in debate over the most appropriate method of providing additional relief to students and families from college costs. We have before us two proposals, one sponsored by Senators MOYNIHAN and PACKWOOD, and the other by Senator PELL, and if we choose one over the other, it will have significant consequences for the future of educational assistance in this country.

This is an important debate, but I am greatly disturbed by its implicit assumption, that the Federal Government needs to increase appropriations for tuition assistance, exclusive of the GI bill, by 40 percent. And that is what both of the proposals before us would do. We are proposing to increase our spending for tuition assistance from $3.8 billion to about $5.3 billion, an increase that cannot be justified when one looks at the change in the cost of a college education, and one that cannot be justified when one looks at the size of the Federal deficit and at the many other pressing problems requiring action and money from the Federal Government.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order.

Will the Senate please come to order? Senators will cease from talking and those on the floor will take their seats.

Mr. MORGAN. Mr. President, I realize the hour is late, but I listened patiently for about a week to all the others and I have a few things I wish to say before passage of this bill.

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order.

Mr. ROBERT C. BYRD. The Senator is entitled to be heard also regardless of what the hour is or what stage of the proceedings the Senate has reached.

I hope the Chair will protect the Senator.

Mr. MORGAN. Mr. President, I think we should look at some facts.

Between 1967 and 1976, the cost to the student of attending college, whether public or private, increased by about 75 percent. At the same time, the median income rose by 88.6 percent, and Federal appropriations per college student increased by an astounding 262 percent, from $87 per student to $315 per student. Taxpayers pay about 14 percent of the cost of educating each student in a private school, and three-quarters of the cost in public colleges.

A glance at college enrollment figures also fails to support the need for a 40-percent increase in Federal financial aid to students, whether it be through tax credits or a grant and loans program. The percentage of dependent 18- to 24-years-old attending college was virtually the same in 1976 as it was in 1967—about 39 percent. The percentage of 18- to 24-years-olds attending college has risen about equally at all income levels following the major drop when the draft ended in 1973. These figures all indicate that young people who wish to attend college are able to do so.

While some additional assistance to students, however distributed, may be justified because of the inflation that has taken place in the last year, a 40-percent increase over 1 year does not seem to be justified.

We have to remember that college education is still a personal responsibility. Maybe one day, it shall be national policy to provide everyone with a free college education, but the country does not want to nor can afford to do this today. We should also remember that going to college is a highly profitable investment. The average income for high school graduates is 70 percent of that for college graduates. A college degree is worth well over $150,000, even including the cost of the college education. A person profits greatly from going to college, and he should be willing to pay for it, even if he or she must initially go into debt. Thus, I am greatly disturbed by the proposals before us, which would greatly increase grants, whether it be through the tax system or a program run by the Department of Health, Education, and Welfare.

The administration originally did not feel that such an increase could be justified, for they proposed a $200 million increase when the budget proposal was released last January. This increase, over 5 percent, in my view, is more in line with the realities of the situation. Maybe an increase somewhat larger than 5 percent can be justified, but not 40 percent.

The country will be lucky if Congress holds the budget deficit to below $50 billion for the upcoming fiscal year. Interest on the national debt will be over $40 billion. Very little progress has been made with regard to reducing Federal spending in the last 4 or 5 years, although a number of Senators, notably the distinguished chairman and ranking minority member of the Budget Committee have spent innumerable hours working on this.

I, too, am greatly concerned about the cost of college education. I will shortly be paying for two daughters to attend college, and it is roughly estimated if this bill were to pass I probably would stand to gain or benefit at least $7,000 or $8,000 during their college days. But I do not feel a 40-percent increase in student aid is justifiable, and believe we will be doing the country a favor by not supporting any such proposal.

Earlier this year, when discussing a proposal to use general revenues to finance the social security system, the distinguished chairman of the Finance Committee was quoted as saying, "What general revenues?" I think the same logic applies today to these proposals.

I was greatly impressed by what the chairman of the Budget Committee said yesterday when he pointed out that if we enact these proposals, or either of them, we might as well throw to the wind any idea of balancing the budget in years to come.

Finally, Mr. President, let me say this, that I had my staff do a little research which many Senators probably have already done, but if they add up all of the assistance that the Federal Government makes for college students today, taking the basic grants of $1,439 million, supplemenal grants of $248 million, the work-study program, which is one of the finest, of $358 million, the Federal loans, the GI bill, and the social security student benefits, the total comes to more than $7 billion, nearly $7.25 billion.

Then if we take the tax expenditures, the exemptions for fellowships and scholarships, the GI bill exclusions, and so forth, we have another $1.25 billion.

Senators know there are not but 4.6 million students in the whole of the United States in college. There are 925,000 in private colleges and there are 3,700,000 in the public colleges.

Take the total Federal aid of $8.5 billion and a tax loss of $1.2 billion and grants and loans, we spend in this country about $1,843 for every college student.

My State of North Carolina appropriates somewhere between $2,000 and $3,000 for every college student. It occurred to me that it might be better if we just took all this money and shipped our students over to Oxford or somewhere in England and educated them there.

I think somewhere there has to be a limit. If there were unlimited funds in Congress then I would be willing to vote for either one of these bills. But, Mr. President, I wish to voice my objection to increasing further expenditures in this area as long as we are running a $50 billion deficit.

Thank you, Mr. President.

Mr. MOYNIHAN. Mr. President, I ask for the third reading of the bill.

● Mr. BAKER. Mr. President, the revised tuition tax credit bill now before the Senate is designed to provide tax relief to individuals for college fees and tuition and to parents for tuition paid to private elementary and secondary schools. It has strong support because inflation has increased tuition costs at all levels of education, impacting heaviest upon low- and middle-income families. I sympathize with those who see their tax bills climb simultaneously with the cost of living and who are finding it increasingly difficult to provide the best possible education for their children.

As revised by the Finance Committee, the bill provides an immediate tax credit for up to 50 percent of tuition and fees for full-time students in colleges and post-secondary vocational schools with a maximum of $250. By October 1, 1980, the bill would increase the credit to $500 and would extend a credit of up to $250 for tuition at private elementary and sec-

ondary schools. Students attending college at least one-half time, but less than full time, would also become eligible for the credit.

Clearly, college tuition costs have risen enormously in the last few years. Since the 1970–71 school year, average fees and tuition for 4-year colleges rose 54 percent at private institutions and 57 percent at public institutions. Similar increases have occurred at 2-year colleges. Yet existing Federal student assistance programs are aimed primarily at low-income families. Only those with income under $15,000 are eligible for the Basic Educational Opportunity Grant program, and only students from families with adjusted income below $25,000 are eligible for subsidized interest payments on a federally-guaranteed student loan. As a result, thousands of families find themselves ineligible for any existing student assistance program even though the burden of rising tuition costs has become increasingly severe.

Since I began my first term in the Senate, in 1967, I have cosponsored legislation, including bills offered by the distinguished Senator from Connecticut (Mr. RIBICOFF) providing income tax credits for college tuition expenses. In 1975, I cosponsored a measure introduced by the junior Senator from Texas (Mr. BENTSEN) providing an income tax credit for savings for the payment of post-secondary educational expenses. I regret that none of these proposals have been enacted into law, because I believe that the time to provide some relief to middle-income families for the expenses of college tuition is long overdue. The tax credit approach provides this relief in a simple and effective way. By allowing a credit against tax due rather than a simple deduction for a portion of tuition, it benefits all taxpayers equally. It eliminates the need for students and their parents to file long and complex applications for assistance from HEW—a task which many families find demeaning. And it eliminates the costs associated with administration of a grant program.

Operating in conjunction with existing student aid programs which primarily assist low-income families, the college tuition tax credit will provide needed relief to middle-income citizens who shoulder an inordinate share of the tax burden.

While many proponents of tuition tax credits compare assistance at the college and postsecondary level with assistance to elementary and secondary schools, I believe that tax credits for elementary and secondary school tuition raise several different issues which must be weighed carefully.

First, while college tax credits benefit those attending both public and private institutions, elementary and secondary education tax credits would be available only for children attending private schools. Existing programs of Federal aid to precollege public schools are targeted at specific areas of need, such as education of disadvantaged students and the handicapped, rather than individual students. The tax credit proposed in the bill is not need based. It would equal $250 for every private school child whose parents pay taxes. This is significantly more than the average Federal expenditure per student in the public schools.

Second, I believe that we must examine the potential impact of tax credits for private schools on our national commitment to providing low-cost, high quality education for all. Our public school system is hardly the monolithic creature some have described it. It is a system administered by thousands of independent, locally selected school boards whose decisions reflect the wishes of the individual communities they serve. This system is utilized by 90 percent of children in the United States and it represents a combined local-State-Federal commitment of billions in public funds.

It is important, Mr. President, during our consideration of this bill, to distinguish between tax relief and tax incentives. As my colleagues are well aware, I am strongly committed to providing relief for all taxpayers in the form of an across-the-board reduction in Federal income tax rates. The virtue of an across-the-board reduction is that it will benefit all taxpayers and will permit them to make their own decisions as to how their income will be spent, rather than leaving those decisions to the Federal Government.

The tax incentive recommended by the Finance Committee affords relief only to those parents who send their children to private schools. To the extent that the tax credit would encourage parents to utilize private schools for educating their children, the tax credit most certainly has the potential for weakening the public schools, whose continued quality and success depend on the willingness of local taxpayers to provide the necessary financial support.

While the impact of these tax credits may be small at first, it seems likely that, once the precedent has been established, the effect as well as the amount of the tax credit can be expected to increase in the future. Bearing in mind the financial difficulties confronting many public school systems today, I am not persuaded that it would be wise public policy for Congress to offer incentives that may undermine institutions which governments at all levels are firmly committed to support.

Third, I am concerned about the potential impact of elementary and secondary school tuition tax credits upon desegregation of the public schools. Proponents of the tax credit cite statistics showing a decline in enrollment at private schools throughout the country as evidence of a need for Federal support of alternatives to public education. The fact remains, however, that in many urban areas, enrollment in private schools has increased in recent years as school busing and other tools to achieve racial integration have been implemented.

My own State of Tennessee affords an excellent example of this development. In the city of Memphis, the school system has experienced a loss of 45,000 white students since busing was initiated in 1972. At the same time, more than 20 new private academies have been established in the city's suburbs, and their enrollement is increasing. As a result, problems of racial concentration in the public schools have increased and taxpayer support for public schools has dropped as more affluent families flee the public school system. Yet it is the public schools upon which we rely to educate the poor, the handicapped, and those who do not meet the entrance standards of private schools.

I am aware that the tax credit bill contains a provision designed to restrict eligibility for tax credits only to those institutions which qualify for tax exempt status under section 501(c)(3) of the Internal Revenue Code, and have nondiscriminatory policies. As a practical matter, however, private schools which have been established to evade school desegregation will hardly prove attractive to inner-city families, most of whom would find tuition costs out of reach even with the limited tax credit available in the bill.

The implications of adopting a Federal policy which may operate to exacerbate the problems public schools are already experiencing as they undergo desegregation are far-reaching, Mr. President. While I would be the first to acknowledge the importance of private and parochial schools in sustaining and contributing to the diversity of thought and point of view which has made this country great, we must bear in mind that it will always be the public schools upon which we rely to provide educational opportunities to the vast majority of American children. It is the public schools which we will expect to bear the burden of training our future generations to deal with the problems our Nation will confront in the decades ahead. And it is the public schools which we hope will help the disadvantaged escape poverty by providing them with the training necessary to secure meaningful jobs.

In conclusion, Mr. President, I will support a tax credit for postsecondary education because I believe that it is necessary and because it will apply equally to students attending public and private institutions. I will oppose extending tax credits for private elementary and secondary school tuition because I feel they will assist only a small minority of taxpayers and that they will conflict with our national commitment to public education. The potential for harm to public schools and desegregation, in my view, outweighs the benefits to be derived from alleviating some of the burden of tuition at private schools. For this reason, I will support the amendment offered by the distinguished Senator from South Carolina (Mr. HOLLINGS) to delete from the bill tax credits for elementary and secondary education. I hope that his amendment will be approved.●

● Mr. DOLE. Mr. President, H.R. 12050. the Tuition Tax Credit Act, presents the Senate with some very difficult decisions. I believe a majority of the Senate agrees with the Senator from Kansas that some assistance must be given to help deal with skyrocketing educational costs.

The Senator from Kansas has been a long-time supporter of the college tax

credit. When this issue has been presented to the Senate in the past, I have consistently voted for the creation of a college tax credit. The prospects for enactment appear brighter than ever. The House has approved legislation similar to the bill now before the Senate. Despite President Carter's veto threat, enactment of some form of tuition tax credit is likely.

NEED IS CLEAR

Mr. President, the Senator from Kansas believes there needs to be some form of tuition relief to maintain the vitality of the American educational system. Middle-income families are pushed to the limit of their resources by large tuition bills. The National Center for Education Statistics reports that the average tuition and fees in both public and private universities increased 93 percent between 1967 and 1976. During that same period, the after-tax income for middle-income taxpayers only increased 66 percent. The ability of the average American family to send children to college has slipped dramatically in the past 10 years.

QUALITY EDUCATION IS IMPORTANT

Further declining enrollment due to increased education costs threatens to deprive our country of a valuable resource—its well-educated citizens. The diversity in the American educational system has not only promoted healthy competition but insured that individual needs are met. Private and public institutions have complemented each other in the task of educating our youth. This basic freedom of choice in education should be available to all students without high costs foreclosing middle-class students.

EFFECT ON PUBLIC SCHOOLS

One of the most difficult questions that has been raised is the impact of a tuition tax credit on public school systems. I might point out that public colleges and universities have competed with private institutions for years. The Senator from Kansas is certain that all of higher education, both public and private, would benefit greatly from a tuition tax relief. The benefits would not favor one system over the other.

ELEMENTARY AND SECONDARY CREDIT

A tax credit for tuition to elementary and secondary schools presents a more complex issue. Traditionally, Federal aid to private education has been very limited. Some have questioned the constitutionality of a tax credit for elementary and secondary schools associated with religious groups. Others have contended that public schools would be faced with reduced community support and, as a consequence, their educational quality would decline. These claims are legitimate and should be considered.

Proponents of extension of credits to pre-college students respond that the financial burdens of those who send their children to these schools will still be high. The credit will not be of sufficient size to approach parity in costs. Those parents who select private education will bear an extra cost in any case.

COST OF THE PROGRAM

As with any major program, the costs and benefits of this legislation must be carefully weighed. The Finance Committee has made several alterations in the credit designed to hold the cost to a minimum. The maximum elementary and secondary credit will only be $250 per student rather than the $500 for college or post-secondary vocational school. Graduate and less than half-time students will no longer be eligible for a credit. Unlike earlier versions, this credit would not be refundable. In addition, the amount of the credit would be reduced by certain need-based Federal aid.

PROPER ROLE OF FEDERAL EDUCATION AID

A tuition tax credit provides support to education without requiring any significant new Government regulation or expansion of present regulations. Some argue that, with the tuition tax credit, the Federal Government will lose control over how this education aid is disbursed. To the Senator from Kansas, giving individual citizens a greater choice of educational opportunities is a primary benefit of the tax credit approach. Removing the Federal Government from the process of determining the shape of educational programs is a very commendable accomplishment of the tuition tax credit.

CONCLUSION

Mr. President, the tuition tax credit legislation now before the Senate represents a chance for the Senate to reaffirm the importance of education to America. Students and their parents are looking to the Senate to help them insure that a quality education remains available to everyone who is dedicated to pursuing it. There is no greater tragedy than denying an opportunity for education to a young person. Passage of this legislation will be an important step toward guaranteeing educational opportunities for everyone.●

● Mr. BARTLETT. Mr. President, while I have long been a firm believer in the value and necessity of private schools, I do not believe a convincing case has been established for a massive program of Federal assistance to elementary, secondary and private schools in the form of a tuition tax credit.

My objections to this form of aid to education are not constitutional in nature. In fact, I believe that, as written, H.R. 12050 would be found constitutional. My objections are primarily pragmatic ones.

First, supporters of this legislation have attempted to justify tuition tax credits for private school attendance by claiming that the declining enrollment in private schools is a result strictly of higher tuition costs. Such declining enrollments are more plausibly the result of a smaller student population than in the past. All schools are experiencing declining enrollments because of the demographic changes in our population. There is also a distinct possibility that with such an across-the-board subsidy as proposed by this bill, tuition rates might be increased because of it, potentially negating the benefits of a tuition tax credit.

I also oppose this section of the Tuition Tax Relief Act because it is enormously expensive and yet unfocused in its assistance. The cost of proposed tax relief to parents of private school students would ultimately total approximately $900 million annually. Unlike the many other forms of Federal educational assistance, tuition tax credits would be extended without regard to the student's need or scholastic merit. I believe these are legitimate criteria which should be applied to any form of Federal aid to education.

Finally, the tuition tax credit for private, elementary, and secondary school attendance would create a new dimension of Federal involvement in the educational system. Many conservatives have been attracted to this proposal in the belief that it will get the Government out of the education business, thereby lessening the direct paper work burden on effected tax payers and lessening the justification for bureaucrats and bureaucratic regulation. Unfortunately, this will not be the case. The tuition tax credit does not replace the current Federal programs, it merely supplements them. In fact, the paper work burden and bureaucratic complexities of obtaining an education would probably be increased by this proposal.

Although Federal policy in the area of education should certainly not abridge the right of individuals to send their children to private schools, the Federal responsibility does not and should not extend to subsidizing the cost of private education.

For these reasons I support the Hollings amendment to delete provisions of the Tuition Tax Relief Act relating to private, secondary, and elementary schools.●

● Mr. CLARK. Mr. President, the tuition tax credit legislation currently being considered in the Congress is a genuine attempt to relieve the heavy burden of education costs on middle-income families. I fully recognize the need for middle-income family support, and as both a legislator and a parent will seek the most equitable and effective approach to assisting students and families in meeting educational costs. However, I am not convinced that the tuition tax credit proposal is the best approach.

Tuition tax credits are costly and uncontrollable. In the Senate version of the bill, a tax credit would result in an aggregate revenue loss of approximately $9.2 billion by fiscal year 1983, and an additional loss of at least $2.8 billion for each fiscal year thereafter. During a time when we all must be particularly concerned about balancing the Federal budget, this approach unnecessarily contributes to the Federal deficit.

Tuition tax credits are not targeted to those families and students most in need. The Congressional Budget Office estimates that 50 percent of the benefits will go to families with annual incomes exceeding $25,000, and of that 17 percent would be to families with incomes exceeding $40,000. Families with annual incomes less than $9,000 would receive only 6 percent of the benefits.

Tuition tax credits would threaten existing student aid programs. Because of the significant loss in Federal revenues due to a tax credit, the Congress will be hesitant to continue and increase support to current student aid programs such as the basic educational opportunity grant program and the college

work-study program. These programs are often the only means by which many middle- and low-income students can continue their education.

Tuition tax credits are a flat grant received after the cost of education has been incurred. The credit is partial reimbursement for an expenditure most families cannot bear at the outset. A credit does nothing to assist with the initial registration costs for the student, and comes months after tuition and fees are due.

Tuition tax credits are not indexed to the actual costs of education. Because the tax credit is neither income-tested nor cost-tested, it distributes benefits to those able to bear the costs as well as those who need support.

These, in general, are reasons that I remain unconvinced that the tuition tax credit will benefit those who need it the most. In addition, I have specific concerns about the effect of tuition tax credits at the elementary and secondary levels.

I have thought long and hard about the extent to which the Federal Government can and should provide support to nonpublic education for grades kindergarten through 12, and about the form which that support should take. I know that nonpublic elementary-secondary education is in serious financial need and am fully supportive of Federal efforts to help fulfill that need in ways which are consistent with the Constitution. I also believe in freedom of choice, and for an individual's right to choose between private and public education. However, I cannot support subsidization of private education at the expense of the American taxpayer. It is the right and voluntary choice of the individual to use a nonpublic school. It is an involuntary choice conferred upon the taxpayer to pay once for public education and again for a subsidy to private education. It is this double taxation that I cannot support.

Additional concerns that I have with respect to the tax credit for grades K–12 focus on constitutional and equity questions. While I am aware that the Supreme Court has not decided on circumstances that are identical to those presented in the bill, I am also aware that the bill does closely resemble those circumstances in the 1973 Nyquist case for which the Court ruled Federal aid was unconstitutional. It is my understanding that such aid is constitutional only when it provides general welfare and health services, textbooks, and transportation to all children, and when it does not contribute to the operational budget costs of the nonpublic institutions. Because the tax credit proposal would provide benefits to those parents of nonpublic school students and not those of public school students, and because the credit would be a direct subsidy to the parent for the operational costs of the nonpublic school—85 percent of which are church-related—providing a tax credit for private education raises serious constitutional questions.

The tax credit for grades K–12 would also provide for at least twice as much Federal Government support for private education as for public education. This strikes me as highly inequitable. The Federal money currently going to nonpublic education is in the form of school lunch programs, and moneys from title I of the Elementary and Secondary Education Act for disadvantaged students with learning problems. I support this type of Federal assistance to nonpublic schools, and will vote for increases in such funding as they are proposed in the reauthorization of ESER bill. I cannot, however, support the expenditure of public funds at twice the rate for private education as for public education.

Tuition tax credits at the elementary-secondary levels might also lead to a drain on our public schools, and a resegregation of the public school system. A tax credit would make it easier and cheaper to attend a de facto segregated school for those parents who wish to avoid an integrated system. I recognize and applaud the Catholic Church in its efforts to achieve racial integration throughout the Nation at large, and credit the church with the success of integration in many parts of the South, in particular. But I must still recognize the advent of private "protest schools" which have risen in objection to racial integration, and which may be encouraged by a tax credit. I must do what I can to guard against such an occurrence.

I am also most reluctant to support with Federal funds nonreligious elite private schools that exclude students for class reasons as well. I am unwilling to help perpetuate race and class divisiveness within the American education system.

Instead of the tuition tax credit approach, I prefer the College Opportunity Act of 1978, S. 2539 which is scheduled for floor activity before the Labor Day recess. This approach expands the eligibility to include middle-income families for such student aid programs as the basic educational opportunity grant program, college work study, supplemental educational opportunity grant, State student incentive grants, and guaranteed student loans.

For the BEOG program, S. 2539 significantly changes the family contribution schedule. Under this bill, the family will be expected to contribute, at most, only 10.5 percnt of their "discretionary income" for the cost of higher education. "Discretionary income" is that income that remains after Federal income taxes and necessary family and catastrophic expenses. Currently the contribution rate is 20 percent for discretionary incomes less than $5,000, and 30 percent for discretionary incomes in excess of $5,000. This change in the family contribution rate would allow an additional 1.5 million students in the BEOG program. Under this bill, a student from a family of four with an annual income of $25,000 will be eligible for a grant.

Further, the Guaranteed Student Loan Program is expanded under S. 2539, making students eligible for a subsidy interest on their loans during their in-school period, regardless of their families' incomes. Currently, subsidized loans are available only for those students of families of adjusted gross incomes less than $25,000. This bill no longer discriminates in the ability of a student to secure a GSL loan on the basis of family income.

Additionally, the other existing student aid programs are also expanded to provide financial assistance to students of middle-income families. It is for these reasons I prefer this bill to the tuition tax credit proposal. The provisions in this bill are indexed to family need and the cost of tuition, and will cost $1.4 billion per year. This approach is more equitable, less costly, and more efficient than the tuition tax credit proposal.

I have seriously studied the pros and cons of both sides of the middle-income assistance issue and have concluded that the tuition tax credit proposal is not the best means by which we can support middle-income families.●

● Mr. LUGAR. Mr. President, I recently received a letter from Rev. Henry R. Mascotte, pastor of St. Augustine Catholic Church in South Bend, Ind., in support of tuition tax credits. In his letter, Father Mascotte speaks not only for his parishioners, but for low-income innercity residents throughout the country who look to tuition tax credits to provide them greater economic freedom in educating their children. I ask that Father Mascotte's letter be printed in the RECORD.

The letter follows:

ST. AUGUSTINE CATHOLIC CHURCH,
South Bend, Ind., August 7, 1978.

Senator RICHARD LUGAR,
U.S. Senate,
Washington, D.C.

DEAR SENATOR LUGAR: The enclosed lists indicate a portion of our peoples interest in the Packwood-Moynihan bill. St. Augustine's is a small inner-city parish of 150 families, that is 65% black. The history of nonprofit schools has played a major role in moving people out of poverty in the United States. Many blacks look to those kinds of schools to help them but they are fast fading from lack of funds. This bill could change that.

Competition is the hallmark of the American way. Public schools financed with taxes, we all pay, have an advantage that puts them out of competition. This bill will improve education by providing that competitive edge.

We appreciate your support of this bill.

Sincerely,

HENRY R. MASCOTTE,
Pastor.●

● Mr. KENNEDY. Mr. President, I am opposed to the use of the Internal Revenue Code as a backdoor source of new Federal spending for education at any level—whether in colleges or secondary schools.

In my view, the longstanding and carefully structured system of Federal aid to education should be built upon and strengthened, not bypassed and undermined by an expensive and untried new method of assistance through the tax laws.

The tax credit proposals in the pending legislation would be expensive, inefficient, and inequitable methods of providing Federal aid to education. The proposals would result in losses of nearly $3 billion a year to the Federal Treasury when fully phased in. These are real dollars that will cost American taxpayers real money, at a time when the Federal Government is awash in red ink and budget deficits. It is ironic that so many

in Congress who call themselves fiscal conservatives and who consistently vote for balanced budgets and against increased spending in other areas are so quick to support this sort of wasteful spending through the Internal Revenue Code. If we have $3 billion in tax money to spend on education, we ought to spend it fairly and wisely.

I am also deeply concerned about the harmful impact of the tax credit proposals on one of our Nation's most valuable resources—our public schools. Constitutional scholars are overwhelmingly of the view that tax credits for the costs of private elementary and secondary school education would be unconstitutional under the first amendment. Therefore, in addition to the policy reasons for opposing such a credit, there is also the strong likelihood that it will be ruled invalid by the Supreme Court.

In the sensitive area of Federal education, Congress ought to be struggling to find imaginative new ways to meet the requirements of the Constitution, rather than simply defying the Supreme Court's recent decisions or asking the Court to change its mind. Unfortunately, the inevitable result of enactment of this legislation will be to raise public expectations, only to have them dashed once the Supreme Court rules on the proposal.

Expectations of relief are likely to be proved ephemeral in another major respect as well. Even if this legislation successfully runs the gauntlet of a Presidential veto and the Supreme Court's ruling, the proffered relief will be short-lived. As many economists have observed, the immediate result of enactment of this legislation is likely to be an irresistible incentive for schools and colleges to "capture" the credit by raising their tuition costs by amounts equal to the credit. As a result, parents and students will get little or no real benefit from the admitted burden of rising tuition costs.

An additional inequity in this legislation is its failure to make the tax credits "refundable." The effect is to deny the benefits of the credit to the lowest income groups and to many parents with large families, since they are the ones who will not have sufficient tax liability to take advantage of the tax credit. Yet these are precisely the parents and families who need the relief the most and who deserve to share in the benefits of this legislation if it goes forward. Unfortunately, the Finance Committee bill unfairly denies them this opportunity.

A much sounder approach to providing Federal education assistance is the College Opportunity Act of 1978, which provides a comprehensive approach to meeting the increased needs for educational assistance, with special emphasis on the needs of hard-pressed, middle income families. The Nation's basic Federal education programs have served us well in the past. With these significant 1978 improvements, they will serve us far better in the future than the unproved tax credit approach. The last thing we need in American education is to bring the Internal Revenue Service into the classroom of our schools and colleges.●

● Mr. WILLIAMS. Mr. President, the Senate has before it a difficult group of decisions as to the best means to provide assistance to families in their pursuit of education for their children. These decisions are made the more arduous by the common knowledge that our financial resources are limited and must be spent carefully, that our actions affect inflationary and recessionary potentials, and that our ability to sustain additional taxes has been exhausted.

The providing of elementary and secondary education is the primary responsibility of State and local governments. The Federal Government has always maintained a secondary role and has avoided placing itself in the position of controlling the States or the school districts of our Nation or the families who utilize educational services. The Federal Government has always refrained from involvement in curriculum, uniform standards or uniform approaches in the field of education. The Federal Government has only become involved to protect the special needs of the most disadvantaged. We have sought to minimize the Federal role and we have staunchly refused setting a National education policy beyond this limited scope.

It is, therefore, not the role of the Federal Government to intervene in State policies with respect to the kind of schools and the sources of support of those schools beyond monitoring compliance to constitutional standards and supplementing assistance for special populations such as the poor and the handicapped. It is certainly not the role of the Federal Government to equalize Federal benefits granted for those special purposes with subsidies to nonpublic institutions, directly or indirectly, in any local community or taken as a while throughout the Nation.

The history of the development of public education is instructive in this regard. Education developed in the States under the powers delegated by the 10th amendment which reserves to the States the governance of matters not otherwise singled out for Federal concern in the Constitution. Education is one of those matters.

During the late 18th century education was debated in the States, initially with different emphases and different results. Thomas Jefferson, for example, devoted 3 years of his work after the Declaration of Independence to the passage in Virginia of a compulsory and universal education law which would have provided education for 3 years in the basic skills. His efforts were successful insofar as adoption of the principle by the Virginia legislature, but the counties were free to implement the act voluntarily. The idea was too unfamiliar, and no counties implemented the measure.

Soon thereafter, however, the role of education in assuring the economic and political development of the Nation won acceptance. State after State began to develop systems of universal education. As the agrarian society gave way to our industrial society, compulsory education was enacted by the States under the powers granted them by the Constitution. Indeed, many State constitutions emphasize the regulation of education as a primary State interest.

Compulsory school attendance was enforced by the States and was implemented through school facilities and the employment of school personnel. The supreme court in State after State rejected suits brought against the institution of public education in the second half of the 19th century. Challenges to the tax system which supported public education were also overruled. The famous Kalamazoo case in 1874 brought in the Michigan Supreme Court a landmark decision that a school district cannot be restricted in its efforts to offer education opportunities and to underwrite their costs.

By the beginning of this century, universal, free public education through high school had been accepted widely, and compulsory school attendance was the established rule of law prompting and expanding that system of education. The Federal role in elementary and secondary education was virtually nonexistent until the mid-1960's when special populations such as poor children and the children of minority groups were accorded supplemental Federal assistance as part of our antipoverty and civil rights efforts.

In the bill before us. we are now being asked to reverse Federal policies with respect to elementary and secondary education and to establish a National policy with far-reaching and unforeseen implications. To what extent for example, would such a policy reversal dampen the State efforts and local willingness to underwrite education? We are all aware that the property tax is of great concern across the Nation. To what extent would tripling the Federal support to private education in the form of tuition tax credits impose greater burdens on the property tax if huge incentives were generated to favor private education? And to what extent will our efforts to bring equal opportunity to the disadvantaged and minority groups be undercut by the tuition tax policy urged upon us by the tax credit bill?

Respected authorities differ, but I cannot help but be concerned by the most recent study of this matter emanating from Johns Hopkins University. That study predicts that a tuition tax credit would prove to be an incentive to segregation. While such projections cannot contain the certainty of experience, I am concerned about the possible dangers posed.

In my opinion, Mr. President, it is unwise to accept the invitation of H.R. 12050 to embark on a National education policy through tuition tax credits for elementary and secondary education. Education should and must remain a State and local responsibility and when given the opportunity to respond to tuition tax credits, an overwhelming majority of Americans in the most recent and respected poll of public opinion rejected the approach. Two respected committees of this Senate have raised serious reser-

vations about such an approach, reservations which need not be recounted here given the recent, repeated statements of our colleagues. And finally grave constitutional issues cloud the validity of this measure.

Accordingly, I urge this body to consider alternative assistance to pupils whose economic or personal circumstances warrant special assistance; assistance which is available through the time-tested approach of Federal categorical support and which emphasizes the primacy of the State and local roles in education.

I urge this body to consider such approaches—which are financially controllable, which permit the Congress to periodically review the efficacy and the effectiveness of Federally authorized programs, and which annually adjust levels of Federal spending directly through the budget and appropriations process. In my opinion, the use of the taxing device is not the best approach to solving the problems of the spiraling costs of education for elementary and secondary school expenses. In this era of economic concern, we should not open the door to new policies depending upon the vagaries of backdoor spending.

H.R. 12050 concerns postsecondary education as well. And here we have different issues and different concerns. Here we have different policies by tradition and past congressional actions.

When higher education student assistance was first authorized in the mid-1960's, the Federal objective was to open access to college for America's capable, low-income students. We had earlier, through veteran's education programs and through the National Defense Education Act, taken the position that it was Federal policy to promote higher education for certain worthy groups such as veterans, older learners and the disadvantaged.

It is timely now to provide access to middle-income families whose ability to bear college burdens is strained by spiraling costs. The question facing us is selection of the best means to achieve that end.

In vivid contrast to our posture respecting elementary and secondary education, our higher education policy has been geared to a Federal role and a pluralistic group of programs to achieve that leadership.

Accordingly, a tuition tax credit program would be consonant with our policies and actions in the higher education field, even if it is not the sole or preferred means to implement those policies.

Tuition tax credits at the post-secondary level are not nearly so clouded by constitutional issues. Their principal advantage is the simplicity of their administration. Their principal disadvantage is that they provide significantly less assistance to middle income families than provided through the basic grant and loan programs.

For example, we could provide $700 a year for a family of four earning $19,000 adjusted income with one child in college under the basic grant program but only $250 as a tuition tax credit for that family. In addition, the basic grant program is more efficient economically and more realistic for family finances. However, it does require far too much paperwork, and that is one reason that the addition of tax credit device may be a useful device in our arsenal of higher education programs.

It was for this reason that I voted in favor of the Roth amendment to the Social Security Act in the first session of this Congress. That amendment passed the Senate and would have provided tuition tax relief to families with college students. It is for this reason that I am disposed to vote for the college tuition tax credit portion of H.R. 12050. For I believe that college credits can promote diversity of support for our national college student assistance policy.

In conclusion, Mr. President, we should reject tuition tax credits as an education policy at the elementary and secondary level, but consider favorably the adoption of this approach to enhance the Nation's higher education assistance programs.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Several Senators addressed the Chair.

Mr. MOYNIHAN. Mr. President, I yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. CURTIS. Mr. President, I shall not delay the Senate more than 2 or 3 minutes.

I rise to compliment the managers of this bill. They have taken care of it for the rest of us on the Finance Committee. Their debate has been learned and eloquent, and I especially mention Senators PACKWOOD, ROTH, and MOYNIHAN, and others who have participated in the debate.

Mr. President, I view this proposal as a tax matter and not an educational bill. We are dealing with money that belongs to individual taxpayers. It is a matter of tax reform, tax equity, and nothing more.

At the present time all taxpayers pay to support the public schools. That is correct. Taxpayers who are single individuals, taxpayers who are couples who have no children, corporations, trusts, all others pay taxes to support the public schools, not for the purpose of educating their children but because it is in the public good to do that.

Now, parents who send their children to private and church schools pay the tax to support the public schools. That is their duty and obligation as citizens. That is as it should be.

When the parents do that, when they spend their money to support a church and private school, they are saving the taxpayers the costs of buildings, gymnasiums, classrooms, equipment, teachers' salaries, supervisors, and books.

If the parents thus save the public expense by this expenditure they ought to have a tax deduction.

Now, this bill is written as a credit. I wish it were a deduction. I think all of these things should be handled that way.

I call attention to the fact that if you make a contribution to a charitable organization the reason back of that is that if that charitable organization takes care of widows, orphans, the poor and the homeless they relieve the public expense by that amount, and because they do it we give the donor a tax benefit.

Likewise when parents pay the full tax to support the public schools and then they make a further payment in order to lessen that expense on the public, they should be encouraged with a tax benefit.

It is not new. At the present time an employer can send his employees to school to upgrade his training and take a deduction for it. Why should we not permit parents to do the same thing?

Mr. President, I yield the floor.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. MOYNIHAN. The Senator from Rhode Island has asked for the floor. May we have order so that the Senator from Rhode Island may be heard?

The PRESIDING OFFICER. The Senator is correct, and the Senate is not in order.

The Senator from Rhode Island.

Mr. PELL. Mr. President, I would like to remind my colleagues we will have immediately following this bill, S. 2539, which also seeks to help middle-income America, and does it by raising the limitation for the basic educational opportunity grants from about $13,000 a year to $25,000 a year.

We will also have coming up very shortly, within a week the leadership indicated, S. 1753, which seeks to assist nonpublic schools by giving money to them in accordance with the present methods that have been ruled constitutional.

So in casting our vote at this time, we should bear in mind that we have these two anchors to windward to help the youngsters of hard-pressed middle America.

Mr. ROBERT C. BYRD. Mr. President, has the bill advanced to third reading yet?

The PRESIDING OFFICER. It has been advanced to third reading.

Mr. ROBERT C. BYRD. Mr. President, I will not delay the Senate. I want to make an announcement.

S. 2539, HELP TO HIGHER EDUCATION BILL

Mr. President, the bill which will immediately follow final action on this bill tonight is S. 2539, the help to higher education bill. There will be no more rollcall votes today after the final vote on this bill, it being now 6 minutes until 9 p.m.

Now, I would like to, if I could, find out how many Senators wish to offer amendments to the higher education bill. The opening statements will be made tonight, there will be no more rollcall votes tonight.

I ask unanimous consent that when the Senate convenes tomorrow it convene at 10 a.m.—no, Mr. President, I will

leave the meeting time at 9:30 as it now stands. Rollcall votes will be occurring early.

Mr. MOYNIHAN. Mr. President, on behalf of the managers of the bill I would like to express our appreciation to Senator CURTIS for his generous remarks.

I move passage of the bill.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from New Hampshire (Mr. DURKIN), the Senator from Mississippi (Mr. EASTLAND), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Virginia (Mr. SCOTT) is necessarily absent.

(Mr. SASSER assumed the chair.)

The result was announced—yeas 65, nays 27, as follows:

[Rollcall Vote No. 323 Leg.]

YEAS—65

Allen	Hansen	Nunn
Anderson	Haskell	Packwood
Baker	Hatch	Pearson
Bayh	Hatfield,	Percy
Bentsen	Paul G.	Proxmire
Biden	Hathaway	Randolph
Brooke	Heinz	Ribicoff
Byrd,	Helms	Riegle
Harry F., Jr.	Hollings	Roth
Byrd, Robert C.	Huddleston	Sasser
Cannon	Humphrey	Schmitt
Case	Jackson	Schweiker
Church	Laxalt	Stevens
Curtis	Long	Stevenson
Danforth	Lugar	Talmadge
DeConcini	Magnuson	Thurmond
Dole	Mathias	Tower
Domenici	Matsunaga	Wallop
Eagleton	McClure	Weicker
Ford	McIntyre	Williams
Garn	Melcher	Zorinsky
Gravel	Moynihan	
Griffin	Nelson	

NAYS—27

Bartlett	Goldwater	Metzenbaum
Bellmon	Hart	Morgan
Bumpers	Hatfield,	Muskie
Burdick	Mark O.	Pell
Chafee	Hayakawa	Sarbanes
Chiles	Hodges	Stafford
Clark	Javits	Stone
Cranston	Kennedy	Young
Culver	Leahy	
Glenn	McGovern	

NOT VOTING—8

Abourezk	Inouye	Sparkman
Durkin	Johnston	Stennis
Eastland	Scott	

So the bill (H.R. 12050), as amended, was passed.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the bill H.R. 12050 be printed with the amendments of the Senate numbered and that in the engrossment of the amendments of the Senate to the bill the Secretary of the Senate be authorized to make necessary technical and clerical changes and corrections, including corrections in sections, subsections, and so forth, designations and cross-references thereto.

The PRESIDING OFFICER (Mr. SARBANES). Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I move that the Senate insist upon its amendments to the bill H.R. 12050 and ask for a conference with the House thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. LONG, Mr. RIBICOFF, Mr. BENTSEN, Mr. MOYNIHAN, Mr. PACKWOOD, Mr. ROTH, and Mr. DOLE conferees on the part of the Senate.

Mr. MOYNIHAN. I thank the Chair.

INTERNATIONAL BANKING ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 995.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 10899) to provide for Federal regulation of participation by foreign banks in domestic financial markets.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

There being no objection, the Senate proceeded to consider the bill (H.R. 10899) which had been reported from the Committee on Banking, Housing, and Urban Affairs with an amendment to strike all after the enacting clause and insert the following:

SHORT TITLE; DEFINITIONS AND RULES OF CONSTRUCTION

SECTION 1. (a) This Act may be cited as the "International Banking Act of 1978".

(b) For the purposes of this Act—

(1) "agency" means any office or any place of business of a foreign bank located in any State of the United States at which credit balances are maintained incidental to or arising out of the exercise of banking powers, checks are paid, or money is lent but at which deposits may not be accepted from citizens or residents of the United States;

(2) "Board" means the Board of Governors of the Federal Reserve System;

(3) "branch" means any office or any place of business of a foreign bank located in any State of the United States at which deposits are received;

(4) "Comptroller" means the Comptroller of the Currency;

(5) "Federal agency" means any agency of a foreign bank established and operating under section 4 of this Act;

(6) "Federal branch" means a branch of a foreign bank established and operating under section 4 of this Act;

(7) "foreign bank" means any company organized under the laws of a foreign country, a territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands, which engages in the business of banking, or any subsidiary or affiliate, organized under such laws, of any such company. For the purposes of this Act the term "foreign bank" includes, without limitation, foreign commercial banks, foreign merchant banks and other foreign institutions that engage in banking activities usual in connection with the business of banking in the countries where such foreign institutions are organized or operating;

(8) "foreign country" means any country other than the United States, and includes any colony, dependency, or possession of any such country;

(9) "commercial lending company" means any institution, other than a bank or an organization operating under section 25 of the Federal Reserve Act, organized under the laws of any State of the United States, or the District of Columbia which maintains credit balances incidental to or arising out of the exercise of banking powers and engages in the business of making commercial loans;

(10) "State" means any State of the United States or the District of Columbia;

(11) "State agency" means an agency of a foreign bank established and operating under the laws of any State;

(12) "State branch" means a branch of a foreign bank established and operating under the laws of any State;

(13) the terms "bank", "bank holding company", "company", "control", and "subsidiary" have the same meanings assigned to those terms in the Bank Holding Company Act of 1956 and the terms "controlled" and "controlling" shall be construed consistently with the term "control" as defined in section 2 of the Bank Holding Company Act of 1956; and

(14) "consolidated" means consolidated in accordance with generally accepted accounting principles in the United States consistently applied.

DIRECTORS OF NATIONAL BANKS

SEC. 2. Section 5146 of the Revised Statutes (12 U.S.C. 72) is amended by striking out the period at the end of the first sentence and adding the following new provision: ", except that in the case of an association which is a subsidiary or affiliate of a foreign bank, the Comptroller of the Currency may in his discretion waive the requirement of citizenship in the case of not more than a minority of the total number of directors.".

EDGE ACT CORPORATIONS

SEC. 3. (a) It is the purpose of this section to eliminate or modify provisions in section 25(a) of the Federal Reserve Act that (1) discriminate against foreign-owned banking institutions, (2) disadvantage or unnecessarily restrict or limit corporations organized under section 25(a) of the Federal Reserve Act in competing with foreign-owned banking institutions in the United States or abroad or (3) impede the attainment of the Congressional purposes set forth in section 25(a) of the Federal Reserve Act as amended by subsection (b) of this section. In furtherance of such purpose, the Congress believes that the Board should review and revise its rules, regulations, and interpretations issued pursuant to section 25 (a) of the Federal Reserve Act to eliminate or modify any restrictions, conditions, or limitations not required by section 25(a) of the Federal Reserve Act, as amended, that (1) discriminate against foreign-owned banking institutions, (2) disadvantage or unnecessarily restrict or limit corporations organized under section 25(a) of the Federal Reserve Act in competing with foreign-owned banking institutions in the United States or abroad, or (3) impede the attainment of the Congressional purposes set forth in section 25(a) of the Federal Reserve Act as amended by subsection (b) of this section. Rules and regulations pursuant to this subsection and section 25(a) of the Federal Reserve Act shall be issued not later than 150 days after the date of enactment of this section and shall be issued in final form and become effective not later than 120 days after they are first issued.

(b) Section 25(a) of the Federal Reserve Act is amended by adding after the first paragraph (12 U.S.C. 611), the following new paragraph:

"The Congress hereby declares that it is

the purpose of this section to provide for the establishment of international banking and financial corporations operating under Federal supervision with powers sufficiently broad to enable them to compete effectively with similar foreign-owned institutions in the United States and abroad; to afford to the United States exporter and importer in particular, and to United States commerce, industry, and agriculture in general, at all times a means of financing international trade, especially United States exports; to foster the participation by regional and smaller banks throughout the United States in the provision of international banking and financing services to all segments of United States agriculture, commerce, and industry, and, in particular small business and farming concerns; to stimulate competition in the provision of international banking and financing services throughout the United States; and, in conjunction with each of the preceding purposes, to facilitate and stimulate the export of United States goods, wares, merchandise, commodities, and services to achieve a sound United States international trade position. The Board of Governors of the Federal Reserve System shall issue rules and regulations under this section consistent with and in furtherance of the purposes described in the preceding sentence, and, in accordance therewith, shall review and revise any such rules and regulations at least once every five years, the first such period commencing with the effective date of rules and regulations issued pursuant to section 3(a) of the International Banking Act of 1978, in order to ensure that such purposes are being served in light of prevailing economic conditions and banking practices.".

(c) The second sentence of the fourth paragraph of section 25(a) of the Federal Reserve Act (12 U.S.C. 614) is amended by striking out ", all of whom shall be citizens of the United States" after "to elect or appoint directors".

(d) The first sentence of the sixth paragraph of section 25(a) of the Federal Reserve Act (12 U.S.C. 615(a)) is amended by striking ", but in no event having liabilities outstanding thereon at any one time exceeding ten times its capital stock and surplus"; and the first sentence of the twelfth paragraph of section 25(a) of the Federal Reserve Act (12 U.S.C. 618) is amended by inserting a period after "and in section 25 of the Federal Reserve Act as amended", and by striking the remainder of the sentence.

(e) The third sentence of the sixth paragraph of section 25(a) of the Federal Reserve Act (12 U.S.C. 615(a)) is amended by striking ", but in no event less than ten per centum of its deposits" and inserting in lieu thereof "for member banks of the Federal Reserve System".

(f) The thirteenth paragraph of section 25(a) of the Federal Reserve Act (12 U.S.C. 619) is deleted and the following paragraph is inserted in lieu thereof:

"Except as otherwise provided in this section, a majority of the shares of the capital stock of any such corporation shall at all times be held and owned by citizens of the United States, by corporations the controlling interest in which is owned by citizens of the United States, chartered under the laws of the United States or of a State of the United States, or by firms or companies, the controlling interest in which is owned by citizens of the United States. Notwithstanding any other provisions of this section, one or more foreign banks, institutions organized under the laws of foreign countries which own or control foreign banks, or banks organized under the laws of the United States, the States of the United States, or the District of Columbia, the controlling interests in which are owned by any such foreign banks or institutions, may, with the prior approval of the Board of Governors of the Federal Reserve System and upon such terms and conditions and subject to such rules and regulations as the Board of Governors of the Federal Reserve System may prescribe, own and hold 50 per centum or more of the shares of the capital stock of any corporation organized under this section, and any such corporation shall be subject to the same provisions of law as any other corporation organized under this section, and the terms 'controls' and 'controlling interest' shall be construed consistently with the definition of 'control' in section 2 of the Bank Holding Company Act of 1956. For the purposes of the preceding sentence of this paragraph the term 'foreign bank' shall have the meaning assigned to it in the International Banking Act of 1978.".

(g) The Board shall report to the Congress not later than 270 days after the date of enactment of this Act its recommendations with respect to permitting corporations organized or operating under section 25 or 25(a) of the Federal Reserve Act, to become members of Federal Reserve Banks.

(h) As part of its annual report pursuant to section 10 of the Federal Reserve Act, the Board shall include its assessment of the effects of the amendments made by this Act on the capitalization and activities of corporations organized or operating under section 25 or 25(a) of the Federal Reserve Act, and on commercial banks and the banking system.

FEDERAL BRANCHES AND AGENCIES

SEC. 4. (a) Except as provided in section 5, a foreign bank which engages directly in a banking business outside the United States may, with the approval of the Comptroller, establish one or more Federal branches or agencies in any State in which (1) it is not operating a branch or agency pursuant to State law and (2) the establishment of a branch or agency, as the case may be, by a foreign bank is not prohibited by State law.

(b) In establishing and operating a Federal branch or agency, a foreign bank shall be subject to such rules, regulations, and orders as the Comptroller considers appropriate to carry out this section, which shall include provisions for service of process and maintenance of branch and agency accounts separate from those of the parent bank. Except as otherwise specifically provided in this Act or in rules, regulations, or orders adopted by the Comptroller under this section, operations of a foreign bank at a Federal branch or agency shall be conducted with the same rights and privileges as a national bank at the same location and shall be subject to all the same duties, restrictions, penalties liabilities, conditions, and limitations that would apply under the National Bank Act to a national bank doing business at the same location, except that (1) the requirements of section 5240 of the Revised Statutes (12 U.S.C. 481) shall be met with respect to a Federal branch or agency if it is examined at least once in each calendar year; (2) any limitation or restriction based on the capital stock and surplus of a national bank shall be deemed to refer, as applied to a Federal branch or agency, to the dollar equivalent of the capital stock and surplus of the foreign bank, and if the parent bank has more than one Federal branch or agency the business transacted by all such branches and agencies shall be aggregated in determining compliance with the limitation; (3) a Federal branch or agency shall not be required to become a member bank, as that term is defined in section 1 of the Federal Reserve Act; and (4) a Federal agency shall not be required to become an insured bank as that term is defined in section 3(h) of the Federal Deposit Insurance Act.

(c) In acting on any application to establish a Federal branch or agency, the Comptroller shall take into account the effects of the proposal on competition in the domestic and foreign commerce of the United States, the financial and managerial resources and future prospects of the applicant foreign bank and the branch or agency, and the convenience and needs of the community to be served.

(d) Notwithstanding any other provision of this section, a foreign bank shall not receive deposits or exercise fiduciary powers at any Federal agency. A foreign bank may, however, maintain at a Federal agency for the account of others credit balances incidental to, or arising out of, the exercise of its lawful powers.

(e) No foreign bank may maintain both a Federal branch and a Federal agency in the same State.

(f) Any branch or agency operated by a foreign bank in a State pursuant to State law and any commercial lending company controlled by a foreign bank may be converted into a Federal branch or agency with the approval of the Comptroller. In the event of any conversion pursuant to this subsection, all of the liabilities of such foreign bank previously payable at the State branch or agency, or all of the liabilities of the commercial lending company, shall thereafter be payable by such foreign bank at the branch or agency established under this subsection.

(g)(1) Upon the opening of a Federal branch or agency in any State and thereafter, a foreign bank, in addition to any deposit requirements imposed under section 6(a) of this Act, shall keep on deposit, in accordance with such rules and regulations as the Comptroller may prescribe, with a member bank designated by such foreign bank, dollar deposits or investment securities of the type that may be held by national banks for their own accounts pursuant to paragraph "Seventh" of section 5136 of the Revised Statutes, as amended, in an amount as hereinafter set forth. Such depository bank shall be located in the State where such branch or agency is located and shall be approved by the Comptroller if it is a national bank and by the Board of Governors of the Federal Reserve Bank if it is a State Bank.

(2) The aggregate amount of deposited investment securities (calculated on the basis of principal amount or market value, whichever is lower) and dollar deposits for each branch or agency established and operating under this section shall be not less than the greater of (1) that amount of capital (but not surplus) which would be required of a national bank being organized at this location, or (2) 5 per centum of the total liabilities of such branch or agency, including acceptances, but excluding (A) accrued expenses, and (B) amounts due and other liabilities to offices, branches, agencies, and subsidiaries of such foreign bank. The Comptroller may require that the assets deposited pursuant to this subsection shall be maintained in such amounts as he may from time to time deem necessary or desirable, for the maintenance of a sound financial condition, the protection of depositors, and the public interest, but such additional amount shall in no event be greater than would be required to conform to generally accepted banking practices as manifested by banks in the area in which the branch or agency is located.

(3) The deposit shall be maintained with any such member bank pursuant to a deposit agreement in such form and containing such limitation and conditions as the Comptroller may prescribe. So long as it continues business in the ordinary course such foreign bank shall, however, be permitted to collect income on the securities and funds so deposited and from time to time examine and exchange such securities.

(4) Subject to such conditions and requirements as may be prescribed by the Comptroller, each foreign bank shall hold in each State in which it has a Federal branch

or agency, assets of such types and in such amount as the Comptroller may prescribe by general or specific regulation or ruling as necessary or desirable for the maintenance of a sound financial condition, the protection of depositors, creditors and the public interest. In determining compliance with any such prescribed asset requirements, the Comptroller shall give credit to (A) assets required to be maintained pursuant to paragraphs (1) and (2) of this subsection, (B) reserves required to be maintained pursuant to section 7(a) of this Act, and (C) assets pledged, and surety bonds payable, to the Federal Deposit Insurance Corporation to secure the payment of domestic deposits. The Comptroller may prescribe different asset requirements for branches or agencies in different States, in order to insure competitive equality of Federal branches and agencies with State branches and agencies and domestic banks in those States.

(h) A foreign bank with a Federal branch or agency operating in any State may (1) with the prior approval of the Comptroller establish and operate additional branches or agencies in the State in which such branch or agency is located on the same terms and conditions and subject to the same limitations and restrictions as are applicable to the establisment of branches by a national bank if the principal office of such national bank were located at the same place as the initial branch or agency in such State of such foreign bank and (2) change the designation of its initial branch or agency to any other branch or agency subject to the same limitations and restrictions as are applicable to a change in the designation of the principal office of a national bank if such principal office were located at the same place as such initial branch or agency.

(i) Authority to operate a Federal branch or agency shall terminate when the parent foreign bank voluntarily relinquishes it or when such parent foreign bank is dissolved or its authority or existence is otherwise terminated or canceled in the country of its organization. If (1) at any time the Comptroller is of the opinion or has reasonable cause to believe that such foreign bank has violated or failed to comply with any of the provisions of this section or any of the rules, regulations, or orders of the Comptroller made pursuant to this section, or (2) a conservator is appointed for such foreign bank or a similar proceeding is initiated in the foreign bank's country of organization, the Comptroller shall have the power, after opportunity for hearing, to revoke the foreign bank's authority to operate a Federal branch or agency. The Comptroller may, in his discretion, deny such opportunity for hearing if he determines such denial to be in the public interest. The Comptroller may restore any such authority upon due proof of compliance with the provisions of this section and the rules, regulations, or orders of the Comptroller made pursuant to this section.

(j)(1) Whenever the Comptroller revokes a foreign bank's authority to operate a Federal branch or agency or whenever any creditor of any such foreign bank shall have obtained a judgment against it arising out of a transaction with a Federal branch or agency in any court of record of the United States or any State of the United States and made application, accompanied by a certificate from the clerk of the court stating that such judgment has been rendered and has remained unpaid for the space of thirty days, or whenever the Comptroller shall become satisfied that such foreign bank is insolvent, he may, after due consideration of its affairs, in any such case, appoint a receiver who shall take possession of all the property and assets of such foreign bank in the United States and exercise the same rights, privileges, powers, and authority with respect thereto as are now exercised by receivers of national banks appointed by the Comptroller.

(2) In any receivership proceeding ordered pursuant to this subsection (j), whenever there has been paid to each and every depositor and creditor of such foreign bank whose claim or claims shall have been proved or allowed, the full amount of such claims arising out of transactions had by them with any branch or agency of such foreign bank located in any State of the United States, except (A) claims that would not represent an enforceable legal obligation against such branch or agency if such branch or agency were a separate legal entity, and (B) amounts due and other liabilities to other offices or branches or agencies of, and wholly owned (except for a nominal number of directors' shares) subsidiaries of, such foreign bank, and all expenses of the receivership, the Comptroller or the Federal Deposit Insurance Corporation, where that Corporation has been appointed receiver of the foreign bank, shall turn over the remainder, if any, of the assets and proceeds of such foreign bank to the head office of such foreign bank, or to the duly appointed domiciliary liquidator or receiver of such foreign bank.

INTERSTATE BANKING OPERATIONS

SEC. 5. (a) Except as provided by subsection (b), (1) no foreign bank may directly or indirectly establish and operate a Federal branch outside of its home State unless (A) its operation is expressly permitted by the State in which it is to be operated, and (B) the foreign bank shall enter into an agreement or undertaking with the Board to receive only such deposits at the place of operation of such Federal branch as would be permissible for a corporation organized under section 25(a) of the Federal Reserve Act under rules and regulations administered by the Board; (2) no foreign bank may directly or indirectly establish and operate a State branch outside of its home State unless (A) it is approved by the bank regulatory authority of the State in which such branch is to be operated, and (B) the foreign bank shall enter into an agreement or undertaking with the Board to receive only such deposits at the place of operation of such State branch as would be permissible for a corporation organized under section 25(a) of the Federal Reserve Act under rules and regulations administered by the Board; (3) no foreign bank may directly or indirectly establish and operate a Federal agency outside of its home State unless its operation is expressly permitted by the State in which it is to be operated; (4) no foreign bank may directly or indirectly establish and operate a State agency or commercial lending company subsidiary outside of its home State, unless its establishment and operation is approved by the bank regulatory authority of the State in which it is to be operated; and (5) no foreign bank may directly or indirectly acquire any voting shares of, interest in, or substantially all of the assets of a bank located outside of its home State if such acquisition would be prohibited under section 3(d) of the Bank Holding Company Act of 1956 if the foreign bank were a bank holding company the operations of whose banking subsidiaries were principally conducted in the foreign bank's home State. Notwithstanding any other provisions of Federal or State law, deposits received by any Federal or State branch subject to the limitations of an agreement or undertaking imposed under this subsection shall not be subject to any requirement of mandatory insurance by the Federal Deposit Insurance Corporation.

(b) Unless its authority to do so is lawfully revoked otherwise than pursuant to this section, a foreign bank, notwithstanding any restriction or limitation imposed under subsection (a) of this section, may establish and operate, outside its home State, any State branch, State agency, or bank or commercial lending company subsidiary which commenced lawful operation or for which an application to commence business had been lawfully filed with the appropriate State or Federal authority, as the case may be, on or before July 26, 1978.

(c) for the purposes of this section, the home State of a foreign bank that has branches, agencies, subsidiary commercial lending companies, or subsidiary banks, or any combination thereof, in more than one State, is whichever of such States is so determined by election of the foreign bank, or, in default of such election, by the Board.

INSURANCE OF DEPOSITS

SEC. 6. (a) No foreign bank may establish or operate a Federal branch which receives deposits of less than $100,000 unless the branch is an insured branch as defined in section 3(s) of the Federal Deposit Insurance Act.

(b) After the date of enactment of this Act no foreign bank may establish a branch, and after one year following such date no foreign bank may operate a branch, in any State in which the deposits of a bank organized and existing under the laws of that State would be required to be insured, unless the branch is an insured branch as defined in section 3(s) of the Federal Deposit Insurance Act, or unless the branch will not thereafter accept deposits of less than $100,000.

(c)(1) The Federal Deposit Insurance Act (12 U.S.C. 1811–1832) is amended as set forth hereinafter in this subsection, in which section numbers not otherwise identified refer to sections of that Act.

(2) Section 3(h) is amended by inserting "(including a foreign bank having an insured branch)" immediately after "(h) The term 'insured bank' means any bank".

(3) Section 3(j) is amended by inserting "or of a branch of a foreign bank" immediately before the period at the end thereof.

(4) Section 3(m) is amended (A) by changing "(m) The" to read "(m)(1) Subject to the provisions of paragraph (2) of this subsection, the", and (B) by adding at the end thereof the following new paragraph:

"(2) In the case of any deposit in a branch of a foreign bank, the term 'insured deposit' means an insured deposit as defined in paragraph (1) of this subsection which—

"(A) is payable in the United States to—

"(i) an individual who is a citizen or resident of the United States,

"(ii) a partnership, corporation, trust, or other legally cognizable entity created under the laws of the United States or any State and having its principal place of business within the United States or any State, or

"(iii) an individual, partnership, corporation, trust, or other legally cognizable entity which is determined by the Board of Directors in accordance with its regulations to have such business or financial relationships in the United States as to make the insurance of such deposit consistent with the purposes of this Act;

and

"(B) meets any other criteria prescribed by the Board of Directors by regulation as necessary or appropriate in its judgment to carry out the purposes of this Act or to facilitate the administration thereof.".

(5) Section 3(q) is amended to read as follows:

"(q) The term 'appropriate Federal banking agency' shall mean—

"(1) the Comptroller of the Currency in the case of a national banking association, a District bank, or a Federal branch or agency of a foreign bank;

"(2) the Board of Governors of the Federal Reserve System—

"(A) in the case of a State member insured bank (except a District bank),

"(B) in the case of any branch or agency of a foreign bank with respect to any provision of the Federal Reserve Act which is made applicable under the International Banking Act of 1978,

"(C) in the case of any foreign bank which does not operate an insured branch,

"(D) in the case of any agency or commercial lending company other than a Federal agency, and

"(E) in the case of supervisory or regulatory proceedings arising from the authority given to the Board of Governors under section 7(c)(1) of the International Banking Act of 1978, including such proceedings under the Financial Institutions Supervisory Act, and

"(3) the Federal Deposit Insurance Corporation in the case of a State nonmember insured Bank (except a District bank) or a foreign bank having an insured branch.

Under the rule set forth in this subsection, more than one agency may be an appropriate Federal banking agency with respect to any given institution. For the purposes of subsections (b) through (n) of section 8 of this Act, the term 'insured bank' shall be deemed to include any uninsured branch or agency of a foreign bank.".

(6) Section 3 is amended by adding at the end thereof the following new subsections:

"(r) The terms 'foreign bank' and 'Federal branch' shall be construed consistently with the usage of such terms in the International Banking Act of 1978.

"(s) The term 'insured branch' means a branch of a foreign bank any deposits in which are insured in accordance with the provisions of this Act.".

(7) Section 5 is amended (A) by changing "SEC. 5." to read "SEC. 5. (a)" and (B) by adding at the end thereof the following new subsections:

"(b) Subject to the provisions of this Act and to such terms and conditions as the Board of Directors may impose, any branch of a foreign bank, upon application by the bank to the Corporation, and examination by the Corporation of the branch, and approval by the Board of Directors, may become an insured branch. Before approving any such application, the Board of Directors shall give consideration to—

"(1) the financial history and condition of the bank,

"(2) the adequacy of its capital structure,

"(3) its future earnings prospects,

"(4) the general character of its management, including but not limited to the management of the branch proposed to be insured,

"(5) the convenience and needs of the community to be served by the branch,

"(6) whether or not its corporate powers, insofar as they will be exercised through the proposed insured branch, are consistent with the purposes of this Act, and

"(7) the probable adequacy and reliability of information supplied and to be supplied by the bank to the Corporation to enable it to carry out its functions under this Act.

"(c)(1) Before any branch of a foreign bank becomes an insured branch, the bank shall deliver to the Corporation or as the Corporation may direct a surety bond, a pledge of assets, or both, in such amounts and of such types as the Corporation may require or approve, for the purpose set forth in paragraph (4) of this subsection.

"(2) After any branch of a foreign bank becomes an insured branch, the bank shall maintain on deposit with the Corporation, or as the Corporation may direct, surety bonds or assets or both, in such amounts and of such types as shall be determined from time to time in accordance with such regulations as the Board of Directors may prescribe. Such regulations may impose differing requirements on the basis of any factors which in the judgment of the Board of Directors are reasonably related to the purpose set forth in paragraph (4).

"(3) The Corporation may require of any given bank larger deposits of bonds and assets than required under paragraph (2) of this subsection if, in the judgment of the Corporation, the situation of that bank or any branch thereof is or becomes such that the deposits of bonds and assets otherwise required under this section would not adequately fulfill the purpose set forth in paragraph (4). The imposition of any such additional requirements may be without notice or opportunity for hearing, but the Corporation shall afford an opportunity to any such bank to apply for a reduction or removal of any such additional requirements so imposed.

"(4) The purpose of the surety bonds and pledges of assets required under this subsection is to provide protection to the deposit insurance fund agains the risks entailed in insuring the domestic deposits of a foreign bank whose activities, assets, and personnel are in large part outside the jurisdiction of the United States. In the implementation of its authority under his subsection, however, the Corporation shall endeavor to avoid imposing requirements on such banks which would unnecessarily place them at a competitive disadvantage in relation to domestically incorporated banks.

"(5) In the case of any failure or threatened failure of a foreign bank to comply with any requirement imposed under this subsection (c), the Corporation, in addition to all other administrative and judicial remedies, may apply to any United States district court, or United States court of any territory, within the jurisdiction of which any branch of the bank is located, for an injunction to compel such bank and any officer, employee, or agent thereof, or any other person having custody or control of any of its assets, to deliver to the Corporation such assets as may be necessary to meet such requirement, and to take any other action necessary to vest the Corporation with control of assets so delivered. If the court shall determine that there has been any such failure or threatened failure to comply with any such requirement, it shall be the duty of the court to issue such injunction. The propriety of the requirement may be litigated only as provided in chapter 7 of title 5 of the United States Code, and may not be made an issue in an action for an injunction under this paragraph.".

(8) The first sentence of section 7(a)(1) is amended by inserting "and each foreign bank having an insured branch which is not a Federal branch" immediately before "shall make to the Corporation".

(9) The first sentence of section 7(a)(3) is amended (A) by inserting "and each foreign bank having an insured branch (other than a Federal branch)" immediately before "shall make to the Corporation" and (B) by inserting ", each foreign bank having an insured branch which is a Federal branch," immediately before "and each insured district".

(10) Section 7(a) is amended by adding at the end thereof the following new paragraph:

"(7) In respect of any report required or authorized to be supplied or published pursuant to this subsection or any other provision of law, the Board of Directors or the Comptroller of the Currency, as the case may be, may differentiate between domestic banks and foreign banks to such extent as, in their judgment, may be reasonably required to avoid hardship and can be done without substantial compromise of insurance risk or supervisory and regulatory effectiveness.".

(11) Section 7(b) is amended (A) by changing "(4) A bank's assessment base" to read "(4)(A) Except as provided in subparagraph (B) of this paragraph, a bank's assessment base" and (B) by adding at the end thereof the following new subparagraph:

"(B) in determining the assessment base and assessment base additions and deductions of a foreign bank having an insured branch, such adjustments shall be made as the Board of Directors may by regulation prescribe in order to provide equitable treatment for domestic and foreign banks.".

(12) Section 7(j)(1) is amended (A) by changing "(j)(1) Whenever" to read "(j)(1)(A) Except as provided in subparagraph (B) of this paragraph, whenever", and (B) by adding at the end thereof the following new subparagraph:

"(B) The Board of Directors may by regulation exempt from the reporting requirements of subparagraph (A) of this paragraph any transaction in the stock of a foreign bank to the extent that the making of any such report would be prohibited by the laws of the country of domicile of the foreign bank in effect at the time such bank makes its application under section 5(b) of this Act, or rendered impracticable by the customs and usages of such country, but the Board of Directors shall weigh the existence of any such prohibition or impracticability in connection with its consideration of the factors enumerated in sections 5(b)(4) and 5(b)(7).".

(13) Section 7(j)(2) is amended by changing "(2) Whenever" to read "(2)(A) Except as provided in subparagraph (B) of this paragraph, whenever" and by adding at the end thereof the following new subparagraph.

"(B) The requirements of subparagraph (A) of this paragraph shall not apply in the case of a loan secured by the stock of a foreign bank if the lending bank is a foreign bank under the laws of whose domicile the report otherwise required by subparagraph (A) would be prohibited.

"(C) No foreign bank under the laws of whose domicile a report in compliance with subparagraph (A) of this paragraph would be prohibited in the case of a loan to acquire the stock of an insured bank which is not a foreign bank may make, acquire, or retain any such loan. Each report of condition filed under subsection (a) by any foreign bank to which this subparagraph applies shall contain either a statement of the amount of each loan made, retained, or acquired by the foreign bank in violation of this subparagraph during the period from the date it became an insured bank or the date of its last report of condition, whichever is later, to the date of the report of condition, or a statement that no such loans were made and no such loans were outstanding during such period.".

(14) The first sentence of section 8(a) is amended by inserting ", a foreign bank having an insured branch which is a Federal branch, a foreign bank having an insured branch which is required to be insured under section 6 (a) or (b) of the International Banking Act of 1978," immediately after "(except a national member bank".

(15) Section 8 is amended by adding at the end thereof the following new subsection:

"(r)(1) Except as otherwise specifically provided in this section, the provisions of this section shall be applied to foreign banks in accordance with this subsection.

"(2) An act or practice outside the United States on the part of a foreign bank or any officer, director, employee, or agent thereof may not constitute the basis for any action by any officer or agency of the United States under this section, unless—

"(A) such officer or agency alleges a belief that such act or practice has been, is, or is likely to be a cause of or carried on in connection with or in furtherance of an act or practice within any one or more States which,

in and of itself, would constitute an appropriate basis for action by a Federal officer or agency under this section; or

"(B) the alleged act or practice is one which, if proven, would, in the judgment of the Board of Directors, adversely affect the insurance risk assumed by the Corporation.

"(3) In any case in which any action or proceeding is brought pursuant to an allegation under paragraph (2) of this subsection for the suspension or removal of any officer, director, or other person associated with a foreign bank, and such person fails to appear promptly as a party to such action or proceeding and to comply with any effective order or judgment therein, any failure by the foreign bank to secure his removal from any office he holds in such bank and from any further participation in its affairs shall, in and of itself, constitute grounds for termination of the insurance of the deposits in any branch of the bank.

"(4) Where the venue of any judicial or administrative proceeding under this section is to be determined by reference to the location of the home office of a bank, the venue of such a proceeding with respect to a foreign bank having one or more branches in not more than one judicial district or other relevant jurisdiction shall be within such jurisdiction. Where such a bank has branches in more than one such jurisdiction, the venue shall be in the jurisdiction within which the branch or branches involved in the proceeding are located, and if there is more than one such jurisdiction, the venue shall be proper in any such jurisdiction in which the proceeding is brought or to which it may appropriately be transferred.

"(5) Any service required or authorized to be made on a foreign bank may be made on any branch located within any State, but if such service is in connection with an action or proceeding involving one or more branches located in any State, service shall be made on at least one branch so involved.".

(16)(A) The first sentence of section 10(b) is amended (i) by inserting "any insured State branch of a foreign bank, any State branch of a foreign bank making application to become an insured bank," immediately after "(except a District bank)", and (ii) by inserting "or branch" before the comma after "any closed insured bank".

(B) The second sentence of section 10(b) is amended by inserting ", insured Federal branch of a foreign bank," between the words "national bank" and "or District bank".

(C) The third sentence of section 10(b) is amended by inserting ", and in the case of a foreign bank, a binding commitment by such bank to permit such examination to the extent determined by the Board of Directors to be necessary to carry out the purposes of this Act shall be required as a condition to the insurance of any deposits" immediately before the period at the end thereof.

(17) Section 11(c) is amended by inserting ", insured Federal branch of a foreign bank," immediately before "or insured District bank,".

(18) The first sentence of section 11(e) is amended by inserting "or any insured branch (other than a Federal branch) of a foreign bank" immediately before "shall have been closed".

(19) The second sentence of section 11(e) is amended by changing "such insured State bank," to read "such insured State bank or insured branch of a foreign bank,".

(20) Section 11(f) is amended by inserting "or insured branch of a foreign bank" immediately before "shall have been closed".

(21) The first sentence of section 11(g) is amended by inserting ", insured branch of a foreign bank," immediately before "or District bank,".

(22) The third sentence of section 11(g) is amended by changing "In the case of any closed insured bank," to read "In the case of any closed insured bank or closed insured branch of a foreign bank,".

(23) Section 12(a) is amended by inserting ", branch of a foreign bank," immediately after "a closed national bank".

(24) Section 13 is amended by adding at the end thereof the following new subsection:

"(g) The powers conferred on the Board of Directors and the Corporation by this section to take action to reopen a closed insured bank or to avert the closing of an insured bank may be used with respect to an insured branch of a foreign bank if, in the judgment of the Board of Directors, the public interest in avoiding the closing of such branch substantially outweighs any additional risk of loss to the insurance fund which the exercise of such powers would entail.".

(25) Section 18(c) is amended by adding at the end thereof the following new paragraph:

"(11) The provisions of this subsection do not apply to any merger transaction involving a foreign bank if no party to the transaction is principally engaged in business in the United States.".

(26) Section 18(d) is amended by inserting the following new sentence immediately after the first sentence thereof: 'No foreign bank may move any insured branch from one location to another without such consent.".

(27) The first sentence of section 18(g) is amended by inserting "and in insured branches of foreign banks" immediately after "in insured nonmember banks".

(28) Section 18(j) is amended by adding at the end thereof the following new sentence: "The provisions of this subsection shall not apply to any foreign bank having an insured branch with respect to dealings between such bank and and affiliate thereof.".

(29) Section 21 is amended by adding at the end thereof the following new subsection:

"(1) The provisions of this section shall not apply to any foreign bank except with respect to the transactions and records of any insured branch of such a bank.".

(30) The first sentence of section 25(a) is amended by inserting "insured branch of a foreign bank," immediately after "No insured bank,".

AUTHORITY OF FEDERAL RESERVE SYSTEM

SEC. 7. (a)(1)(A) Except as provided in paragraph (2) of this subsection, subsections (a), (b), (c), (d), (f), (g), (i), (j), (k), and the second sentence of subsection (e) of section 19 of the Federal Reserve Act shall apply to every Federal branch and Federal agency of a foreign bank in the same manner and to the same extent as if the Federal branch or Federal agency were a member bank as that term is defined in section 1 of the Federal Reserve Act; but the Board either by general or specific regulation or ruling may waive the minimum and maximum reserve ratios prescribed under section 19 of the Federal Reserve Act and may prescribe any ratio, not more than 22 per centum, for any obligation of any such Federal branch or Federal agency that the Board may deem reasonable and appropriate, taking into consideration the character of business conducted by such institutions and the need to maintain vigorous and fair competition between and among such institutions and member banks. The Board may impose reserve requirements on Federal branches and Federal agencies in such graduated manner as it deems reasonable and appropriate.

(B) After consultation and in cooperation with the State bank supervisory authorities, the Board may make applicable to any State branch or State agency any requirement made applicable to, or which the Board has authority to impose upon, any Federal branch or agency under subparagraph (A) of this paragraph.

(2) A branch or agency shall be subject to this subsection only if (A) its parent foreign bank has total worldwide consolidated bank assets in excess of $1,000,000,000; (B) its parent foreign bank is controlled by a foreign company which owns or controls foreign banks that in the aggregate have total worldwide consolidated bank assets in excess of $1,000,000,000; or (C) its parent foreign bank is controlled by a group of foreign companies that own or control foreign banks that in the aggregate have total worldwide consolidated bank assets in excess of $1,000,000,000.

(b) Section 13 of the Federal Reserve Act is amended by adding at the end thereof the following new paragraph:

"Subject to such restrictions, limitations, and regulations as may be imposed by the Board of Governors of the Federal Reserve System, each Federal Reserve bank may receive deposits from, discount paper endorsed by, and make advances to any branch or agency of a foreign bank in the same manner and to the same extent that it may exercise such powers with respect to a member bank if such branch or agency is maintaining reserves with such Reserve bank pursuant to section 7 of the International Banking Act of 1978. In exercising any such powers with respect to any such branch or agency, each Federal Reserve bank shall give due regard to account balances being maintained by such branch or agency with such Reserve bank and the proportion of the assets of such branch or agency being held as reserves under section 7 of the International Banking Act of 1978. For the purposes of this paragraph, the terms 'branch', 'agency', and 'foreign bank' shall have the same meanings assigned to them in section 1 of the International Banking Act of 1978.".

(c)(1) The Board may make examinations of each branch or agency of a foreign bank, and of each commercial lending company or bank controlled by one or more foreign banks or by one or more foreign companies that control a foreign bank, the cost of which shall be assessed against and paid by such foreign bank or company, as the case may be. The Board shall, insofar as possible, use the reports of examinations made by the Comptroller, the Federal Deposit Insurance Corporation, or the appropriate State bank supervisory authority for the purposes of this subsection.

(2) Each branch or agency of a foreign bank, other than a Federal branch or agency, shall be subject to paragraph 20 and the provision requiring the reports of condition contained in paragraph 6 of section 9 of the Federal Reserve Act (12 P.S.C. 335 and 324) to the same extent and in the same manner as if the branch or agency were a State member bank. In addition to any requirements imposed under section 4 of this Act, each Federal branch and agency shall be subject to subparagraph (a) of section 11 of the Federal Reserve Act (12 U.S.C. 248(a)) and to paragraph 5 of section 21 of the Federal Reserve Act (12 U.S.C. 483) to the same extent and in the same manner as if it were a member bank.

(d) On or before two years after enactment of this Act, the Board after consultation with the appropriate State bank supervisory authorities shall report to the Committee on Banking, Finance and Urban Affairs of the United States House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the United States Senate its recommendations with respect to the implementation of this Act, including any recommended requirements such as limitations on loans to affiliates or capital adequacy requirements which should be imposed on foreign banks to carry out the purposes of this Act.

NONBANKING ACTIVITIES

SEC. 8. (a) Except as otherwise provided in this section (1) any foreign bank that

maintains a branch or agency in a State, (2) any foreign bank or foreign company controlling a foreign bank that controls a commercial lending company organized under State law, and (3) any company of which any foreign bank or company referred to in (1) and (2) is a subsidiary shall be subject to the provisions of the Bank Holding Company Act of 1956, and to sections 105 and 106 of the Bank Holding Company Act Amendments of 1970 in the same manner and to the same extent that bank holding companies are subject thereto, except that any such foreign bank or company shall not by reason of this subsection be deemed a bank holding company for purposes of section 3 of the Bank Holding Company Act of 1956.

(b) Until December 31, 1985, a foreign bank or other company to which subsection (a) applies on the date of enactment of this Act may retain direct or indirect ownership or control of any voting shares of any nonbanking company in the United States that it owned, controlled, or held with power to vote on the date of enactment of this Act or engage in any nonbanking activities in the United States in which it was engaged on such date.

(c) After December 31, 1985, a foreign bank or other company to which subsection (a) applies on the date of enactment of this Act may continue to engage in nonbanking activities in the United States in which directly or through an affiliate it was lawfully engaged on July 26, 1978 (or on a date subsequent to July 26, 1978, in the case of activities carried on as the result of the direct or indirect acquisition, pursuant to a binding written contract entered into on or before July 26, 1978, of another company engaged in such activities at the time of acquisition), and may engage directly or through an affiliate in nonbanking activities in the United States which are covered by an application to engage in such activities which was filed on or before July 26, 1978; except that the Board by order, after opportunity for hearing, may terminate the authority conferred by this subsection (c) on any such foreign bank or company to engage directly or through an affiliate in any activity otherwise permitted by this subsection (c) if it determines having due regard to the purposes of this Act and the Bank Holding Company Act of 1956, that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices in the United States. Notwithstanding subsection (a) of this section, a foreign bank or company referred to in this subsection (c) may retain ownership or control of any voting shares (or, where necessary to prevent dilution of its voting interest, acquire additional voting shares) of any domestically-controlled affiliate covered in 1978 which engages in the business of underwriting, distributing, or otherwise buying or selling stocks, bonds, and other securities in the United States. Except in the case of affiliates described in the preceding sentence, nothing in this subsection (c) shall be construed to authorize any foreign bank or company referred to in this subsection (c), or any affiliate thereof, to engage in activities authorized by this subsection (c) through the acquisition, pursuant to a contract entered into after July 26, 1978, of any interest in or the assets of a going concern engaged in such activities. Any foreign bank or company that is authorized to engage in any activity pursuant to this subsection (c) but, as a result of action of the Board, is required to terminate such activity may retain the ownership of control of shares in any company carrying on such activity for a period of two years from the date on which its authority was so terminated by the Board. As used in this subsection, the term "affiliate" shall mean any company more than 5 per centum of whose voting shares is directly or indirectly owned or controlled or held with power to vote by the specified foreign bank or company, and the term "domestically-controlled affiliate covered in 1978" shall mean any affiliate the majority of whose voting shares is owned by a company or group of companies organized under the laws of the United States or any State thereof, if it has been under continuous domestic majority-controlling ownership since July 26, 1978, and if a foreign bank or group of foreign banks does not own or control directly or indirectly, 25 percent or more of its voting shares.

(d) Nothing in this section shall be construed to define a branch or agency of a foreign bank or a commercial lending company controlled by a foreign bank or foreign company that controls a foreign bank as a "bank" for the purposes of any provisions of the Bank Holding Company Act of 1956, or section 105 of the Bank Holding Company Act Amendments of 1970, except that any such branch, agency or commercial lending company subsidiary shall be deemed a "bank" or "banking subsidiary", as the case may be, for the purposes of applying the prohibitions of section 106 of the Bank Holding Company Act Amendments of 1970 and the exemptions provided in sections 4(c)(1), 4(c)(2), 4(c)(3), and 4(c)(4) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c), (1), (2), (3), and (4) to any foreign bank or other company to which subsection (a) applies.

(e) Section 2(h) of the Bank Holding Company Act of 1956 is amended (1) by striking out "(h) The" and inserting in lieu thereof "(h)(1) Except as provided by paragraph (2), the", (2) by striking out the proviso, and (3) by inserting at the end thereof the following:

"(2) The prohibitions of section 4 of this Act shall not apply to shares of any company organized under the laws of a foreign country (or to shares held by such company in any company engaged in the same general line of business as the investor company or in a business related to the business of the investor company) that is principally engaged in business outside the United States if such shares are held or acquired by a bank holding company organized under the laws of a foreign country that is principally engaged in the banking business outside the United States, except that (1) such exempt foreign company (A) may engage in or hold shares of a company engaged in the business of underwriting, selling or distributing securities in the United States only to the extent that a bank holding company may do so under this Act and under regulations or orders issued by the Board under this Act, and (B) may engage in the United States in any banking or financial operations or types of activities permitted under section 4(c)(8) or in any order or regulation issued by the Board under such section only with the Board's prior approval under that section, and (2) no domestic office or subsidiary of a bank holding company or subsidiary thereof holding shares of such company may extend credit to a domestic office or subsidiary of such exempt company on terms more favorable than those afforded similar borrowers in the United States.".

STUDY OF FOREIGN TREATMENT OF UNITED STATES BANKS

SEC. 9. The Secretary of the Treasury, in conjunction with the Secretary of State, the Board, the Comptroller, and the Federal Deposit Insurance Corporation shall within 90 days after enactment of this bill commence a study of the extent to which banks organized under the laws of the United States or any State thereof are denied, whether by law or practice, national treatment in conducting banking operations in foreign countries, and the effects, if any, of such discrimination on United States exports to those countries. On or before two years after enactment of this section, the Secretary of the Treasury shall be required to report his findings, conclusions, and recommendations from such study to the Congress and describe the efforts undertaken by the United States to eliminate any foreign laws or practices that discriminate against banks organized under the laws of the United States or any State thereof, or that serve as a barrier to the financing of United States exports to any foreign country.

REPRESENTATIVE OFFICES

SEC. 10. (a) Any foreign bank that maintains an office other than a branch or agency in any State shall register with the Secretary of the Treasury in accordance with rules prescribed by him, within one hundred and eighty days after the date of enactment of this Act or the date on which the office is established, whichever is later.

(b) This Act does not authorize the establishment of any such office in any State in contravention of State law.

CEASE-AND-DESIST ORDERS

SEC. 11. Subsection (b) of section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818(b)) is amended by adding at the end thereof the following new paragraph:

"(4) This subsection and subsections (c), (d), (h), (i), (k), (l), (m), and (n) of this section shall apply to any foreign bank or company to which subsection (a) of section 8 of the International Banking Act of 1978 applies and to any subsidiary (other than a bank) of any such foreign bank or company in the same manner as they apply to a bank holding company and any subsidiary thereof (other than a bank) under subparagraph (3) of this subsection. For the purposes of this subparagraph, the term 'subsidiary' shall have the meaning assigned to it in section 2 of the Bank Holding Company Act of 1956.".

AMENDMENT TO THE BANKING ACT OF 1933

SEC. 12. Section 21 of the Banking Act of 1933 (12 U.S.C. 378) is amended by striking clause (B) of paragraph (2) of subsection (a) thereof and inserting in lieu thereof the following: "(B) shall be permitted by the United States, any State, territory, or district to engage in such business and shall be subjected by the laws of the United States, or such State, territory, or district to examination and regulations or,".

REGULATION AND ENFORCEMENT

SEC. 13. (a) The Comptroller, the Board, and the Federal Deposit Insurance Corporation, are authorized and empowered to issue such rules, regulations, and orders as each of them may deem necessary in order to perform their respective duties and functions under this Act and to administer and carry out the provisions and purposes of this Act and prevent evasions thereof.

(b) In addition to any powers, remedies, or sanctions otherwise provided by law, compliance with the requirements imposed under this Act or any amendment made by this Act may be enforced under section 8 of the Federal Deposit Insurance Act by any appropriate Federal banking agency as defined in that Act.

(c) In the case of any provision of the Federal Reserve Act to which a foreign bank or branch thereof is subject under this Act, and which is made applicable to nonmember insured banks by the Federal Deposit Insurance Act, whether by cross-reference to the Federal Reserve Act or by a provision in substantially the same terms in the Federal Deposit Insurance Act, the administration, interpretation, and enforcement of such provision, insofar as it relates to any foreign bank or branch thereof as to which the Board is an appropriate Federal banking agency, are vested in the

Board, but where the making of any report to the Board or a Federal Reserve bank is required under any such provision, the Federal Deposit Insurance Corporation may require that a duplicate of any such report be sent directly to it. This subsection shall not be construed to impair any power of the Federal Deposit Insurance Corporation to make regular or special examinations or to require special reports.

REPORT ON M'FADDEN ACT

SEC. 14. (a) The President, in consultation with the Attorney General, the Secretary of the Treasury, the Board, the Comptroller, and the Federal Deposit Insurance Corporation, shall transmit a report to the Congress containing his recommendations convening the applicability of the McFadden Act to the present financial, banking, and economic environment, including an analysis of the effects of any proposed amendment to such Act on the structure of the banking industry and on the financial and economic environment in general.

(b) The report required by subsection (a) shall be transmitted to the Congress not later than one year after the date of enactment of this Act.

Mr. McINTYRE. Mr. President, I ask unanimous consent that the committee amendments be agreed to and treated as original text.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments were agreed to.

UP AMENDMENT NO. 1663

(Purpose: To require a report on State consultation, and for other purposes.)

Mr. McINTYRE. Mr. President, on behalf of Senator HEINZ and myself I send amendments to the desk and ask for their immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Hampshire (Mr. McINTYRE) for himself and Mr. HEINZ, proposes an unprinted amendment numbered 1663.

Mr. McINTYRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, line 13, after the period insert the following: "Not later than 180 days after the enactment of this Act, the Board shall report to such Committees the steps which have been taken to consult and cooperate with State bank supervisory authorities as required by subsection (a) (1) (B).".

On page 65, line 23, before the period insert a comma and the following: "or unless the Comptroller determines by order or regulation that the branch is not engaged in domestic retail deposit activities requiring deposit insurance protection, taking account of the size and nature of depositors and deposit accounts".

On page 68, line 8, before the period insert a comma and the following: "or unless the Federal Deposit Insurance Corporation determines by order of regulation that the branch is not engaged in domestic retail deposit activities requiring deposit insurance protection, taking account of the size and nature of depositors and deposit accounts".

On page 56, line 19, strike out "parent" and insert in lieu thereof "foreign".

On page 58, line 6, strike out "(a)".

On page 69, line 4, before the period insert "or any commercial lending company owned or controlled by a foreign bank".

On page 77, line 5, after "branches" insert "or agencies".

On age 77, line 7, after "branches" insert "or agencies".

On page 77, line 9, after "branches" insert "or agency or agencies".

On page 77, line 15, after "branch" insert "or agency".

On page 77, line 17, after "branches" insert "or one or more agencies".

On page 77, line 18, after "branch" insert "or agency".

On page 89, line 25, strike out "two years" and insert in lieu thereof "one year".

On page 65, lines 11 and 12, insert the following:

Strike out "July 26, 1978" and insert in lieu thereof "July 27, 1978".

Mr. McINTYRE. Mr. President, the first of these amendments would require the Federal Reserve to report to the Congress within 180 days of the steps it has taken to consult and cooperate with State bank supervisors under the reserve setting authority granted section 7(a)(1)(B).

The second amendment would give the FDIC authority to determine that in a particular case the mandatory deposit insurance provision of the legislation is inappropriate because of the wholesale nature of the business of the foreign branch's depositors and their deposits.

There follows a series of technical corrective amendments clarifying inaccuracies and perfecting the venue provisions of the legislation.

Another amendment would require the Secretary of the Treasury to report back to the Congress within a year on his study of the treatment of American banks in foreign countries.

The final amendment, sponsored by Senator HEINZ, would move the grandfather date under section 5 of the legislation forward 1 day to July 27, 1978, the date the committee had been scheduled to complete its markup on H.R. 10899.

Mr. President these amendments have been cleared with the leadership on both sides in the committee.

Mr. President, I move the amendment be agreed to en bloc.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McINTYRE. Mr. President, on July 26, 1978, the Committee on Banking, Housing and Urban Affairs ordered reported legislation (H.R. 10899, with an amendment) to provide for Federal regulation of participation by foreign banks in domestic financial markets and on August 8, 1978, the committee filed its report.

Foreign banks have become a significant factor in our domestic banking markets. In 1973, there were approximately 60 foreign banks operating banking offices in the United States with assets of about $37 billion. By 1978, 122 foreign banks were operating in the United States with assets of $90 billion. Moreover, these U.S. offices of foreign banks had more than $26 billion in commercial and industrial loans. This was equal to about 20 percent of similar loans by large banks that report weekly to the Federal Reserve. Foreign banks in this country are not specialized institutions engaged principally in foreign trade financing on the periphery of our banking system. They are in the mainstream of our domestic banking system. This growth of foreign banking institutions operating in this country has created the need to subject their operations to monetary policy controls and to Federal regulatory oversight over their affairs.

Our policy respecting foreign enterprises doing business in the United States is one of national treatment. Under this policy foreign enterprises operating in the host country are treated as competitive equals with their domestic counterparts. There is, at this time, no uniform national policy concerning foreign banking operation in this country. As a result, foreign banks enjoy many competitive advantages over our domestic banks. This bill establishes the principle of competitive equality under law between foreign and domestic banks.

Fortunately, the climate in which this bill has been considered is one of relative calm. Foreign banks doing business in the United States have behaved in a responsible manner, and their presence here has been a benefit to the banking industry as a whole. Enactment of a rational framework of Federal regulation at this time is appropriate and will serve to avoid future problems while enhancing the competitive environment.

Mr. President, this legislation establishes a fair Federal framework within which foreign banks may continue to participate as a strong competitive force in our domestic financial markets. This Federal framework is essentially as follows: First, availability of Federal deposit insurance for deposits of branches of foreign banks to safeguard depositors funds; second, monetary policy controls over the funds of branches and agencies of foreign banks to enable the Federal Reserve to better implement monetary policy although only after consultation and cooperation with State supervisory authorities in the case of State branches and agencies in keeping with our dual banking system; third, residual authority to examine foreign bank operations in the United States by Federal regulatory authorities to insure the safety and soundness of the banking system; and fourth, authority for foreign banks to continue to operate across State lines but in a manner that insures competitive equality between foreign and domestic banks while encouraging foreign bank entry in those States that desire a foreign bank presence.

The bill provides in section 6 for FDIC insurance of deposits in branches of foreign banks for the first time. Several witnesses testified that FDIC insurance of deposits in branches of foreign banks, should be made mandatory. On the other hand, other witnesses, most notably the FDIC, urged that such insurance be voluntary, not mandatory, citing insufficient legal and regulatory controls over the parent foreign bank itself.

While deposit insurance may be viewed as a competitive consideration, given the costs involved, there is a con-

sensus that deposits in branches of foreign banks are by and large "wholesale" in nature. In this regard, most proponents of mandatory insurance concede that the primary concern is for the protection of the individual retail, not commercial depositors. The committee struck a balance here in requiring FDIC insurance protection for retail operations while permitting FDIC insurance on a voluntary basis for foreign banks in the United States which engage only in wholesale banking. In those instances where such branches do accept "detail" deposits, defined to be deposits of less than $100,000, FDIC insurance of all deposits in such branches is made mandatory.

Section 7 of this legislation provides the Federal Reserve with authority to set reserves for Federal and State branches and agencies. This authority extends over all branches and agencies of foreign banks that have $1 billion or more in worldwide assets. Those branches and agencies for which the Federal Reserve holds reserve balances also have access to Federal Reserve discount, borrowing, and clearing facilities subject to such restrictions, limitations, and regulations as may be imposed by the Federal Reserve Board. The financial institutions in the size category have the ability to significantly affect fund flows in and out of the country and to make sizable loans. Federal Reserve monetary authority over these institutions should provide the Federal Reserve with the ability to better control monetary policy.

In keeping with our dual banking system of Federal and State authority, the Federal Reserve Board may establish reserve requirements for State licensed branches and agencies only after consultation and cooperation with State bank supervisory authorities. While the committee felt that reserve setting authority over State-licensed foreign bank branches and agencies was necessary for monetary policy purposes, the committee did not impose reserve requirements over State chartered bank subsidiaries and commercial lending companies. This decision was in keeping with existing practice under the duel banking system whereby State chartered institutions retain the option for joining the Federal Reserve and being subject to monetary controls.

The committee retained the present Federal-State regulatory framework in providing the Comptroller, the FDIC, and the States with primary examining authority over such operations within their jurisdiction. But the committee amended the House bill to provide the Federal Reserve Board with residual examining authority over all banking operations of foreign banks, including branches, agencies, commercial lending companies, and bank subsidiaries. The committee has provided the umbrella of one Federal agency over all domestic operations of foreign banks. Thus, Federal branches and agencies will be subject to examination by the Comptroller, federally insured State branches will be examined by the State agencies and by the FDIC, and non-federally insured State branches and all State agencies and commercial lending companies will be examined by the appropriate State authorities or, if not so examined, by the Federal Reserve. All such organizations will however be subject to special examination by the Federal Reserve.

It is intended that if the Federal Reserve deems it necessary to review the activities of a branch agency, or commercial lending company, the Federal Reserve, in order to avoid duplicative regulation, will make as much use as possible of relevant reports of examination made by the Comptroller, the FDIC, and the States. It is to be expected that, the Federal bank regulatory agencies will cooperate with one another and with State banking authorities so as to develop and implement consistent and effective examination standards.

The most controversial aspect of this legislation concerned the matter of interstate branching by foreign banks. Foreign banks have been able to branch across State lines because they are not subject to the limitations on branching that are imposed on domestic banks under the McFadden Act. The heart of the controversy is competitive equality between domestic and foreign banks; however, other important issues of competitive equality between States and discriminatory treatment of domestic banks abroad are also involved.

It is clear that foreign banks do enjoy privileges not extended to domestic banks under our laws—the ability to receive deposits, make loans, and pay checks at banking offices located in several States. The extent to which this opportunity gives foreign banks a competitive advantage over their domestic counterparts is a matter of some earnest dispute. The essence of banking is the ability to receive deposits, and it is in this that foreign banks do enjoy a growing, significant interstate advantage over domestic banking organizations, which cannot receive domestic bank deposits outside of their home State. The real culprit is the McFadden Act which prohibits U.S. banks from competing across State lines for deposits. Nevertheless, until the McFadden Act is changed the committee felt that similar restrictions should apply to foreign banks as applicable to domestic banks. However, it would be unwise in attempting to establish competitive equality between domestic and foreign banks to impose restrictions so rigid that they would confine foreign banks to a single state of operations, and consequently reduce foreign capital inflows and the development of international banking centers throughout the country. Such a solution would also be inconsistent with this Nation's dual banking system which has served local, national, and international credit needs well throughout our history.

The committee reconciled these issues in a way that it believes equitably takes into account the interests and concerns of Federal and State officials, and domestic and foreign banks. The committee struck a compromise that it believes will establish the general rules for future competitive equality between domestic and foreign banks, preserve and enhance the ability of the States to attract foreign capital and develop international banking centers, and give the United States some leverage to secure more equitable national treatment for U.S. banks abroad.

Under section 5(a) foreign banks would be able to establish branch or agency offices in any State where this is permissible. The decision to attract foreign bank entry is, as now, left to the individual States. However, in the case of a branch to be established and operated outside of a foreign bank's home State of operations, which State would essentially be determined by the foreign bank, such branch would be able to accept such credit balances as agencies would be able to accept under relevant State and Federal law, but, with respect to deposits, would be limited to accepting the types of foreign-source and international banking and finance related deposits permissible for international banking corporations organized under section 25(a) of the Federal Reserve Act—the Edge Act.

Mr. President, as I have said, the real culprit is the McFadden Act which was enacted over 50 years ago and whose ghost limits competition in our banking system.

Various proposals to amend this act have been discussed for many years but no action has been taken to remove this anachronism from our laws.

Therefore, section 14 was added to the bill which directs the President in consultation with the Secretary of the Treasury, and the Attorney General and the appropriate Federal bank regulatory agencies, to present a set of recommendations to the Congress with regard to the applicability of the McFadden Act to the current banking structure. These recommendations are to be made within 1 year of the enactment of the bill.

This provision will serve to keep the pressure on for meaningful change in the outdated McFadden Act.

I commend this legislation to my colleagues.

● Mr. BROOKE. Mr. President, today we consider the International Banking Act of 1978 (H.R. 10899), a landmark piece of legislation which will provide a national framework for involvement by foreign banks in domestic banking activities. During the past several years, studies have been conducted and legislation has been considered regarding the activities of foreign banks in the United States. This bill represents a culmination of the Banking Committee's efforts to promote domestic involvement by foreign banks in a regulatory setting which insures competitive equality between such banks and domestic financial institutions.

Trying to reach agreement on such complex and farreaching legislation is not an easy task, and I think one reason why the committee unanimously ordered this bill to be reported was the fine work done by Senators McINTYRE and STEVENSON on the legislation. Senator McINTYRE as chairman of the Subcommittee on

Financial Institutions, has ably guided the international banking bill through the committee, and Senator STEVENSON, providing expertise on the technical aspects of the bill, proposed important revisions to the legislation which have strengthened it and broadened its acceptability among all committee members.

In the past few years, foreign banks have played an increasingly important role in our nation's banking system. Federal Reserve Board statistics indicate that, as of April 1978, 122 foreign banks operated banking facilities in the United States and that such U.S. offices had more than $26 billion in commercial and industrial loans.

This bill will establish uniform national treatment of foreign banks in the United States and place them on a more equal footing with domestic financial institutions. Under this legislation, the ability of foreign banks to conduct an interstate banking business will be restricted with respect to deposit-taking functions, but will not be limited with regard to lending or other banking activities. The interstate banking provisions of the bill are of particular concern to me because my home State of Massachusetts is interested in increasing its share of foreign financing business. While I was reluctant to impinge at all on the ability of States to attract foreign banks to their communities, I believe the compromise reached in the Banking Committee regarding the interstate activities of foreign banks will help assure States like Massachusetts that they can continue to compete with the large money center States for foreign bank business.

In addition to providing a uniform national policy on interstate banking by foreign banks, the bill provides that non-U.S. citizens may serve on the boards of directors of Edge corporations and national banks; revises the Edge Act—enacted in 1919—to make Edge corporations more attractive as export financing vehicles; mandates FDIC insurance on retail deposits of foreign branches; limits domestic nonbanking activities of foreign banks; and provides the Federal Reserve Board with reserve setting authority over foreign branches and agencies. The committee also added two provisions to the bill directing that studies be made on the treatment of U.S. banks abroad and on the interstate banking restrictions of the McFadden Act. The former study should be of assistance in determining the extent to which other nations are regulating American banks in the same manner as they regulate their own banks. The latter study should provide facts and legislative recommendations on the whole issue of interstate banking.

The bill has been carefully studied by the Banking Committee, and I believe we have presented the full Senate with a piece of tightly drawn legislation. I also should note that the committee was very ably assisted in its work on the bill by our staff. Jeremiah Buckley. John Collins, James Reinhardt, William Weber, Charles L. Marinaccio, and Gary Welsh deserve special recognition for providing sound counsel and technical expertise to the committee on this bill.

Mr. President, the rapid increase in foreign bank activity in the United States during the past few years necessitates that we establish national policies with respect to such activity. The international banking bill will provide uniform standards under which foreign banks may engage in domestic banking activities in a manner comparable to U.S. banking organizations. It is a good bill whose time has come, and I urge my fellow Senators to act on it promptly.●

● Mr. PROXMIRE. Mr. President, I support passage of this legislation to provide a Federal regulatory framework over the activities of foreign banks operating in the United States.

This legislation provides a fair solution to some knotty problems. Under its provisions foreign banks will retain an incentive to establish multistate operations. This will provide healthy competition for loans, bring in new capital, and foster our export trade with its consequent benefits. At the same time, this bill should insure that our own domestic banks are not subjected to unfair competition by the activities of foreign banks that are forbidden to domestic banks.

The legislation also provides the Federal Reserve with the authority it needs to better control monetary policy by subjecting branches and agencies of foreign banks to reserve requirements. In the case of State branches and agencies this must be done after consultation and cooperation with State regulatory authorities.

The legislation further provides the Federal Reserve with residual examinations authority over foreign banks operating in the United States. The Federal Reserve must to the extent possible use the reports of other regulatory bodies. Nevertheless, this legislation provides the public with the umbrella of a single bank regulatory agency over the operations of foreign banks operating in domestic financial markets.

I commend Senator MCINTYRE for his leadership in guiding this landmark legislation and I commend this bill to my colleagues.●

● Mr. STEVENSON. Mr. President, I commend the distinguished Senator from New Hampshire—Mr. MCINTYRE—for his outstanding leadership and hard work on H.R. 10899, the International Banking Act of 1978. Legislation to regulate the growing operations of foreign banks in the United States has been before the Congress since 1975. The plethora of issues raised by such legislation has spanned every aspect of our banking system—State/Federal regulation and supervision, interstate banking, deposit insurance, nonbanking activities, Federal Reserve monetary controls, and the international banking operations of our own U.S. banks. H.R. 10899, as reported by the Committee on Banking, Housing and Urban Affairs, under the leadership of the Senator from New Hampshire—(Mr. MCINTYRE), deals with each of these issues as they affect foreign banks in an intelligent and equitable manner that takes into consideration and resolves the interests and concerns of State and Federal officials and domestic and foreign banks.

I believe the Banking Committee's report on H.R. 10899 is an excellent summary of the major issues involved in regulating foreign banks and ably describes the reasons supporting the committee's actions on the bill. I would like, however, to discuss briefly and, in some cases, clarify certain amendments which I proposed to the bill and which were accepted by the committee.

Section 3 of the bill, as reported, contains the first amendments to the Edge Act since its enactment in 1919. The principal purpose of the Edge Act was to facilitate U.S. exports by providing for the Federal chartering of international banking and financing corporations at locations throughout the United States. These Edge Act corporations presently operate under an antiquated set of statutory and regulatory restraints that disadvantage them in competing with foreign banks both here and abroad and impede their primary mission of financing U.S. exports. The amendments adopted in committee should bring these corporations into the competitive and banking realities of the present era and make them a greatly improved vehicle for facilitating U.S. exports. In particular, I believe the amendments should make it easier for non-bank concerns involved in exporting, including domestic trading companies, to own or organize such corporations and use them to provide necessary financing for exports throughout the world.

The need for these Edge Act changes was made clear in the comprehensive hearings that have been conducted this year by the Subcommittee on International Finance on U.S. export policy, and their passage today is an important step in the process of reorienting our trade and financing laws toward the elimination of unnecessary export impediments that we impose from within.

Section 5 of the bill, as reported, compromises the controversial interstate banking issue by letting foreign banks establish banking offices wherever they can find a receptive State, subject only to the limitation that outside of their home State of operations they accept the same types of foreign source and international deposits that can be accepted by our own banks outside of their home State of operations. Since this section is discussed at length in the committee's report, I only state here my concurrence with the report language and stress in particular that the "choice of home State" privilege afforded in section 5(c) should be interpreted by the Federal Reserve Board in a manner consistent with the limitations imposed under section 5(a), namely to limit full-service deposit-taking to one State only, except where there are grandfathered operations. For those foreign banks that currently have no deposit-taking facilities in the United States, their home State should be the State where they establish their initial full-service deposit-taking branch or subsidiary. However, I believe that under section 5(c), a foreign bank with a single

branch office in the United States at time of enactment which is eligible for grandfathering under section 5(b), could not thereafter establish a branch in another State, designate that second State as its home State, and thus seek to have full-service branch offices in two States. In my judgment, that type of manipulative use of section 5(c) is not intended to be permitted.

Section 9 of the bill as reported by the committee provides for a study by the Secretary of Treasury of the treatment afforded U.S. banks abroad, and in particular the effects, if any, of such treatment on U.S. exports. This study is necessitated by the fact that several foreign countries, whether by law or practice, do not afford U.S. banks national treatment in their operations in those countries. In proposing this section of the bill, it was not my intent to require the Secretary to study the treatment accorded U.S. banks in every foreign country abroad. Rather, I believe the Secretary should focus his study on those countries from which foreign banks have come to do a banking business in the United States. In fact, I believe it would be valuable each time a new foreign country were represented in our banking market, if the Treasury would provide to each of the Federal and State banking authorities an analysis of the treatment of our banks in such country.

I conclude by recognizing that George W. Mitchell, former Vice Chairman of the Federal Reserve Board and now a consultant to the Board on electronic banking matters, recommended Federal legislation to regulate foreign banks some 5 years ago. Our action today is a belated recognition of George Mitchell's wisdom and foresight on this issue. I will always think of this bill as the Mitchell bill, in honor of the distinguished public servant who brought this subject to our attention.●

● Mr. TOWER. Mr. President, the International Banking Act of 1978 represents a significant development in the regulation of foreign banks in this country. This legislation establishes the framework for Federal regulation of foreign banking activities in the United States and attempts to create an environment in which foreign and domestic banks can operate on a competitively equal basis.

The issues raised in this legislation are extremely complex and very controversial. On the one hand, there is the legitimate interest on the part of the State bank regulators in seeking legislation that would allow foreign banks to operate in their State. Their interest in this matter reflects a concern that restrictions on the multi-State activities of foreign banks would result in a concentration of foreign banking operations in only one or two States, New York and California in particular. This would deny other States the benefits which foreign banks can offer in the way of fostering international trade and a more diversified banking system.

On the other hand, there is the equally legitimate concern of American bankers and others that the absence of restrictions on the operations of foreign banks in this country would give foreign banks a competitive advantage over domestic banks, particularly with respect to deposit taking authority in more than one State. A related concern is that the unrestricted operation of foreign banks in this country would be unfair because domestic banks do not face unrestricted access to banking markets abroad.

The committee has attempted to resolve these issues by adopting a compromise that will allow foreign banks to establish and operate branches in more than one State, providing those branches only accept deposits that are incidental to foreign trade. It also would eliminate certain existing restrictions on the foreign trade activities of domestic banks.

This is a reasonable resolution to a difficult problem. It will allow foreign banks to operate in more than one State for the purpose of promoting and facilitating international trade. This could be particularly important to Texas, where international trade is an important and growing sector of the State's economy, and to cities like Houston and Dallas, which will undoubtedly become major money market centers in the future.

At the same time, the legislation addresses the need to establish a competitive situation in which both domestic and foreign banks can operate equitably. Finally, the legislation calls for the further study of related issues, including the McFadden Act—dealing with the branching of domestic banks—and the treatment of U.S. banks abroad. This will allow Congress to reassess the issue of foreign banking in the United States and determine the need for any additional legislation in the future.●

● Mr. HEINZ. Mr. President, as section 5 of the International Banking Act of 1978 was reported from the Senate Committee on Banking, Housing, and Urban Affairs, it prohibits interstate State branch banking by foreign banks unless: First, the State branch's operation is approved by the bank regulatory authority of the State in which the State branch is to operate and second, the foreign bank agrees to take only those deposits which an Edge Act corporation is permitted to take. In addition, the Senate committee version grandfathers foreign branch banks which commenced lawful operations or for which an application to commence business had been lawfully filed with the appropriate State or Federal authority on or before July 26, 1978.

I know of at least one example, in my home State of Pennsylvania, where this arbitrary date—fixed to coincide with the date on which we happened to markup this bill, rather than the day that we were scheduled to complete markup—will by 1 day's time deprive a foreign branch bank of its ability to do business in as fully a manner as it might have if we had fixed a more rational cutoff date.

The application of the foreign branch to which I have referred was received in the Commonwealth's Banking Department in Harrisburg on July 27, 1978, the date that markup was scheduled to be completed. The actual committee markup date is too arbitrary a grandfather date for the cutoff on this section, especially when it is realized that the Committee markup might just as easily have been completed, as scheduled, a day later, on July 27, 1978.●

The PRESIDING OFFICER. The bill is open to further amendment. If there is no further amendment to be offered, the question is on the engrossment of the amendment and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 10899), as amended, was read the third time and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McINTYRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, may we proceed to the next order, please?

COLLEGE OPPORTUNITY ACT OF 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of Calendar Order 585, S. 2539, which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 2539) to amend the Higher Education Act of 1965 to improve the basic educational opportunity grants program and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Human Resources with amendments as follows:

On page 2, line 3, strike "14" and insert "10.5";

On page 2, line 6, after "411(b)(5)" insert "(B)";

On page 2, line 7, strike "subparagraph (B)";

On page 2, line 8, strike "$600,000,000" and insert "$500,000,000";

On page 2, beginning with line 9, insert the following:

(c)(1) Section 411(b)(5)(A) of that Act is amended by striking out "$130,093,000" and inserting in lieu thereof "$370,000,000 for the fiscal year 1979, and $450,000,000 for the fiscal year 1980, and thereafter".

(2) Section 413(b)(1) of that Act is amended by striking out "and for each of the succeeding fiscal years ending prior to October 1, 1979" and inserting in lieu thereof the following: "and for each of the five succeeding fiscal years, and $250,000,000 for the fiscal year ending September 30, 1979".

(d) Section 415(b)(4) is amended by inserting before the semicolon at the end thereof a comma and the following: "except in any State in which participation of nonprofit institutions of higher education is in violation of the Constitution of the State".

On page 3, beginning with line 21, insert the following:

(f)(1) Section 425(a)(1)(A) of that Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

On page 3, line 24, strike "(f)" and insert "(2)";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled, That this Act may be cited as the "College Opportunity Act of 1978".

SEC. 2. (a) Section 411(a)(3)(B) of the Higher Education Act of 1965 is amended by adding at the end thereof the following new division:

"(iv) Beginning with the academic year 1979–1980 and thereafter, in determing the expected family contribution under this subparagraph no rate in excess of 10.5 per centum shall be applied to parental discretionary income.".

(b) Section 411(b)(5)(B) of that Act is amended by striking out "$237,400,000" and inserting in lieu thereof "$500,000,000".

(c)(1) Section 411(b)(5)(A) of that Act is amended by striking out "$130,093,000" and inserting in lieu thereof "$370,000,000 for the fiscal year 1979, and $450,000,000 for the fiscal year 1980, and thereafter".

(2) Section 413A(b)(1) of that Act is amended by striking out "and for each of the succeeding fiscal years ending prior to October 1, 1979" and inserting in lieu thereof the following: "and for each of the five succeeding fiscal years, and $250,000,000 for the fiscal year ending September 30, 1979".

(d) Section 415(b)(4) is amended by inserting before the semicolon at the end thereof a comma and the following: "except in any State in which participation of nonprofit institutions of higher education is in violation of the Constitution of the State".

SEC. 3. (a) Section 428(a)(2)(A) of that Act is amended to read as follows:

"(2)(A) Each student qualifying for a portion of an interest payment under paragraph (1) shall have provided to the lender a statement from the eligible institution, at which the student has been accepted for enrollment, or at which he is in attendance in good standing (as determined by such institution), which—

"(i) sets forth such student's estimated cost of attendance, and

"(ii) set forth such student's estimated financial assistance.".

(b) Section 428(a)(2)(B) of that Act is repealed.

(c) Subparagraphs (C) and (D) of section 428(a)(2) of that Act, and all cross references thereto, are redesignated as subparagraphs (B) and (C), respectively.

(d) Section 428(a)(2)(B) of that Act (as redesignated by subsection (c) of this section) is amended by striking out the semicolon at the end of clause (iii) and inserting in lieu thereof a period, and by striking out clause (iv) of such section.

(e) Section 428(a)(9) of that Act is repealed.

(f)(1) Section 425(a)(1)(A) of that Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

(2) Section 423(b)(1)(A)(i) of that Act is amended by striking out "section 428(a)(2)(C)(i)" and inserting in lieu thereof "section 428(a)(2)(B)(i)".

Mr. PELL. Mr. President, I ask unanimous consent that the following members of the staff of the Human Resources Committee be granted the privileges of the floor during the debate and votes on S. 2539, the College Opportunity Act of 1978; Richard Jerue, Jean Frohlicher, David Evans, Alexander Crary, Christine Fruggiero, Stephen Paradise, Franklin Zweig, Sven Groennings, Gregory Fusco, Polly Gault, and Nancy Barrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, the bill now before the Senate is S. 2539, the College Opportunity Act of 1978.

The purpose of this bill can be very simply stated—it is to make college affordable once again for our Nation's middle-income families.

I think all of us here recognize the problems middle-income America is facing in its attempt to secure a college education for her children.

We have seen the efforts made in the last couple of days by the Senate. We have seen a bill just passed, a bill that I believe will be correctly vetoed by the President. So we will still be left trying to find some alternative way to help middle-income families who find themselves pinched to the bone by college costs.

Middle-income families find themselves so pinched, yet, while they are finding it harder and harder to finance their children's college education, they are also finding that they are not eligible for most governmental programs that would assist them in this financing.

We all know the contributions middle-income America makes in our country. These families go through life doing the work of our society, paying the bills of our society, and bearing the brunt of the taxes. Rarely do they seek governmental help. But they need our help now.

If we fail to help middle-income America with the cost of college, we will be allowing the doors of higher education to be slammed shut on a large segment of our society. We will be in danger of creating a system of higher education available only to the rich—who can afford to pay their own way—and to the poor—who are eligible for Federal financial aid.

We cannot let this happen.

If we pass this legislation, Mr. President, we will be taking a giant step toward preventing that occurrence.

S. 2539 is a very simple bill, Mr. President. It does not create any new Federal programs. What it does is build upon the basic building blocks of already existing Federal student aid programs. These programs—the basic educational opportunity grant programs, the supplemental educational opportunity grant programs, college work-study, State student incentive grants, and guaranteed student loans—are already well known to students and parents throughout the country. They are programs which high schools and colleges understand and are able to deal with. S. 2539 takes what we already have and makes it better. I think that is a very worthwhile approach.

I want to also point out that S. 2539 is totally supported by President Carter. It reflects his concerns and beliefs. It focuses aid on students who need our help the most. Eighty-nine percent of the benefits of this bill will go to families with incomes of $25,000 or less. Sixty-four percent of its benefits will go to middle-income families, families with incomes within the $15,000 to $25,000 range. These are the families who need our help the most. These are the families toward whom we should be directing our assistance.

I think two of the provisions of S. 2539 require the most attention. These provisions deal with two important programs, the basic educational opportunity grant programs and the guaranteed student loan program.

With respect to basic grants, this legislation will expand that program so that families with incomes of $25,000, and one child in college, will be eligible for a basic grant of at least $250. Currently, the cutoff point for the basic grant program is approximately $13,000. Above that point, a family is usually not eligible for a basic grant. S. 2539 would significantly reduce the amount a family is expected by the Federal Government to contribute to their child's education under the basic grant program. The result would be that an additional 1.5 million students would be eligible for basic grants. For an average family of four, with one child in college, it would mean the following—with an income of $12,000, a basic grant of almost $1,300; with an income of $15,000, a basic grant of about $1,000; with an income of $21,000, a basic grant of $540; and with an income of $24,000, a basic grant of about $300.

I think from this brief analysis, one can see the merits of the basic grant portion of this legislation. It is need-based. It takes into account a family's relative ability to pay for their child's education. It is sensitive to a family's financial situation. It does not give all familes the same amount, for it recognizes that different families have different needs. I think this is the best approach for any student assistance program.

We make a significant change in the guaranteed student loan program through this legislation. We repeal entirely the unsubsidized portion of the guaranteed loan program. This program is the primary program that is today available to middle-income families to pay for their children's college education. Under this program, the Federal Government will guarantee the college loan that the lender makes. Also, if a family has an adjusted gross income of less than $25,000, the Federal Government will pay the interest on the loan while the student is in college.

President Carter requested that we raise this gross income figure to $40,000 as an attempt to provide more loan assistance to middle-income families. We decided to remove the ceiling completely, since those who would be covered under the President's proposal would represent 98 percent of our Nation's population. We felt that 98 percent of our people should not have to go through the paperwork required to determine their need so that 2 percent of our population could be kept out of the program. By removing the ceiling entirely, which S. 2539 does, we will both help our middle-income families and reduce the paperwork requirements of the guaranteed student loan program.

Mr. President, I would like to point out one other significant feature of this legislation. No additional paperwork will be required by this legislation. This legislation builds upon already existing programs. The forms and procedures of those programs, already in existence and

already familiar to families who send their children to college, will be utilized. No new data items or forms would have to be filled out by parents.

In addition, no new bureaucracy would be required to administer or monitor this legislation. The change made in basic grants would only require a computer change at the Office of Education. Staff to administer and monitor the program are already in place.

Mr. President, I think this bill will represent a very significant step in our efforts to assist middle-income America meet the high costs of college education. It is supported by the President. It is the foundation of his middle-income college assistance efforts. It is a good bill, and I urge that my colleagues act favorably upon it.

I believe the most important point in it is that it does not create a new bureaucracy, a new set of forms, new paperwork. It is a simple program seeking to achieve the objective we all have of helping middle-income America and doing it by building on already tested and proved-successful programs.

Mr. President S. 2539 was reported by the Human Resources Committee on February 28, 1978. Its primary purpose it to make college affordable once again for our Nation's middle-income families.

Mr. President, over the past decade the costs of sending a child to college have skyrocketed. Between 1967 and 1976, the cost of sending a child to an average college has increased by 77 percent.

Today, the average yearly cost of tuition, room, and board at a nonpublic college is $4,800. The equivalent average costs at public institutions is nearly $3,000 a year. And, the prospects of those costs increasing are definite.

If a family has a child, today, who is 1 year old, it is estimated that that family will have to save an average of $1,570 a year so that they will have the funds to pay for 4 years of education at a public university when their child becomes old enough to enter college. If that same family decides they want to send their child to a private college, they will have to save about $2,700 a year.

The projected cost of what 4 years of public college will cost when today's 1-year-old reaches college age is $47,380. For private college, the equivalent figure is $82,830.

These figures are startling. Yet, I think they accurately represent the harsh reality many American families are experiencing in their attempts to secure the American dream of a college education for their children.

I think all of us here today are aware of the fact that many American families are finding it increasingly difficult to pay for a college education for their children. Middle-income families are most severely affected by this development.

These families find themselves pinched to the bone by college costs. Yet, they are the very same families who are not eligible for most of the existing Federal grant and loan programs.

These middle-income families go through life doing the work of our society, pay the bills of our society, and bearing the brunt of the taxes. Rarely do they seek our help. But, they need our help now. If we fail to help them, we will be allowing the doors of higher education to be slammed shut on a large segment of our society. We will be in danger of creating a system of higher education available only to the rich—who can afford to pay their own way—and to the poor—who are eligible for Federal financial aid. We cannot let this happen.

With the passage of this bill, Mr. President, we will be taking a giant step toward preventing that occurrence.

This bill is designed to meet the overwhelming need of that unserved segment of our society, the middle income. S. 2539 builds upon the basic building blocks of already existing Federal student aid programs—basic educational opportunity grants, supplemental educational opportunity grants, college work-study, State student incentive grants, and guaranteed student loans—programs which are already familiar to schools, college, students, and parents across the country.

I must point out that this bill is supported by the President. It reflects the concerns that he expressed that any Federal student aid program provide assistance to those students who need our help the most. Under this bill, 89 percent of the assistance it provides will go to families with incomes of $25,000 or less. Sixty-four percent of the benefits of S. 2539 will go to middle-income families, those with incomes within the $15,000 to $25,000 range. I raise this fact because I think it distinguishes this bill quite clearly from the college tax credit legislation. Under the tax credit bill, 55 percent of the benefits would go to families with incomes in excess of $25,000. In my opinion, these families need our help a lot less than those who are in the $15,000 to $25,000 range.

Let me give you a little example of what S. 2539 will mean to the average family. I shall only consider the basic grants portion of our bill, since it is the major component of our legislation. Under that portion of our bill. a family of four, with one child in college, and an average income of $12,000, would receive a basic grant of almost $1,300. That grant would come at the beginning of the college year, when the family needs the help the most. On the other hand, that same family would receive under the tax credit proposal a credit of only $250, and they would have to wait until the spring of the year following the beginning of college to receive it.

If that same family had an income of $15,000. it could receive a basic grant of approximately $1,000. They would still only receive $250 under tax credits.

That same family at $21.000 would receive a basic grant of $540. Under the tax credit, again, they would only receive $250.

At $24.000. that family would receive a basic grant of about $300. Under the tax credit, they would receive $250.

I think from this brief analysis, one can see the merits to the legislation now before us. It is need-based. It takes into account a family's relative ability to pay for their child's education. It is sensitive to a family's financial situation, and it considers the large variations in the costs of attending different schools. Tax credits, on the other hand, are flat grants, with the same amount going to each family. I think the approach of S. 2539 is far preferable.

Now, I should like to briefly explain the principal features of this bill. The largest item in the bill would amend the basic educational opportunity grant program. This program was originally enacted in 1972. The guiding principle behind basic grants is that the student is the consumer. He or she takes their basic grant eligibility to the institution of his or her choice and has their basic grant award applied to the cost of that particular college. A student is not at the mercy of the college for student aid, but is able to choose himself.

Section 2(a) of this legislation amends the basic grant program. It provides that, beginning with the academic year 1979–80 and thereafter, the Commissioner of Education may apply a rate no higher than 10.5 percent in determining a family's expected contribution from parental discretionary income under the basic grant program. Currently, the rate applied is 20 percent of the first $5,000 of parental discretionary income and 30 percent of any excess. The change made by this legislation would add approximately 1.5 million students as being eligible for basic grants. It would cost approximately $1.2 billion over the current level of $2,054 million. Under this legislation, a family of four, with one child in college, no unusual expenses, and an annual income of $25,000, would be eligible for a basic grant of approximately $250. A family with a smaller income, more children in college, and a different family circumstance, would receive a larger grant This legislation would provide a new and much needed middle-income focus to the basic educational opportunity grant program.

Subsection 2(b)—College work-study: This section increases from $237,400,000 to $500 million the minimum amount which must be appropriated for the college work-study program before funds may be made available under the basic grant program. The college work-study program pays 80 percent of a student's salary for a part-time job for his or her institution of higher education or other nonprofit organization.

Subsection 2(c)—Supplemental educational opportunity grants: This section increases the mandatory minimum funding for the supplemental educational opportunity grant program from $130,093,000 to $370 million for fiscal year 1979 and to $450 million for fiscal year 1980 and thereafter. These levels, again, must be met before funds can be made available for basic grants. The section also increases the authorization for initial year supplemental grants—those available to first year students—from $200 million to $250 million. Supplemental educational opportunity grants are intended to supplement the basic grant program, providing grants to qualified students of exceptional financial need,

and allowing student financial-aid officers to make available additional grant assistance to students in special circumstances which the basic grant program is unable to measure. Grant size, based on the student's need as determined by the higher educational institution, ranges from $200 to a maximum of $1,500 for an academic year, or one-half of the total of financial aid provided to the student by the institution, whichever is the lesser amount.

Subsection 2(d) State student incentive grants: This section makes a technical amendment to the State student incentive grant program to allow continued participation in that program of States which have constitutional prohibitions against participation of nonprofit institutions of higher education in State grant programs. Under the State student incentive grant program, the Federal Government provides grants to States on a 1-to-1 matching basis, to assist them in providing individual grants, based on financial need, to undergraduate students attending institutions of higher education.

Section 3—Guaranteed student loans: This section repeals the unsubsidized portion of the guaranteed student loan program, making students eligible for a subsidy of interest on their loans during their in-school period, regardless of their families' income. For more than a decade, the guaranteed student loan program has been the primary program available to middle-income families to finance their children's education. Yet, even these loans have not always been easy to get.

Until 1976, only families with adjusted gross incomes of less than $15,000 per year were eligible for subsidized guaranteed loans, the subsidy meaning that the Federal Government paid the student's 7 percent interest charge during the period the student was in school. Above the $15,000 income level, families were theoretically eligible to receive federally guaranteed loans without the interest subsidy for the in-school period.

These loans were all too often unavailable, however, as they were unattractive to lenders. Subsidized loans in a lender's portfolio could have all interest subsidies billed as a single item to the Federal Government. Each unsubsidized loan meant that a lender would have to undertake the paperwork necessary to collect interest from the borrower on a monthly or quarterly basis. Given the size of the loans—about $1,000 on the average—and the rate of return—7 percent—many lenders simply refused to make unsubsidized loans.

In 1976, Congress recognized that the $15,000 adjusted gross income level for an interest subsidy was far too low and raised that level to an adjusted gross income of $25,000.

The President, on February 8, 1978, proposed to raise this ceiling to an adjusted gross income of $40,000. Since those who would be covered by the revision proposed by the President would make up 98 percent of our Nation's population, it was decided to remove the ceiling completely. This legislation does not.

Mr. President, in my opinion, S. 2539 is the best approach to help our Nation's middle-income families with the high costs of college. It provides assistance to the families who need our help the most. With its passage, college will be affordable once again for all Americans. I urge the passage of this important legislation.

I wish some amendments might be called up, if there are any.

Mr. BAKER. Will the Senator yield to me briefly?

Mr. PELL. I yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I might say to the distinguished managers of the bill on both sides of the aisle, as well to the distinguished majority leader, that I have done a canvass on this side since all amendments appear to be on my side of the aisle, but none of them appeared to be ready at this moment.

So while I had hoped we could call up an amendment and at least make it the pending question for the morning, that does not appear possible at this time.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. PELL. I yield.

Mr. ROBERT C. BYRD. Mr. President, I want to thank the minority leader for the efforts he has put forth to locate Senators who indicated they would be calling up amendments. He has tried to locate them. They, understandably, cannot be located at this hour of 9:35 p.m. I thank him and we will just hope they will not call them up tomorrow.

I yield.

Mr. STAFFORD. Mr. President, I understand the Senator from South Carolina would like 5 seconds. I am glad to yield him 10 seconds.

Mr. THURMOND. Mr. President, I ask unanimous consent that Mr. Lockimer, of my staff, be granted privilege of the floor during consideration of this bill and the vote on it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that no further time be charged against the bill today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS. Mr. President, I support the College Opportunity Act of 1978 and urge my colleagues to view it as an essential and universally applauded effort to provide college access for the children of middle-income families.

This measure builds upon the proven and effective foundation of our national student assistance policy for higher education. The elements in that policy are the basic educational opportunity grant program, the supplemental educational opportunity grant program, the college work study program and the guaranteed student loan program. These programs constitute an organic whole and are depended upon by our citizens. These programs work hand in glove and in combination weave together a basic fabric of educational access and opportunity for those pursuing higher education. Together, they make giant strides in assuring college for our citizens who have the motivation and capability of improving their knowledge, their skills and the Nation's quality of life.

The bill as reported from the Committee on Human Resources would expand the basic grants program to assure educational opportunity for an additional 1.5 million students from middle-income families. It would promote attendance at the more expensive colleges and universities for lower- and middle-income persons by expanding in two installments the supplemental opportunity grant program. It would add another 280,000 students from middle-income families who combine earning and learning in higher education. It would remove the cap from the guaranteed student loan program and permit any qualified family or person to borrow from private lenders funds for education which would be amortised and repaid through the private loan market with 100 percent payment guarantees by the Federal Government.

The total cost of these improvements and extensions to our middle-income families is $1.46 billion in authorized funds. The entire package is arranged and orchestrated to provide balance and coverage for middle-income persons, those families earning between $15,000 and $25,000 a year after taxes and major, essential expenses. The components have been established and linked to provide economic assistance to families, economic stimulus for the economy and financial stability for our higher education policy.

For example, while increased grant would cost the Treasury $1.2 billion, enhanced tax returns of graduated students will be leveraged by such expenditures. Moreover, the stimulus given to the private loan market through the guaranteed student loan program builds capital availability for education in the private sector and comprises a source of risk-free investment for qualified lenders. This federally generated economic stimulus is multiplied many times over by State education loan and grant programs now operated in almost every State in the Nation. Thus, our Federal investment yields important economic and human resources returns.

The package presented in S. 2539 has been endorsed by virtually every responsible spokesperson for higher education. It has been endorsed, by the administration which has emphasized the importance of higher education expenditures within a long-term perspective of fiscal constraint.

Recent actions of the Appropriations Committee in maintaining previous levels of spending for these programs may defer our ability to implement a middle-income package by 1979. That committee has preferred to wait until this body has acted and looks toward a supplemental appropriation for middle-income college assistance if the Congress enacts this measure. I am confident that the Appropriations Committee will view such a supplemental appropriation favorably and I urge the Senate's favorable action of this measure.

In conclusion, Mr. President, the bill before us, S. 2539, the College Oppor-

tunity Act of 1978, presents an excellent means for the Senate to provide essential assistance to middle-income families based on our proven higher education policies and programs.

PAYING COLLEGE COSTS—A SOUND ALTERNATIVE

Mr. JAVITS. Mr. President, today I join with our colleague, the distinguished chairman of the Subcommittee on Education, Arts, and Humanities, in bringing to the Senate legislation to amend the basic educational opportunity grants and the guaranteed student loan programs. I believe this legislation is a preferred alternative to an untargeted tax credit available regardless of financial circumstances. In my opening statement on tuition tax credits, I detailed my reasons in support of S. 2539 and opposition to H.R. 12050.

Mr. President, I believe that this bill gives us the very viable, feasible, and wise alternative to the bill which was just adopted, the tuition tax credit. I have stated my reasons for opposing a tuition tax credit for some years. My reasons are fully detailed in the debate which I inserted respecting the bill just passed.

Mr. President, my reasons are: First, that the tuition tax credit does not give consideration to the financial needs of a family—it gives benefits where they really are not needed when we consider the needs of others; second, the incentive provided simply will cause most colleges and universities to lift their tuition fees, making the taxpayer no better off than he is now; and third, the cost is very much higher than the cost of building up and fortifying the basic educational opportunity grants, as done in S. 2539.

We are definitely moving aid up into the middle class, which is the whole claim for the tuition tax credit the opportunity for basic educational opportunity grants.

We adopted in the Human Resources Committee, and I am a ranking member and I have been for some years, the principle that we would equip the student with the ability to shop around seeking what he considered to be best in terms of his own education. We believe that this would have the healthiest effect upon the higher education system of the United States.

I still believe that principle to be valid. The bill which Senator PELL and I, and Senator STAFFORD, are submitting here follows that principle. It is for that reason that I voted against the tuition tax credit. I deeply believe this bill is much to preferred as a course for higher education and as a cost of financial soundness in this country.

The bill under consideration today provides that an individual family at the $25,000 annual income level will receive approximately the same level of benefit in the form of a basic grant, $250 per year. Families with lesser financial resources will receive proportionately greater benefits. If enacted, this proposal can be implemented quickly, because it requires only an adjustment in the existing and highly successful Basic Educational Opportunity Grant program. Because the benefits are not available to everyone, colleges will be constrained from tuition increases. The benefits will accrue to individuals based on their economic need and the cost of the education which they choose. Students who have higher costs because they have chosen a nonpublic college will receive proportionately greater assistance. In the present price structure of higher education, this seems a reasonable approach.

Mr. President, I fear that the long debate over tax credits has obscured the understanding of S. 2539. I believe that many Senators are not familiar with its provisions. It is a simple bill to expand two highly successful programs—the Basic Educational Opportunity Grants Program, BEOG—also known as Pell grants—and the Guaranteed Student Loan Program, GSLP. The major provisions of S. 2539 can be summarized as follows:

The basic educational opportunity grant program would be amended under this bill so that the benefits of that program will become available to middle-income families. The current breakpoint for the basic grant program for an average family of four with one child in college is approximately $13,000. If a family has a larger income than $13,000, it most likely would not be eligible for a basic grant under the existing program. S. 2539 would change that, thus making the same average family eligible for a basic grant of $250 if it has an income of $25,000. Its basic grant would be larger if it had a smaller income.

The guaranteed student loan program would be amended to eliminate the income limit on interest-subsidized guaranteed loans. Currently, families with adjusted gross incomes of $25,000 or less are eligible to have the interest on their guaranteed loans paid by the Government while their child is still in college. President Carter has requested that the income ceiling be raised to $40,000. This would make approximately 98 percent of the population eligible for this subsidy. Since only 2 percent of the population would not be covered, and since a great deal of paperwork would be required to perform a needs analysis for the 98 percent that would be eligible, S. 2539 would remove the income ceiling completely.

Under the revisions made by the committee, H.R. 12050 no longer overlaps with the BEOG program. I believe that the tuition tax credit bill may be vetoed and may not become law. But if it does become law, either this year or in the future, it is important to realize that there can be no "double dipping" with a single individual receiving both a tuition tax credit and a BEOG. This underscores the need for S. 2539, regardless of the final disposition of the tax credit issue.

Mr. President, unlike tax credits, the provisions of S. 2539 have the support of the administration, which proposed a similar approach and has requested full funding for fiscal year 1979. Unlike tax credits, S. 2539 enjoys broad support among the higher education leadership in our country. I ask unanimous consent that the letter of support for S. 2539 from nine leading higher education associations be printed at the conclusion of my remarks.

Regarding costs, I believe we must look at three aspects: the annual costs of S. 2539 compared to tax credits; the distribution of funds by income group; and the ability to review annually the Federal assistance in education. The Congressional Budget Office estimates that S. 2539 will cost $1.464 billion in fiscal year 1979 and $1.630 billion in fiscal year 1983. The estimates for tax credits begin with only $667 million in fiscal year 1979 because it would not then be fully implemented, but rise to $2.88 billion in fiscal year 1983. When fully in effect, the tax credits would cost almost twice as much as S. 2539, and most importantly, not be subject to annual review.

The Senate has on several occasions passed college tuition tax credit measures, although none has become law. The President has clearly stated his opposition to tax credits and his firm intention to veto any tuition tax credit measure sent to him. I believe that if we are to provide tuition relief to middle-income families, we must pass S. 2539 and also provide the necessary funds to implement its provisions. I have not supported tax credit proposals because of the reasons I have already given. I very much hope that my colleagues will support this alternative as a much better approach.

May I say finally, Mr. President, there are millions of dollars which we are dealing with in the budget. These cuts of $100 million or $50 million or $10 million which we spend infinite time on people may pride themselves on feeling that they are great economizers, do not begin to measure up. You have to have 50 of them to equal what is at stake here.

For all of those reasons, Mr. President, I commend the bill to the Senate and hope the Senate will pass it.

I yield to my colleague from Vermont, if Senator PELL will indulge us, who wishes to put some remarks into the record, to follow the remarks which I have made, which will follow those of Senator PELL.

Mr. STAFFORD. Mr. President, I join in what my distinguished colleague, the senior Senator from New York (Mr. JAVITS) has said.

Mr. President, I wish to express my support for S. 2539, the College Opportunity Act. Its purpose coincides with that stated by most Members of this body. It is to reduce the financial strain upon middle-income families with children in college. The main effect of this bill would be to increase the participation of students from middle-income families in the basic grant program.

More than 6 years ago, as a new member of our Education Subcommittee, I supported the effort that established the program of basic educational opportunity grants. This program now aids more than 2 million young Americans. It gives them the chance to go to virtually any college where they qualify for admission, regardless of poor economic circumstance. Because the assistance is based on need, which is of course related to educational cost, it effectively provides freedom of choice, enabling students to attend the institutions which can best fulfill their aspirations. This program has been an enormous success in provid-

ing opportunity to our young people. More students from poor families have been able to continue their education beyond high school than ever before in our history.

However, as is well known, increasing college costs, which now total $2,000 to $7,000 per year, have created extraordinary burdens for many middle-income families. Probably all of us have received many letters of concern. I wish to offer the perspective that just as it was unfair to deny the opportunity for college education to the poor, it is unfair to compel the sons and daughters of middle-income Americans to lower their educational sights solely for economic reasons. It makes sense to safeguard their opportunities.

It also makes sense to utilize the present mechanism to provide assistance to middle-income students. It is successful. It is based on the right principles for our public policy. It is well established and well understood. It requires no new bureaucracy and no new types of forms or data items. The aid goes directly to the student when he or she needs it at the beginning of the school year. It provides no incentive for colleges and universities to increase their tuition.

The bill eases the requirements of the present law with regard to parental discretionary income. It requires that parental discretionary income not be assessed in excess of 10.5 percent in determining eligibility for grants, effective 1979–80. The mechanical effect is to change the computer's calculations of families' ability to pay. The impact is that Federal grants would be available to help pay the educational costs of a student from a family with an annual income of up to approximately $25,000, and nearly one and a half million additional students would be served.

This bill also builds upon another advantage of the present law; namely the flexibility of being able to create combinations of different kinds of assistance to meet the differing needs of individual students. It would increase authorized funding for the college work-study program in order to help provide work opportunities for additional students from middle-income families especially. It also would increase authorized funding for supplemental opportunity grants, with the anticipated effect of providing grants to some 180,000 additional students from middle-income families. These would complement the States' student grant programs, which are on a one-to-one matching basis with Federal funding.

Finally, it would expand the guaranteed loan program, which has been the main program available to middle-income families to finance their children's education. These are subsidized loans. The Federal Government pays the interest charge during the years of study. The family-income ceiling for eligibility for a subsidized loan is currently an adjusted gross income of $25,000. Today that ceiling is too low, especially in light of our proposal to extend eligibility for minimum grants to that level. The present administration, which supports S. 2539, proposed increasing that figure to $40,000, which equals a net income of approximately $47,500. As this ceiling would cover 98 percent of the population, and as it would not be sensible to submit that huge majority to a needs test in order to keep the other 2 percent from getting subsidized loans, the Committee on Human Resources voted to lift all income ceilings on subsidized loans. That decision will save a lot of paperwork. That saving is a trade-off against the relatively few loan subsidies which would go to the relatively affluent. On balance, this is a sensible trade-off. No members of the Human Resources Committee had difficulty accepting the concept of lifting the income ceiling for this program completely.

During the last year I have received letters from numerous professional associations in the field of higher education as well as from leaders of numerous colleges and universities. Every one of them has favored this bill and preferred this approach to any other approach for providing relief from the burdens of college expenses. Confirmation of their analysis is to be found in the college board's just-published report entitled "Middle-Income Students: A New Target for Federal Aid?" It says:

> The proportion of new benefits going to middle-income ($15,000 to $25,000) families under the student-aid proposals would be nearly twice that of any of the tax-credit bills, which provide a disproportionate share of assistance to families with incomes above $25,000.

Finally I would like to cite the new public opinion poll by the Roper Organization which was released at the end of July and showed that, by a margin of more than 3:1, people prefer grants and loans to tuition tax credits as the means to help students from middle-income families meet college expenses.

Mr. President, with my fellow members of the Committee on Human Resources and with the overwhelming support of the higher education community, I wish to recommend this measure very positively to my colleagues. It is the logical and needed next step in our long quest to provide equality of educational opportunity to the sons and daughters of all Americans.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business with Senators allowed to speak for up to 3 minutes therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a withdrawal, which were referred to the appropriate committees.

(The nominations and withdrawal received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

HOUSE JOINT RESOLUTIONS SIGNED

At 9:33 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

H.J. Res. 682. A joint resolution to provide for the designation of a week as "National Lupus Week";

H.J. Res. 946. A joint resolution to designate October 7, 1978, as "National Guard Day"; and

H.J. Res. 963. A joint resolution designating July 18, 1979, as "National P.O.W.–M.I.A. Recognition Day".

The enrolled joint resolutions were subsequently signed by the Acting President pro tempore (Mr. MORGAN).

At 12:31 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the House disagrees to the amendments of the Senate to H.R. 13468, an act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. NATCHER, Mr. GIAIMO, Mr. MCKAY, Mrs. BURKE of California, Mr. CHARLES WILSON of Texas, Mr. BENJAMIN, Mr. MAHON, Mr. BURGENER, Mr. KEMP, and Mr. CEDERBERG were appointed managers of the conference on the part of the House.

The message also announced that the House has passed the following bills, without amendment:

S. 405. An act for the relief of Chong Cha Williams; and

S. 1335. An act for the relief of Chin Myong Yo Purdom, also known as Myong Yo Sin.

ENROLLED BILL SIGNED

At 6:30 p.m., a message from the House of Representatives delivered by Mr. Hackney, announced that the Speaker has signed the following enrolled bill:

H.R. 10732. An act to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal year 1979, to provide for the regulation of foreign fish processing vessels in the fishery conservation zone, and for other purposes.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. MORGAN).

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–4140. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on

rescissions and deferrals, August 1978; to the Committee on Agriculture, Nutrition, and Forestry, the Committee on Appropriations, the Committee on Armed Services, the Committee on Banking, Housing, and Urban Affairs, the Committee on the Budget, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Finance, the Committee on Foreign Relations, the Committee on Governmental Affairs, the Committee on Human Resources, and the Committee on the Judiciary, jointly, pursuant to order of January 30, 1975.

EC–4141. A communication from the Assistant Secretary of Defense, reporting, pursuant to law, the intent to obligate $73.5 thousand of funds available in the Marine Corps Stock Fund and $11.0 million in the Army Stock Fund for war reserve stocks; to the Committee on Appropriations.

EC–4142. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to Israel for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4143. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to Spain for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4144. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, concerning 10 construction projects to be undertaken by the U.S. Army Reserve; to the Committee on Armed Services.

EC–4145. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to the Republic of China for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4146. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army proposed Letter of Offer to the Republic of China for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4147. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to Iran for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4148. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Navy's proposed Letter of Offer to Iran for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4149. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to Korea for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4150. A communication from the Director, Defense Security Assistance Agency, reporting, pursuant to law, concerning the Department of the Army's proposed Letter of Offer to Thailand for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4151. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, a report on real and personal property of the Department of Defense, as of September 30, 1977; to the Committee on Armed Services.

EC–4152. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, on 2 construction projects to be undertaken by the Army National Guard; to the Committee on Armed Services.

EC–4153. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

EC–4154. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

EC–4155. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of a certain naval vessel, and for other purposes; to the Committee on Armed Services.

EC–4156. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to approve the sale of certain naval vessels, and for other purposes; to the Committee on Armed Services.

EC–4157. A communication from the Secretary of Commerce, transmitting, pursuant to law, the annual report of the Secretary of Commerce for the fiscal year ended September 30, 1977; to the Committee on Commerce, Science, and Transportation.

EC–4158. A communication from the General Counsel, Department of Energy, reporting, pursuant to law, notice of a meeting related to the International Energy Program; to the Committee on Energy and Natural Resources.

EC–4159. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed contract with IRT Corporation, San Diego, Calif., for a research project entitled "Development of an Ion Implantation System for Surface Alloying"; to the Committee on Energy and Natural Resources.

EC–4160. A communication from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed contract with Eagle Crusher Co., Galion, Ohio, for a research project entitled "Portable Crusher For Underground Mining Applications: Phase II—Construction and Testing and Phase III—Production Test in Underground Mine"; to the Committee on Energy and Natural Resources.

EC–4161. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report of changes in the market shares of the statutory categories of retail gasoline marketers; to the Committee on Energy and Natural Resources.

EC–4162. A communication from the Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, a report of changes in the market shares of the statutory categories of refined petroleum products; to the Committee on Energy and Natural Resources.

EC–4163. A communication from the Secretary of Agriculture, transmitting, pursuant to law, a study report on the Great Bear Wilderness Study Area in the Flathead and the Lewis and Clark National Forests in Montana, a final environmental statement, and a draft of proposed legislation to designate the Great Bear Wilderness, Flathead National Forest, and enlarge the Bob Marshall Wilderness, Flathead and Lewis and Clark National Forests, State of Montana; to the Committee on Energy and Natural Resources.

EC–4189. A communication from the Principal Deputy Under Secretary of Defense (Research and Engineering), transmitting, pursuant to law, a report on procurement from small and other business firms for October 1977–December 1977; to the Select Committee on Small Business.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions and memorials, which were referred as indicated:

POM–774. A resolution adopted by the Better Roads and Transportation Council, Denver, Colo., regarding highway/transit funding legislation; to the Committee on Commerce, Science, and Transportation.

POM–775. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on Energy and Natural Resources:

"RESOLUTION No. 347

"Be it *resolved* by the Legislature of the territory of Guam:

"Whereas, in Public Law 86–664, the United States granted to the territory of Guam the areas known as the Paseo de Susana and Agana Boat Basin; and

"Whereas, use of this land was restricted for 'civic, park and recreational purposes'; and

"Whereas, the territory, in an effort to become more self-sufficient, has encouraged the development of agricultural and small fishing industires on the island; and

"Whereas, the only feasible location for certain facility of benefit to recreational boatsmen and small commercial fishermen is within the restricted land; and

"Whereas, presently, a very hazardous situation exists because small boatsmen must carry fuel on the most heavily traveled highway in Guam to the Basin and fuel their boats from containers rather than at a fuel station; and

"Whereas, it is feared that continuation of this practice necessitated by the lack of a fuel station could result in a disastrous explosion; and

"Whereas, the land proposed for use of the boatsmen has disintegrated into a 'junk yard' for the storage of abandoned hulls and boats; and

"Whereas, the Guam Fishermen's Cooperative Association has proposed the construction of a facility for use by all small boatsmen which would include a fueling center, a cold storage plant and ice plant, an easy loader, a scale platform and a headquarters building for the Guam Fishermen's Co-Op; and

"Whereas, this facility could be used by recreational boatsmen as well as fishermen; and

"Whereas, construction of this facility is compatible with the original intent that the area be for recreational and civic purposes because the only use of the Agana Boat Basin is for recreational boating and small commercial fishermen whose boats do not exceed forty feet; and

"Whereas, the government proposes to lease an area not to exceed one acre to the Guam Fishermen's Cooperative Association; and

"Whereas, the initiative and self-sustaining effort of the Guam Fishermen's Co-Op is applauded in Guam; now, therefore, be it

"*Resolved*, that the Fourteenth Guam Legislature, on behalf of the people of Guam, respectfully requests the United States Congress to amend Public Law 86–664 to provide for use of a portion of the land granted to the territory of Guam for construction of the proposed facility; and be it further

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Speaker of the United States House of Representatives; to the President of the Senate; to Congressman Philip Burton; to Congressman Antonio B. Won Pat; to the Secretary of Interior; to the Director, Office of Territories; to the Guam Department of Parks and Recreation; to the Guam Fishermen's Cooperative Association; to the Chairman, Economic Adjustment Committee and to the Governor of Guam."

POM–776. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on the Judiciary:

"HOUSE CONCURRENT RESOLUTION No. 13

"Whereas, The overwhelming endorsement by California voters of Proposition 13 has spurred a nationwide taxpayer's revolt against high taxes and excessive government spending; and

"Whereas, While numerous local governments and states, including Texas, are sincerely responding to citizen demands for tax limitations coupled with responsible spending, the federal government, where budget restraint is most needed, has reacted to the message of Proposition 13 in a halfhearted and disappointing manner; and

"Whereas, The federal budget is increasing at an alarming rate, several times that of inflation, as seen by a 140 percent increase since 1970; and
